Richard Weitz

Global Security Watch—China Richard Weitz, 2013-07-10 This book presents a comprehensive overview of China's main foreign and defense policies, providing students, policy makers, and general readers with an up-to-date assessment of this most important country. **Global Security Watch—China** presents a comprehensive overview of the main foreign and defense policies of the People's Republic of China, emphasizing the political-military developments in the modern era since the 1989 Tiananmen Square incident. It provides a historical overview in the first chapter, followed by information on the domestic factors that affect Chinese national security, such as economics, society, and politics; China's external objectives; its global energy strategy; and its defense policies and security objectives. Drawing upon a wide variety of domestic and foreign primary sources, the work details China's policies and its relationships with the United States, Europe, the Middle East, Latin America, Asia, and Eurasia. It includes biographical sketches of select individuals of importance to modern Chinese history, such as Mao Zedong and Deng Xiaoping. Appropriate for audiences ranging from university students to policy makers to general readers, this book is an excellent resource for academic libraries and suitable as a textbook for courses on contemporary Chinese politics and international relations.

Stripe Rust Xianming Chen, Zhensheng Kang, 2017-07-11 This book comprehensively introduces stripe rust disease, its development and its integral control. Covering the biology, genetics, genome, and functional genomics of the pathogen, it also discusses host and non-host resistance, their interactions and the epidemiology of the disease. It is intended for scientists, postgraduates and undergraduate studying stripe rust, plant pathology, crop breeding, crop protection and

agricultural science, but is also a valuable reference book for consultants and administrators in agricultural businesses and education.

Taiwan's Economic Transformation in Evolutionary Perspective

Fu-Lai Tony Yu, 2007 Since the end of the Second World War, Taiwan has transformed in around 60 years time from a farmland to a high tech industrial economy. This book examines entrepreneurship, innovative systems and government policies in Taiwan.

Women in China from Earliest Times to the Present Robin

Yates, 2009-07-31 This essential reference work is an alphabetic listing, with an extensive index, of more than 2500 citations of books, chapters in books, and articles, and 100+ dissertations in all social science and humanities disciplines relating to women in China from earliest times to today.

Contingent States William A. Callahan, 2004 In the 1990s, Greater China became the subject of debate as the site of either the danger of the “China threat” or the promise of Confucian capitalism. William A. Callahan argues that Greater China presents challenges not only to economic and political order but also to international relations theory. In fact, Greater China, though absent from geopolitical maps and international law, is very much present in economic and cultural exchange and exemplifies the contingent state of international politics. Callahan deconstructs the mainstream geopolitical and political-economic understandings of Greater China, tracing its emergence through an ethnographic analysis of four political “problems” in East Asia: the South China Sea disputes, Sino-Korean relations, the return of Hong Kong, and cross-straits relations. Callahan shows how bureaucrats, outlaws, tycoons, academics, workers, politicians, and hooligans alike produce Greater China through networks of relations in local, national, regional, global, and transnational space. Finally,

Contingent States reveals how each of the “problems” provoked theoretical innovations that depart from standard conceptions of sovereignty, democracy, and the nation-state. William A. Callahan is senior lecturer of international politics and deputy director of the Center for Contemporary Chinese Studies at the University of Durham, England, and the author of *Imagining Democracy: Reading “The Events of May” in Thailand and Pollwatching, Elections, and Civil Society in Southeast Asia*.

Chinese Globalization Jiaming Sun, William Scott Lancaster, 2013

This book examines the explicit effects of global connectivity on local culture and society in post-reform mainland China. It focuses on individual level globalization in China and how global socialization impacts local residents' behaviors, lifestyle, value orientation and the consequence of local transformation. Asking questions such as: What types of individual global connections have emerged and developed in China over the last three decades? What aspects of local transformations are influenced by such global connections? How does the impact of global connections vary across different aspects of local communities and institutions? Jiaming Sun uses an original micro-level relational approach to analyse how different types of individual global connections may make a difference and constitute certain outcomes of local transformation, the outcome being that global connections are capable of facilitating local transformation across different spatial, economic, and cultural settings.

