Carbon and Nutrient Fluxes in Continental Margins Kon-Kee Liu, Larry Atkinson, Renato Quiñones, Liana Talaue-McManus, 2010-02-11 This book is a product of the joint JGOFS (Joint Global Ocean Flux Study)/LOICZ (Land–Ocean Interactions in the Coastal Zone) Continental Margins Task Team which was established to facilitate continental margins research in the two projects. It contains significant information on the physical, biogeochemical, and ecosystems of continental margins nationally and regionally and provides a very valuable synthesis of this information and the physical, biogeochemical and ecosystem processes which occur on continental margins. The publication of this book is timely as it provides a very strong foundation for the development of the joint IMBER (Integrated Marine Biogeochemistry and Ecosystems Research)/LOICZ Science Plan and Implementation Strategy for biogeochemical and ecosystems research in the continental margins and the impacts of global change on these systems. This initiative will move forward integrated biogeochemical and ecosystems research in the continental margins. We thank all the contributors to this volume and especially Kon-Kee Liu who has dedicated a great deal of time to ensuring a high-quality book is published. IMBER Scientific Steering Committee Julie Hall LOICZ Scientific Steering Committee Jozef Pacyna v 1 Preface In general, interfaces between the Earth's larger material reservoirs (i. e. , the land, atmosphere, ocean, and sediments) are important in the control of the biogeochemical dynamics and cycling of the major bio-essential elements, including carbon (C), nitrogen (N), phosphorus (P), sulfur (S), and silicon (Si), found in organic matter and the inorganic skeletons, shells, and tests of benthic and marine organisms.

Bix Jean Pierre Lion, 2005-01-01 Bix Beiderbecke is a figure of legend: the white cornetist's short life (1903-1931) fit the myth of the tragic artist, surrounded by the nostalgia of an era (Prohibition), and rooted in the dark history of jazz. Considered a genius by his fans and fellow musicians, Bix was a master cornet player, pianist, and composer, and one of the most inspiring jazz musicians of his age. French jazz scholar Jean Pierre Lion traveled the trajectory of Bix's life, from birth to death, to boarding school, on tour, and beyond, to uncover the truth behind the legend. He creates historical ambience with descriptions of 1920s Chicago - ruled by Al Capone and peopled with fast cars, flappers, and hot jazz musicians - and Bix's personality is revealed through excerpts from the few letters he wrote in his lifetime and the memories of friends and witnesses of the jazz age. When he died, Bix left behind a tremendous list of recordings (included here in a definitive discography) and several original compositions. This biography culls the entirety of Bix scholarship into one volume, painting a

The Unconventional Quotes of the Black Lion Shad Author,2018-06-06 This character was created 2015. The only purpose was to have a cool and different dame when I was challenging my son and the community kidz playing basketball, football and often racing. Now the Black Lion has evolved to wanting to be a super hero. Now his mission is to be apart of the Solar Power League.

English Fiction in the 1930s Chris Hopkins,2006-01-01 This study approaches the fiction of the 1930s through critical debates about genre, language and history, setting these in their original context, and discussing the generic forms most favoured by novelists at the time. Chris Hopkins uses a series of case studies of texts to draw on, develop or explore the boundaries, contemporary usefulness and complexities of particular prose genres. Generic debates and the political-aesthetic effects of different kinds of representation were live issues as discursive struggles and negotiations took place between modernist and realist modes, between high, middle and lowbrow categorisations of culture, between literature and mass culture, and between different conceptions of the role of the writer, politics and nationality, sexuality and gender identities. Chris Hopkins draws both on well-known texts and on novels which have only recently begun to be discussed by critics of the thirties - particularly those by women writers whose work has still not been related very clearly to the literary and political debates of the period. Organised in five sections each focusing on major genres, he takes a wide range of novels as case studies and discusses their uses of generic forms, relating them to other examples and to their historical, political and cultural contexts.

Heart of a Lion William Stolzenburg,2016-04-12 Late one June night in 2011, a large animal collided with an SUV cruising down a Connecticut parkway. The creature appeared as something out of New England's forgotten past. Beside the road lay a 140-pound mountain lion. Speculations ran wild, the wildest of which figured him a ghostly survivor from a bygone century when lions last roamed the eastern United States. But a more fantastic scenario of facts soon unfolded. The lion was three years old, with a DNA trail embarking from the Black Hills of South Dakota on a cross-country odyssey eventually passing within thirty miles of New York City. It was the farthest landbound trek ever recorded for a wild animal in America, by a barely weaned teenager venturing solo through hostile terrain. William Stolzenburg retraces his two-year journey--from his embattled birthplace in the Black Hills, across the Great Plains and the Mississippi River, through Midwest metropolises and remote northern forests, to his tragic finale upon Connecticut's Gold Coast. Along the way, the lion traverses lands with people gunning for his kind, as well as those championing his cause. *Heart of a Lion* is a story of one heroic creature pitting instinct against towering odds, coming home to a society deeply divided over his return. It is a testament to the resilience of nature, and a test of humanity's willingness to live again beside the ultimate symbol of wildness.

