A Dictionary of German-Jewish Surnames Lars Menk, 2005 This dictionary identifies more than 13,000 German-Jewish surnames from the area that was pre-World War I Germany. From Baden-Wuerttemberg in the south to Schleswig-Holstein in the north. From Westfalen in the west to East Prussia in the east. In addition to providing the etymology and variants of each name, it identifies where in the region the name appeared, identifying the town and time period. More than 300 sources were used to compile the book. A chapter provides the Jewish population in many towns in the 19th century.

Oxford's Sedleian Professors of Natural Philosophy Christopher Hollings, Mark McCartney, Senior Lecturer in Mathematics Mark McCartney, 2023-11-16 Established in the early seventeenth century following a bequest to the university by Sir William Sedley, Oxford's Sedleian Professorship of Natural Philosophy is one of the university's oldest professorships. In common with other such positions established around this time, such as the Savilian Professorships of Geometry and Astronomy, for example, its purpose was to provide centrally organised lectures on a specific subject. While the Professorship is now a high-profile research post in applied mathematics, it has previously been held by physicians, an astronomer, and several people in the eighteenth century whose credentials in natural philosophy are much less clear. This edited volume traces the varied history of the chair through the first four centuries of its existence, combining specialised contributions from historians of medicine, of science, of mathematics, and of universities, together with personal reminiscences of some of the more recent holders of the post.

Plate en Politiek S.D. van der Merwe, 2019-07-31 Populere Afrikaanse musiekkunstenaars het sover goed gedoen in post-apartheid Suid-Afrika en geniet die entoesiastiese ondersteuning van lojale volgelinge. Hierdie ondersteuning word aangevuur deur 'n komplekse stel emosies wat verband hou daarmee e;om Afrikaans te weese; in 'n kultureel pluralistiese samelewing. In *Plate en Politiek* ondersoek Van der Merwe die interaksie tussen populere musiek en die ontvouing van 'n Afrikaanse kultuurpolitiek vanaf die begin van die twintigste eeu tot die hede. Dit sluit 'n soektog in na die eerste opgeneemde Afrikaanse lieder en dokumenteer die daaropvolgende fases van musiekontwikkeling wat die agentskap van ordinere mense - kunstenaar en luisteraar - weerspieël teen die agtergrond van fundamentele sosiale en politieke verandering. Dit besin oor beide die musiekhoofstroom en meer alternatiewe musiek, en ontbloot onder andere, historiese voorbeelde van die akkommodering van, en verset teen, die meesternarratief van die Afrikanernasionalistiese ideologie, pogings van kulturele entrepreneurs om beheer uit te oefen oor populere Afrikaanse kultuur, klassespanning, blywende rasse-eksklusiwiteit, protes en sensuur, en die post-apartheid oproeping van Afrikaner nostalgie en wit slagofferskap. Uiteindelik bied *Plate en Politiek* 'n on-onderbroke weergawe van, en 'n kritiese blik op, meer as 'n eeu van opgeneemde Afrikaanse musiek.

On Record Schalk van der Merwe, 2017-07-12 Popular Afrikaans music artists have done well in post-apartheid South Africa and enjoy the enthusiastic support of loyal fans. This support is fuelled by a complex set of emotions linked to e;being Afrikaanse; in a culturally pluralistic society. In *On Record*, van der Merwe investigates the interplay between popular music and the unfolding of Afrikaans culture politics from the start of the twentieth century to the present. It includes a search for the earliest recorded Afrikaans songs and documents subsequent phases of music development that reflect the agency of ordinary individuals - artists and listeners - against a background of fundamental societal and political change. It regards both the music mainstream and the alternative, and reveals, among other things, historical cases of compliance and resistance regarding the master narrative of Afrikaner nationalist ideology, the attempts by cultural entrepreneurs to establish authority over popular Afrikaans culture, class tension, lasting racial exclusivity, protest and censorship, and the post-apartheid invocation of Afrikaner nostalgia and white victimhood. Ultimately, *On Record* provides an uninterrupted account, and a critique, of the entire history of recorded popular Afrikaans music up to the present.

