**Museum Informatics** Paul F. Marty, Katherine Burton Jones, 2012-07-26 Museum Informatics explores the sociotechnical issues that arise when people, information, and technology interact in museums. It is designed specifically to address the many challenges faced by museums, museum professionals, and museum visitors in the information society. It examines not only applications of new technologies in museums, but how advances in information science and technology have changed the very nature of museums, both what it is to work in one, and what it is to visit one. To explore these issues, Museum Informatics offers a selection of contributed chapters, written by leading museum researchers and practitioners, each covering significant themes or concepts fundamental to the study of museum informatics and providing practical examples and detailed case studies useful for museum researchers and professionals. In this way, Museum Informatics offers a fresh perspective on the sociotechnical interactions that occur between people, information, and technology in museums, presented in a format accessible to multiple audiences, including researchers, students, museum professionals, and museum visitors.

**Marine Physiology Down East: The Story of the Mt. Desert Island Biological Laboratory** David H. Evans, 2015-08-13 This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory (MDIBL), one of the major marine laboratories in the United States and a leader in using marine organisms to study fundamental physiological concepts. Beginning with its founding as the Harpswell Laboratory of Tufts University in 1898, David H. Evans follows its evolution from a teaching facility to a research center for distinguished renal and epithelial physiologists. He also describes how it became the site of major advances in cytokinesis, regeneration, cardiac and vascular physiology, hepatic physiology, endocrinology and toxicology, as well as studies of the comparative physiology of marine organisms. Fundamental physiological concepts in the context of the discoveries made at the MDIBL are explained and the social and administrative history of this renowned facility is described.

**The Places Where Community Is Practiced** Anna Steigemann, 2019-02-25 In this open access publication, the social cohesion of urban neighborhoods and their residents is examined, which is often viewed as vulnerable since increased mobility, individualization, wider socio-economic and demographic changes have fundamentally altered the basis for everyday social interaction in urban neighborhoods. Anna Steigemann gives scholarly attention to the concrete places where neighborly interactions still take place and to how these interactions affect local community building. She illuminates and explores the ordinary everyday interactions and social practices in and around shops and gastronomic facilities on a shopping street in Berlin-Neukölln, revealing how these businesses are important places where community is practiced, but also why they are increasingly threatened by commercial and residential gentrification.

**Territorial Integrity in a Globalizing World** Abdelhamid El Ouali, 2012-03-26 This book offers a comprehensive, highly informative and interdisciplinary study on territorial integrity and the challenges globalization, self-determination and external interventions present. This study aims at not only to fill an epistemological gap in this regard, but also answer the question of whether International Law is adequately equipped to help states address these challenges. The author argues that the biggest threat that many states are confronted with today is their disintegration rather than their obsolescence, and that International Law has not often been able to prevent that eventuality. In fact, states, when they were not destroyed by war, managed to survive, thanks to the flexibility of territoriality, i.e. their ability to adjust to difficult situations as they arose. It is this understanding of adaptation that urges an increasing number of states today to revive territorial autonomy and restore an original understanding of self-determination in which democracy is a pivotal factor in establishing congruence between the states and their nations. While this move is endorsed by International Law, it is not the case for globalization; for their own sake, proponents of globalization should recognize that the states are irreplaceable as long as they remain the sole providers of protection for their peoples.
