Latinos in American Football Mario Longoria,Jorge Iber,2020-02-28 In 1927 Cuban national Ignacio S. Molinet was recruited to play with the Frankford Yellow Jackets of the old NFL for a single season. Mexican national Jose Martinez-Zorrilla achieved 1932 All-American honors. These are the beginnings of the Latino experience in American Football, which continues amidst a remarkable and diversified setting of Hispanic nationalities and ethnic groups. This history of Latinos in American Football dispels the myths that baseball, boxing, and soccer are the chosen and competent sports for Spanish-surname athletes. The book documents their fascination for the sport that initially denied their participation but that could not discourage their determination to master the game.

MATERIALES CONVENCIONALES Y TECNOLÓGICOS PARA EL TRATAMIENTO EDUCATIVO DE LA DIVERSIDAD CARRETERO DÍAZ Miguel Ángel ,2018-05-22 Esta obra abarca una parte instrumental del máster, y se ocupa, en unos casos de recordar y en otros de proponer, la utilización de diversas herramientas tecnológicas que facilitan la comunicación didáctica del maestro con el alumno que presenta necesidades especiales diversas. Para lograr este objetivo proponemos el uso de diversos medios, y preferiremos en la mayoría de las ocasiones las adaptaciones o programas más sencillos, porque suelen ser los más útiles, no solo por su reducido coste, sino por la versatilidad de su aplicación. Desde la sencillez y la creatividad, esta obra ofrece la posibilidad de aplicar las enormes potencialidades que las nuevas tecnologías ofrecen en la mejora del proceso de la comunicación didáctica.

Search and research Ana GARCÍA-VALCÁRCEL,Francisco José GARCÍA PEÑALVO,Marta MARTÍN DEL POZO,2017-06-27 Descripción / Resumen (Inglés): The present volume represents a compilation of international teacher education practice and research with a focus on Teacher Education for

Contemporary Contexts. It draws upon the diverse educational perspectives, teaching procedures, knowledge, and situated contexts where the discipline takes shape. The sections of this book comprise research papers accepted for presentation during the 18th International Study Association on Teachers and Teaching (ISATT) Biennial Conference that will take place from July 3rd to July 7th in Salamanca, Spain. Around 300 delegates from 57 countries across the globe and a large Scientific Committee of 80 colleagues have contributed academically and professionally to support our ability to share the contents of this volume. The main conference topic is search and research. Searching is the action of looking carefully at people, objects, and situations in order to find something concealed or to discover something beyond the ordinary. This is what teachers do in their classrooms and, primarily, 'search' represents their endeavours to construct professional knowledge as a result of developing practice. Researching is systematic inquiry that intends to discover new knowledge and/or to refute educational theories, a process typically rendered by teacher educators and other researchers. The focus of this 18th biennial ISATT conference is to bring together both "search" and "research", connecting practice and theory (or 'praxis'), with the purpose of offering relevant solutions to realistic classroom problems. The editorial process followed three differentiated phases: The first phase required abstract submission with the purpose of being accepted for the conference. A double (or triple) blind review was conducted to evaluate whether the papers submitted were suitable for the conference. A rate of 87% of the papers were accepted for presentation. The second phase encouraged authors to voluntarily submit a full paper of 3,000 words. A total of 111 full papers were then subjected to an open review process with the main purpose of suggesting to authors ways of further improving the presentation of their valuable research. A third phase, not yet completed and therefore beyond the scope of this book, was the review and selection of the outstanding papers,

papers that were deemed eligible for the post-proceeding publication (i.e., less than 15% of the total). The central intent of the book is to contribute to fostering scholarly discussions and to inform future teaching trajectories, strengthen lines of research in teacher education and demonstrate the opportunities and constraints in our professional work. Its added value highlights the commonplace in international research that serves to depict how the field of teacher education is moving forward in an increasingly global society. All in all, teachers, teacher educators and researchers learn by effective communication processes, whether in in personal/professional interactions or in the use of digital technologies. Positive interactions lead to building strong communities of learners, which in turn, leads to the production of valuable knowledge and better understandings about learning and teaching. With the upcoming commemoration of its 800th anniversary in the year 2018, the University of Salamanca, as the oldest university in operation in Spain, is proud to host the ISATT 18th biennial conference and to support the exceptional work of many researchers in the field of Teacher Education by compiling and editing the work in this volume. Furthermore, the local Organizing Committee and the ISATT Executive Committee hope you will experience a rewarding intellectual experience as a result of your contributions and knowledge, as both academics and practitioners. Thank you very much for providing us this exciting opportunity to work with you. We warmly welcome you to Salamanca – a truly historic and a contemporary context! Descripción / Resumen (Español / Castellano): El presente volumen está integrado por una recopilación de prácticas e investigaciones internacionales de formación docente centradas en la formación de profesores en la sociedad actual. Se basa en las diversas perspectivas educativas, los procedimientos de enseñanza, conocimiento y contextos sociales. Las secciones de este libro comprenden trabajos de investigación aceptados para su exposición en las XVIII Conferencia Bienal Internacional de Estudios de Profesores y Enseñanza