The Political Economy of the Chinese Coal Industry Tim

Wright, 2012-03-12 Coal mining is one of China's largest industries, and provides an excellent case study through which to consider the broader issues of China's transition from socialism to capitalism,

focussing on the shift to a market economy, the rise of rural industry and the situation of China's working class. Coal was one of the pillars of the planned economy but, the author argues, its shift to market-based operations has been protracted and difficult, particularly in moving from the artificially low prices of the planned economy to market prescribed prices - a change that had a major impact on the industry's financial performance. The book goes on to consider the growth of small rural coal mines as part of the Township and Village Enterprises (TVEs) programme; these small mines have brought prosperity to areas where small manufacturing enterprises are not competitive, but at the same time have been the cause of many social and environmental problems. It also examines the situation of coal miners - arguably one of the most vulnerable segments of the Chinese working class - under socialism and under capitalism, paying particular attention to the issue of work safety and coal mine disasters. The book provides a comprehensive and coherent treatment of these issues from the establishment of the People's Republic up to 2010.

Human-Centred Economics Richard Samans, 2023-12-02 This open access book examines the chronic underperformance of economies with respect to inclusion, sustainability and resilience. It finds that the standard liberal economic growth and development model has evolved over the past century in a fundamentally unbalanced manner that underemphasizes the crucial role of institutions – legal norms, policy incentives and public administrative capacities – in translating market-based growth in the production of goods and services into broad and sustainable gains in social welfare at the household level. Correcting this imbalance of emphasis in economic theory and policy between markets and institutions, production and distribution, and national income and household living standards is the single most

important step required to transcend 20th century trickle-down “neoliberalism” and replace it with a more human-centred model of economic progress in the 21st century. The book breaks new ground by integrating the principal institutional dimensions of the social contract into the heart of macroeconomic theory and presenting extensive corresponding reforms of domestic and international economic policy to refocus them on the median living standards, rather than primarily aggregate wealth or GDP, of nations. This is the bottom-line measure of national economic performance, and it depends on the strength of both markets of exchange and institutions in such areas as labour and social protection, financial and corporate governance, competition and rents, anti-corruption, infrastructure and basic necessities, environmental protection, education and skilling, etc. Extensive comparative data are presented demonstrating that countries at every level of economic development have ample policy space to narrow their “welfare gaps” – their underperformance on these and other key aspects of household living standards relative to the frontier of leading policy practice in peer countries.

Chinese Politics in the Xi Jinping Era Cheng Li, 2016-10-18

Chinese politics are at a crossroads as President Xi Jinping amasses personal power and tests the constraints of collective leadership. In the years since he became general secretary of the Chinese Communist Party in 2012, Xi Jinping has surprised many people in China and around the world with his bold anti-corruption campaign and his aggressive consolidation of power. Given these new developments, we must rethink how we analyze Chinese politics—an urgent task as China now has more influence on the global economy and regional security than at any other time in modern history. *Chinese Politics in the Xi Jinping Era* examines how the structure and dynamics of party

leadership have evolved since the late 1990s and argues that inner-party democracy—the concept of collective leadership that emphasizes deal making based on accepted rules and norms—may pave the way for greater transformation within China's political system. Xi's legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world's most populous and increasingly pluralistic country. Cheng Li also addresses the recruitment and composition of the political elite, a central concern in Chinese politics. China analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th Central Committee, including tables and charts detailing their family background, education, occupation, career patterns, and mentor-patron ties.

