communication and interpersonal communication. Interactive mass communication redefines the roles of online communication partners who are confronted with a higher degree of complexity in terms of hypertextual information units. In web advertising, this new aspect of interactivity is linguistically reflected in different types of personal address forms, directives, and trigger words. This study also analyzes the different strategies of persuasion with which web ads try to initiate their activation. Web Advertising provides essential information on the language of web advertisements for academics, researchers and students in the fields of hypertext-linguistics, advertising, communication and media studies.

**The Power of Strategy Innovation** Robert E. Johnston, J. Douglas BATE, 2013-03-29 This helpful resource contains tools and tricks to help companies excel in dynamic markets and provide groundbreaking products and services. The authors refer to this as "innovation" rather than "strategic planning," but the truth is somewhere in-between: through a proven five-phase discovery process --for staging, aligning, exploring, creating, and mapping-- strategic innovation will become a company-wide competency. In *The Power of Strategy Innovation*, you'll learn how to: apply innovative thinking to your company's business model to bridge the gap between strategy and product development; how to remain flexible, future-oriented, and responsive to market changes and your clients' changing needs; and how to create a perpetual flow of viable new business opportunities. Informative interviews with corporate leaders dispersed throughout the book provide further insight into different industries and the ways they have committed to taking a more innovative approach. Through these shared methodologies, *The Power of Strategy Innovation* will forever transform the way you do business--and help you rise to become a leader in your industry.

Contemporary Selling Mark W. Johnston, Greg W. Marshall, 2016-02-19 *Contemporary Selling* is the only book on the market that combines full coverage of 21st century personal selling processes with a basic look at sales management practices in a way that students want to learn and instructors want to teach. The overarching theme of the book is enabling salespeople to build relationships successfully and to create value with customers. Johnston and Marshall have created a comprehensive, holistic source of information about the selling function in modern organizations that links the process of selling (what salespeople do) with the process of managing salespeople (what sales managers do). A strong focus on the modern tools of selling, such as customer relationship management (CRM), social media and technology-enabled selling, and sales analytics, means the book continues to set the standard for the most up-to-date and student-friendly selling book on the market today. Pedagogical features include: Mini-cases to help students understand and apply the principles they have learned in the classroom Ethical Dilemma and Global Connection boxes that simulate real-world challenges faced by salespeople and their managers Role Plays that enable students to learn by doing A companion website includes an instructor's manual, PowerPoints, and other tools to provide additional support for students and instructors.

**Innovation, Startups and Intellectual Property Management** Ignacio De

Leon, Jose Fernandez Donoso, 2017-05-17 This book identifies the potential of intellectual property as a competitive asset for Latin American firms. The authors employ a cognitive approach that involves identifying why small firms are reluctant to register patents, resorting rather to alternative IP competitive strategies. This, in turn, results in the undercapitalization of intellectual assets, thus creating hurdles for the development of capital venture markets. Using new data gathered from highly innovative SMEs in Latin America and the Caribbean, the authors bring a fresh cognitive approach towards understanding the institutional role of intellectual property, and outline various new policy recommendations.