(ISATT) que tendrá lugar del 3 al 7 de julio en Salamanca, España. Alrededor de 300 delegados de 57 países de todo el mundo y un gran Comité Científico de 80 colegas han contribuido académica y profesionalmente en favor de este evento. El tema principal de la conferencia es la búsqueda y la investigación. «Buscar» es la acción de mirar cuidadosamente a las personas, objetos y situaciones para encontrar algo escondido o descubrir algo más allá de lo ordinario. Esto es lo que los maestros hacen en sus clases y, sobre todo, la búsqueda representa sus esfuerzos para construir conocimiento profesional como resultado del desarrollo de la práctica cotidiana. La «investigación» es una investigación sistemática que pretende descubrir nuevos conocimientos y/o refutar teorías educativas, un proceso que suelen dar los educadores de profesores y de otros investigadores. El objetivo de esta 18ª conferencia ISATT es reunir tanto la «búsqueda» como la «investigación», conectando la práctica y la teoría (o praxis) con el propósito de ofrecer soluciones relevantes a los problemas reales de la clase. El proceso editorial siguió tres fases diferenciadas: 1. Requirió el envío de resúmenes con el propósito de que fuesen aceptados para la ser expuestos en la conferencia. Se realizó una revisión doble ciego (o triple) para evaluar si los artículos presentados eran adecuados. Se aceptó una tasa de 87% de los trabajos para su presentación. 2. La segunda fase requirió de los autores en envío en período voluntario de un trabajo completo de 3.000 palabras. Un total de 111 trabajos fueron sometidos a un proceso de revisión abierta con el propósito principal de sugerir a los autores formas de mejora. 3. Una tercera fase, aún inconclusa, y por lo tanto fuera del alcance de este libro, fue la revisión y selección de los documentos pendientes, los documentos que se consideraron electos para la publicación posterior al procedimiento (es decir, menos del 15% del total). La intención central de esta obra es contribuir a fomentar el debate académico e informar sobre futuras trayectorias de enseñanza, fortalecer las líneas de investigación en la formación del

profesorado y demostrar las oportunidades y limitaciones en nuestro ámbito. Su valor es el de destacar el lugar común en la investigación internacional que sirve para describir cómo el campo de la formación de maestros avanza en una sociedad cada vez más global. En general, los maestros, los educadores de educadores y los investigadores aprendan mediante procesos de comunicación eficaces, ya sea en interacciones personales/profesionales o en el uso de tecnologías digitales. Las interacciones conducen a la construcción de comunidades fuertes de estudiantes, que a su vez, conduce a la producción de conocimientos valiosos y mejores sobre el aprendizaje y la enseñanza. Con la próxima conmemoración de su 800 aniversario en el año 2018, la Universidad de Salamanca, como la decana de las españolas, se enorgullece en acoger la XVIII Conferencia Bienal de ISATT y apoyar el trabajo excepcional de muchos investigadores en el campo del Profesor Educación Investigador, editando la obra. Además, el Comité Organizador Local y el Comité Ejecutivo de ISATT esperan que experimente una lectura gratificante como resultado de sus contribuciones y conocimientos, tanto académicos como profesionales. Muchas gracias por brindarnos esta emocionante oportunidad de trabajar con usted. ¡Les damos la bienvenida a Salamanca un contexto verdaderamente histórico y a su vez contemporáneo!

Human Behavior in the Social Environment Rudolph Alexander, Jr.,2009-12-02 Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social enviroment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special

section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additonal higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

Ebola's Message Nicholas G. Evans,Tara C. Smith,Maimuna S. Majumder,2016-10-07 Interdisciplinary perspectives on the science, politics, and ethics of the 2013–2015 Ebola virus disease outbreak. The 2013–2015 outbreak of the Ebola virus disease (EVD) was a public health disaster: 28,575 infections and 11,313 deaths (as of October 2015), devastating the countries of Guinea, Liberia, and Sierra Leone; a slow and mismanaged international response; and sensationalistic media coverage, seized upon by politicians to justify wrongheaded policy. And yet there were also promising developments that may improve future responses to infectious disease epidemics: the UN Security Council's first involvement in a public health event; a series of promising clinical treatments and vaccines for EVD; and recognition of the need for a global public health system to deal with epidemics that cross national borders. This volume offers a range of perspectives on these and other lessons learned, with essays on the science, politics, and ethics of the Ebola outbreak. The contributors discuss topics including the virology and management of EVD in both rich and poor nations; the

spread of the disease (with an essay by a leader of Médecins Sans Frontières); racist perceptions of West Africa; mainstream and social media responses to Ebola; and the ethical issue of whether to run clinical trials of experimental treatments during an outbreak. Ant Colony Optimization Marco Dorigo,Thomas Stutzle,2004-06-04 An overview of the rapidly growing field of ant colony optimization that describes theoretical findings, the major algorithms, and current applications. The complex social behaviors of ants have been much studied by science, and computer scientists are now finding that these behavior patterns can provide models for solving difficult combinatorial optimization problems. The attempt to develop algorithms inspired by one aspect of ant behavior, the ability to find what computer scientists would call shortest paths, has become the field of ant colony optimization (ACO), the most successful and widely recognized algorithmic technique based on ant behavior. This book presents an overview of this rapidly growing

