Progress and Confusion Olivier Blanchard, Raghuram Rajan, Kenneth Rogoff, Lawrence H. Summers, 2016-04-22 Leading economists consider the shape of future economic policy: will it resume the pre-crisis consensus, or contend with the post-crisis “new normal”? What will economic policy look like once the global financial crisis is finally over? Will it resume the pre-crisis consensus, or will it be forced to contend with a post-crisis “new normal”? Have we made progress in addressing these issues, or does confusion remain? In April of 2015, the International Monetary Fund gathered leading economists, both academics and policymakers, to address the shape of future macroeconomic policy. This book is the result, with prominent figures—including Ben Bernanke, John Taylor, and Paul Volcker—offering essays that address topics that range from the measurement of systemic risk to foreign exchange intervention. The chapters address whether we have entered a “new normal” of low growth, negative real rates, and deflationary pressures, with contributors taking opposing views; whether new financial regulation has stemmed systemic risk; the effectiveness of macro prudential tools; monetary policy, the choice of inflation targets, and the responsibilities of central banks; fiscal policy, stimulus, and debt stabilization; the volatility of capital flows; and the international monetary and financial system, including the role of international policy coordination. In light of these discussions, is there progress or confusion regarding the future of macroeconomic policy? In the final chapter, volume editor Olivier Blanchard answers: both. Many lessons have been learned; but, as the chapters of the book reveal, there is no clear agreement on several key issues. Contributors Viral V. Acharya, Anat R. Admati, Zeti Akhtar Aziz, Ben Bernanke, Olivier Blanchard, Marco Buti, Ricardo J. Caballero, Agustín Carstens, Jaime Caruana, J. The State of Economics, the State of the World Kaushik Basu, David Rosenblatt, Claudia Sepulveda, 2020-01-07 Leading economists address the ongoing challenges to economics in theory and practice in a time of political and economic crises. More than a decade of financial crises, sovereign debt problems, political conflict, and rising xenophobia and protectionism has left the global economy unsettled and the ability of economics as a discipline to account for episodes of volatility uncertain. In this book, leading economists consider the state of their discipline in a world of ongoing economic and political crises. The book begins with three sweeping essays by Nobel laureates Kenneth Arrow (in one of his last published works), Amartya Sen, and Joseph Stiglitz that offer a summary of the theoretical foundations of modern economics—the twin pillars of general equilibrium theory and welfare economics. Contributors then turn to macroeconomic stabilization and growth and, finally, new areas of research that depart from traditional theory, methodology, and concerns: climate change, behavioral economics, and evolutionary game theory. The 2019 Nobel Prize laureates, Abhijit Banerjee, Esther Duflo, and Michael Kremer, contribute a paper on the use of randomized control trials in development economics. Contributors Philippe Aghion, Ingela Alger, Kenneth Arrow, Abhijit Banerjee, Kaushik Basu, Lawrence Blume, Guillermo Calvo, Francesco Caselli, Asli Demirgüç-Kunt, Shantayanan Devarajan, Esther Duflo, Samuel Fankhauser, James Foster, Varun Gauri, Xavier Gine, G  l Giraud, Gita Gopinath, Robert Hockett, Karla Hoff, Ravi Kanbur, Aart Kraay, Michael Kremer, David McKenzie, C  lestin Monga, Maurice Obstfeld, Hamid Rashid, Martin Ravallion, Amartya Sen, Luis Serv  n, Hyun Song Shin, Nicholas Stern, Joseph Stiglitz, Cass Sunstein, Michael Toman, J  rgen Weibull

Challenges for Global Macroeconomic Stability and the Role of the G7 Fabrizio Saccomanni, Simone Romano, 2017-05-18 In view of the Italian Presidency of the Group of Seven (G7) in 2017, the Istituto Affari Internazionali (IAI) conducted a research project on “Major Challenges for Global Macroeconomic Stability and the Role of the G7” together with a major policy think tank in each of the other G7 member countries: Center for International Governance Innovation (CIGI, Canada); Centre d’Etudes Prospectives et d’Information Internationales (CEPII,

France); Kiel Institute for the World Economy (IfW, Germany); Japan Institute for International Affairs (JIIA, Japan); Royal Institute for International Affairs (Chatham House, United Kingdom); Peterson Institute for International Economics (PIIE, United States). The project covered the following three subjects, representing major challenges for G7 policy-makers: macroeconomic policy coordination; international trade relations; global financial stability. Each participating think tank prepared a paper addressing all or some of the issues from the perspective of its own country, outlining areas of possible consensus for joint actions to be achieved within the Group and offering independent policy recommendations for the G7 deliberations. The seven papers have been presented at an international conference held in Rome on 27-28 March 2017 and have been discussed by a broad range of experts from academia and international institutions. The proceedings of the conference are presented in this volume. A broad consensus emerged from the T7 papers and the contributions of the discussants on the need to reduce policy uncertainty, preventing a resurgence of financial tensions in capital and foreign exchange markets. Boosting public investment in infrastructures and new technologies; defining a “better trade agenda” with adequate social protections and completing the financial regulatory reform were also indicated as top priorities for the G7.

