**Hypoxia and Exercise** Robert Roach,Peter D. Wagner,Peter Hackett,2007-04-03 The 14th volume in the series will focus on cutting edge research at the interface of hypoxia and exercise. The work will cover the range from molecular mechanisms of muscle fatigue and muscle wasting to whole body exercise on the world's highest mountains. State of the art papers on training at high altitude for low altitude athletic performance will also be featured.

**Rethinking Rape Law** Clare McGlynn,Vanessa E. Munro,2010-07-12 *Rethinking Rape Law* provides a comprehensive and critical analysis of contemporary rape laws, across a range of jurisdictions. In a context in which there has been considerable legal reform of sexual offences, *Rethinking Rape Law* engages with developments spanning national, regional and international frameworks. It is only when we fully understand the differences between the law of rape in times of war and in times of peace, between common law and continental jurisdictions, between societies in transition and societies long inured to feminist activism, that we are able to understand and evaluate current practices, with a view to change and a better future for victims of sexual crimes. Written by leading authors from across the world, this is the first authoritative text on rape law that crosses jurisdictions, examines its conceptual and theoretical foundations, and sets the law in its policy context. It is destined to become the primary source for scholarly work and debate on sexual offences laws.

**Making Sense of Sexual Consent** Mark Cowling,Paul Reynolds,2017-03-02 The issue of sexual consent has stimulated much debate in the last decade. The contributors to this illuminating volume make sense of sexual consent from various conceptual standpoints: socio-legal, post-structural, philosophical and feminist. The volume comprises a range of studies, all based around consent within a specific context such as criminal justice, homosexuality, sadomasochism, prostitution, male rape, learning disabilities, sexual ethics, and the age of consent. It is the first collection to publish exclusively on issues of sexual consent, and both makes sense of sexual consent in contemporary society and guides debate towards better consent standards and decisions in the future. *Making Sense of Sexual Consent* will excite considerable discussion amongst academics, professionals and all those who think that freedom to make decisions about our sexual selves is important. It will set the agenda for debate on sexual consent into the 21st Century.

**Brainstem Control of Wakefulness and Sleep** Mircea M. Steriade,Robert W. McCarley,2013-03-09 This book is part of an ongoing history of efforts to understand the nature of waking and sleeping states from a biological point of view. We believe the recent technological revolutions in anatomy and physiology make the present moment especially propitious for this effort. In planning this book we had the choices of producing an edited volume with invited chapter authors or of writing the book ourselves. Edited volumes offer the opportunity for expression of expertise in each chapter but, we felt, would not allow the development of our ideas on the potential and actual unity of the field and would not allow the expression of coherence that can be obtained only with one or two voices, but which may be quite difficult with a chorus assembled and performing together for the first time. (Unlike musical works, there is very little precedent for rehearsals and repeated performances for authors of edited volumes or even for the existence of conductors able to induce a single rhythm and vision of the composition. ) We thus decided on a monograph. The primary goal was to communicate the current realities and the future possibilities of unifying basic studies on anatomy and cellular physiology with investigations of the behavioral and physiological events of waking and sleep. In keeping with this goal we cross-reference the basic cellular physiology in the latter chapters, and, in the last chapter, we take up possible links to relevant clinical phenomenology.

**Treating Violence** Tony Maden,2007-01-18 *Treating Violence* deals with the problem of violence by mental health patients. Over the last twenty years violence by the mentally ill has grown from just a peripheral concern to dominate debate about services. Scientific studies have established beyond reasonable doubt that mental disorders lead to violence in a minority of sufferers, whilst a series of homicide inquiries brought the media spotlight to bear on the real and imagined failings of mental health services. Consequently, health services have had violence risk assessment thrust upon them by worried managers and politicians. Clinicians were bewildered by the growing number of risk scales and they felt vulnerable to criticism when things went wrong. This book provides a way out of the confusion. It summarises the evidence, critically reviews risk assessment methods, and presents a strong case for improving management through structured clinical assessment. In this provocative and controversial account, standardised risk assessment is discussed in a critical, non-technical way, with a reminder that nobody can predict the future. There is advice for the clinician on when and how to use standardised assessment, along with a strong defence of clinical methods. Topics include: research on violence, mental health, and risk prediction; the ethics of violence risk assessment; homicide inquiries in the UK, with the results of a new study reviewing their findings; a discussion of professional attitudes towards violence risk; a description of risk assessment tools and recommendations for their use; and a strong defence of structured clinical assessment as the best way of managing risk. This is a book that should be read by anybody working in front line mental health services or criminal justice. It will also be of interest to those who have read the headlines about mental illness and violence and want to know

