Measuring Political Risk Charlotte H. Brink, 2017-03-02 Offering a fresh, transparent approach encompassing new material, this invigorating volume measures political risk - for instance the risk that foreign investment might face in any country. It also demonstrates how progress or regress made in good governance initiatives as conditionalities to aid can be assessed. Governments can monitor their own policy environment(s), and take remedial action if necessary. The methodology allows for measurement of previously un-quantified 'soft' factors that add to the risks foreign investors might face, demonstrating why these factors are of importance to both risk assertive and risk averse investors. Features include: - 103 contextualized, measurable risk factors and their 411 risk factor indicators. - Guidelines to using these factors in order to perform generic macro analyses, or micro, client/project/industry-specific analyses. - Explanation of the methodology with which to comprehensively measure the probability of risk occurring in any macro or micro investment climate.

Bhangra Moves Anjali Gera Roy, 2017-07-05 Bhangra is commonly understood as the hybrid music produced in Britain by British Asian music producers through mixing Panjabi folk melodies with western pop and black dance rhythms. This is derived from a Punjabi harvest dance of the same name. This book looks at Bhangra's global flows from one of its originary sites, the Indian subcontinent, to contribute to the understanding of emerging South Asian cultural practices such as Bhangra or Bollywood in multi-ethnic societies. It seeks to trace Bhangra's moves from Punjab and its 'return back' to look at the forces that initiate and regulate global flows of local texts and to ask how their producers and consumers redirect them to produce new definitions of culture, identity and nation. The critical importance of this book lies in understanding the difference between the present globalizing wave and previous trans-local movements. Gera Roy contrasts the frames of cultural imperialism with those of cultural invasion to show how Indian cultures have constantly reinvented themselves by cross-pollinating with 'invading' cultures such as Hellenic, Persian, Arabic and many others in the past. By looking at Bhangra's flows to and from India, the book revises the relation between culture, space and identity and challenges boundaries. It weighs both the uses and costs of visibility provided by global networks to marginalized groups in diverse localities and explores whether collaborations between Bhangra practitioners, largely of working class origin, give ordinary people any control over the circulation of culture in the global village. Finally, the book considers whether cultural practices can alter hierarchies and power structures in the real world.

SQL Server DTS Steve Hughes, 2002 This book appeals to both developers and database administrators who are faced with the common situation of having to migrate or integrate data from one location into another. While the first section of the book is designed for the beginner to DTS, it is assumed that the reader has at least basic database and programming experience. The second section is extensive coding, and is best used by someone with intermediate to advanced programming skills. The third section contains a mix of examples that will be useful to all levels of database administrators and programmers. For the readers who have been using DTS this section can be used as a reference section and help with DTS designs and usage. Unlike other resources available, this book covers data transformation in both SQL Server 7 and 2000.

Whaling and International Law Malgosia Fitzmaurice, 2015-12-03 Whales are regarded as a totemic symbol by some nations and as a natural marine resource by others. This book presents a complex picture of legal problems surrounding the interpretation of the International Convention for the Regulation of Whaling and the role of its regulatory body, the International Whaling Commission. Contemporary whaling is about the competing interests of whaling nations (which are in the minority), non-whaling nations (which are in the majority) and indigenous peoples. Whales are covered by many international conventions, which has led to a very fragmented legal situation and does not necessarily ensure that whales are protected. This is one of the paradoxes of the contemporary international legal regime which are explored in this book. The book also examines the contentious issue of the right of indigenous peoples to whaling and questions whether indigenous whaling is very different from commercial practices.

Country Analysis David M. Currie, 2016-05-13 The ability to connect theoretical macroeconomics to the analysis of the economic and political performance of a given country is an essential skill for global investors. In *Country Analysis: Understanding Economic and Political Performance*, David M. Currie takes a unique analytical approach to the subject, clearly demonstrating the relationship between theory and application in investing practices. This valuable book shows how to interpret country performance and provides the practising investor with sufficient background on economic principles to be able to understand and interpret country summaries that appear in business periodicals and other media. It covers key topics such as the Washington Consensus and the three major categories of economic decisions - fiscal policy, monetary policy and trade policy. It includes an important chapter on the political aspect of government performance, to give the reader an understanding of economic decisions in their true context. *Country Analysis* explains the reasoning behind the criteria used in evaluating country risk and economic performance, without the need for a sophisticated understanding of economics or mathematics. Each chapter includes a series of text boxes that include real-life examples from business periodicals to reinforce what is discussed and enable readers to practice identifying and interpreting relevant information. Practitioners making investment decisions in global markets, as well as students in MBA and other courses, will find this immensely practical book a valuable aid to critical decision making.

Linking Aquatic Exposure and Effects Theo C. Brock, 2011-06-03 Time-variable exposure profiles of pesticides are more often the rule than exception in the surface waters of agricultural landscapes. There is, therefore, a need to adequately address the uncertainties arising from time-variable exposure profiles in the aquatic risk assessment procedure for pesticides. *Linking Aquatic Exposure and Effects: Risk Assessment of Pesticides* provides guidance and recommendations for linking aquatic exposure and ecotoxicological effects in the environmental assessment of agricultural pesticides. Leading international scientists share their expertise in aquatic exposure assessment, aquatic ecotoxicology, and the risk assessment and management of plant protection products. The book incorporates the tools and approaches currently available for assessing the environmental risks of time-variable exposure profiles of pesticides. It also discusses the science behind these techniques. This volume covers the extrapolation techniques, including models that address the environmental fate, toxicokinetics, toxicodynamics, and ecological effects, for performing accurate aquatic environmental risk assessments of pesticides. It explains how to link aquatic exposure and effects in the risk assessment procedure for plant protection products.

3D Laser Scanning for Heritage Clive Boardman, Paul Bryan, 2018 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Financing Energy Efficiency Robert P. Taylor, Chandrasekar Govindarajalu, Jeremy Levin, Anke S. Meyer, William A. Ward, 2008-02-08 While energy efficiency projects could partly meet new energy demand more cheaply than new supplies, weak economic institutions in developing and transitional economies impede developing and financing energy efficiency retrofits. This book analyzes these difficulties, suggests a 3-part model for projectizing and financing energy efficiency retrofits, and presents thirteen case studies to illustrate the issues and principles involved.
