Quest for Space: The Indian Connect ,2014-02-15 Human endeavours in space over the past six decades have reached a stage that just about every facet of human life today has some complement of space capability contributing to it, encompassing the entire spectrum from telecommunications, navigation, weather forecasting, remote sensing, broadcasting and disaster management. Space exploration actually owes its origins to matters military, with civil applications coming about as a by-product. Capability building in space thereafter has witnessed frenzied progress, in the spheres of both the military and the civil/commercial. With an ever increasing number of countries joining the space bandwagon, space is getting congested and competitive. International legislation on space, though well meaning, is largely viewed to be inadequate to address the concerns of equitable access to space and more alarmingly, is reticent on the issue of militarisation and weaponisation. The Indian presence in the global space order is rather significant. Ranking sixth globally in terms of space budget and technological capability, India is capable of going beyond its calling. Its multi-dimensional space programme spans almost the entire spectrum from space launch to satellite construction and their employment in a large array of development-centric applications, and in recent years, in missions beyond the Earth. The Mangalyaan mission to Mars currently underway symbolises India's indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at the global level. India, thus, stands today, technologically robust and self-reliant – well poised in the global space order to look beyond its domestic charter and address the concerns of the international global community. Space legislation, situational awareness and international cooperation in space security are some of the geostrategic options analysed in this book, which could facilitate Indian positioning in the global space order.

Cases on Managing Dairy Productive Chains Satolo, Eduardo Guilherme,Mac-Lean, Priscilla Ayllen Bustos,2023-03-27 In agricultural production, one of the sectors that stands out worldwide for its economic and social relevance is milk production. Although food items tend to be produced in complex systems composed of several agents and with processes connected to supply chains, the dairy supply chain is seen as relatively simple and includes three main stakeholders: dairy production, processing and packaging, and retail. However, this simplicity of chain management changes in a scenario in which milk production is concentrated in a high number of small-scale producers, who occupy areas where other crops are less viable. At this point in the literature, there are few works that consolidate studies that address the daily production chain, in particular dealing with aspects of good milk manufacturing and quality practices, environment, dairy farming 4.0, and management of the dairy production chain. *Cases on Managing Dairy Productive Chains* discusses the relevance and topicality of the themes and their applications in one of the main production chains, such as milk, and allows researchers to visualize new insights for research in the various aspects of applicable management. It further presents cases in dairy segments and investigates their applications, entrepreneurial strategies, and innovation in management areas. Covering topics such as cooling systems, raw materials, and sustainability indicators, this case book is an excellent resource for agriculturalists, managers, engineers, extensionists, students and faculty of higher education, librarians, researchers, and academicians.

Asia Alone Simon S. C. Tay,2010-12-01 An insightful examination of the changing relationship between Asia and the United States In this lucidly written and thought-provoking book, author Simon Tay highlights the accelerating trends that point to Asia increasingly forging its own path, independent of the United States. He also describes the fundamental changes and new policy directions needed to maintain and strengthen the bonds between Asia and the United States that have been beneficial to both since the end of the Second World War. On the eve of the global financial crisis of 2008, the economies of the United States and its Asian partners were deeply interdependent. But the different approaches taken to the crisis by Asian and Western leaders point to a new separation that may have negative consequences for the economies and businesses of both regions. To avoid a dangerous divide that may make us all the poorer, Tay reveals what leaders, policy-makers, companies, and citizens can do to find a balance that enriches us all. Written by a leading public intellectual CNN's Fareed Zakaria describes as one of the most intelligent and reliable guides to the region Touches on major issues in foreign policy and economics that will impact Asian nations and the United States over the near future Explains the changing nature of economic relations in the global economy For foreign policy followers, politicians, and businesspeople, *Asia Alone* charts a path forward—together.

Public Health Practice in Australia Sally Fawkes,2020-07-16 *Public Health Practice in Australia* offers a thorough introduction to what public health practitioners

do, and the 'effort' involved in improving the health of the public. This second edition has been fully revised and updated in line with current policies and practice. It highlights common threads that underlie seemingly disparate activities, ideas and entities that comprise the organised effort of public health practice. The emphasis is on securing and maintaining the conditions in society that enable people to live healthy and fulfilling lives. The authors examine the impact of historical, social, economic, environmental and political factors on the health of individuals, communities and populations. Taking an applied, multidisciplinary approach, they outline the strategies and tools that public health practitioners use to improve health outcomes: identifying infrastructure needs in the workforce, public and private sector organisations, and in regulation; gathering, analysing and using health data; applying interventions in health policy, provision of health services and health promotion. Public Health Practice in Australia draws on current international and Australian research and the interwoven case studies make the theories and concepts come alive. It is a valuable resource for students and professionals across the health sciences including public health, medicine, environmental health, health promotion, health information management and health administration. 'The book is impressive in the completeness, clarity and consistency of the material covered, and for the way in which many of the theoretical issues are related to current practice. An extremely useful and valuable reference for both students and practitioners alike.' - Thomas Tenkate, Environmental Health