Popular Pleasures Paul Duncum, 2021-08-26 Today's many popular aesthetic pleasures have a very long history. Paul Duncum considers the historical critical discourses, and socio-political issues raised by aesthetic pleasures in fifteen thematic chapters. Using illustrative examples from the past, present, and across cultures, he challenges the idea of any decline of cultural standards and argues that no grounds exist for cultural pessimism. Refusing to condemn popular culture on the basis of taste, he reserves critique for the socio-political ideologies aesthetics invariably serve. Art history, film, cultural studies, and philosophical aesthetics are each employed to show that the sensory/emotional lures of today's popular culture are mostly identical to those of premodern fine art. They include the violent, the horrific, the sentimental, the exotic, the erotic, and the humorous. Some of these pleasures derive from our evolutionary biology; they are all an important part of what it means to be human, and central to understanding contemporary society. Examples are wide-ranging,

including British seaside postcards, Disney films, Nazi propaganda, burlesque, modern advertising, as well as many exemplars of fine art. The book reveals fresh insights for all those studying visual culture, art history, aesthetics, media studies, and media and art education.

China-Taiwan Rapprochement Min-Hua Chiang, 2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China. It goes beyond a consideration of trade and investment flows, and discusses also the large population flows, the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level. It considers the impact of growing economic integration on society and politics, assesses how China-Taiwan economic integration is affecting the East Asian region more widely, and explores the implications for international relations, including the United States dominance in the region. Overall, the book presents a comprehensive analysis of all the issues.

China's Economic Challenge: Unconventional Success Albert Keidel, 2022-03-23 This book analyzes economic strategies responsible for China's 40 years of 40-fold growth, suggesting how such strategies might be applied elsewhere. It combines a seven-chapter chronological analysis of China's growth with three additional chapters on the government's leadership role, success in poverty reduction, and China's combined international finance and trade experience. The book recaps why China's success challenges the United States and the field of development economics. One of its emphases, the 1980s, reports how generous rural price and land-tenure reforms caused a rural income boom that threatened urban subsidized livelihoods and underpinned consequent violence. It describes how China will likely face a similar challenge moving forward, during the planned merger

of rural and urban workforces. The book includes an analysis of the US-China trade war and China's economic prospects in the wake of COVID-19. It is a clear and timely account for anyone interested in understanding the institutions and policies responsible for China's successful development and its likely continuation.

Unsettling the Bildungsroman Stella Bolaki, 2011 *Unsettling the Bildungsroman* combines genre and cultural theory and offers a cross-ethnic comparative approach to the tradition of the female novel of development and the American coming-of-age narrative. Examines the work of Jamaica Kincaid, Sandra Cisneros, Maxine Hong Kingston, and Audre Lorde.

Illicit Transnational Businesses in a Global Economy: How Criminals and Terrorists Pay the Bills Andre Keuck, 2009-10-08 This writing examines the structures and procedures of illicit businesses: the narcotics trade, arms smuggling, and human trafficking, and discuss their operations within a legal and financial context. Subsequent sections explore the thread that ties all of these enterprises together: money laundering (ML). It looks at practices money launderers use to mask illegal income; and then describes the anti-money laundering (AML) and countering of terrorist financing (CTF)-oriented legal mechanisms that are used to combat them, with an emphasis on UK and US law. The final section considers the status of the techniques used to counter the flow of illegal money, and makes recommendations for their improvement.

Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14 This volume examines contemporary diplomatic, economic, and security competition between China and Japan in the Asia-Pacific region. The book outlines the role that Sino-

Japanese competition plays in East Asian security, an area of study largely overlooked in contemporary writing on Asian security, which tends to focus on US–China relations and/or US hegemony in Asia. The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinzō Abe, and regional security dynamics within and between Asian states/institutions since 2012. It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region. In doing so, the volume draws on a levels of analysis approach to demonstrate the value in looking at security in the Asia-Pacific from a regional rather than global perspective. The vast majority of existing research on the region's security tends to focus on great power relations and treats Asia as a sub-region within the larger global security architecture. In contrast, this volume shows how competition between the two largest Asian economies shapes East Asia's security environment and drives security priorities across Asia's sub-regions. As such, this collection provides an important contribution to discussion on security in Asia; one with potential to influence both political and military policy makers, security practitioners, and scholars. This book will be of much interest to students of Asian politics, regional security, diplomacy, and international relations.