more about the facts and the controversies that lie behind them.

**Pulmonary Arterial Hypertension and Interstitial Lung Diseases** Robert P. Baughman,Roberto G. Carbone,Giovanni Bottino,2009-01-01 Interstitial lung disease (ILD) is a broad category of lung diseases that includes more than 150 disorders characterized by scarring or fibrosis of the lungs. In *Pulmonary Arterial Hypertension and Interstitial Lung Disease: A Clinical Guide*, renowned experts provide a state-of-the-art overview of the problems seen by physicians in the clinical management of ILDs. Divided into two sections, the first part provides an update on general issues and introduces both interstitial lung disease and associated pulmonary hypertension. A detailed analysis of the pathology of the various interstitial lung diseases is also provided. The second part addresses specific categories of disease. Bronchiolitis, hypersensitivity pneumonitis, and other conditions are covered, and the use of inspiratory and expiratory high resolution CT scan is discussed as well. This important new text is an invaluable resource for the practicing physician who must be aware of the broad and troubling manifestations of interstitial lung disease.

**Dynamic Risk Factors** Tony Ward,Clare-Ann Fortune,2018-10-25 Dynamic risk factors are the children of risk prediction. They were identified to help practitioners assess risk of recidivism and to set treatment targets likely to reduce reoffending. This resulted in the development of intervention programs designed to modify the characteristics of individuals and their environments associated with crime. The predictive nature of their legacy lies in their ability to provide reliable information about the likelihood of future reoffending. In this respect, dynamic risk factors are useful complements to static risk factors such as age, gender, and history of offending, and add incremental validity to recidivism prediction. Their treatment utility resides in the fact that practitioners increasingly rely on the identification of dynamic risk factors to direct correctional assessment and interventions. Thus, dynamic risk factors have a dual status. They are both useful predictors of reoffending and measures of risk status, and potential causes of reoffending, capable of serving an explanatory role as well as a predictive one. It is a simple and powerful conceptualization that has streamlined forensic and correctional research, program development, and the delivery of treatment. Despite its conceptual elegance we believe that the dual conceptualization of dynamic risk factors is problematic and these difficulties spill over into their role in assessment, assessment, treatment, and desistance contexts. In this publication, the nature and function of dynamic risk factors are investigated and their strengths and limitations identified. This book was originally published as a special issue of *Psychology, Crime and Law*.

**Temporomandibular Disorders** Daniel M. Laskin,Charles S. Greene (Orthodontist),William L. Hylander,2006 This multidisciplinary textbook presents a unique approach to diagnosis and management of the various temporomandibular disorders. Written by a large group of eminent researchers and clinicians, it links current scientific concepts of basic anatomy, physiology, biomechanics, and pathology of the temporomandibular joint with specific diagnostic and treatment protocols that are based on sound clinical data. Thus, in keeping with the current thrust in medicine and dentistry, the book provides access to the best available evidence so that clinicians can make informed rather than empirical decisions about what is appropriate therapy. Where lack of data or rapid changes in a particular discipline do not allow for evidence-based conclusions or recommendations, the book highlights the areas of agreement and disagreement in order to expose the deficiencies in our present knowledge base. In a field of treatment long associated with controversy, this book educates readers about which current practices of diagnosis and treatment are strongly supported by scientific research and which are supported only by practical experience and/or anecdotal evidence.