field, from its theoretical inception to practical applications, including descriptions of many available ACO algorithms and their uses. The book first describes the translation of observed ant behavior into working optimization algorithms. The ant colony metaheuristic is then introduced and viewed in the general context of combinatorial optimization. This is followed by a detailed description and guide to all major ACO algorithms and a report on current theoretical findings. The book surveys ACO applications now in use, including routing, assignment, scheduling, subset, machine learning, and bioinformatics problems. AntNet, an ACO algorithm designed for the network routing problem, is described in detail. The authors conclude by summarizing the progress in the field and outlining future research directions. Each chapter ends with bibliographic material, bullet points setting out important ideas covered in the chapter, and exercises. Ant Colony Optimization will be of interest to academic and industry researchers, graduate students, and practitioners who wish to learn how to implement ACO algorithms.

The Learning Habit Stephanie Donaldson-Pressman,Rebecca Jackson,Robert Pressman,2014-09-02 A groundbreaking approach to building learning habits for life, based on a major new study revealing what works – and what doesn't Life is different for kids today. This important and parent-friendly book presents new solutions based on the largest study of family routines ever conducted. The Learning Habit offers a blueprint for navigating the maze of homework, media use, and the everyday stress that families with school-age children face; turning those "stress times" into opportunities to develop the eight

critical skills kids will need to succeed in college and in the highly competitive job market of tomorrow – skills including concentration and focus, time management, decision-making, goal-setting, and self-reliance. Along with hands-on advice and compelling real-life case studies, the book includes 21 fun family challenges for parents and kids, bringing together the latest research with simple everyday solutions to help kids thrive, academically and beyond.

Envisioning Machine Translation in the Information Future John S. White,2003-07-31 Envisioning Machine Translation in the Information Future When the organizing committee of AMTA-2000 began planning, it was in that brief moment in history when we were absorbed in contemplation of the passing of the century and the millennium. Nearly everyone was comparing lists of the most important accomplishments and people of the last 10, 100, or 1000 years, imagining the radical changes likely over just the next few years, and at least mildly anxious about the potential Y2K apocalypse. The millennial theme for the conference, "Envisioning MT in the Information Future," arose from this period. The year 2000 has now come, and nothing terrible has happened (yet) to our electronic infrastructure. Our musings about great people and events probably did not ennoble us much, and whatever sense of jubilee we held has since dissipated. So it may seem a bit obsolete or anachronistic to cast this AMTA conference into visionary themes.

Radio's New Wave Jason Loviglio,Michele Hilmes,2013-06-19 Radio's New Wave explores the

evolution of audio media and sound scholarship in the digital age. Extending and updating the focus of their widely acclaimed 2001 book The Radio Reader, Hilmes and Loviglio gather together innovative work by both established and rising scholars to explore the ways that radio has transformed in the digital environment. Contributors explore what sound looks like on screens, how digital listening moves us, new forms of sonic expression, radio's convergence with mobile media, and the creative activities of old and new audiences. Even radio's history has been altered by research made possible by digital and global convergence. Together, these twelve concise chapters chart the dissolution of radio's boundaries and its expansion to include a wide-ranging universe of sound, visuals, tactile interfaces, and cultural roles, as radio rides the digital wave into its second century.

Mammalian Toxicology Mohamed Abou-Donia,2015-05-04 Mammalian Toxicology surveys chemical agents and examines how such chemicals impact on human health, emphasizing the importance in minimizing environmental exposure to chemical and physical hazards in our homes, communities and workplaces through such media as contaminated water, soil and air. Starting with the basic principles on a wide range of toxic agents, this textbook describes how they enter the body, their mechanisms of action once inside, and strategies for diagnosis, prevention and treatment. Topics covered include: General principles of toxicology: pharmacological and toxicological principles underpinning the study of toxicology, risk assessments and mechanisms of cell death Disposition: routes of chemical exposures, entry into the body and various tissues, storage, metabolic biotransformation and elimination, with examples from various toxicants. Toxic agents: the occurrences, disposition in the body, health effects, toxic mechanisms, antidotes and treatments of a

range of agents including pesticides, metals, solvents, gases, nanomaterials, food components and additives, pharmaceuticals, drugs of abuse, natural toxins, endocrine disruptors, radiation, and warfare weapons. Toxic effects: including neurotoxicity, developmental toxicity, immunotoxicity, teratogenecity, male and female reproductive toxicity, mutagenecity, carcinogenicity, pulmonary toxicity, cardiovascular toxicity, hepatotoxicity, gastrointestinal toxicity and cardiovascular toxicity Toxicology and society: epidemiological studies of chemical-induced diseases in human populations, and a vision for toxicology in the 21st century.
