Arguing with Idiots Glenn Beck, Kevin Balfe, 2009-09-22 FUNNY. FRIGHTENING. TRUE. It happens to all of us: You're minding your own business, when some idiot informs you that guns are evil, the Prius will save the planet, or the rich have to finally start paying their fair share of taxes. Just go away! you think to yourself -- but they only become more obnoxious. Your heart rate quickens. You start to sweat. You can't get away. Your only hope is... this book. Glenn Beck, author of the #1 New York Times bestsellers *An Inconvenient Book* and *Glenn Beck's Common Sense*, has stumbled upon the secret formula to winning arguments against people with big mouths but small minds: knowing the facts. And this book is full of them. The next time your Idiot Friends tell you how gun control prevents gun violence, you'll tell them all about England's handgun ban (see page 53). When they tell you that we should copy the UK's health-care system, you'll recount the horrifying facts you read on page 244. And the next time an idiot tells you that vegetable prices will skyrocket without illegal workers, you'll stop saying no, they won't and you'll start saying, actually, eliminating all illegal labor will cause us to spend just \$8 a year more on produce. (See page 139.) Idiots can't be identified through voting records, they can be found only by looking for people who hide behind stereotypes, embrace partisanship, and believe that bumper sticker slogans are a substitute for common sense. If you know someone who fits the bill, then *Arguing with Idiots* will help you silence them once and for all with the ultimate weapon: the truth.

International and Comparative Criminal Justice and Urban Governance Adam

Crawford, 2011-06-02 Criminal justice has traditionally been associated with the nation state, its legitimacy and its authority. The growing internationalisation of crime control raises crucial and complex questions about the future shape of justice and urban governance as these are experienced at local, national and international realms. The emergence of new international justice institutions such as the International Criminal Court, the greater movement of people and goods across national borders and the transfer of criminal justice policies between different jurisdictions all present novel challenges to criminal justice systems as well as our understandings of criminal justice. This volume of essays explores the implications and impact of criminal justice developments in an increasingly globalised world. It offers cutting-edge conceptual contributions from leading international commentators organised around the themes of international criminal justice institutions and practices; comparative penal policies; and international and comparative urban governance and crime control.

Citizen Islam Zeyno Baran, 2011-07-21 Since September 11, Western governments have legitimized and empowered nonviolent Islamists as representatives of Islam for all Muslims in the West, an approach that has worried Muslim moderates. *Citizen Islam* addresses the implications of this approach. The book opens with an overview of the theology and history of Islam, to show that violence and intolerance are not fundamental aspects of the religion. It then explains the growth of Islamism in Europe and in the United States before suggesting that both are finally beginning to recognize the threat posed by nonviolent Islamists. Lastly, it outlines steps that Western and Muslim leaders can take to strengthen moderate Islam and counter the threat of Islamism. Written by Zeyno Baran, a Turkish-born Muslim, *Citizen Islam* sheds a sharp light on Muslim communities in the West. It concludes that there is much that Western governments can still do to reverse the spread of Islamism. But they must act quickly.

Doing Our Bit Murdoch Stephens, 2018-08-17 In 2013, Murdoch Stephens began a

campaign to double New Zealand's refugee quota. Inspired by his time living in Aleppo, Syria, over the next five years he built the campaign into a mainstream national movement – one that contributed to the first growth in New Zealand's refugee quota in thirty years. *Doing Our Bit* is an insider's account of political campaigning in New Zealand. This BWB Text is essential reading for anyone interested in grassroots campaigning or how political change happens in New Zealand.

Law and the Wearing of Religious Symbols Erica Howard, 2013-06-17 Written in accessible language, *Law and the Wearing of Religious Symbols* is a comprehensive analysis of a topical subject that is being widely debated across Europe. The book provides an overview of emerging case law from the European Court of Human Rights as well as from national courts and equality bodies in European countries on the wearing of religious symbols in educational settings. The author persuasively argues that bans on the wearing of religious symbols in educational institutions in Europe constitutes a breach of an individual's human rights and contravenes existing anti-discrimination legislation. The book offers a discussion of developments in Europe, including the French ban on Islamic head scarves which came into force in April 2011. In addition to an in depth examination of recent bans, the book also assesses the arguments used for imposing them as well as the legal claims that can potentially be made to challenge their validity. In doing this, the book will go beyond merely analysing the bans in place to suggest ways in which educational institutions can most fairly respond to requests for accommodation of the wearing of religious symbols and whether perhaps the adoption of other provisions or measures are necessary in order to improve the present situation. This book will be of particular interest to students and academics in the disciplines of law, human rights, political science, sociology and education, but will also be of considerable value to policy makers and educators as well.