Minority Language Planning and Micronationalism in Italy Paolo Coluzzi, 2007 Issues of language planning and minority nationalism or «micronationalism» are becoming increasingly important in a globalized world. Yet minority language planning in Italy and its relation to minority nationalism has so far attracted relatively limited academic attention, despite the particularly interesting changes that have taken place since Law 482 on the protection of minority languages was passed in 1999. This book presents the situation in Italy in three case studies and compares them with similar cases in Spain: Friulian (compared with Galician), Cimbrian (compared with Aranese) and Western Lombard (compared with Asturian). Analysis of these case studies is preceded by a clear and thorough introduction to terminology, legislation in the two countries, nationalism, the discipline of language planning and bilingual education, both in general terms and with specific reference to the Italian and Spanish cases. This first part introduces and defines the crucial distinction between minority and regional languages, between macro and micronationalism, both in their conservative and progressive strands, and between majority and minority language planning, among other things.

The Neoliberal Pattern of Domination José Manuel Sánchez Bermúdez, 2012-06-21 An examination of the domination of neoliberal capital, showing how it renders impossible the unity of human beings dispossessed from the means of production and subsistence. Left unchallenged, capital confines large masses to a life of exploitation, domination, and bare subsistence as the majority remain divided and predisposed to infighting.

Recent Developments in Cointegration Katarina Juselius, 2018-07-05 This book is a printed edition of the Special Issue *Recent Developments in Cointegration* that was published in *Econometrics*

The Populism-Euroscepticism Nexus Juan Roch, 2023-12-19 This book explores the modes of European Union (EU) contestation which are mobilized by radical parties and seeks to unearth the relationship of such contestation with populist discourses. It looks specifically at how rightist and leftist parties articulate populist discourses with representations and problematizations of Europe and the EU by examining the left-wing Podemos in Spain and the right-wing Alternative für Deutschland (AfD) in Germany. It argues that radical parties also build their Euroscepticism on other hegemonic discourses and populism is only one possible discursive articulation to mobilize the contestation of the EU. It examines whether populism discourses may serve (or not) as a stimulus for EU contestation and as such shows the implications that this may have for the persistence of Euroscepticism in Western European democracies. This book will be of key interest to scholars and students of radical parties, democracy, democratic and political theory, populism, Euroscepticism, discourse studies and more broadly to comparative politics and European studies.

What America Can Learn from School Choice in Other Countries David Salisbury, James

Tooley, 2005-06-25 Parents in many other countries have more freedom of choice in education than Americans do. In Chile, Sweden, and the Netherlands, they can choose private schools without financial penalty. As we expand school choice in the United States, reformers and policymakers should look beyond our borders and learn from the examples of other countries. Critics in America claim that school choice would benefit a minority of students at the expense of the majority or that choice in education would drain funding from public schools and segregate students into racial or economic groups. Are these claims based on fact or fear? In this collection, scholars from Europe, South America, New Zealand, Australia, Canada, and the United States examine other countries' experiences with school choice and draw out critical lessons for America. What school choice policies are most effective? How well do private schools serve the poor? What policies are necessary to promote the widest selection of educational opportunities for the largest number of children? Also, what controls and regulations are most harmful to the development of a competitive education industry? Has school choice in other countries led to a free education market, or has it, at least in some cases, led instead to increased regulations, regimentation, and uniformity among private and public schools? The wealth of information and insights contained in this volume will aid policymakers and reformers as they search for the best ways to improve American education.

Environmental Rhetoric and Ecologies of Place Peter N. Goggin, 2013-07-18 Understanding how rhetoric, and environmental rhetoric in particular, informs and is informed by local and global ecologies contributes to our conversations about sustainability and resilience — the preservation and conservation of the earth and the future of human society. This book explores some of the complex relationships, collaborations, compromises, and contradictions between human endeavor and situated discourses, identities and landscapes, social justice and natural resources, movement and geographies, unpacking and grappling with the complexities of rhetoric of presence. Making a significant contribution to exploring the complex discursive constructions of environmental rhetorics and place-based rhetorics, this collection considers discourses, actions, and adaptations concerning environmental regulations and development, sustainability, exploitation, and conservation of energy resources. Essays visit arguments on cultural values, social justice, environmental advocacy, and identity as political constructions of rhetorical place and space. Rural and urban case studies contribute to discussions of the ethics and identities of environment, and the rhetorics of environmental cartography and glocalization. Contributors represent a range of specialization across a variety of scholarly research in such fields as communication studies, rhetorical theory, social/cultural geography, technical/professional communication, cartography, anthropology, linguistics, comparative literature/ecocriticism, literacy studies, digital rhetoric/media studies, and discourse analysis. Thus, this book goes beyond the assumption that rhetorics are situated, and challenges us to consider not only how and why they are situated, but what we mean when we theorize notions of situated, place-based rhetorics.

