**The Tale of Benjamin Bunny** Beatrix Potter, 1986 Peter's mischievous cousin, Benjamin Bunny, persuades him to go back to Mr. McGregor's garden to retrieve the clothes he lost there.

**The 100** Simon Maier, Jeremy Kourdi, 2011-03-01 What are the greatest speeches of all time? Who are the greatest communicators and orators and what made them so successful? And, significantly, what lessons can you learn from the world's greatest influencers and communicators? This book individually profiles 100 powerful speakers and analyses the success factors behind their greatest ever speeches. Bill Clinton, Winston Churchill, Nelson Mandela, Benazir Bhutto, Rudy Giuliani, Jack Welch, Lee Kuan Yew, JF Kennedy, Steve Jobs, Barack Obama – these are some of the great communicators featured in this fascinating book. Even in today's high-tech world, words are as powerful as they have always been, and the way they are used and the results that they achieve remain vital for progress and success at all levels. This book provides unique insights into becoming a skilled orator for today's age. But first Eddie has to survive the jagged netherworld of modern-day Thailand – a corkscrewed realm where big-time drug dealers tango with small-time hustlers, criminals on the 1 am mingle with bureaucrats on the take, and the merely raffish jostle with the downright scary for centre stage in the big leagues of weird. If Eddie can weather all that, maybe he really can find out what happened back in Saigon so long ago, and where those ten tons of money are.

**Graphic Design Discourse** Henry Hongmin Kim, 2018-03-20 If the aim of graphic design is to communicate meaning clearly, there's an irony that the field itself has struggled between two contradictory opposites: rote design resulting from a rigorous, fixed set of rules, and eccentric design that expresses the hand of the artist but fails to communicate with its audience. But what if designers focused on process and critical analysis over visual outcome? Through a carefully selected collection of more than seventy-five seminal texts spanning centuries and bridging the disciplines of art, architecture, design history, philosophy, and cultural theory, *Graphic Design Discourse: Evolving Theories, Ideologies, and Processes of Visual Communication* establishes a new paradigm for graphic design methodologies for the twenty-first century. This illuminating anthology is essential reading for practicing designers, educators, and students trying to understand how to design in a singular, expressive way without forgoing clear and concise visual communication.

**Collective Wisdom** Katerina Cizek, William Uricchio, 2022-11-01 How to co-create—and why: the emergence of media co-creation as a concept and as a practice grounded in equity and justice. Co-creation is everywhere: It's how the internet was built; it generated massive prehistoric rock carvings; it powered the development of vaccines for COVID-19 in record time. Co-creation offers alternatives to the idea of the solitary author privileged by top-down media. But co-creation is easy to miss, as individuals often take credit

for—and profit from—collective forms of authorship, erasing whole cultures and narratives as they do so. *Collective Wisdom* offers the first guide to co-creation as a concept and as a practice, tracing co-creation in a media-making that ranges from collaborative journalism to human–AI partnerships. Why co-create—and why now? The many coauthors, drawing on a remarkable array of professional and personal experience, focus on the radical, sustained practices of co-creating media within communities and with social movements. They explore the urgent need for co-creation across disciplines and organization, and the latest methods for collaborating with nonhuman systems in biology and technology. The idea of “collective intelligence” is not new, and has been applied to such disparate phenomena as decision making by consensus and hived insects. *Collective wisdom* goes further. With conceptual explanation and practical examples, this book shows that co-creation only becomes wise when it is grounded in equity and justice.

**Art as Social Practice** xtine burrough, Judy Walgren, 2022-03-07 With a focus on socially engaged art practices in the twenty-first century, this book explores how artists use their creative practices to raise consciousness, form communities, create change, and bring forth social impact through new technologies and digital practices. Suzanne Lacy’s Foreword and section introduction authors Anne Balsamo, Harrell Fletcher, Natalie Loveless, Karen Moss, and Stephanie Rothenberg present twenty-five in-depth case studies by established and emerging contemporary artists including Kim Abeles,

