**Wang Bing** Bing Wang, 2018 A leading figure in documentary cinema, Wang Bing's boundary-pushing films witness the accelerated transformation of China's landscape with a deep sense of intimacy and sincerity. He has been working outside of China's film industry since the beginning of his career, always shooting alone or with a very small crew. His films offer unsparing looks at the everyday lives and struggles of people living on the margins of Chinese society. The resilience of the human spirit is at the heart of each of these works, opening up timely existential and socio-economic questions. With a bold, uncompromising approach to cinematic form, Wang Bing's singular body of work is testament to a rare tenacity of vision that continues to expand how the medium can represent human lives and histories. This *Pioneers* film series surveys the artist's filmic portraits of labour and remote survival, as well as his dedicated examination of a suppressed chapter of Chinese history. The programme marks the first London screenings of 'Man with No Name' and the monumental 'West of the Tracks' in its entirety, and includes an artist talk in which Wang Bing will share his 2014 video *Traces* for the first time in the UK.--from Tate website.

Social Trust Liu Weiping, 2023-06-19 This book explores how social trust impacts the Chinese economy. Due to the profound social changes brought by rapid urbanization, China's traditional

social trust system gradually weakens. How to rebuild and enhance social credit remains as a key and difficult project. Exploring case studies from the real estate market, private banking, and urban financing, this book explores the value of informal social links to the economic functions of a society and how to rebuild them when they erode. This is of interest to scholars of China's economy and society.

*Chinese Macrosecuritization* Juha A. Vuori, 2023-12-01 This book provides a holistic picture of Chinese global security discourses, with a focus on macrosecritizations. The work examines how the People's Republic of China (PRC) has aligned itself within global security discourses. This is approached through the theory of securitization, specifically by using the notion of macrosecritization as the lens for its analysis. The book offers the first full account of Chinese macrosecritization discourses and alignments, and it aims to discern what security speech with referent objects such as humanity, civilization, or nature has done in the domestic and international politics of China. Specifically, the work focuses on the discourses of the Cold War, anti-nuclear weapons, climate change, and the Global War on Terror, which have all been postulated in the literature as macrosecritizations. In addition, it examines discourses with global referent objects that have been put forth by the PRC so that we can see whether its proposals for global security governance take the form of, or are legitimated through, macrosecritization. The overall argument in the book is that the way contemporary China uses macrosecritization discourses provides for ontological security as its position in relation to other major powers is undergoing transformation, by allowing it to maintain a consistent narrative of its international self that abides by its own set of moral values and sense of worth. This book will be of interest to students of critical security studies, Chinese politics and International Relations.

**The Holistic Rx for Kids** Madiha M. Saeed MD,2021-11-11 As physical and mental health conditions and destructive behaviors skyrocket, Dr. Saeed uncovers how our children's brains, bodies, and behaviors are being hijacked and presents evidence-based actionable steps parents can take to help their children make better decisions, build resilience, and heal and prevent acute/chronic conditions at any age.

The Party Leads All Jacques deLisle,Guobin Yang,2022-09-27 Examining the past, current, and potential future roles of the Communist Party in governing China The Chinese Communist Party and its policies touch nearly every aspect of life in China and dominate some. An often-quoted current phrase—one with roots in the era of Mao Zedong—says “the Party leads all.” Under the leadership of Xi Jinping, the Party determines much of what is permitted and prohibited in the country's social, economic, and political activity, as well as China's increasingly consequential foreign relations. Even so, the Communist Party always has faced limits on what it can control, and it may encounter new obstacles ahead. This book addresses important questions about the current and future roles of the party: Has Xi's tenure brought a qualitative increase in the pursuit, or achievement, of party control? How is party rule shaped and exercised by internal party dynamics, the party's control over the state, society, economy, foreign affairs, government institutions and rules, and ideology? How serious are the threats to party strength and success posed by Xi's approach to power, corruption in the party's ranks, a rapidly changing society, a fraught international environment, or a possibly overly ambitious agenda for party control? Leading scholars examine these questions from several disciplinary perspectives, each focusing on a key area of the party and its efforts to lead, control, or influence the world around it. This book offers the most comprehensive and up-to-date assessment of the party's roles in China's economy, government, civil society, legal system, military affairs, and

foreign policy. It does so at a critical moment, with the full contours of the Xi Jinping era in China becoming more evident and as the CCP reaches its 100th anniversary and nears three-quarters of a century in power. It will be essential reading for all scholars, students, and policy-makers interested in contemporary China.

