Key Topics of Language Variation in Sociolinguistics, Stylistics, Pragmatics and Discourse Analysis

Bahaa-Eddin A. Hassan, 2024-04-02 This book provides critical accounts of the most important topics in sociolinguistics, stylistics, communication, pragmatics and discourse analysis. It will serve as a valuable reference for students of linguistics, sociology, communication studies and discourse studies, as it guides them on how to perceive language variation in different fields. The book provides a very accessible introduction to language variation, illustrated with compelling examples and drawing insightfully on a wide range of readings. It reflects the vitality of language variation in its multifaceted pursuits, and views language variation as a key common theme among the different branches of linguistics. This view does not limit its scope to sociolinguistics; rather it includes other branches such as stylistics, pragmatics and discourse analysis.

The Woman Who Named God Charlotte Gordon, 2009-07-28 The saga of Abraham, Sarah, and Hagar is the tale of origin for all three monotheistic faiths. Abraham must choose between two wives who have borne him two sons. One wife and son will share in his wealth and status, while the other two are exiled into the desert. Long a cornerstone of Western anxiety, the story chronicles a very famous and troubled family, and sheds light on the ongoing conflict between the Judeo-Christian and Islamic worlds. How did this ancient story become one of the least understood and most frequently misinterpreted of our cultural myths? Gordon explores this legendary love triangle to give us a startling perspective on three biblical

characters who -- with their jealousies, passions, and doubts -- actually behave like human beings. The Woman Who Named God is a compelling, smart, and provocative take on one of the Bible's most intriguing and troubling love stories.

Jihadists of North Africa and the Sahel Alexander Thurston,2020-10-29 Offers unique insights into the inner workings of jihadist organisations over the past three decades in North Africa and the Sahel.

Idriss Deby and the Darfur Conflict Ésaïe Toïngar,2014-01-16 Idriss Deby Itno, current ruler of Chad, is the unacknowledged cause of much of the war and mayhem in central Africa. He is responsible for ethnic violence against his own people; the instigation of two wars in Sudan; the removal of the democratically elected presidents of the two neighboring countries; involvement in war in the Democratic Republic of Congo; an international counterfeiting operation; and the theft of diamonds and property across the region. Deby commits crimes against humanity, subverts election law and his nation's constitution, and is greatly responsible for the Darfur and Central African Republic crises but has not been held responsible by the international community, and the French government in particular seems to trust him to protect its regional economic interests, regardless of the human cost. Deby's transgressions have until now received little attention, a humanitarian oversight remedied by this work.

The Hemshin Hovann Simonian,2007-01-24 The Hemshin are without doubt one of the most enigmatic peoples of Turkey and the Caucasus. As former Christians who converted to Islam centuries ago yet did not assimilate into the culture of the surrounding Muslim populations, as Turks who speak Armenian yet are

often not aware of it, as Muslims who continue to celebrate feasts that are part of the calendar of the Armenian Church, and as descendants of Armenians who, for the most part, have chosen to deny their Armenian origins in favour of recently invented myths of Turkic ancestry, the Hemshin and the seemingly irreconcilable differences within their group identity have generated curiosity and often controversy. The Hemshin is the first scholarly work to provide an in-depth study of these people living in the eastern Black Sea region of Turkey. This groundbreaking volume brings together chapters written by an international group of scholars that cover the history, language, economy, culture and identity of the Hemshin. It is further enriched with an unprecedented collection of maps, pictures and appendices of up-to-date statistics. The Hemshin forms part of the Peoples of the Caucasus series, an indispensable and yet accessible resource for all those with an interest in the Caucasus.

China and North Africa since World War II Muhamad S. Olimat, 2014-12-11 This is a comprehensive work exploring Sino-North African relations based on a five-dimensional approach in terms of political relations, trade ties, cultural relations, security coordination, and energy cooperation. It is a quality addition to studies examining the increasing Chinese involvement in North Africa.

Algeria in Transition Ahmed Aghrout, Redha. M Bougherira, 2004-08-02 This book, by providing an up-to-date, systematic analytical account on transformations in Algeria, makes a valuable contribution to the literature on this country that has not yet received much attention in the Anglo-American academy. Its distinctive feature is that it entirely focuses on Algeria, thus departing from existing studies dealing with the entire geographical area of North Africa or the Maghreb.

