Routledge Handbook of International Criminology Cindy J. Smith, Sheldon X. Zhang, Rosemary Barberet, 2011-05-03 The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions, and cultures, and facilitates the development of an overarching framework that is truly international. The book is divided into three parts, in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised, and will encourage young scholars to move the field of

inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries.

Antiquities Maxwell L. Anderson, 2016-11-03 The destruction of ancient monuments and artworks by the Taliban in Afghanistan and the Islamic State in Iraq and Syria has shocked observers worldwide. Yet iconoclastic erasures of the past date back at least to the mid-1300s BCE, during the Amarna Period of ancient Egypt's 18th dynasty. Far more damage to the past has been inflicted by natural disasters, looters, and public works. Art historian Maxwell Anderson's *Antiquities: What Everyone Needs to Know®* analyzes continuing threats to our heritage, and offers a balanced account of treaties and laws governing the circulation of objects; the history of collecting antiquities; how forgeries are made and detected; how authentic works are documented, stored, dispersed, and displayed; the politics of sending antiquities back to their countries of origin; and the outlook for an expanded legal market. Anderson provides a summary of challenges ahead, including the future of underwater archaeology, the use of drones, remote sensing, and how invisible markings on antiquities will allow them to be traced. Written in question-and-answer format, the book equips readers with a nuanced understanding of the legal, practical, and moral choices that face us all when confronting antiquities in a museum gallery, shop window, or for sale on the Internet.

Dirty Entanglements Louise I. Shelley, 2014-07-28 The entangled threat of crime, corruption, and terrorism now deserves high-level policy attention because of its growth trajectory. Using lively case studies, this book analyzes the transformation of crime and terrorism and the business logic of terrorism. Louise I. Shelley concludes that corruption, crime, and terrorism will remain important security challenges in the twenty-first century as a result of economic and demographic inequalities in the world, the

rise of ethnic and sectarian violence, climate change, the growth of technology, and the failure of nineteenth- and twentieth-century institutions to respond to these challenges when they emerged.

Digital Libraries Judith Andrews, 2017-05-15 *Digital Libraries: Policy, Planning and Practice* brings together a wealth of international experience in the planning and implementation of digital and hybrid library projects, providing a stimulating and informative handbook and reference for library staff and information managers. It consists of chapters contributed by leading specialists from Europe, North America, South Africa and the Middle East, who offer their insight into the decision-making processes that have shaped a variety of different digitization programmes. Beginning with introductory overviews of the digital library context, the US Digital Library Program and the UK e-lib and hybrid library programmes, *Digital Libraries* then divides into two main sections on policy and planning, and implementation and practice. The first explores concerns such as financial and resource planning, digitized compared to born-digital content and related service issues, open access to scholarly research archives, policies for and against preservation and their justification, and evaluating electronic information services. The second section is based on case studies on major European and North American digital library projects, including the Glasgow Digital Library, UCEEL (University of Central England Electronic Library), the Networked Digital Library of Theses and Dissertations (discussed in the context of five international projects), the Indiana University music Variations and Variations2 Project, and the beginnings of the Library of Congress digital program and its integration into core library services. The concluding chapter discusses the way forward for digital libraries in the context of experiences at Tilburg University library, and possible enabling or limiting factors in the future. The result of drawing together these varied and illuminating

experiences is a book that offers useful information and comparisons for all digital library project staff, institutional administrators, educators and developers of learning technology. It also provides useful pointers for researchers and project staff involved in archive and museum projects, as well as introducing students to the key ingredients of successful digital libraries.