#### **China's environmental policy in terms of European Union standards** Jan Wiktor

Tkaczyński, Łukasz Gacek, 2020-11-16 It is beyond dispute that both China and the European Union stand to gain from promoting low-carbon development through the dissemination of clean and renewable energy sources, as this inevitably leads to increased environmental protection. The depletion of fossil fuel resources and the accompanying changes in the global energy mix make Europe and China not only competitors in the global economic race, but also *nolens volens* partners. Their pragmatic partnership is characterized, on the one hand, by the need to take action to reduce the consumption of fossil fuels and, on the other, by the desire to minimize the negative environmental impact of their use. Hence, the existing and emerging cooperation between the two actors, while challenging for a number of reasons, is not only an attempt to set up channels to exchange vital information, but also an exercise in setting the standards under which further cooperation will be forged.

Understanding China's Real Estate Markets Bing Wang, Tobias Just, 2021-06-07 China's economy has been transforming rapidly over the last 25 years. As a result, Chinese conurbations have changed remarkably, with cities expanding both vertically and horizontally, and the physical

environment acting as a medium for unprecedented urbanization. This has provided vast opportunities for investors, real estate developers, and service companies, but also presents huge challenges—as traditional city spaces have been reconfigured, environmental risks and the volatility of real estate markets increased. However, as engagement with China is becoming strategically important for many, forming a synthesized lens through which to read China across the vicissitudes of its real estate sector bears historic significance. By offering an insightful framework and structure for understanding China's variegated real estate dynamics, players, and markets, *Understanding China's Real Estate Markets* codifies the principles and practices of real estate development, finance, and investment in China and builds foundations for future academic research and practical knowledge in shaping and engaging the urban environment within China and beyond.

The 80 full research papers presented together with 8 demonstrations were carefully reviewed and selected from 266 submissions. The focus of the conference is on following topics: data mining, spatial and temporal databases, recommender systems, graph data management, information retrieval, privacy and trust, query processing and optimization, social media, big data analytics, and distributed and cloud computing.

Tomorrow's Coasts: Complex and Impermanent Lynn Donelson Wright,C. Reid Nichols,2018-06-15 This book is intended as a conceptual roadmap to show how some of the

numerous pieces of complex coastal systems intersect and might interact under changing future environmental regimes. It is addressed to a non-technical but environmentally literate audience that includes the lay public, policy makers, planners, engineers and academics interested in the causes and consequences of global changes as they are likely to affect coastal systems. The book also outlines some strategies for anticipating and responding to the challenges that lie ahead. The purpose is not to offer a technical treatise on how to build better numerical models or to provide the cognoscenti with new scientific details or theories. Quite on the contrary the authors aim to provide a holistic, easy-accessible overview of coastal systems and therefore use a writing style that is non-technical, nonmathematical and non-jargonized throughout. Wherever scientific terms are required to avoid ambiguity, a clear and simple definition is presented and those definitions are repeated in the glossary. The authors aim to communicate with all who care about the future of coastal environments. In Part 1, they present some underlying general “big picture” concepts that are applicable to coastal processes and coastal change worldwide. Part 2 reviews some of the more important physical, ecological and societal causes and outcomes of coastal change. A selection of case studies of some prominent and highly vulnerable coastal regions is presented in Part 3. Some strategies for facilitating and supporting collaboration among the global scientific community to enhance future coastal resilience are outlined in Part 4.

Public Value and Social Development Bing Wang, 2022-03-26 This book aims to seek for the truth which connects public value and social development as basis to build a harmony community for individuals as well as society. The book tries to bridge science, technology, economics, politics, history, ethics, and environment under the concept of public values, and reveals the essentials of public policy for individual and social development. The potential audience of the book are officials

and policy makers in the public sectors, as well as managers in the private sectors.

*The Fourth Industrial Revolution* Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

*Assessing Vulnerability to Global Environmental Change* Richard J. T. Klein, Anthony G. Patt, 2012-05-16 Assessing the vulnerability of human populations to global environmental change, particularly climate change, is now the main imperative of research and international action. However, much of the research into vulnerability is not designed to feed directly into decision making and policy, creating a gap between the knowledge created by researchers and what is required by decision makers. This book seeks to rectify this problem and bridge the gap. It discusses vulnerability as the central theme and brings together many different applications from disaster studies, climate change impact studies and several other fields and provides the most comprehensive synthesis of definitions, theories, formalization and applications to date, illustrated with examples from different disciplines, regions and periods, and from local through to regional, national and international levels. Case study topics cover sea level rise, vulnerability to changes in ecosystem services, assessing the vulnerability of human health and 'double exposure' to climate change and trade liberalization amongst other issues. Research outcomes stress that science-policy dialogues must be transparent to be effective and concentrate on a mutual understanding of the concepts used. A key research finding is that the most useful information for decision makers is that which shows the separate causes and drivers of vulnerability, rather than presenting vulnerability in an aggregated form. The book concludes with a unifying framework for analysing integrated methodologies of vulnerability assessment and guiding how research and policy can be linked to reduce vulnerability.
