### **Understanding Nicholson Baker** Arthur Michael

Saltzman, 1999 Lauded by Vanity Fair as the best writer of our generation, Nicholson Baker has earned a complex and controversial reputation among contemporary American authors. In addition to being celebrated as a prose miniaturist for such works as *The Mezzanine* and *Room Temperature*, Baker is known for highly erotic works such as *Vox* and *The Fermata*. In *Understanding Nicholson Baker*, Arthur Saltzman engages these provocative fictions as well as Baker's nonfiction to show how his seemingly disparate works derive from and demonstrate an unrelenting zeal for explicit detail, along with descriptive obsessiveness and linguistic virtuosity.

### **How the New Deal Built Florida Tourism** David J.

Nelson, 2019-04-11 Florida Historical Society Rembert Patrick Award Florida Book Awards, Silver Medal for Florida Nonfiction Countering the conventional narrative that Florida's tourism industry suffered during the Great Depression, this book shows that the 1930s were, in reality, the starting point for much that characterizes modern Florida's tourism. David Nelson argues that state and federal government programs designed to reboot the economy during this decade are crucial to understanding the state today. Nelson examines the impact of three connected initiatives—the federal New Deal, its Civilian Conservation Corps program (CCC), and the CCC's creation of the Florida Park Service. He reveals that the CCC designed state parks to reinforce the popular image of Florida as a tropical, exotic, and safe paradise. The CCC often removed native flora and fauna, introduced exotic species, and created artificial landscapes that were then presented as natural. Nelson discusses how Florida business leaders benefitted from federally funded development and the ways residents and business owners rejected or supported the commercialization and shifting cultural identity of their state. A detailed look at a unique era in which the state

government sponsored the tourism industry, helped commodify natural resources, and boosted mythical ideas of the “Real Florida” that endure today, this book makes the case that the creation of the Florida Park Service is the story of modern Florida.

Collett Leventhorpe, the English Confederate J. Timothy Cole,Bradley R. Foley,2014-08-23 This is the story of Collett Leventhorpe (1815-1889), an Englishman and former captain in the 14th Regiment of Foot. Leventhorpe came to North Carolina about 1843, settled there, and later served the Confederacy as a colonel in the 34th and 11th N.C. and brigadier general commanding the Home Guard in eastern North Carolina. Though he trained as a physician at the College of Charleston in the late 1840s, he never practiced and was a restless man, endlessly in search of fortune--before the war in the gold fields of North Carolina and Georgia, and after it in the pursuit of lost estates, art treasures and inventions. But he excelled first and foremost as a Confederate soldier. As a field commander he was never defeated in battle, and his record was marred only by his own rejection of a much deserved but very late promotion to CSA brigadier. He lies buried in the beautiful Happy Valley section of Caldwell County.

**Mobile Communication and Society** Manuel Castells,Mireia Fernandez-Ardevol,Jack Linchuan Qiu,Araba Sey,2009-09-18 How wireless technology is redefining the relationship of communication, technology, and society around the world—in everyday work and life, in youth culture, in politics, and in the developing world. Wireless networks are the fastest growing communications technology in history. Are mobile phones expressions of identity, fashionable gadgets, tools for life—or all of the above? *Mobile Communication and Society* looks at how the possibility of multimodal communication from anywhere to anywhere at any time affects everyday life at home, at work, and at school, and raises broader concerns about politics

and culture both global and local. Drawing on data gathered from around the world, the authors explore who has access to wireless technology, and why, and analyze the patterns of social differentiation seen in unequal access. They explore the social effects of wireless communication—what it means for family life, for example, when everyone is constantly in touch, or for the idea of an office when workers can work anywhere. Is the technological ability to multitask further compressing time in our already hurried existence? The authors consider the rise of a mobile youth culture based on peer-to-peer networks, with its own language of texting, and its own values. They examine the phenomenon of flash mobs, and the possible political implications. And they look at the relationship between communication and development and the possibility that developing countries could leapfrog directly to wireless and satellite technology. This sweeping book—moving easily in its analysis from the United States to China, from Europe to Latin America and Africa—answers the key questions about our transformation into a mobile network society.

**Media, Markets, and Democracy** C. Edwin Baker, 2001-11-05 Government interventions in media markets are often criticized for preventing audiences from getting the media products they want. A free press is often asserted to be essential for democracy. The first point is incorrect and the

second is inadequate as a policy guide. Part I of this book shows that unique aspects of media products prevent markets from providing for audience desires. Part II shows that four prominent, but different, theories of democracy lead to different conceptions of good journalistic practice, media policy, and proper constitutional principles. Part II makes clear that the choice among democratic theories is crucial for understanding what should be meant by free press. Part III explores international free trade in media products. Contrary to the dominant American position, it shows that Parts I and II's economic and democratic theory justify deviations from free trade in media products.

### **Intervention, Ethnic Conflict and State-Building in Iraq**

Michael Rear, 2008-05-06 External intervention by the U.N. and other actors in ethnic conflicts has interfered with the state-building process in post-colonial states. Rear examines the 1991 uprisings in Iraq and demonstrates how this intervention has contributed to the problems with democratization experienced in the post-Saddam era. This timely work will appeal to scholars of International Relations and Middle East studies, as well as those seeking greater insight into the current conflict in Iraq.