A Self-Made Man Sidney Blumenthal, 2016-05-10 The first in a sweeping, multi-volume history of Abraham Lincoln—from his obscure beginnings to his presidency, death, and the overthrow of his post-Civil War plan of reconciliation—“engaging and informative and...thought-provoking” (The Christian Science Monitor). From his youth as a voracious newspaper reader, Abraham Lincoln became a free thinker, reading Tom Paine, as well as Shakespeare and the Bible. In the “fascinating” (Booklist, starred review) *A Self-Made Man*, Sidney Blumenthal reveals how Lincoln’s antislavery thinking began in his childhood in backwoods Kentucky and Indiana. Intensely ambitious, he held political aspirations from his earliest years. Yet he was a socially awkward suitor who had a nervous breakdown over his inability to deal with the opposite sex. His marriage to the upper class Mary Todd was crucial to his social aspirations and his political career. “The Lincoln of Blumenthal’s pen is...a brave progressive facing racist assaults on his religion, ethnicity, and very legitimacy that echo the anti-Obama birther movement....Blumenthal takes the wily pol of Steven Spielberg’s Lincoln and Doris Kearns Goodwin’s *Team of Rivals* and goes deeper, finding a Vulcan logic and House of Cards ruthlessness” (The Washingtonian). Based on prodigious research of Lincoln’s record, and of the period and its main players, Blumenthal’s robust biography reflects both Lincoln’s time and the struggle that consumes our own political debate. This first volume traces Lincoln from his birth in 1809 through his education in the political arts, rise to the Congress, and fall into the wilderness from which he emerged as the man we recognize as Abraham Lincoln. “Splendid...no one can come away from reading *A Self-Made*

Man...without eagerly anticipating the ensuing volumes.”
(Washington Monthly).

Erased Omer Bartov, Visiting Raoul Wallenberg Professor Omer Bartov, 2007-10-07 Bartov, a leading Holocaust scholar, discovers that to make sense of the heartbreaking events of the war, he must first grapple with the complex interethnic relationships and conflicts that have existed there for centuries. Visiting twenty Ukrainian towns, he recreates the histories of the vibrant Jewish and Polish communities who once lived there - and describes what is left today following their brutal and complete destruction.--BOOK JACKET.

Endless Flight Keiron Pim, 2022-10-06 The brilliant, mercurial, self-mythologising novelist and journalist Joseph Roth, author of the European 20th century masterpiece *The Radetzky March*, was an observer and chronicler of his times. Born and raised in Galicia on the eastern edge of the Austro-Hungarian Empire, his life's decline mirrored the collapse of civilised Europe: in his last peripatetic years, he was exiled from Germany, his wife driven into an asylum, and he died an alcoholic on the eve of the World War II. With keen insight, rigor and sensitivity, Keiron Pim delivers a visceral portrait of Roth's internal restlessness and search for belonging, from his childhood in the town of Brody to his Vienna years and his unsettled roaming of Europe. Exploring the role of Roth's absent father in his imaginings, and his attitude to his Jewishness, Roth's biography has particular relevance to us now, not only in the growing recognition and revival of his works, but also because his life's trajectory speaks powerfully to us in a time of uncertainty, fear, refugee crises and rising ethno-nationalism.

Brody: A Galician Border City in the Long Nineteenth Century Börries Kuzmany, 2017-01-05 Brody: A Galician Border City in the Long Nineteenth Century reconciles Brody's socioeconomic history with its cultural memory. It is the first comprehensive study of this city under Habsburg-Austrian rule (1772-1914) and it includes all ethno-confessional groups during

this period—Jews, Poles, and Ukrainians.

Ethics and the Archaeology of Violence Alfredo González-Ruibal, Gabriel Moshenska, 2014-11-10 This volume examines the distinctive and highly problematic ethical questions surrounding conflict archaeology. By bringing together sophisticated analyses and pertinent case studies from around the world it aims to address the problems facing archaeologists working in areas of violent conflict, past and present. Of all the contentious issues within archaeology and heritage, the study of conflict and work within conflict zones are undoubtedly the most highly charged and hotly debated, both within and outside the discipline. Ranging across the conflict zones of the world past and present, this book attempts to raise the level of these often fractious debates by locating them within ethical frameworks. The issues and debates in this book range across a range of ethical models, including deontological, teleological and virtue ethics. The chapters address real-world ethical conundrums that confront archaeologists in a diversity of countries, including Israel/Palestine, Iran, Uruguay, Argentina, Rwanda, Germany and Spain. They all have in common recent, traumatic experiences of war and dictatorship. The chapters provide carefully argued, thought-provoking analyses and examples that will be of real practical use to archaeologists in formulating and addressing ethical dilemmas in a confident and constructive manner.

