**Securing the Belt and Road Initiative** Alessandro Arduino,Xue Gong,2018-02-01 This collection explores the expansion of Chinese outbound investments, aimed to sustain the increased need for natural resources, and how they have amplified the magnitude of a possible international crisis that the People's Republic of China may face in the near future by bringing together the views of a wide range of scholars. President Xi's Belt and Road initiative (BRI), aimed to promote economic development and exchanges with China for over 60 countries, necessitates a wide range of security procedures. While the threats to Chinese enterprises and Chinese workers based on foreign soil are poised to increase, there is an urgent need to develop new guidelines for risk assessment, special insurance and crisis management. While the Chinese State Owned Enterprises are expanding their international reach capabilities, they still do not have the capacity to assure adequate security. In such a climate, this collection will be of profound value to policy makers, those working in the financial sector, and academics.

**Research** Pm Kasi,2009-07 For Students, Scholars, Researchers, Investigators, Trainees and Scientists. If I have seen a little further it is by standing on the shoulders of Giants. Isaac Newton. This book on research is an attempt to try to answer the basic fundamental questions that come to the minds of young students, researchers, scholars, investigators, trainees or scientists. It is an outcome of collaboration between 43 researchers from 11 different countries (Pakistan, India, United States, Iran, United Kingdom, Nepal, Canada, Greece, Poland, Japan and Australia): Achakzai AM, Afghan AK, Ahmed A, Ali D, Ans M, Asad RM, Ashfaq A, Butt NM, Farooq F, Fatima M, Gilani AI, Ibrahim M, Ishtiaq O, Janjua NZ, Kakisi O, Kasi PM, Kassi M, Kassi M, Khan SF, Khawar T, Kiani J, Kulkarni HS, Majeed A, Naqvi HA, Nawaz H, Oberoi DV, Qureshi SA, Rai AS, Rathore FA, Rehman R, Sabri AA, Saeed F, Shah M, Shankar R, Sharma A, Sherjeel SA, Shoraneh F, Siddiqui S, Syed FK, Szlufic S, Yaqoob N, Zafar A, Zaidi AH Although there is a lot of literature available to answer the queries that come to the mind of a young investigator, the language is often too complex and difficult to understand and thus, aversive. Some of these teaching materials sound more like experts talking to each other. This book would act as a catalyst in providing useful reviews and guidance related to different aspects of research for students who need to be inducted and recognized as an integral part of the research community. We hope researchers benefit from this endeavor of ours. E-mail: pashtoon.kasi@gmail.com Website: www.PromotingResearch.com

**Rethinking Education Across Borders** Uttam Gaulee,Shyam Sharma,Krishna Bista,2020-02-14 This book focuses on critical issues and perspectives concerning globally mobile students, aspects that have grown in importance thanks to major geopolitical, economic, and technological changes around the globe (i.e., in and across major origins and destinations of international students). Over the past few decades, the field of international higher education and scholarship has developed robust areas of research that guide current policy, programs, and pedagogy. However, many of the established narratives and wisdoms that dominate research agendas, scope, and foci have become somewhat ossified and are unable to reflect recent political upheavals and other changes (e.g. the Brexit, Trump era, and Belt and Road Initiative) that have disrupted a number of areas including mobility patterns and recruitment practices, understanding and supporting students, engagement of global mobile students with their local

counterparts, and the political economy of international education at large. By re-assessing established issues and perspectives in light of the emerging global/local situations, the contributing authors – all experts on international education – share insights on policies and practices that can help adapt to emerging challenges and opportunities for institutions, scholars, and other stakeholders in international higher education. Including theoretical, empirical, and practitioner-based methods and perspectives provided by scholars from around the world, the book offers a unique and intriguing resource.

**ReThinking Management** Wendelin Küpers,Stephan Sonnenburg,Martin Zierold,2017-02-27 This book assembles multi-disciplinary contributions to delve deeper into ReThinking Management. The first part provides some foundational considerations and inspirations. Further chapters offer more specific links to the arts and creativity sectors as well as empirical research and case reflections. ReThinking Management pursues the main idea that management theory is not merely a sub-discipline of economics, but rather a cross-disciplinary and critical field of research and practice, with a decidedly cultural perspective. While questioning the status and practices of conventional management, the book opens up for new understandings, turns and perspectives.

**Leaders Eat Last** Simon Sinek,2017-05-23 Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of Start With Why and Together is Better. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video Millenials in the workplace (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. Officers eat last, he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a Circle of Safety that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

Net Neutrality Compendium Luca Belli,Primavera De Filippi,2015-11-10 The ways in which Internet traffic is managed have direct consequences on Internet users' rights as well as on their capability to compete on a level playing field. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users' freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how does it relates to human rights and free competition and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group, established under the aegis of the United Nations Internet Governance Forum (IGF).