Advanced Power Generation Systems Ibrahim Dincer, Calin Zamfirescu, 2014-07-15 Advanced Power Generation Systems examines the full range of advanced multiple output thermodynamic cycles that can enable more sustainable and efficient power production from traditional methods, as well as driving the significant gains available from renewable sources. These advanced cycles can harness the by-products of one power generation effort, such as electricity production, to simultaneously create additional energy outputs, such as heat or refrigeration. Gas turbine-based, and industrial waste heat recovery-based combined, cogeneration, and trigeneration cycles are considered in depth, along with Syngas combustion engines, hybrid SOFC/gas turbine engines, and other thermodynamically efficient and environmentally conscious generation technologies. The uses of solar power, biomass, hydrogen, and fuel cells in advanced power generation are considered, within both hybrid and dedicated systems. The detailed energy and exergy analysis of each type of system provided by globally recognized author Dr. Ibrahim Dincer will inform effective and efficient design choices, while emphasizing the pivotal role of new methodologies and models for performance assessment of existing systems. This unique resource gathers information from thermodynamics, fluid mechanics, heat transfer, and energy system design to provide a single-source guide to solving practical power engineering problems. The only complete source of info on the whole array of multiple output thermodynamic cycles, covering all the design options for environmentally-conscious combined production of electric power, heat, and refrigeration Offers crucial instruction on realizing more efficiency in traditional power generation systems, and on implementing renewable technologies, including solar, hydrogen, fuel cells, and biomass Each cycle description clarified through schematic

diagrams, and linked to sustainable development scenarios through detailed energy, exergy, and efficiency analyses Case studies and examples demonstrate how novel systems and performance assessment methods function in practice

Web Service Mining George Zheng, Athman Bouguettaya, 2010-06-14 The new computing environment enabled by advances in service oriented architectures, mashups, and cloud computing will consist of service spaces comprising data, applications, infrastructure resources distributed over the Web. This environment embraces a holistic paradigm in which users, services, and resources establish on-demand interactions, possibly in real-time, to realise useful experiences. Such interactions obtain relevant services that are targeted to the time and place of the user requesting the service and to the device used to access it. The benefit of such environment originates from the added value generated by the possible interactions in a large scale rather than by the capabilities of its individual components separately. This offers tremendous automation opportunities in a variety of application domains including execution of forecasting, office tasks, travel support, intelligent information gathering and analysis, environment monitoring, healthcare, e-business, community based systems, e-science and e-government. A key feature of this environment is the ability to dynamically compose services to realise user tasks. While recent advances in service discovery, composition and Semantic Web technologies contribute necessary first steps to facilitate this task, the benefits of composition are still limited to take advantages of large-scale ubiquitous environments. The mainstream composition techniques and technologies rely on human understanding and manual programming to compose and aggregate services. Recent advances improve composition by leveraging search technologies

and flow-based composition languages as in mashups and process-centric service composition.

STEM Learning Mesut Duran, Margret Höft, Brahim Medjahed, Daniel B. Lawson, Elsayed A. Orady, 2015-11-06 This book reports the results of a three-year research program funded by the National Science Foundation which targeted students and teachers from four Detroit high schools in order for them to learn, experience, and use IT within the context of STEM (IT/STEM), and explore 21st century career and educational pathways. The book discusses the accomplishment of these goals through the creation of a Community of Designers-- an environment in which high school students and teachers, undergraduate/graduate student assistants, and STEM area faculty and industry experts worked together as a cohesive team. The program created four project-based design teams, one for each STEM area. Each team had access to two year-round IT/STEM enrichment experiences to create high-quality learning projects, strategies, and curriculum models. These strategies were applied in after school, weekend, and summer settings through hands-on, inquiry-based activities with a strong emphasis on non-traditional approaches to learning and understanding. The book represents the first comprehensive description and analysis of the research program and suggests a plan for future development and refinement.

Transitional justice in process Mariam Salehi, 2022-03-15 Transitional justice in process is the first book to comprehensively study the Tunisian transitional justice process. After the fall of the Ben Ali regime in 2011, Tunisia swiftly began dealing with its authoritarian past and initiated a comprehensive transitional justice process, with the Truth and Dignity Commission as its central institution. However, instead of bringing about peace and justice, transitional justice soon became an arena of contention. Through a process

lens, the book explores why and how the transitional justice process evolved, and explains how it relates to the country's political transition. Based on extensive field research in Tunisia and the United States, and interviews with a broad range of Tunisian and international stakeholders and decision-makers, *Transitional justice in process* provides an in-depth analysis of a crucial period, beginning with the first initiatives aimed at dealing with the past and seeking justice and accountability. It discusses the development and design of the transitional justice mandate, and looks at the performance of transitional justice institutions in practice. It examines the role of international justice professionals in different stages of the process, as well as the alliances and frictions between different actor groups that cut across the often-assumed local-international divide. *Transitional justice in process* makes an essential contribution to literature on the domestic and international politics of transitional justice, and in particular to the understanding of the Tunisian transitional justice process.