The Shifts and the Shocks Martin Wolf, 2014-09-04 In *The Shifts and the Shocks*, Martin Wolf - one of the world's most influential economic commentators and author of *Why Globalization Works* - presents his controversial and highly original analysis of the economic course of the last seven years. There have been many books that have sought to explain the causes and courses of the financial and economic crisis which began in 2007-8. *The Shifts and the Shocks* is not another detailed history of the crisis, but the most persuasive and complete account yet published of what the crisis should teach us about modern economies and economics. The book identifies the origin of the crisis in

the complex interaction between globalization, hugely destabilizing global imbalances and our dangerously fragile financial system. In the eurozone, these sources of instability were multiplied by the tragically defective architecture of the monetary union. It also shows how much of the orthodoxy that shaped monetary and financial policy before the crisis occurred was complacent and wrong. In doing so, it mercilessly reveals the failures of the financial, political and intellectual elites who ran the system. The book also examines what has been done to reform the financial and monetary systems since the worst of the crisis passed. 'Are we now on a sustainable course?' Wolf asks. 'The answer is no.' He explains with great clarity why 'further crises seem certain' and why the management of the eurozone in particular 'guarantees a huge political crisis at some point in the future.' Wolf provides far more ambitious and comprehensive plans for reform than any currently being implemented. Written with all the intellectual command and trenchant judgement that have made Martin Wolf one of the world's most influential economic commentators, *The Shifts and the Shocks* matches impressive analysis with no-holds-barred criticism and persuasive prescription for a more stable future. It is a book no-one with an interest in global affairs will want to neglect. MARTIN WOLF is Associate Editor and Chief Economics Commentator at the Financial Times, London. He is the recipient of many awards for financial journalism, for which he was also made a CBE in 2000. His previous books include *Why Globalization Works* and *Fixing Global Finance*. We have been inundated with books about the 'financial' aspects of the crisis. There have also been many books about specific institutions or memoirs by retired policy-makers. We need something different. There are two dimensions of the crisis that have received surprisingly little treatment. One is the link between developments in the macro-economy and the behaviour of the financial sector. The other is the global dimension of the crisis. Both these lie at the heart of Martin Wolf's analysis of the causes of the crisis and of his proposals to reduce the risk of another crisis. For these two reasons this is an important book that will be influential. Most important of all, it is in my view the right analysis and remedy Mervyn King To think straight about the causes and solutions of the financial crisis we must reject orthodox assumptions that more finance and global financial integration are limitlessly beneficial. *The Shifts and the Shocks* does just that, providing an intellectually sparkling and vital account of why the crisis occurred, and of the radical reforms needed if we are to avoid a future repeat Adair Turner Martin Wolf is unsurpassed in the world of economic journalists. His superb book may be the best of all those spawned by the Great Recession. It is analytical and rigorous without ever succumbing to fatalism or complacency Lawrence Summers

The Europeanization of National Foreign Policies towards Latin America Lorena Ruano, 2013-05-07 Who shapes the European Union's policy towards Latin America? How has this EU policy modified individual member states' relations with the region? This book provides a comparative account of seven member states' bilateral links with Latin America since 1945, in the context of their EU membership and based on the concept of 'Europeanization'. It illustrates how and why the main architects of this EU policy have been Spain and Germany. In contrast, Poland, Sweden and Ireland, which had little previous interaction with Latin America, have developed their current relations with that region virtually as a result of their EU membership. The United Kingdom and France lie in the middle: they have been influential in certain policy-areas and key periods in history, while they have adapted to what is done at the EU level in others. Practitioners, established academic experts as well emerging scholars in the field bring to bear a novel combination of pioneering research and cutting edge conceptual analysis on this important but neglected area of the EU's foreign relations.

