Museums, Monuments, and National Parks Denise D. Meringolo, 2012 The rapid expansion of the field of public history since the 1970s has led many to believe that it is a relatively new profession. In this book, Denise D. Meringolo shows that the roots of public history actually reach back to the nineteenth century, when the federal government entered into the work of collecting and preserving the nation's natural and cultural resources. Yet it was not until the emergence of the education-oriented National Park Service history program in the 1920s and 1930s that public history found an institutional home. Even then, tensions between administrators in Washington and practitioners on the ground at National Parks, monuments, and museums continued to redefine the scope and substance of the field. The process of definition persists to this day as public historians establish a growing presence in major universities throughout the United States and abroad. Book jacket.

**New Narratives** Ruth E. Page, Bronwen Thomas, 2011-12-01 Just as the explosive growth of digital media has led to ever-expanding narrative possibilities and practices, so these new electronic modes of storytelling have, in their own turn, demanded a rapid and radical rethinking of narrative theory. This timely volume takes up the challenge, deeply and broadly considering the relationship between digital technology and narrative theory in the face of the changing landscape of computer-mediated communication. *New Narratives* reflects the diversity of its subject by bringing together some of the foremost practitioners and theorists of digital narratives. It extends the range of digital subgenres examined by narrative theorists to include forms that have become increasingly prominent, new examples of experimental hypertext, and contemporary video games. The collection also explicitly draws connections between the development of narrative theory, technological innovation, and the use of narratives in particular social and cultural contexts. Finally, *New Narratives* focuses on how the tools provided by new technologies may be harnessed to provide new ways of both producing and theorizing narrative. Truly interdisciplinary, the book offers broad coverage of contemporary narrative theory, including frameworks that draw from classical and postclassical narratology, linguistics, and media studies.

*Aliens and Man* Jerome A. Kroth, 2010 When it comes to extraterrestrials, UFOs, crop circles, and ancient-astronaut literature, most intelligent readers are repulsed by New Age hype, turned off by Erik Van Daniken, flustered by blatant pseudo-science, and deeply chagrined at how even the History Channel got dragged into the tabloid and sensational. Yet many intelligent, open-minded readers harbor secret interests: in the Great Pyramid and how it was built, in mythic tales of sky gods coming and going, from Ezekiel to the Rig-Veda. They are awed by the intricate fractals in crop circles, and they more than take notice when a NASA astronaut says he was trailed in space by UFOs. That questioning readership, however, swims in a vast sea of agnosticism—curious but not convinced. And there just aren't any books for them. None they can trust. None that reaches them. None that transcends tabloid fantasies to authentically treat issues with enough dispassion and scholarly erudition not to insult their intelligence. Here, Dr. Kroth gives the run-down on a wide range of evidence, and ponders how reliable any of it may be. Readers are left with all the elements to form their own equation.

*The Source Field Investigations* David Wilcock, 2012-07-31 Prepare yourself for a revealing tour through the most incredible scientific mysteries of the world with your guide David Wilcock, the New York Times bestselling author of *Awakening in the Dream*. More than two million people have seen David Wilcock's incredible tour of the 2012 prophecies in his Internet documentary, *The 2012 Enigma*. Now, he expands his vision with a cutting-edge investigation into alternative sciences with deep insights into what is coming in our immediate future. A stunning synthesis of hidden science and lost prophecies, *The Source Field Investigations* exposes DNA transformation, wormholes, ancient conspiracies, the Maya calendar, and a new model of galactic energy fields triggering mental, biological, and spiritual evolution. Unlike the apocalyptic viewpoints depicted in big-budget disaster films, Wilcock believes that 2012 will be a watermark for widespread acceptance of a greater reality—and here, he lays out the blueprints for such a Golden Age.

*The Chatelaine of La Trinité (Classic Reprint)* Henry B. Fuller, 2015-07-15 Excerpt from *The Chatelaine of La Trinite* Neither of these, however, had interfered with her brief inspection of the shiny little red book which she still held in her hand, and which she was just on the point of passing back to her companion with a smile that was more or less arch, and which a shade of deference prevented, perhaps, from being a trifle quizzical. This person, a young lady whose general effect was that of bright and restless elegance, took back the volume with the least show of embarrassment, laid it on top of the parasol, and, giving the Chatelaine a quick interrogatory glance, seemed to put herself unreservedly into her friend's hands. She had purchased the book three days before in Paris; it contained a list of acceptable inns, a sectional map capable of being extended far beyond the cover inclosing it, a thoughtful essay on Alpine geology, and other features of interest to the conscientious and determined tourist. But Miss West now promptly and definitively renounced it, with an instant apprehension that the Chatelaine had tacitly undertaken to make any such commonplace assistance superfluous. And this, in effect, was what the Chatelaine's smile really amounted to. She lightly threw the book of ready reference aside, picked up her parasol again, gaily extended it toward the long-drawn panorama of the Bernese Oberland, in discreet burlesque of that didactic person through whom pointer and blackboard complement each other, and proceeded to an immediate redemption of her promise. **The Ascension Mysteries** David Wilcock,2017-08-15 From the New York Times bestselling author of Awakening in the Dream comes a book that will take readers on a surprising and enthralling journey through the history of the universe, exploring the great cosmic battle surrounding our own ascension. David Wilcock's previous New York Times bestsellers, The Source Field

Investigations and The Synchronicity Key, used cutting-edge alternative science to reveal oft-hidden truths about our universe. In The Ascension Mysteries, David takes us on a gripping personal journey that describes the secret cosmic battle between positive and negative happening every day, hidden in both the traumas of our own lives and the world's headlines. Through his contact with a positive higher intelligence behind the UFO phenomenon, groundbreaking scientific information, and data from high-ranking government whistle-blowers, David reveals that the earth is now on the front lines of a battle that has been raging between positive and negative extraterrestrials for hundreds of thousands of years. The Ascension Mysteries explores the towering personal obstacles David overcame to unlock the great secrets of our universe and looks ahead to what this battle means for each of us personally. By unifying ancient texts from a variety of religions with scientific data and insider testimony, David presents a stunning conclusion—that Earth is on the verge of a massive cosmic event that will transform matter, energy, consciousness, and biological life as we now know it and will utterly defeat the great villains of our time.

**Cultural Production in Virtual and Imagined Worlds** Tracey Bowen, Mary-Lou Nemanic, 2009-12-14 Cultural Production in Virtual and Imagined Worlds foregrounds how the two important fields of visual culture and Internet culture interact. This collection of essays explores the intersections, overlaps and disparities in terms of how the two discourses illuminate our everyday negotiations as we become increasingly dependent on the Internet and virtual/visual imaginings for constructing who we are. What is being examined here are the ways in which we use visual/virtual lenses to see the world both individually and collectively. This book represents a transnational effort that began as a series of conversations during the Mid Atlantic Popular/American Culture conferences from 2005–2009. The editors, a Canadian and an American, have included contributors across national and geographic contexts. Cultural Production is aimed at raising questions, crossing borders and presenting points of departure for future scholarship in the relatively new and very rapidly changing disciplines of visual and virtual cultures. Our critical approach to this study includes viewing Internet images as contested sites of cultural activity and also as sites that advance ideologies related to cultural transformation.
