Imaging of Parasitic Diseases Mohamed E. Abd El Bagi,Maurice C. Haddad,Jean C. Tamraz,2007-11-04 With parasitic diseases increasing worldwide it's vitally important that radiologists in particular stay up to date with developments. In this brilliantly useful volume, the authors cover the imaging findings for parasitic diseases that can affect the human body using modern imaging equipments. Every chapter consists of a short description of causative agent, epidemiology, clinical manifestations, laboratory tests, and imaging findings with illustrative examples of parasitic diseases.

**Dementia and Chronic Disease** Angela Georgia Catic,2020-06-11 This book is designed to guide all physicians in long-term care, in-, and outpatient settings who work with elders with co-current dementia and medical comorbidities. Chapters cover a wide range of challenging topics, including epidemiological data, evaluation and management techniques to optimize physical and cognitive function in patients with dementia, safety measures, and nonpharmacologic measures to support cognition. Chapters also discuss the unique aspects of managing the most common chronic diseases and the management of musculoskeletal pain in elders with dementia. Except for the introductory chapter, each chapter will include a case vignette to highlight some of the primary challenges of management of the particular chronic disease/condition in elders with dementia, making this an accessible and highly practical tool for medical professionals of all backgrounds. Written by experts in the field, Dementia and Chronic Disease is an excellent resource for all medical professionals treating patients with dementia, including geriatricians, family medicine physicians, social workers, nurses, hospitalists, and all others.

**Advances in Social and Occupational Ergonomics** Richard H.M. Goossens,Atsuo Murata,2019-06-06 This book reports on cutting-edge research on social and occupational ergonomics, presenting innovative contributions to the optimization of sociotechnical management systems related to organizational, policy, and logistical issues. It discusses timely topics related to communication, crew resource management, work design, participatory design, as well as teamwork, community ergonomics, cooperative work, and warning systems, and explores new work paradigms, organizational cultures, virtual organizations, telework, and quality management. The book also describes pioneering infrastructures implemented for different purposes such as urban, health, and enterprise, and examines the changing role of automated systems, offering innovative solutions that address the needs of particular populations. Based on the AHFE 2019 International Conference on Social and Occupational Ergonomics, held on July 24-28, 2019, Washington D.C, USA, the book provides readers with a comprehensive overview of the current challenges in both organizational and occupational ergonomics, highlighting key connections between them and underlining the importance of emotional factors in influencing human performance.

*Comprehensive Healthcare Simulation: Mastery Learning in Health Professions Education* William C. McGaghie,Jeffrey H. Barsuk,Diane B. Wayne,2020-03-10 This book presents the parameters of Mastery Learning (ML), an especially stringent variety of competency-based education that guides students to acquire essential knowledge and skill, measured rigorously against a minimum passing standard (MPS). As both a scholarly resource and a teaching tool, this is a “how to” book that serves as a resource for a wide variety of health professions educators. A seminal source of information and practical advice about ML, this book divided into five parts: Clinical Education in the Health Professions, The Mastery Learning Model, Mastery Learning in Action, Transfer of Training from Mastery Learning and The Road Ahead. Complete with high-quality images and tables, chapters take an in-depth look into ML principles and practices across the health professions. Specific educational content instructs readers on how to build and present ML curricula, evaluate short and long-run results, conduct learner debriefing and give powerful feedback, set learner achievement standards, and prepare faculty for new educational roles. An invaluable addition to the Comprehensive Healthcare Simulation Series, Mastery Learning in Health Professions Education is written and edited by leaders in the field for practicing clinicians in a variety of health professions.

**Angle of Repose** Wallace Stegner,2014-11-04 An American masterpiece and iconic novel of the West by National Book Award and Pulitzer Prize winner Wallace Stegner—a deeply moving narrative of one family and the traditions of our national past. Lyman Ward is a retired professor of history, recently confined to a wheelchair by a crippling bone disease and dependant on others for his every need. Amid the chaos of 1970s counterculture he retreats to his ancestral home of Grass Valley, California, to write the biography of his grandmother: an elegant and headstrong artist and pioneer who, together with her engineer husband, made her own journey through the hardscrabble West nearly a hundred years before. In discovering her story he excavates his own, probing the shadows of his experience and the America that has come of age around him.

