**History at the End of the World** Mark Levene,Rob Johnson,Penny Roberts,2010 The authors of this collection of essays propose that climate change means serious peril. The approaches begin from archaeology, literature, religion, psychology, sociology, philosophy of science, engineering and sustainable development, as well as 'straight' history. Our argument, however, is not about the science per se. It is about us, our deep and more recent history, and how we arrived at this calamitous impasse. With contributions from academic activists and independent researchers, History at the End of the World challenges advocates of 'business as usual' to think again. But in its wide-ranging assessment of how we transcend the current crisis, it also proposes that the human past could be our most powerful resource in the struggle for survival.

**Surviving Accidents and Crashes** Marcia Amidon Lusted,2014-03-01 Most people don't have to worry about being buried alive or falling into a sinkhole. See how these people kept their wits in stressful situations and survived.

**Fadó** Rónán Gearóid Ó Domhnaill,2013-11-01 With Fadó, long forgotten about episodes from Irish history are presented in easy to follow short chapters. Who was Crom Cruach and what are Holy Wells? Who were the priest catchers and why were corpses stolen? How did a Cork woman become a feared pirate of the Caribbean and why is William Melville not loved by all in his native county? For such a small island, Ireland has history and archaeology in abundance and much of this is often only known to people in the locality. The author has travelled the island extensively and researched long forgotten characters and events, some of whom are stranger than fiction. Irish men and women of all hues and generations are examined here as the reader is guided through a land of heroes and villains, saints and scholars, pestilence and prosperity. Fadó is a book that can be read with ease and the author's passion for his subject is infectious. It is a must read for anyone interested in Irish history.

Classroom veterans themselves, the authors have organized the books with practicality in mind. Safety concepts are discussed in the context of common situations in real classrooms. Chapters address both general topics such as equipping labs, storing and disposing of chemicals, and maintaining documentation as well as the special requirements of specific disciplines, physics, chemistry, Earth and space science, and biology. *Investigating Safely* Juliana Texley,Terry Kwan,John Summers,2004 Just as high school science is more complex than it is at lower grade levels, so are the safety issues you face in your classes and labs. Reduce the risks to people and place with Investigating Safety, the tried and most advanced and detailed volume in NSTA's unique series of safety guidebooks for science teachers. Some of the guide's 11 chapters deal with the special safety requirements of specific disciplines; physics, chemistry, Earth and space sciences, and biology. Others cover topics every high school teacher must grapple with, including equipping labs; storing and disposing of chemicals and other hazardous materials; maintaining documentation; and organizing field trips. You'll learn not only how to accommodate students with specials needs but also how to make every student a partner in safer science. Classroom veterans themselves, the authors have organized the book with practicality in mind. Safety concepts are discussed in the context of common situations in real classrooms. Sidebars and inserts in every chapter highlight and reinforce important material. Key informatin is selectively repeated in different chapters so you won't have to flip back and forth. And permission slips, student contracts, and other sample forms are included for adapting to your needs. *Contesting The Future Of Nuclear Power: A Critical Global Assessment Of Atomic Energy* Benjamin K Sovacool,2011-05-05 This book provides a concise but rigorous appraisal about the future of nuclear power and the presumed nuclear renaissance. It does so by assessing the technical, economic, environmental, political, and social risks related to all aspects of the nuclear fuel cycle, from uranium mills and mines to nuclear reactors and spent fuel storage facilities. In each case, the book argues that the costs of nuclear power significantly outweigh its benefits. It concludes by calling for investments in renewable energy and energy efficiency as a better path towards an affordable, secure, and socially acceptable future.The prospect of a global nuclear renaissance could change the way that energy is produced and used the world over. Sovacool takes a hard look at who would benefit — mostly energy companies and manufacturers — and who would suffer — mostly taxpayers, those living near nuclear facilities, and electricity customers. This book is a must-read for anyone even remotely concerned about a sustainable energy future, and also for those with a specific interest in modern nuclear power plants.

NATIONAL HIGHWAYS AND MOTORWAY POLICE IN PAKISTAN: An Illuminative Study Saima Manzoor Arain,Akif Manzoor Arain,2016-07-07 The Motorway Police System in Pakistan is designed in a manner which enables law enforcement and does not encourage corruption. Enforcement action is transparent because of the tools made available and the manner in which SOPs have been prepared. It operates a traffic law which is as good as any in the world. The officers work in eight hour shifts and get weekly holidays by rotation. They live and work on the highway and are well compensated to be able to run two kitchens. In view of this, the Motorway Police has become a model for policing in Pakistan. Asad Jahangir Khan Ex-IG NH&MP. Thus it is thought provoking: it is revolutionary, opening new vistas and bold horizons of intellectual endeavors. This book is scholarly written and exquisitely presented.

**Little Minnesota in World War II** Jill A. Johnson,Deane L. Johnson,2017-09-05 During World War II, a total of 165 men from Minnesota’s smallest towns gave their lives for our country. Several were awarded the Distinguished Service Cross, Distinguished Flying Cross, Silver Star, and Bronze Star. All received the award no one wanted: the Purple Heart. Most of their stories have never been told publicly. Little Minnesota in World War II, by Jill A. Johnson and Deane L. Johnson, honors these brave men from the smallest rural towns. From John Emery (who died December 7, 1941, on board the USS Arizona) to Herman Thelander (who was lost in the Bermuda Triangle, a mystery unsolved to this day), this unique book allows you to experience the war through personal accounts of the men and their families. With photos from the war, scans of actual letters, journal excerpts, and family memories, this one-of-a-kind book brings history to life and will make you feel prouder than ever to be Minnesotan.

**Carbon Dioxide Capture for Storage in Deep Geologic Formations - Results from the CO2 Capture Project** David C Thomas,Sally M Benson,2015-01-03 Over the past decade, the prospect of climate change resulting from anthropogenic CO2 has become a matter of growing public concern. Not only is the reduction of CO2 emissions extremely important, but keeping the cost at a manageable level is a prime priority for companies and the public, alike. The CO2 capture project (CCP) came together with a common goal in mind: find a technological process to capture CO2 emissions that is relatively low-cost and able be to be expanded to industrial applications. The Carbon Dioxide Capture and Storage Project outlines the research and findings of all the participating companies and associations involved in the CCP. The final results of thousands of hours of research are outlined in the book, showing a successful achievement of the CCP’s goals for lower cost CO2 capture technology and furthering the safe, reliable option of geological storage. The Carbon Dioxide Capture and Storage Project is a valuable reference for any scientists, industrialists, government agencies, and companies interested in a safer, more cost-efficient response to the CO2 crisis.