China and the Middle East Muhamad Olimat, 2013 This manuscript examines relations between China and the Middle East in historical context. It highlights some of the most important events that characterize the ties between China and the Middle East, and examines their relationship in key areas that include energy, trade, arms sales, culture and politics. The centre of China's relations with Israel is arms sales and advanced technology, while the core of Sino-Saudi relations is oil. Iran and China are tied with deep historical, civilizational, cultural and political relations, but China's current interests in Iran centre on oil. Relations between China and the United Arab Emirates (UAE) centre on trade. The UAE serve as a primary hub for Chinese business corporations not only in the Gulf or the wider Middle East, but also in

Africa and the world. China's relations with Algeria have been based on political co-ordination since the early days of the Algerian War of Independence and the early days of the People's Republic of China. China provided Algeria with political, diplomatic and military support to accomplish its national liberation from France. Since then, their partnership has developed. Finally, the book develops a tridimensional approach in which China's ties with Middle Eastern countries are viewed as an outcome of interaction between three actors in each situation. The book reaches the conclusion that China's national interests in the Middle East are only increasing, and it is anticipated that Sino-Middle Eastern relations and strategic partnerships will be enhanced in the near future, provided that China is not perceived as undermining the Arab Spring. Key Features Offers an in-depth analysis of Chinese-Middle Eastern relations Assists students and scholars in understanding the uniqueness of the Chinese model of engagement in the Middle East Explains why most Middle Easterners prefer China's engagement to Western engagement Explores the future of Sino-Middle Eastern relations

From empire to exile Claire Eldridge, 2016-07-22 This book explores the commemorative afterlives of the Algerian War of Independence (1954-62), one of the world's most iconic wars of decolonisation. It focuses on the million French settlers - *pieds-noirs* - and the tens of thousands of *harkis* - the French army's native auxiliaries - who felt compelled to migrate to France when colonial rule ended. Challenging the idea that Algeria was a 'forgotten' war that only returned to French public attention in the 1990s, this study reveals a dynamic picture of memory activism undertaken continuously since 1962 by grassroots communities connected to this conflict. Reconceptualising the ways in which the Algerian War has been

debated, evaluated and commemorated in the subsequent five decades, From empire to exile makes an original contribution to important discussions surrounding the contentious issues of memory, migration and empire in contemporary France that will appeal to students and scholars of history and cultural studies.

Algeria Patrick Crowley, 2017 Algeria: Nation, Culture and Transnationalism covers a specific period of time (1988-2013) that has taken on a significantly different socio-political configuration to that of the first 25 years of post-independence Algeria (1962-1987). Since 1988, Algeria has seen democratic contestation, civil conflict between state and Islamist parties and, over the past 10 years, an uneasy peace. It was in the same period that the country endured economic decline and a painful transition to a more liberal economy. Less than twenty years ago Algeria was seen as a 'failed state' yet it is now perceived as having a role in the 'stabilization' of North Africa in the wake of the Arab Spring. Central to this transformation has been a turn in Algeria's economic fortunes. The Algerian army and political elite have, over the past 10 years, hugely benefitted from revenues derived from its hydrocarbon exports and use such revenues to manage a society in which a majority depend on state subsidies and public sector employment. Contemporary Algeria, argues Hugh Roberts (2003), is marked by an emerging post-nationalism and a sense that the elite has lost the political bearings that shaped the nation after 1962. There is an on-going tension generated by official positions that remain vigorously centripetal and a more informal, local yet transnational, dynamics that is often centrifugal in effect. The result is a society characterised by a range of oppositions that bear upon the evolution of the state and the lives of ordinary Algerians. Algeria has been dramatically marked by competing forces: state nationalism and grassroots nationalist disenchantment; Islamism and a version of Islam

that accommodates greater plurality; a national economy - and this includes cultural production - that is responding to globalization; the conflict of the 1990s and its contemporary legacy. The contributions to this book focus on the impact of such forces across a range of interests in contemporary Algeria.

Multiagent based Supply Chain Management Brahim Chaib-draa, Jörg Müller, 2006-10-11 This book takes a close look at recent progress in the field of supply chain management using agent technology and more specifically multiagent systems. Sixteen chapters are organized in four main parts: Introductory Papers; Multiagent Based Supply Chain Modeling; Collaboration and Coordination Between Agents in a Supply Chain; and Multiagent Based Supply Chain Management: Applications. The result is a comprehensive review of existing literature, and ideas for future research.

This full-color book uses a wealth of examples and illustrations to effectively

The World Almanac of Islamism 2017 American Foreign Policy Council, 2017-12-18 Now in its third edition, *The World Almanac of Islamism* is the first comprehensive reference work to detail the current activities of radical Islamist movements worldwide. The contributions, written by subject experts, provide up-to-date assessments on the contemporary Islamist threat in all countries and regions where it exists. Each

country study will include valuable metrics for gauging the advance or decline of Islamism. In places where Islamists are not in power, these include year-on-year comparisons of the number of terrorist attacks that have taken place, the level of popular support being received by radical religious organizations and political parties, and applicable government responses to these trends, if any. In places where they are in power, metrics encompass relevant changes to domestic human rights practices and social conditions, foreign policy rhetoric and action, and the overall stability of the state.