Cultural Property Law and Restitution Irini A. Stamatoudi, 2011-01-01 This invaluable book, for the first time, brings together the international and European Union legal framework on cultural property law and the restitution of cultural property. Drawing on the author's extensive experience of international disputes, it provides a very comprehensive and useful commentary. Theories of cultural nationalism and cultural internationalism and their founding principles are explored. Irini Stamatoudi also draws on soft law sources, ethics, morality, public feeling and the role of international organisations to create a

complete picture of the principles and trends emerging today.

Handbook of Catchment Management Robert C. Ferrier, Alan Jenkins, 2009-09-11 This book addresses the fundamental requirement for an interdisciplinary catchment based approach to managing and protecting water resources that crucially includes an understanding of land use and its management. In this approach the hydrological cycle links mountains to the sea, and ecosystems in rivers, groundwaters, lakes, wetlands, estuaries and coasts forming an essential continuum directly influenced by human activity. The book provides a synthesis of current and future thinking in catchment management, and shows how the specific problems that arise in water use policy can be addressed within the context of an integrated approach to management. The book is written for advanced students, researchers, fellow academics and water sector professionals such as planners and regulators. The intention is to highlight examples and case studies that have resonance not only within natural sciences and engineering but with academics in other fields such as socio-economics, law and policy.

Nuclear Deterrence in the 21st Century Thérèse Delpech, 2012-03-28 Deterrence remains a primary doctrine for dealing with the threat of nuclear weapons in the 21st century. The author reviews the history of nuclear deterrence and calls for a renewed intellectual effort to address the relevance of concepts such as first strike, escalation, extended deterrence, and other Cold War-era strategies in today's complex world of additional superpowers, smaller nuclear powers, and nonstate actors.

The Balance of the Future Mark Reiner, 2005-06 Do you make decisions based upon assumptions? We all do. Assumptions are often based upon unexamined perceptions. Most of our perceptions are understood through duality--good/bad,

black/white, male/female. This book explores some of these perceptions. They hold a hidden key not only to our understanding of the past, but also to our possible future. The recognition of our global crisis is universal, whether conscious or subconsciously. This juncture holds the possibility of our remaining within our painful, self-destructive patterns, or of creating a glorious leap forward into a stable, free and peaceful world. This book offers an in depth look at our assumptions, shows how they have driven our history and may taint our future. In addition, opportunities are offered to enhance our individual and collective consciousness. Are we courageous enough to take them?

The Realist Tradition in International Relations Barry Scott Zellen, 2011-08-19 This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy, international relations, and strategic studies to the majestic breadth of the realist tradition that unifies them all. *The Realist Tradition in International Relations: The Foundations of Western Order* introduces the principal theorists who have shaped and defined the realist tradition. This once-dominant theory of international politics has reemerged to provide a shared foundation for understanding political theory, international relations theory, and strategic studies. The work is comprised of four volumes, each focusing upon a distinct period and the pivotal contributors writing in that era. Volume 1, *State of Hope*, looks at the classical era when chaos reigned supreme. Volume 2, *State of Fear*, goes through the early-modern period and the emergence of the modern state. Volume 3, *State of Awe*, explores the age of total war with its unprecedented dangers. Volume 4, *State of Siege*, examines the present era of insurgency and asymmetrical conflict. A truly monumental work, this sweeping study will surely foster a new appreciation of the rich tapestry of realist thought and its continuing relevance to the study of world politics.

The Prime of Miss Jean Brodie Muriel Spark, 2012-03-20 “A perfect book”—and basis for the Maggie Smith film—about a

teacher who makes a lasting impression on her female students in the years before World War II (Chicago Tribune). “Give me a girl at an impressionable age, and she is mine for life!” So asserts Jean Brodie, a magnetic, dubious, and sometimes comic teacher at the conservative Marcia Blaine School for Girls in Edinburgh. Brodie selects six favorite pupils to mold—and she doesn’t stop with just their intellectual lives. She has a plan for them all, including how they will live, whom they will love, and what sacrifices they will make to uphold her ideals. When the girls reach adulthood and begin to find their own destinies, Jean Brodie’s indelible imprint is a gift to some, and a curse to others. The Prime of Miss Jean Brodie is Spark’s masterpiece, a novel that offers one of twentieth-century English literature’s most iconic and complex characters—a woman at once admirable and sinister, benevolent and conniving. This ebook features an illustrated biography of Muriel Spark including rare photos and never-before-seen documents from the author’s archive at the National Library of Scotland.