**Curriculum Development for Medical Education** David E. Kern,Patricia A. Thomas,Mark T. Hughes,2009-10-22 Curriculum Development for Medical Education is designed for

use by curriculum developers and others who are responsible for the educational experiences of medical students, residents, fellows, and clinical practitioners. Short, practical, and general in its approach, the book begins with a broad overview of the subject. Each succeeding chapter covers one of the six steps: problem identification and general needs assessment, targeted needs assessment, goals and objectives, educational strategies, implementation, and evaluation. Additional chapters address curriculum maintenance, enhancement, and dissemination. The six-step approach outlined here has evolved over the past twenty years, during which time the authors have taught curriculum development and evaluation skills to faculty and fellows in the Johns Hopkins University Faculty Development Program for Clinician-Educators. Program participants have used the techniques described to develop curricula on such diverse topics as preclerkship skills building, clinical reasoning and shared decision making, outpatient internal medicine, musculoskeletal disorders, office gynecology for the generalist, chronic illness and disability, geriatrics for nongeriatric faculty, surgical skills assessment, laparoscopic surgical skills, cross-cultural competence, and medical ethics. This thoroughly revised edition includes a broad discussion of competencies mandated by the Accreditation Council for Graduate Medical Education and other bodies, current information on education technology, increased emphasis on scholarships related to curriculum development, and advice on obtaining institutional review board approval. Updated examples throughout the book illustrate major points. The expanded appendixes include samples of complete curricula and information on funding, faculty development, and curricular resources.

*Chia* Ricardo Ayerza,Wayne Coates,2022-03-15 One of the four main Aztec crops at the time of Columbus’s arrival in the New World, chia is now a forgotten food of the Americas. Chia seed oil offers the highest omega-3 fatty acid content available from plants, but today this species is known only for its use in chia pets. Yet pre-Columbian civilizations used chia as a raw material for medicines and nutritional compounds, while chia flour could be stored for years as a food reserve and was valued as a source of energy on long journeys. In this book, agronomist Ricardo Ayerza and agricultural engineer Wayne Coates trace the long and fascinating history of chia’s use, then reveal the scientific story of the plant and its modern potential. They compare fatty acid profiles of chia with our other major sources—fish oil, flaxseed, and marine algae—and provide evidence that chia is superior in many ways. Here are just some of the benefits that chia provides: – chia has the highest known percentage of alpha-linolenic acid, and the highest combined alpha-linolenic and linoleic fatty acid percentage of all crops – chia has more protein, lipids, energy, and fiber—but fewer carbs—than rice, barley, oats, wheat, or corn—and its protein is gluten-free – chia is an excellent source of calcium, phosphorus, magnesium, potassium, iron, zinc, and copper – chia is low in sodium: salmon has 78 times as much, tuna 237 times as much – chia exhibits no evidence of allergic response, even in individuals with peanut and tree-nut allergies – chia doesn't give off a “fishy flavor,” unlike some other sources of omega-3 fatty acid The need to balance the essential fatty acid content of the human diet, combined with the need for a safe, renewable, omega-3 fatty acid source, positions chia to become one of the world’s important crops. As this insightful study shows, current nutritional understanding provides an excellent opportunity to reintroduce this important food to the world.

**Psychology and Geriatrics** Benjamin A. Bensadon,2015-04-16 Psychology and Geriatrics demonstrates the value of integrating psychological knowledge and insight with medical training and geriatric care. Leading physician and geropsychologist contributors come together to share their collective wisdom about topics that are as emotionally uncomfortable as they are universally relevant. As the world struggles to respond to unprecedented gains in life expectancy and an explosion of new retirees living with chronic health conditions, this collaboration could not be more timely. This exceptional resource is, itself, evidence that physicians and psychologists can work together to optimize truly patient-centered geriatric care. Here at last is a scientifically rigorous, evidence-based response to the aging mind and body from those most expertly trained. Illustrates why and how psychologists must assume a more integrated role in meeting the health care needs of older patients Confronts emotionally laden topics such as cognitively impaired driving, caregiver burden, end-of-life communication, suicide, and systemic issues such as bias, payment, and the culture of medicine Challenges decades-long barriers to integration, from both physician and psychologist perspectives, suggesting how they can finally be overcome Provides an innovative, practical response to academic medicine's growing emphasis on psychological and behavioral science Demonstrates how health care reform creates a behavioral health niche that clinical psychologists are uniquely qualified to fill