Library Lion Michelle Knudsen, 2024-03-05 A reminder that sometimes, there is a good reason to break the rules. . . . This winsome pairing of text and illustration is a natural for storytime. -- SCHOOL LIBRARY JOURNAL (starred review) (Ages 4-7) Miss Merriweather, the head librarian, is very particular about rules in the library. No running allowed. And you must be quiet. But when a lion comes to the library one day, no one is sure what to do. There aren't any rules about lions in the library. And, as it turns out, this lion seems very well suited to library visiting. His big feet are quiet on the library floor. He makes a comfy backrest for the children at story hour. And he never roars in the library, at least not anymore. But when something terrible happens, the lion quickly comes to the rescue in the only way he knows how. Michelle Knudsen's disarming story, illustrated by the matchless Kevin Hawkes in an expressive timeless style, will win over even the most ardent of rule keepers.

Atlas of the Indian Tribes of North America and the Clash of Cultures

Nicholas J. Santoro, 2009 Atlas of the Indian Tribes of the Continental United States and the Clash of Cultures The Atlas identifies of the Native American tribes of the United States and chronicles the conflict of cultures and Indians' fight for self-preservation in a changing and demanding new world. The Atlas is a compact resource on the identity, location, and history of each of the Native American tribes that have inhabited the land that we now call the continental United States and answers the three basic questions of who, where, and when. Regretfully, the information on too many tribes is extremely limited. For some, there is little more than a name. The history of the American Indian is presented in the context of America's history its westward expansion, official government policy and public attitudes. By seeing something of who we were, we are better prepared to define who we need to be. The Atlas will be a convenient resource for the casual reader, the researcher, and the teacher and the student alike. A unique feature of this book is a master list of the varied names by which the tribes have been known throughout history.

Mysterious Creatures [2 volumes] George M. Eberhart, 2002-12-17 A comprehensive guide to cryptozoology—the quest to identify animals that have not been officially catalogued by science and to place these unknown animals into their proper zoological categories. In this fascinating two-volume encyclopedia, author George M. Eberhart provides a comprehensive catalog of nearly 1,000 cryptids—unknown animals usually reported through eyewitness accounts and not yet described by science. Cryptids are the stuff of folklore, hoaxes, and genuine scientific breakthroughs. There are 400 now-classified cryptids once considered either extinct or pure fantasy. The cryptozoologist's job is to strip away the myth, misidentification, and mystery—and separate fact from fiction. Mysterious Creatures covers everything from dinosaurs and the emala-ntouka, an elephant-killing dinosaur-like animal of central Africa, to searches for the Loch Ness monster, Bigfoot, and other cryptozoological hoaxes. Entries about specific animals include the derivation or meaning of each cryptid's name, its scientific name, variant names, a physical description, behavior, description of tracks, habitat, significant sightings, present status, and possible explanations. Illustrations and photographs accompany many entries. The book also includes

resources and references for further information.

The Perfect Protein Andy Sharpless, Suzannah Evans, 2013-05-28 The planet will be home to more than 9 billion people by 2050, and we're already seeing critical levels of famine around the world mirrored by growing obesity in developed nations. In *The Perfect Protein*, Andy Sharpless maintains that protecting wild seafood can help combat both issues, because seafood is the healthiest, cheapest, most environmentally friendly source of protein on earth. While the conservation community has taken a simplistic, save-the-whales approach when it comes to oceans, Sharpless contends that we must save the world's seafood not just to protect marine life and biodiversity but to stave off the coming humanitarian crisis. With high demand for predator species like tuna and salmon, wealthy nations like the U.S. convert reduction species such as anchovies, mackerel, and sardines into feed for salmon and other farmed animals—even though these overlooked fish are packed with health-boosting Omega-3 fatty acids and could feed millions. By establishing science-based quotas, protecting wild habitats, and reducing bycatch (and treating anchovies and their like as food, not feed), Sharpless believes that effective ocean stewardship can put healthy, sustainable seafood on the table forever. To that end, Oceana has tapped 20-plus chefs, including Mario Batali, Eric Ripert, and Jose Andres for recipes that give us all a role to play in this revolutionary mission: to save the fish so that we can eat more fish.