Darwin's Sacred Cause Adrian Desmond, James Moore, 2014-11-11 An “arresting” and deeply personal portrait that “confront[s] the touchy subject of Darwin and race head on” (The New York Times Book Review). It’s difficult to overstate the profound risk Charles Darwin took in publishing his theory of evolution. How and why would a quiet, respectable gentleman, a pillar of his parish, produce one of the most radical ideas in the history of human thought? Drawing on a wealth of manuscripts, family letters, diaries, and even ships’ logs, Adrian Desmond and James Moore have restored the moral missing link to the story of Charles Darwin’s historic achievement. Nineteenth-century apologists for slavery argued that blacks and whites had originated as separate species, with whites created superior. Darwin, however, believed that the races belonged to the same human family. Slavery was therefore a sin, and abolishing it became Darwin’s sacred cause. His theory of evolution gave a common ancestor not only to all races, but to all biological life. This “masterful” book restores the missing moral core of Darwin’s evolutionary universe, providing a completely new account of how he came to his shattering theories about human origins (Publishers Weekly, starred review). It will revolutionize your view of the great naturalist. “An illuminating new book.” —Smithsonian “Compelling . . . Desmond and Moore aptly describe Darwin’s interaction with some of the thorniest social and political issues of the day.” —Wired “This exciting book is sure to create a stir.” —Janet Browne, Aramont Professor of the History of Science, Harvard University, and author of *Charles Darwin: Voyaging*

Political Theologies Hent de Vries, Lawrence Eugene Sullivan, 2006 What has happened to religion in its present manifestations? Containing contributions from distinguished scholars from disciplines, such as: philosophy, political theory, anthropology, classics, and religious studies, this book seeks to address this question.

Religious Freedom in India Goldie Osuri, 2013 Drawing on the critical and theoretical concepts of sovereignty, biopolitics, and necropolitics, this book examines how a normative liberal and secular understanding of India's religious identity is translatable by Hindu nationalists into discrimination and violence against minoritized religious communities. Extending these concepts to an analysis of historical, political and legal genealogies of conversion, the author demonstrates how a concern for sovereignty links past and present anti-conversion campaigns and laws. The book illustrates how sovereignty informs the making of secularism as well as religious difference. The focus on sovereignty sheds light on the manner in which religious difference becomes a point of reference for the religio-secular idioms of Bombay cinema, for legal judgements on communal violence, for human rights organizations, and those seeking justice for communal violence. This wide-ranging examination and discussion of the trajectories of (anti) conversion politics through historical, legal, philosophical, popular cultural, archival and ethnographic material offers a cogent argument for shifting the stakes and rethinking the relationship between sovereignty and religious freedom. The book is a timely contribution to broader theoretical and political discussions of (post) secularism and human rights, and is of interest to students and scholars of postcolonial studies, cultural studies, law, and religious studies.

Virtual Mentoring for Teachers: Online Professional Development Practices Keengwe, Jared, 2012-08-31 A major investment in professional development is necessary to ensure the fundamental success of instructors in technology-integrated classrooms and in online courses. However, while traditional models of professional development rely on face-to-face instruction, online methods are also gaining traction-viable means for faculty development. *Virtual Mentoring for Teachers: Online Professional Development Practices* offers peer-reviewed essays and research

reports contributed by an array of scholars and practitioners in the field of instructional technology and online education. It is organized around two primary themes: professional development models for faculty in online environments and understanding e-Learning and best practices in teaching and learning in online environments. The objective of this scholarship is to highlight research-based online professional development programs and best practices models that have been shown to enhance effective teaching and learning in a variety of environments.