Dreaming in Turtle Peter Laufer, 2018-11-20 A fascinating exploration into the world of turtles across the globe; Laufer charts the lore, love, and peril to a beloved species. *Dreaming in Turtle* is a compelling story of a stalwart animal prized from prehistory through to today—an animal threatened by human greed, pragmatism, and rationalization. It stars turtles and shady and heroic human characters both, in settings ranging from luxury redoubts to degraded habitats, during a time when the confluence of easy global trade, limited supply, and inexhaustible demand has accelerated the stress on species. The growth of the middle class in high-population regions like China, where the turtle is particularly valued, feeds this perfect storm into which the turtle finds itself lashed. This is a tale not just of endangered turtles but also one of overall human failings, frailties, and vulnerabilities—all punctuated by optimistic hope for change fueled by dedicated turtle champions.

Food City CJ Lim, 2014-04-16 In *Food City*, a companion piece to *Smartcities* and *Eco-Warriors*, innovative architect and urban designer CJ Lim explores the issue of urban transformation and how the creation, storage and distribution of food has been and can again become a construct for the practice of everyday life. *Food City* investigates the reinstatement of food at the core of national and local governance -- how it can be a driver to restructure employment, education, transport, tax, health, culture, communities, and the justice system, re-evaluating how the city functions as a spatial and political entity. Global in scope, *Food City* first addresses the frameworks of over 25 international cities through the medium of food and how the city is governed. It then provides a case study through drawings, models, and text, exploring how a secondary infrastructure could function as a living environmental and food system operating as a sustainable stratum over the city of London. This case study raises serious questions about the priorities of our governing bodies, using architectural relationships to reframe the spaces of food consumption and production, analyzed through historical precedent, function and form. This study of the

integration of food, architecture, and the development of future cities will both inspire and stimulate professionals and students in the fields of urban design and architecture.

America's Gun Wars Donald J. Campbell, 2019-04-10 This book examines the controversies surrounding gun control, which are less about whether it works and more about whether the nation should prioritize traditional values of rugged independence or newer values of communitarian interdependence. America's Gun Wars contends that an understanding of America's gun controversy cannot be found in statistics documenting the rise (or fall) of violent crime, or in examining trade-offs between societal needs and personal safety, or in following the political maneuvering of advocacy groups such as the National Rifle Association or Everytown for Gun Safety. At heart, the gun controversy is a values conflict involving how people see themselves and how they make sense of the world they live in. Understanding this controversy requires a deep analysis of the profoundly different cultures inhabited by pro- and anti-gun activists, lawmakers, and voters. Written by a social scientist who has spent his life exploring how values and self-perceptions impact behavior, this book explores the origins and evolution of cultures in American society; the beliefs, experiences, and principles that guide the behavior of members in both camps; and the triumphs and failures that the two sides have experienced from colonial times to the present day.

The authors of the book trace Vietnam's labour history, explore the impact of the socialist legacy and examine the reasons for the large number of recent strikes. Jailhouse Journalism James McGrath Morris,2017-07-12 In the 1980s alone, some 100 periodicals were published by and for inmates of America's prisons. Unlike their peers who passed their sentences stamping out licence plates, these convicts spent their days like reporters in any community - looking for the story. Yet their own story, the lengthy history of their unique brand of journalism, remained largely unknown. In this volume James McGrath Morris seeks to address the history of this medium, the lives of the men and women who brought it to life, and the controversies that often surround it.

Policy Success in an Age of Gridlock Lawrence S. Rothenberg,2018-06-27 Since 1990, polarization hindered changing environmental policy statutorily. Yet, in mid-2016 the Lautenberg Act regulating toxics - chemicals employed in commerce - was passed, winning business and environmental support. What might explain this? Has the Trump administration undercut the law's effects? Does the Act's passage portend more progressive actions? We show that the Act was a function of the status quo changing due to regulatory efforts abroad and in the United States, and from outside pressures on business. These influences impacted implementation, with the Trump administration not targeting toxics regulation analogous to other programs. Further, the processes we observe for toxics may not be unique.
