Releasing the Prophetic Destiny of a Nation Dutch Sheets, Chuck Pierce, 2005-05 At the same moment, God issued a separate call to two men---prophet Chuck Pierce and pastor Dutch Sheets---to heal the United States. As a prophetic act to realign our country to His covenant plan, the duo rallied apostles, prophets and intercessors from state-to-state to break the grip of demonic strongholds. *Releasing the Prophetic Destiny of a Nation* is the remarkable story behind their 50-state roadtrip to restore revival to America. Endowed with God-given keys of authority to reconcile America to its heavenly mandate, the two chronicle their efforts to purge the land of territorial and generational sin. Now is the time and season for a warfare anointing to rest upon America.

Examples of topics covered include icons of Native culture, such as pow wows, Indian dancing, and tipi dwellings; Native art forms such as pottery, rock art, sandpainting, silverwork, tattooing, and totem poles; foods such as corn, frybread, and wild rice; and Native Americans in popular culture. Yoruba Creativity Toyin Falola, Ann Genova, 2005 In songs, dance and drama the fame of the Yoruba of Nigeria is firmly established and universally acknowledged. Also an established writing and literary tradition, the Yoruba have asserted themselves as a dominant force in the world of creativity. Such stars are represented here, as in the works of Wole Soyinka and Zulu Sofola. The future of language in the making of new idioms and dictionaries is also examined in an attempt to position the Yoruba and their cultures in the ever-changing world of cultural inventions.

Nano-Hype David M. Berube, 2009-12-04 Nanotechnology, the science of molecular engineering at the atomic scale, has captured the popular imagination. From movies to TV series to video games, utopian fantasies and horror scenarios involving nanotechnology have become a staple of the entertainment industry. The hyperbole surrounding this new technology comes not only from the media but also from scientists who exaggerate the anticipated benefits of nanotechnology to justify research funding, as well as from environmentalists and globalization opponents, who sometimes indulge in doom-and-gloom prophecies to advance their own agendas. The result is widespread misinformation and an uninformed public. In an effort to set the record straight, professor of communication studies David M. Berube has written this thoroughly researched, accessible overview of nanotechnology in contemporary culture. He evaluates the claims and counterclaims about nanotechnology by a broad range of interested parties including government officials and bureaucrats, industry leaders and entrepreneurs, scientists, journalists, and other persons in the media. Berube appraises programs and grand initiatives here and abroad, and he examines the environmental concerns raised by opponents, as well as the government and private responses to these concerns. With so much argumentation on both sides, it is difficult for anyone to determine what is true. *Nano-Hype* provides up-to-date, objective information to inform the public. Based on over a decade of research and interviews with many of the movers and shakers in nanotechnology, this critical study will help the reader separate the realistic prospects from the hype surrounding this important cutting-edge technology.

Native Americans Today Bruce E. Johansen, 2010-06-22 This engaging collection of Native American profiles examines these individuals' unique life experiences within the larger context of U.S. history. *Native Americans Today: A Biographical Dictionary* focuses on the lives of contemporary Native Americans. Such treatments are rare, as most Native American biographies are historical (pre-1900) and cover familiar figures. Profiles collected here are written to be enjoyable as well as instructive, presented as examples of personal storytelling that should be savored not only for their factual content, but also for the humanity they evoke. The book spotlights Native American lives in the United States and Canada, mainly after 1900, though a few older figures are included because their lives evoke strikingly modern themes. The author, an expert on all things Native American, knows (or knew) several of the people in the entries, adding a special vibrancy to the writing. Among those profiled are former U.S. Senator Ben Nighthorse Campbell, activist Eloise Cobell, and controversial political prisoner Leonard Peltier, as well as writers, artists, and musicians. The compilation also includes non-Native Americans whose lives and careers impacted Indian life.

Kahn, 2009-09-03 This book explores the crucial relationships between political leaders, public health officials, journalists, and others to see why leadership confusion develops. It then examines five recent emergencies--the 2001 anthrax attacks and 1993 cryptosporidium outbreak in the United States, the 2003 SARS outbreak in Toronto, the 2001 foot-and-mouth disease crisis, and the decade-long battle against Mad Cow Disease in the U.K.

