No Ordinary Disruption Richard Dobbs,James Manyika,Jonathan Woetzel,2016-08-30 Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, No Ordinary Disruption: The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

America Beyond Capitalism Gar Alperovitz,2011 America Beyond Capitalism is a book whose time has come. Gar Alperovitz's expert diagnosis of the long-term structural crisis of the American economic and political system is accompanied by detailed, practical answers to the problems we face as a society. Unlike many books that reserve a few pages of a concluding chapter to offer generalized, tentative solutions, Alperovitz marshals years of research into emerging new economy strategies to present a comprehensive picture of practical bottom-up efforts currently underway in thousands of communities across the United States. All democratize wealth and empower communities, not corporations: worker-ownership, cooperatives, community land trusts, social enterprises, along with many supporting municipal, state and longer term federal strategies as well. America Beyond Capitalism is a call to arms, an eminently practical roadmap for laying foundations to change a faltering system that increasingly fails to sustain the great American values of equality, liberty and meaningful democracy.

Harnessing Novel Forms of Work Organization: Design Knowledge on Crowdfunding Platform Systems Volkmar Mrass,2021-01-01 The digitalization is currently fundamentally changing our world of work. One important trend in this context is the “platform economy”, with crowdfunding platforms as an increasingly relevant platform type. Many of these crowdfunding platforms and their surrounding work systems including participants, nformation, technologies, as well as processes and activities, are comparatively new and often designed incrementally. What is currently still lacking is systematic knowledge about the efficient design of such crowdfunding platform systems (CWPS). This dissertation provides such design knowledge in the form of a nascent design theory. One important focus lies on the question how such CWPS should be designed to also use this novel form of work organization for more complex work. This dissertation furthermore shows how a close interlinking of external crowds and internal employees of an organization helps to harness the advantages of crowdfunding while at the same time mitigates its disadvantages.