Christopher Blay, Joseph DeLappe, Mary Beth Heffernan, Chris Johnson, Rebekah Modrak, Praba Pilar, Tabita Rezaire, Sylvain Souklaye, and collaborators Victoria Vesna and Siddharth Ramakrishnan. Artists offer firsthand insight into how they activate methods used in socially engaged art projects from the twentieth century and incorporated new technologies to create twenty-first century, socially engaged, digital art practices. Works highlighted in this book span collaborative image-making, immersive experiences, telematic art, time machines, artificial intelligence, and physical computing. These reflective case studies reveal how the artists collaborate with participants and communities, and have found ways to expand, transform, reimagine, and create new platforms for meaningful exchange in both physical and virtual spaces. An invaluable resource for students and scholars of art, technology, and new media, as well as artists interested in exploring these intersections.

### **Critical Theory ,**

**Digital Critical Editions** Daniel Apollon, Claire Belisle, Philippe Regnier, 2014-07-15 Provocative yet sober, Digital Critical Editions examines how transitioning from print to a digital milieu deeply affects how scholars deal with the work of editing critical texts. On one hand, forces like changing technology and evolving reader expectations lead to the development of specific editorial products, while on the other hand, they threaten traditional forms of knowledge and methods of textual scholarship. Using the

experiences of philologists, text critics, text encoders, scientific editors, and media analysts, Digital Critical Editions ranges from philology in ancient Alexandria to the vision of user-supported online critical editing, from peer-directed texts distributed to a few to community-edited products shaped by the many. The authors discuss the production and accessibility of documents, the emergence of tools used in scholarly work, new editing regimes, and how the readers' expectations evolve as they navigate digital texts. The goal: exploring questions such as, What kind of text is produced? Why is it produced in this particular way? Digital Critical Editions provides digital editors, researchers, readers, and technological actors with insights for addressing disruptions that arise from the clash of traditional and digital cultures, while also offering a practical roadmap for processing traditional texts and collections with today's state-of-the-art editing and research techniques thus addressing readers' new emerging reading habits.

**Images in Law** William Pencak, Ms Anne Wagner, 2013-01-28 What does 'the law' look like? While numerous attempts have been made to examine law and legal action in terms of its language, little has yet been written that considers how visual images of the law influence its interpretation and execution in ways not discernible from written texts. This groundbreaking collection focuses on images in law, featuring contributions that show and discuss the perception of the legal universe on a theoretical basis or when dealing with visual semiotics (dress, ceremony, technology, etc.). It also examines

'language in action', analyzing jury instructions, police directives, and how imagery is used in conjunction with contentious social and political issues within a country, such as the image of family in Ireland or the image of racism in France.

**Media Studies** Paul Long, 2014-07-10 Media Studies: Texts, Production, Context, 2nd Edition is a comprehensive introduction to the various approaches in the field. From outlining what media studies is to encouraging active engagement in research and analysis, this book advocates media study as a participatory process and provides a framework and set of skills to help you develop critical thinking. Updated to reflect the changing media environment, Media Studies retains the highly praised approach and style of the first edition. Key Features: Five sections - media texts and meanings; producing media; media audiences; media and social contexts; historiography - examine approaches to the field including new and web media, traditional print and broadcast media, popular music, computer games, photography, and film. An international perspective allows you to view media in a global context. Examines media audiences as consumers, listeners, readerships and members of communities. Guidance on analytical tools - language, a range of theories and analytical techniques - to give you the confidence to navigate, research and make sense of the field. New for the second edition: New case studies including Google, My Big Fat Gypsy Wedding, the life of a freelance journalist, phone hacking at News International, and collaborative

journalism. 'New Media, New Media Studies' is an additional feature, which brings into focus ways of thinking about new media forms. Media Studies: Texts, Production, Context, 2nd Edition will be essential reading for undergraduate and postgraduate students of media studies, cultural studies, communication studies, film studies, the sociology of the media, popular culture and other related subjects.