Affluence and Freedom Pierre Charbonnier, 2021-06-22 In this pathbreaking book, Pierre Charbonnier opens up a new intellectual terrain: an environmental history of political ideas. His aim is not to locate the seeds of ecological thought in the history of political ideas as others have done, but rather to show that all political ideas, whether or not they endorse ecological ideals, are informed by a certain conception of our relationship to the Earth and to our environment. The fundamental political categories of modernity were founded on the idea that we could improve on nature, that we could exert a decisive victory over its excesses and claim unlimited access to earthly resources. In this way, modern thinkers imagined a political society of free individuals, equal and prosperous, alongside the development of industry geared towards progress and liberated from the Earth's shackles. Yet this pact between democracy and growth has now been called into question by climate change and the environmental crisis. It is therefore our duty today to rethink political emancipation, bearing in mind that this can no longer draw on the prospect of infinite growth promised by industrial capitalism. Ecology must draw on the power harnessed by nineteenth-century socialism to respond to the massive impact of industrialization, but it must also rethink the imperative to offer protection to society by taking account of the solidarity of social groups and their conditions in a world transformed by climate change. This timely and original work of social and political theory will be of interest to a wide readership in politics, sociology, environmental studies and the social sciences and humanities generally.

The Threat of Race David Theo Goldberg, 2009-02-11 Written by a renowned scholar of critical race theory, *The Threat of Race* explores how the concept of race has been historically produced and how it continues to be articulated, if often denied, in today's world. A major new study of race and racism by a renowned scholar of critical race theory Explores how the concept of race has been historically produced and how it continues to be articulated - if often denied - in today's world Argues that it is the neoliberal society that fuels new forms of racism Surveys race dynamics throughout various regions of the world - from Western and Northern Europe, South Africa and Latin America, and from Israel and Palestine to the United States

Measuring College Learning Responsibly Richard J. Shavelson, 2009-12-17 Accrediting boards, the federal government, and state legislatures are now requiring a greater level of accountability from higher education. However, current accountability practices, including accreditation, No Child Left Behind, and performance reporting are inadequate to the task. If wielded indiscriminately, accountability can actually do more harm than good. This innovative work looks broadly at how accountability is being considered by campuses, accrediting boards, higher education organizations, and governments in the US and abroad. It explores how new demands for accountability and new technologies are changing the way student learning is assessed. The author, one of the most respected assessment researchers in the nation, provides a framework for assessing student learning and discusses historical and contemporary debates in the field. He details new directions in assessment, such as the Collegiate Learning Assessment he helped develop, analyzes exemplary campus assessment programs, and proposes considerations necessary for designing successful accountability systems.

Pushing for Midwives Christa Craven, 2010-10-22 A history of the re-emergence of midwifery in America.

Children with Gender Identity Disorder Simona Giordano, 2013 This book explores the ethical, clinical and legal issues surrounding the care and treatment of children with identity disorder (GID), proposing ways of valuing gender diversity, and stressing the responsibilities that a civil society should have towards trans-youth.

The Student Michael S. Roth, 2023-09-12 From the president of Wesleyan University, an illuminating history of the student, spanning from antiquity to Zoom In this sweeping book, Michael S. Roth narrates a vivid and dynamic history of students, exploring some of the principal models for learning that have developed in very different contexts, from the sixth century BCE to the present. Beginning with the followers of Confucius, Socrates, and Jesus and moving to medieval apprentices, students at Enlightenment centers of learning, and learners enrolled in twenty-first-century universities, he explores how students have been followers, interlocutors, disciples, rebels, and children becoming adults. There are many ways to be a student, Roth argues, but at their core is developing the capacity to think for oneself by learning from others, and thereby finding freedom. In an age of machine learning, this book celebrates the student who develops more than mastery, cultivating curiosity, judgment, creativity, and an ability to keep learning beyond formal schooling. Roth shows how the student throughout history has been someone who interacts dynamically with the world, absorbing its lessons and creatively responding to them.

Between Race and Reason Susan Searls Giroux, 2010-07-28 Inquiring into the future of the university, Susan Giroux finds a paradox at the heart of higher education in the post-civil rights era. Although we think of post-civil rights as representing a colorblind or race transcendent triumphalism in national political discourse, Giroux argues that our present is shaped by persistent raceless racism at home and permanent civilizational war abroad. She sees the university as a primary battleground in this ongoing struggle. As the heir to Enlightenment ideals of civic education, the university should be the institution for the production of an informed and reflective democratic citizenry responsible to and for the civic health of the polity, a privileged site committed to free and equal exchange in the interests of peaceful and democratic coexistence. And yet, says Giroux, historically and currently the university has failed and continues to fail in this role. *Between Race and Reason* engages the work of diverse intellectuals—Friedrich Nietzsche, W. E. B. Du Bois, Michel Foucault, Martin Luther King, Jr., Jacques Derrida and others—who challenge the university's past and present collusion with racism and violence. The book complements recent work done on the politics of higher education that has examined the consequences of university corporatization, militarization, and bureaucratic rationalization by focusing on the ways in which these elements of a broader neoliberal project are also racially prompted and promoted. At the same time, it undertakes to imagine how the university can be reconceived as a uniquely privileged site for critique in the interests of today's urgent imperatives for peace and justice.

