With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

*After the Dance, the Drums Are Heavy* Rebecca Dirksen, 2020-01-29 Haitian carnival offers a lens into popular power and politics. Political demonstrations in Haiti often manifest as musical performances. Studying carnival and political protest side by side brings insight to the musical engagement that ordinary citizens and celebrity musicians often cultivate and revere in contemporary Haiti. This book explores how the self-declared president of konpa Sweet Micky (Michel Martelly) rose to the nation's highest office while methodically crafting a political product inherently entangled with his musical product. It offers deep historical perspective on the characteristics of carnivalesque verbal play and the performative skillset of the artist (Sweet Micky) who dominated carnival for more than a decade including vulgarities and polemics. It moreover demonstrates that the practice of leveraging the carnivalesque for expedient political function has precedence in Haiti's history. Yet there has been profound resistance to this brand of politics led by many other high-profile artists, including Matyas and Jòj, Brothers Posse, Boukman Eksperyans, and RAM. These groups have each released popular carnival songs that have contributed to the public's discussions on what civic participation and citizenship in Haiti can and should be. Author Rebecca Dirksen presents an in-depth consideration of politically and socially engaged music and what these expressions mean for the Haitian population in the face of challenging political and economic circumstances. *After the Dance, the Drums Are Heavy* centers the voices of Haitian musicians and regular citizens by extensively sharing interviews and detailed analyses of musical performance in the context of contemporary events well beyond the musical realm--

**Bad Gays** Huw Lemmey, Ben Miller, 2023-05-30 An unconventional history of homosexuality We all remember Oscar Wilde, but who speaks for Bosie? What about those 'bad gays' whose unexemplary lives reveal more than we might expect? Many popular histories seek to establish homosexual heroes, pioneers, and martyrs but, as Huw Lemmey and Ben Miller argue, the past is filled with queer people whose sexualities and dastardly deeds have been overlooked despite their being informative and instructive. Based on the hugely popular podcast series of the same name, Bad Gays asks what we can learn about LGBTQ+ history, sexuality and identity through its villains, failures, and baddies. With characters such as the Emperor Hadrian, anthropologist Margaret Mead and notorious gangster Ronnie Kray, the authors tell the story of how the figure of the white gay man was born, and how he failed. They examine a cast of kings, fascist thugs, artists and debauched bon viveurs. Imperial-era figures Lawrence of Arabia and Roger Casement get a look-in, as do FBI boss J. Edgar Hoover, lawyer Roy Cohn, and architect Philip Johnson. Together these amazing life stories expand and challenge mainstream assumptions about sexual identity: showing that homosexuality itself was an idea that emerged in the nineteenth century, one central to major historical events. Bad Gays is a passionate argument for rethinking gay politics beyond questions of identity, compelling readers to search for solidarity across boundaries.

**Pandemic Exposures** Fassin Didier, Marion Fourcade, 2021-11 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at

odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

Why the West Can't Win Fadi Lama, 2023-05-01 Geopolitical upheaval has gripped the world since collapse of the Soviet Union. During the 1990s the West focused on eliminating the resurgence of Russia as a great power. This led to the assimilation of Warsaw Pact countries into NATO, two Chechen wars, and political systems in the Central Asian republics aligned with the West. Russia's economic destruction was managed by the Harvard boys' shock therapy, which left Russian resources in the control of a few oligarchs aligned with the West. By the end of the 1990s Russia was a weak, bankrupt country of marginalized influence in the world. Then the West's focus turned to China as a potential challenger to western global hegemony. It was thought to suffice to control global energy resources and sea-lanes to China to prevent China from challenging western global hegemony. Hence the first two decades of the millennium were focused on controlling West Asia and North Africa's energy resources. For most, the collapse of the Soviet Union in 1991 signaled the victory of the self-denominated Free World. *Why the West Can't Win*, however, addresses how events in the three following decades signal the end of a millennium of West European expansionism, a plundering and oppression initially labeled Crusades when the popes embodied political power, morphing into colonialism, then to the Free World when colonialism went out of fashion post-World War II, and at last to the "International Community" after the collapse of the Soviet Union. This book's geopolitical analysis includes a historical overview, an understanding of the financial systems established at the Bretton Woods conference that continue dominating the global economy, how they are used as a powerful geopolitical instrument, an economic analysis based on real goods production, global energy dynamics, alliances and strategies of key global players. It addresses the emerging division of the world into two geopolitical groups: Western Europe, North America, Australia, New Zealand and Africa, Asia and Latin America. The current global geopolitical clash is in essence a struggle between the colonial powers wishing to preserve the Bretton Woods system that allows siphoning wealth of nations, and sovereign nations striving for independence and an end to a millennium of oppression. This work compares the geopolitical forces since the turn of the millennium with a view to providing insight into their relative strengths and the likely outcome of this struggle.