Catalonia's Human Towers Mariann Vaczi, 2023-09-05 The building of human towers (castells) is a centuries-old traditional sport where hundreds of men, women, and children gather in Catalan squares to create breathtaking edifices through a feat of collective athleticism. The result is a great spectacle of effort and overcoming, tension and release. Catalonia's Human Towers is an ethnographic look at the thriving castells practice--a symbol of Catalan cultural heritage and identity amid debates around national autonomy and secession from Spain. While the main function of building castells is to grow community through a low-cost, intergenerational, and inclusive leisure activity, Mariann Vaczi reveals how this unique sport also provides a social base, image, and vocabulary for the independence movement. Highlighting the intersection of folklore, performance, and sport, Catalonia's Human Towers captures the subtle processes by which the body becomes politicized and ideology becomes embodied, with all the desires, risks and precarities of collective constructions.

**Zizek and the Media** Paul A. Taylor, 2013-09-04 Slavoj Zizek reaches the

parts of the media that other theorists cannot. With sources ranging from Thomas Aquinas to Quentin Tarantino and Desperate Housewives to Dostoyevsky, Zizek mixes high theory with low culture more engagingly than any other thinker alive today. His prolific output includes such media friendly content as a TV series (The Pervert's Guide to Cinema) a documentary movie (Zizek!) and a wealth of YouTube clips. A celebrity academic, he walks the media talk. Zizek and the Media provides a systematic and approachable introduction to the main concepts and themes of Zizek's work, and their particular implications for the study of the media. The book: Describes the radical nature of Zizek's media politics Uses Zizekian insights to expose the profound intellectual limitations of conventional approaches to the media Explores the psychoanalytical and philosophical roots of Zizek's work Provides the reader with Zizekian tools to uncover the hidden ideologies of everyday media content; Explains the ultimate seriousness that underlies his numerous jokes. As likely to discuss Homer's Springfield as Ithaca, Zizek is shown to be the ideal guide for today's mediascape.

**Expanding Practices in Audiovisual Narrative** Chris Hales, Raivo Kelomees, 2014-10-16 The last twenty or so years have seen a phenomenal expansion in the variety of forms of creative and narrative audiovisual expression. The increasing role of relatively recent developments such as the internet, mobile telephony and computer gaming, which complement the narrative representation of more traditional media, seems to have acted as a

catalyst to unfreeze the standard types of story form that had been appearing on screens for over a hundred years. Storytelling has taken on new forms, in the physical format(s) of the narrative material, the place or device where it is experienced, and the way it is accessed by the viewer – in particular, a viewer who might now also be a creator, modifier, or active participant in the represented audiovisual experience. Including texts by leading media scholars Erkki Huhtamo and Ryszard W. Kluszczyński, this book offers both historical and contemporary analyses of a variety of these “expanding practices in audiovisual narrative”. Chapters discuss mobile and locative (and hybrid) narrative media; the connection between computer gaming and more traditional forms of storytelling and game-playing; the use of computational algorithms to organise and access narrative content; and explain how the traditional documentary film form is being transformed by the potential of the audience to participate in, or change the form of, a non-fictional narrative. Historically, the work of Luc Courchesne and Radúz Činčera is analysed, as is the media-archaeological context of interactivity, pushing buttons, and group experiences. Narrative forms will undoubtedly continue their process of expansion and evolution, such that one can never truly represent the “state of the art” of current practice in audiovisual digital media. Nevertheless, the articles presented here offer useful source material to inform scholars and practitioners from a variety of related fields about certain historical, cultural and theoretical aspects of the evolution of the

narrative form in the digital age.

*Stalinism and the Dialectics of Saturn* Douglas Greene, 2023-03-20 This study examines the debates, history, and theory surrounding Stalinism and the Soviet Union. The author argues that the growing popularity of socialism in the United States calls for a renewed look at the legacy of Stalinism.

*Digital Culture Unplugged* Nalini Rajan, 2020-11-29 This edited volume is an exploration of the many different ways in which contemporary society negotiates digital technologies and media in South Asia. It especially focuses on cyber-religion, the notion of self-formation and digital technology, urban cybercultural phenomenon, digital era in cinema and photography that represent an eclectic mix o

*The War Against Marxism* Tony McKenna, 2021-05-06 Marxism has provided the ideological impetus to liberation movements, radical struggles and revolutions across the world. But in the 20th century, the emancipatory and democratic power of its thought has often been distorted and overridden by various Stalinist dictatorships which claimed to be acting in its name. A similar undermining of freedom of thought has been accomplished at an intellectual level; various schools have transformed Marxist thought in line with some of the most fashionable but gentrified forms of contemporary philosophy, shifting the focus from the democratic power of the masses and their ability to challenge the capitalist order to concentrate on superstar thinkers and elite theories. *The War Against Marxism* traces the war against

Marxism which, paradoxically, has been conducted in the name of Marxism itself. As such it provides a fiery philosophical and polemical indictment of so-called 'Marxists' such as Adorno, Horkheimer, Althusser, Jameson, Eagleton, Mouffe, Laclau and Zizek and asks what can be done to stem this counterrevolution.