Global Liquidity through the Lens of Monetary Aggregates Kyuil Chung, Jong-Eun Lee, Ms. Elena Loukoianova, Mr. Hail Park, Mr. Hyun Song Shin, 2014-01-24 This paper examines how the financial activities of non-financial corporates (NFCs) in international markets potentially affects domestic monetary aggregates and financial conditions. Monetary aggregates reflect, in part, the activities of NFCs, who channel capital market financing into the domestic banking system, thereby influencing funding conditions and credit availability. Periods of capital inflows are also those when the domestic currency is appreciating, and such periods of rapid exchange rate appreciation coincide

with increases in the central bank's foreign exchange reserves, increasing the stock of narrow money. The paper examines economic significance of cross-country panel data on monetary aggregates and other measures of non-core bank liabilities. Non-core liabilities that reflect the activities of NFCs reflect broad credit conditions and predict global trade and growth.

Cultural Competence Ronnie Linda Leavitt, 2010 Cultural Competence: A Lifelong Journey to Cultural Proficiency provides a comprehensive, theoretical and practical approach to increasing knowledge and awareness, improving attitudes, and providing the necessary skills for practicing cultural competence each day. Dr. Ronnie Leavitt, along with a group of contributors with a range of backgrounds, both in physical therapy and the social sciences, provides an evidencebased text looking to explore practical applications in a wide array of settings. Cultural Competence addresses cultural competence by discussing the special considerations one needs to learn about rather than specific population groups. Also discussed is how different theorists describe cultural competence, as well as methods of measuring cultural competence and government policies regarding cultural competence. BOOK JACKET

Disorder Helen Thompson, 2022 Explains why we in the West, live in the political times we do; a moment of historical time arising from systemic dynamics that have wrought predicaments to confront and not problems to be solved. A retrospective and predictive account of the political shocks of 2016 and onwards, and how the specific consequences of the structural historical forces at work are ongoing and in good part inexorable. Argues that these political times arise and disruption will continue from the intersection of fault lines generated by a geopolitical cycle that has been disrupted, but is not over--Publisher's description.

Corpus-Based Translation Studies Alet Kruger, Kim Wallmach, Jeremy Munday, 2011-06-16 This is a collection of leading research within corpus-based translation studies (CTS). CTS is now recognized as a major paradigm that has transformed analysis within the discipline of translation studies. It can be defined as the use of corpus linguistic technologies to inform and elucidate the translation process, something that is increasingly accessible through advances in computer technology. The book pulls together a wide range of perspectives from respected authors in the field. All the chapters deal with the implementation of the basic concepts and methodologies, providing the reader with practical tools for their own research. The book addresses key issues in corpus analysis, including online corpora and corpus construction, and covers both translation and interpreting. The authors look at various languages and utilize a variety of approaches, qualitative and quantitative, reflecting the breadth of the field and providing many valuable examples of the methodology at work.

The Routledge Handbook of Conference Interpreting Michaela Albl-Mikasa, Elisabet Tiselius, 2021-11-29 Providing comprehensive coverage of both current research and practice in conference interpreting, The Routledge Handbook of Conference Interpreting covers core areas and cutting-edge developments, which have sprung up due to the spread of modern technologies and global English. Consisting of 40 chapters divided into seven parts—Fundamentals, Settings, Regions, Professional issues, Training and education, Research perspectives and Recent developments—the Handbook focuses on the key areas of conference interpreting. This volume is unique in its approach to the field of conference interpreting as it covers not only research and teaching practice but also practical issues of the profession on all continents. Bringing together over 70 researchers in the field from all over the world and with an introduction by the editors, this is essential reading for all researchers, trainers, students and professionals of conference interpreting.

Subversion, Conversion, Development James Leach, Lee Wilson, 2014-05-02 Explorations of design, use, and reuse of information technology in diverse historical and cultural contexts. This book explores alternative cultural encounters with and around information technologies. These encounters are alternative because they counter dominant, Western-oriented notions of media consumption; they include media practices as forms of cultural resistance and subversion, "DIY cultures," and other nonmainstream models of technology production. The contributors—leading thinkers in science and technology studies, anthropology, and software design—pay special attention

to the specific inflections that different cultures and communities give to the value of knowledge. The richly detailed accounts presented here challenge the dominant view of knowledge as a neutral good—information available for representation and encoding but separated from all social relations. The chapters examine specific cases in which the forms of knowledge and cross-cultural encounters are shaping technology use and development. They consider design, use, and reuse of technological tools, including databases, GPS devices, books, and computers, in locations that range from Australia and New Guinea to Germany and the United States. Contributors Poline Bala, Alan Blackwell, Wade Chambers, Michael Christie, Hildegard Diemberger, Stephen Hugh-Jones, James Leach, Jerome Lewis, Dawn Nafus, Gregers Petersen, Marilyn Strathern, David Turnbull, Helen Verran, Laura Watts, Lee Wilson