### **Conflict and Peace in Central Eurasia** Babak

Rezvani, 2015-01-27 Conflict and Peace in Central Eurasia explains ethnoterritorial conflicts not only by focussing on these conflicts but also by comparing all cases of conflict and coexistence with each other. Aiming at formulating new theories, this study makes use of qualitative comparative analysis (QCA) as well as case studies and statistical analyses.

*Acting White* Stuart Buck, 2010-05-25 Commentators from Bill Cosby to Barack Obama have observed the phenomenon of black schoolchildren accusing studious classmates of acting white. How did this contentious phrase, with roots in Jim Crow-era racial discord, become a part of the schoolyard lexicon, and what does it say about the state of racial identity in the American system of education? The answer, writes Stuart Buck in this frank and

thoroughly researched book, lies in the complex history of desegregation. Although it arose from noble impulses and was to the overall benefit of the nation, racial desegregation was often implemented in a way that was devastating to black communities. It frequently destroyed black schools, reduced the numbers of black principals who could serve as role models, and made school a strange and uncomfortable environment for black children, a place many viewed as quintessentially white. Drawing on research in education, history, and sociology as well as articles, interviews, and personal testimony, Buck reveals the unexpected result of desegregation and suggests practical solutions for making racial identification a positive force in the classroom.

Designing Inclusive Futures P. Langdon, P. John Clarkson, P. Robinson, 2008-03-07 "Designing Inclusive Futures" reflects the need to explore, in a coherent way, the issues and practicalities that lie behind design that is intended to extend our active future lives. This encompasses design for inclusion in daily life at home but also extends to the workplace and for products within these contexts. For example, given trends in employment sector growth, skills requirements, labour supply and demographic change, there is a need to predict the critical areas where individual capabilities are mismatched with the physical, social and organisational demands of work. This mismatch, which can be addressed within the domain of inclusive design, is pervasively linked to real artefacts in workspaces and their intersection with the health factors that relate to ageing. This book is the result of the fourth CWUAAT workshop held in Cambridge, England in April 2008.

*A Surgeon with Custer at the Little Big Horn* James Madison DeWolf, 2017-05-25 In spring 1876 a physician named James Madison DeWolf accepted the assignment of contract surgeon for the Seventh Cavalry, becoming one of three surgeons who accompanied Custer's battalion at the Battle of the Little Big Horn. Killed in the early stages of the battle, he might easily have become a mere footnote in the many chronicles of this epic campaign—but he left behind an eyewitness account in his diary and correspondence. *A Surgeon with Custer at the Little Big Horn* is the first annotated edition of these rare accounts since 1958, and the most complete treatment to date. While researchers have known of DeWolf's diary for many years, few details have surfaced about the man himself. In *A Surgeon with Custer at the Little Big Horn*, Todd E. Harburn bridges this gap, providing a detailed biography of DeWolf as well as extensive editorial insight into his writings. As one of the most highly educated men who traveled with Custer, the surgeon was well equipped to compose articulate descriptions of the 1876 campaign against the Indians, a fateful journey that began for him at Fort Lincoln, Dakota Territory, and ended on the battlefield in eastern Montana Territory. In letters to his beloved wife, Fannie, and in diary entries—reproduced in this volume exactly as he wrote them—DeWolf describes the terrain, weather conditions, and medical needs that he and his companions encountered along the way. After DeWolf's death, his colleague Dr. Henry Porter, who survived the conflict, retrieved his diary and sent it to DeWolf's widow. Later, the DeWolf family donated it to the Little Bighorn Battlefield National Monument. Now available in this accessible and fully annotated format, the diary, along with the DeWolf's personal correspondence, serves as a unique primary resource for information about the Little Big Horn campaign and medical practices on the western frontier.

The Mental Universe of the English Nonjurors John William Klein,2021-09-21 The Glorious Revolution of 1688, which pushed James II from the throne of England, was not glorious for everyone; in fact, for many, it was a great disaster. Those who had already taken an oath of allegiance to James II and "to his heirs and lawful successors" now pondered how they could take a

second oath to William and Mary. Those who initially refused to swear the oaths were called Nonjurors. In 1691, Archbishop Sancroft, eight bishops, and four hundred clergy of the Church of England, as well as a substantial number of scholars at Oxford and Cambridge, were deprived, removed from their offices and their license to practice removed. The loss of this talent to the realm was incalculable. Ten different paradigms shaped the English Nonjurors' worldview: Passive Obedience was paramount, the Apostolic Succession essential, a Cyprianist mentality colored everything, they held a conscientious regard for oaths, the Usages Controversy brought Tradition to the fore, printing presses replaced lost pulpits, patronage was a means of protection and proliferation, they lived with a hybridized conception of time, creative women spiritual writers complemented male bishops, and a global ecumenical approach to the Orthodox East was visionary. These ten operated synergistically to create an effective tool for the Nonjurors' survival and success in their mission. The Nonjurors' influence, out of all proportion to their size, was due in large measure to this mentality. Their unique circumstances prompted creative thinking, and they were superb in that endeavor. These perspectives constituted the infrastructure of the Nonjurors' world, and they help us to see the early eighteenth century not only as a time of rapid change, but also as an era of persistent older religious mentalities adapted to new circumstances.