Boost Graph Library Jeremy G. Siek, Lie-Quan Lee, Andrew Lumsdaine, 2001-12-20 The Boost Graph Library (BGL) is the first C++ library to apply the principles of generic programming to the construction of the advanced data structures and algorithms used in graph computations. Problems in such diverse areas as Internet packet routing, molecular biology, scientific computing, and telephone network design can be solved by using graph theory. This book presents an in-depth description of the BGL and provides working examples designed to illustrate the application of BGL to these real-world problems. Smokeless War Manoj Kewalramani, 2021-06-28 In January 2020, the COVID-19 outbreak in China was viewed as a black swan event, threatening the Communist Party's rule. Two short months later, however, China appeared to have controlled the virus, while the rest of the world struggled to respond. As country after country imposed lockdowns of varying strictness and the human cost began to rise, geopolitical frictions flared up over the origins of the virus, along with Beijing's early failures, diplomacy and discourse. Smokeless War: China's Quest for Geopolitical Dominance offers a gripping account of the Communist Party of China's political, diplomatic and narrative responses during the pandemic. Drawing on the latest academic research and Chinese language sources, it discusses the Party-State's efforts to achieve greater discourse power and political primacy, as it sought to convert a potentially existential crisis into a historic opportunity. In doing so, the author provides an insightful account of the Communist Party of China's approaches to cultivating sources of strength and exercise of power.

Deception Rand Paul, 2023-10-10 Senator Rand Paul was on to Anthony Fauci from the start. Wielding previously unimaginable power, Fauci misled the country about the origins of the Covid pandemic and shut down scientific dissent. One of the few leaders who dared to challenge America's Doctor was Senator Rand Paul, himself a

physician. Deception is his indictment of the catastrophic failures of the public health bureaucracy during the pandemic. Senator Paul presents the evidence that: The Covid virus was likely the product of gain-of-function research at the Wuhan lab in China—research funded in part by the U.S. government. Taxpayer dollars for that research were deceptively funneled to Wuhan without the required regulatory review. Fauci and his scientific yes-men knew from day one about Covid's origin and tried to cover it up. Fauci and his allies ruthlessly attacked everyone—including highly qualified scientists—who threatened to reveal the truth about the pandemic. Why? Hundreds of millions of dollars of grants and unreported royalties were at stake, and heads would roll if the truth got out. It almost worked. At Fauci's insistence, the government imposed needlessly extreme lockdowns on Americans at the cost of immense personal and economic destruction. Covid-19 was deadly, but the real killer was the coverup, led by America's most durable medical bureaucrat—a man for whom the truth was too often expendable. Senator Paul makes a powerful case that funding dangerous bioengineering in a totalitarian country is madness. If we don't heed this warning, the next pandemic could be far worse.

Unconscious Branding Douglas Van Praet, 2012-11-13 For too long marketers have been asking the wrong question. If consumers make decisions unconsciously, why do we persist in asking them directly through traditional marketing research why they do what they do? They simply can't tell us because they don't really know. Before marketers develop strategies, they need to recognize that consumers have strategies too . . . human strategies, not consumer strategies. We need to go beyond asking why, and begin to ask how, behavior change occurs. Here, author Douglas Van Praet takes the most brilliant and revolutionary concepts from cognitive science and applies them to how we market, advertise, and consume in the modern digital age. Van Praet simplifies the most complex object in the known universe - the human brain - into seven codified actionable steps to behavior change. These steps are illustrated using real world examples from advertising, marketing, media and business to consciously unravel what brilliant marketers and ad practitioners have long done intuitively, deconstructing the real story behind some of the greatest marketing and business successes in recent history, such as Nike's Just Do It campaign; Got Milk?; Wendy's Where's the Beef? ; and the infamous Volkswagen Punch Buggy launch as well as their beloved The Force (Mini Darth Vader) Super Bowl commercial.

Anti/Vax Bernice L. Hausman, 2019-04-15 Antivaxxers are crazy. That is the perception we all gain from the media, the internet, celebrities, and beyond, writes Bernice Hausman in Anti/Vax, but we need to open our eyes and ears so that we can all have a better conversation about vaccine skepticism and its implications. Hausman argues that the heated debate about vaccinations and whether to get them or not is most often fueled by accusations and vilifications rather than careful attention to the real concerns of many Americans. She wants to set the record straight about vaccine skepticism and show how the issues and ideas that motivate it—like suspicion of pharmaceutical companies or the belief that some illness is necessary to good health—are commonplace in our society. Through Anti/Vax, Hausman wants to engage public health officials, the media, and each of us in a public dialogue about the relation of individual bodily autonomy to the state's responsibility to safeguard citizens' health. We need to know more about the position of each side in this important stand-off so that public decisions are made through understanding rather than stereotyped perceptions of scientifically illiterate antivaxxers or faceless bureaucrats. Hausman reveals that vaccine skepticism is, in part, a critique of medicalization and a warning about the dangers of modern medicine rather than a glib and gullible reaction to scaremongering and misunderstanding.
