Business Coaching and Training Noah Daniels, 2014-10-24 The economy goes up and down. Right now, it's not doing so well. In fact, most would say it has tanked. Managing your costs is important to your growth and survival, and when the economy is performing poorly, it is even more of a challenge. Experts say that 58% of companies have a shortfall in leaders and many companies are actually cutting their development budget as part of their cost cutting measures. Before you make that cut, you might want to think long and hard about whether that's the right choice for your business. When you take development away from the executives, it can be detrimental. Leading is actually special skill. A key leader can find a business coach a very helpful tool to navigate through the storm and continue to grow and prosper.

The Global Business of Coaching David Lines, Christina Evans, 2020-04-22 Coaching has become a global business phenomenon, yet the way that coaching has evolved and spread across the globe is not unproblematic. Some of these challenges include: different types/genres of coaching; understanding and relevance of different coaching philosophies and models in different cultural contexts; equivalency of qualifications and coach credentials, as well as questions over standards and governance, as part of a wider debate around professionalization. Coaching then, as with the transfer of knowledge and professionalization in other disciplines, is not immune to ethnocentricity. Through a combination of adopting a meta-analysis of coaching, supported with narratives of coaching practice drawn from different socio-political/cultural contexts, the aim of this book is to challenge current knowledge, understanding and norms of how coaching is, or should, be practised in different cultural contexts. This book will provide a foundation for further research in coaching as an academic field of study and as an emerging profession. It will resonate with critical scholars, coach educators, and coach practitioners who want to develop their praxis and enhance their reflexivity and be of interest to researchers, academics, and students in the fields of business and leadership, human resource development, organizational learning and development, mentoring and coaching.