Poetics of Dance Gabriele Brandstetter,2015-04-10 When it was first published in Germany in 1995, *Poetics of Dance* was already seen as a path-breaking publication, the first to explore the relationships between the birth of modern dance, new developments in the visual arts, and the renewal of literature and drama in the form of avant-garde theatrical and movement productions of the early twentieth-century. Author Gabriele Brandstetter established in this book not only a relation between dance and critical theory, but in fact a full interdisciplinary methodology that quickly found foothold with other areas of research within dance studies. The book looks at dance at the beginnings of the 20th century, the time during which modern dance first began to make its radical departure from the aesthetics of classical ballet. Brandstetter traces modern dance's connection to new innovations and trends in visual and literary arts to argue that modern dance is in fact the preeminent symbol of modernity. As Brandstetter demonstrates, the aesthetic renewal of dance vocabulary which was pursued by modern dancers on both sides of the Atlantic - Isadora Duncan and Loie Fuller, Valeska Gert

and Oskar Schlemmer, Vaslav Nijinsky and Michel Fokine - unfurled itself in new ideas about gender and subjectivity in the arts more generally, thus reflecting the modern experience of life and the self-understanding of the individual as an individual. As a whole, the book makes an important contribution to the theory of modernity.

**Repair** Markus Berger, Kate Irvin, 2022-09-30 A collection of timely new scholarship, *Repair: Sustainable Design Futures* investigates repair as a contemporary expression of empowerment, agency, and resistance to our unmaking of the world and the environment. Repair is an act, metaphor, and foundation for opening up a dialogue about design's role in proposing radically different social, environmental, and economic futures. Thematically expansive and richly illustrated, with over 125 visuals, this volume features an international, interdisciplinary group of contributors from across the design spectrum whose voices and artwork speak to how we might address our broken social and physical worlds. Organized around reparative thinking and practices, the book includes 30 long and short chapters, photo essays, and interviews that focus on multiple responses to fractured systems, relationships, cities, architecture, objects, and more. *Repair* will encourage students, academics, researchers, and practitioners in art, design and architecture practice and theory, cultural studies, environment and sustainability, to discuss, engage, and rethink the act of repair and its impact on our society and environment.

Magic in the Air James E. Katz, 2017-09-08 In this timely volume, James E. Katz, a leading authority on social consequences of communication technology, analyzes the way new mobile telecommunications affect daily life both in the United States and around the world. Magic in the Air is the most wide-ranging analysis of mobile communication to date. Katz investigates the spectrum of social aspects of the cell phone's impact on society and the way social forces affect the use, display, and re-configuration of the cell phone. Surveying the mobile phone's current and emerging role in daily life, Katz finds that it provides many benefits for the user, and that some of these benefits are subtle and even counter-intuitive. He also identifies ways the mobile phone has not been entirely positive. After reviewing these he outlines some steps to ameliorate the mobile phone's negative effects. Katz also discusses use and abuse of mobile phones in educational settings, where he finds that their use is eroding students' participation in class even as it is helping them to cheat on exams and cut class. Parents no longer object

to their children having mobile phones in class in a post-Columbine and 9/11 era; instead they are pressing schools to change their rules to allow students to have their phones available during class. And mobile phone misbehavior is by no means limited to students: Katz finds that teachers are increasingly taking calls in the middle of class, even interrupting their own lectures to answer what they claim are important calls. In keeping with the book's title, Katz explores the often overlooked psychic and religious uses of the mobile phone, an area that has only recently begun to command scholarly interest. *Magic in the Air* will be essential reading for communications specialists, sociologists, and social psychologists.