Contemporary Urban Youth Culture in China Jing

Sun,2019-12-01 In Contemporary Urban Youth Culture in China: A Multiperspectival Cultural Studies of Internet Subcultures, Jing Sun explores contemporary Chinese urban youth culture through analyses of three Chinese Internet subcultural artifacts--A Bloody Case of a Steamed Bun, Cao Ni Ma, and Du Fu Is Busy. Using Douglas Kellner's (1995) multiperspectival cultural studies (i.e., critical theory and critical media literacy) as the theoretical framework, and diagnostic

critique and semiotics as the analytical method, Sun examines three general themes--resistance, power relations, and consumerism. The power of multiperspectival cultural studies, an interdisciplinary inquiry, lies in its potentials to explore contemporary Chinese urban youth culture from multiple perspectives; explore historical backgrounds and complexity of cultural artifacts to understand contradictions and trajectories of contemporary Chinese urban youth culture; recognize alternative medias as a space for contemporary urban Chinese youth to express frustrations and dissatisfactions, to challenge social inequalities and injustices, and to create dreams and hopes for their future; recognize that the intertextuality among cultural artifacts and subcultures creates possibilities for Chinese urban youth to invent more alternative media cultures that empower them to challenge dominations, perform their identities, and release their imagination for the future; invite Chinese youth to be the change agents for the era but not to be imprisoned by the era; and overcome misunderstanding, misrepresentation, or underrepresentation of contemporary Chinese urban youth cultural texts to promote linguistic and cultural diversity in a multicultural, multilingual, and multiracial world. Sun argues that contemporary urban youth need to obtain critical media literacy to become the change agents in contemporary China. They need to be the medium of cultural exchanges in the multicultural, multilingual, and multiracial world. In order to best assist contemporary Chinese urban youth in expressing their voices, portraying their hopes, and performing their historical responsibilities as change agents, Sun sincerely hopes more research will be done on the contemporary Chinese urban youth culture, especially on its contradictions and trajectories, with the intent to shed light on more richly textured, nuanced, and inspiring insights into the

interconnection between contemporary Chinese urban youth and media power in an increasingly multicultural, multilingual, and multiracial world.

Contemporary Computer-Assisted Language Learning Michael Thomas, 2012-12-27 A state of the art reference volume on contemporary computer-assisted language learning, including chapters on research and methodology by leading international figures in the field.

Racism Postcolonialism Europe Graham Huggan, Ian Law, 2022-04-01 Racism Postcolonialism Europe turns the postcolonial critical gaze that had previously been most likely to train itself on regions other than Europe, and sometimes those perceived to be most culturally or geographically distant from Europe, back on Europe itself. The book argues that racism is alive and dangerously well in Europe, and examines this racism through the lens of postcolonial criticism. Postcolonial racism can be a racism of reaction, based on the perceived threat to traditional social and cultural identities; or a racism of (false) respect, based on mainstream liberals' desire to hold at arm's length 'different' cultures they are anxious not to offend. Most of all, postcolonial racism, at least within the contemporary European context, is a racism of surveillance, whereby 'foreigners' become 'aliens', 'protection' disguises 'preference', and 'cultural difference' slides into 'racial stigmatization' --all in the interests of representing the European people, which is a very different entity to the European population as a whole. Boasting a broad multidisciplinary approach and a range of distinguished contributors - including Philomena Essed, Michel Wieviorka and Griselda Pollock – Racism Postcolonialism Europe will be required reading for scholars and students of race, postcolonial studies, sociology, European history and

literary and cultural studies.

The Citizen and the Chinese State Perry Keller, 2017-03-02 This volume addresses several core questions regarding the nature of law in China and its future development. In particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet, as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity.