*Human Resource Management* David A. DeCenzo, Stephen P. Robbins, 1998-12-18 Over the past decade, management practice has gone through dramatic changes. Workforce diversity, downsizing, reengineering, total quality management, outsourcing, and rediscovering the importance of satisfying the customer, all has a significant impact on Human Resources. The new Sixth Edition of De Cenzo/Robbins' *Human Resource Management* features a current, real-world perspective that gives readers a crystal-clear picture of what today's HRM is really like. Emphasizing the application of theory, the Sixth Edition carefully integrates real examples with the most up-to-date information available.

**Catastrophic Incentives** Jeff Schlegelmilch, Ellen Carlin, 2023-10-03 Societies are vulnerable to any number of potential disasters: earthquakes, hurricanes, infectious diseases, terrorist attacks, and many others. Even though the dangers are often clear, there is a persistent pattern of

inadequate preparation and a failure to learn from experience. Before disasters, institutions pay insufficient attention to risk; in the aftermath, even when the lack of preparation led to a flawed response, the focus shifts to patching holes instead of addressing the underlying problems. Examining twenty years of disasters from 9/11 to COVID-19, Jeff Schlegelmilch and Ellen Carlin show how flawed incentive structures make the world more vulnerable when catastrophe strikes. They explore how governments, the private sector, nonprofits, and academia behave before, during, and after crises, arguing that standard operational and business models have produced dysfunction. Catastrophic Incentives reveals troubling patterns about what does and does not matter to the institutions that are responsible for dealing with disasters. The short-termism of electoral politics and corporate decision making, the funding structure of nonprofits, and the institutional dynamics shaping academic research have all contributed to a failure to build resilience. Offering a comprehensive and incisive look at disaster governance, Catastrophic Incentives provides timely recommendations for reimagining systems and institutions so that they are better equipped to manage twenty-first-century threats.

**How to Be Everything** Emilie Wapnick, 2017-05-02 What do you want to be when you grow up? It's a familiar question we're all asked as kids. While seemingly harmless, the question has unintended consequences. It can make you feel like you need to choose one job, one passion, one thing to be about. Guess what? You don't. Having a lot of different interests, projects and curiosities doesn't make you a jack-of-all-trades, master of none. Your endless curiosity doesn't mean you are broken or flaky. What you are is a multipotentialite: someone with many interests and creative pursuits. And that is actually your biggest strength. How to Be Everything helps you channel your diverse passions and skills to work for you. Based on her popular TED talk, Why some of us don't have one true calling, Emilie Wapnick flips the script on conventional career advice. Instead of suggesting that you specialize, choose a niche or accumulate 10,000 hours of practice in a single area, Wapnick provides a practical framework for building a sustainable life around ALL of your passions. You'll discover:

- Why your multipotentiality is your biggest strength, especially in today's uncertain job market.
- How to make a living and structure your work if you have many skills and interests.
- How to focus on multiple projects and make progress on all of them.
- How to handle common insecurities such as the fear of not being the best, the guilt associated with losing interest in something you used to love and the challenge of explaining what you do to others.

Not fitting neatly into a box can be a beautiful thing. How to Be Everything teaches you how to design a life, at any age and stage of your career, that allows you to be fully you, and find the kind of work you'll love.