Conformation in Fibrous Proteins and Related Synthetic Polypeptides R Fraser, 2012-12-02 *Conformation in Fibrous Proteins: And Related Synthetic Polypeptides* provides a comprehensive and critical account of conformation in fibrous proteins and synthetic polypeptides in the solid state. Physical methods of determining conformation are discussed, and relevant results from studies of synthetic polypeptides and fibrous proteins are presented. Comprised of 18 chapters divided into three sections, this book opens with a discussion on the theory and technique of X-ray diffraction applicable to the study of conformation in fibrous materials, along with electron diffraction, electron microscopy, optical diffraction, and infrared spectrophotometry. The procedures used for

conformation analysis and prediction are also outlined. The following chapters consider optimization techniques and other methods for elucidating conformation in fibrous proteins and synthetic polypeptides; the use of synthetic polypeptides as models of fibrous proteins; and conformation in fibrous proteins such as silks, collagens, myofibrillar proteins, and keratins. This monograph will be a valuable source of information for molecular biologists.

The Swimsuit Christine Schmidt, 2013-07-18 The Swimsuit: Fashion from Poolside to Catwalk documents the modern swimsuit's trajectory from men's underwear and circus/performance wear to its unique niche in world fashion. It emphasizes the relationship between fashion, media, celebrity, sport and the cultivation of the modern body. This fascinating book provides an historical, sociological and cultural context in which to view how the swimsuit - and Australia, the country that significantly influenced its modern form - migrated from the cultural and colonial periphery to the centre of international attention. In addition, the book offers new perspectives on national histories of the swimsuit and investigates how traditional European fashion centers have opened up to new markets and modes of living, bringing together influences from around the globe. The Swimsuit is essential reading for students, scholars, and the general reader interested in fashion, popular culture, history, media, sport, and gender studies.

King George V-Class Battleships Daniel Knowles, 2022-04-08 Following the First World War the major naval powers entered into an agreement restricting the construction of capital ships and limiting the numbers that signatories were allowed to maintain, so numerous ships were scrapped or disposed of and the majority of planned vessels were either cancelled whilst being built or never laid down. By the late 1920s the Royal Navy's battle force comprised of the two Nelson-class ships, the battlecruisers 'Hood', 'Renown' and 'Repulse', and 'Revenge' and Queen Elizabeth-class ships, all designed before the First World War. In 1928 the Royal Navy began planning a new class of battleships which was put on hold with the signing of the Treaty of London. In 1935, realising its battle fleet was becoming dated as other nations laid down new classes of battleships, the Royal Navy recommenced planning capital ships within treaty limitations. The result was the King George V-class battleships. Regarded by some as the worst new-generation battleships in the Second World War the King George V-class were Britain's most modern battleships during the conflict and saw action in some of the most famous engagements from the sinking of the 'Bismarck' in 1941 to the surrender of Japan in 1945. This book charts the story of the King George V-class from its conception and design through to the operational history of the ships in the class.

Sports Around the World: History, Culture, and Practice provides a unique, global overview of sports and sports cultures. Unlike most works of this type, this book provides both essays that examine general topics, such as globalization and sport, international relations and sport, and tourism and sport, as well as essays on sports history, culture, and practice in world regions—for example, Latin America and the Caribbean, the Middle East and North Africa, Europe, and Oceania—in order to provide a more global perspective. These essays are followed by entries on specific sports, world athletes, stadiums and arenas, famous games and matches, and major controversies. Spanning topics as varied as modern professional cycling to the fictional movie Rocky to the deadly ball game of the ancient Mayans, the first three volumes contain overview essays and entries for specific sports that have been and are currently practiced around the world. The fourth volume provides a compendium of information on the winners of major sporting competitions from around the world. Readers will gain invaluable insights into how sports have been enjoyed throughout all of human culture, and more fully comprehend their cultural contexts. The entries provide suggestions for further reading on each topic—helpful to general readers, students with school projects, university students and academics alike.