Rhetoric's Pragmatism Steven Mailloux, 2017-04-27 For over thirty years, Steven Mailloux has championed and advanced the field of rhetorical hermeneutics, a historically and theoretically informed approach to textual interpretation. This volume collects fourteen of his most recent influential essays on the methodology, plus an interview. Following from the proposition that rhetorical hermeneutics uses rhetoric to practice theory by doing history, this book examines a diverse range of texts from literature, history, law, religion, and cultural studies. Through four sections, Mailloux explores the theoretical writings of Heidegger, Burke, and Rorty, among others; Jesuit educational treatises; and products of popular culture such as Azar Nafisi's *Reading Lolita in Tehran* and *Star Trek: The Next Generation*. In doing so, he shows how rhetorical perspectives and pragmatist traditions work together as two mutually supportive modes of understanding, and he demonstrates how the combination of rhetoric and interpretation works both in theory and in practice. Theoretically, rhetorical hermeneutics can be understood as a form of neopragmatism. Practically, it focuses on the production, circulation, and reception of written and performed communication. A

thought-provoking collection from a preeminent literary critic and rhetorician, Rhetoric's Pragmatism assesses the practice and value of rhetorical hermeneutics today and the directions in which it might head. Scholars and students of rhetoric and communication studies, critical theory, literature, law, religion, and American studies will find Mailloux's arguments enlightening and essential.

Creating the Twentieth Century Vaclav Smil, 2005-08-25 The period between 1867 and 1914 remains the greatest watershed in human history since the emergence of settled agricultural societies: the time when an expansive civilization based on synergy of fuels, science, and technical innovation was born. At its beginnings in the 1870s were dynamite, the telephone, photographic film, and the first light bulbs. Its peak decade - the astonishing 1880s - brought electricity - generating plants, electric motors, steam turbines, the gramophone, cars, aluminum production, air-filled rubber tires, and prestressed concrete. And its post-1900 period saw the first airplanes, tractors, radio signals and plastics, neon lights and assembly line production. This book is a systematic interdisciplinary account of the history of this outpouring of European and American intellect and of its truly epochal consequences. It takes a close look at four fundamental classes of these epoch-making innovations: formation, diffusion, and standardization of electric systems; invention and rapid adoption of internal combustion engines; the unprecedented pace of new chemical syntheses and material substitutions; and the birth of a new information age. These chapters are followed by an evaluation of the lasting impact these advances had on the 20th century, that is, the creation of high-energy societies engaged in mass production aimed at improving standards of living.

Gender Dysphoria and Disorders of Sex Development Baudewijntje P.C. Kreukels, Thomas D. Steensma, Annelou L.C. de Vries, 2013-07-01 This book provides a state of the art review on the care and treatment of and current scientific knowledge on gender dysphoria (GD) and disorders of sex development (DSD). The book elucidates the history, the present situation, and the newest developments and future perspectives in both research on GD and DSD and the clinical management of individuals with GD and DSD of all ages. With contributions from a selection of leading scientists and established clinicians in the field of GD and DSD, this is a unique and comprehensive book focusing on the etiology and developmental trajectories of GD and DSD regarding gender identity development, psychiatric comorbidity, classification dilemmas, ethical dilemmas in treatment, influences of societal stigmatization, and discussion of the medical and psychological implications and outcomes of treatment, and providing treatment guidelines for individuals with GD and DSD (distinct guidelines each for children, adolescents, and adults). By presenting not only an historic overview and the current state of the art, but also challenges for the future, the book aims to demonstrate the need for further research and to stimulate the development and improvement of the clinical care of individuals with GD and DSD.
