**Museum Making** Suzanne Macleod, Laura Hourston Hanks, Jonathan Hale, 2012-03-15 Over recent decades, many museums, galleries and historic sites around the world have enjoyed an unprecedented level of large-scale investment in their capital infrastructure, in building refurbishments and new gallery displays. This period has also seen the creation of countless new purpose-built museums and galleries, suggesting a fundamental re-evaluation of the processes of designing and shaping of museums. *Museum Making: Narratives, Architectures, Exhibitions* examines this re-making by exploring the inherently spatial character of narrative in the museum and its potential to connect on the deepest levels with human perception and imagination. Through this uniting theme, the chapters explore the power of narratives as structured experiences unfolding in space and time as well as the use of theatre, film and other technologies of storytelling by contemporary museum makers to generate meaningful and, it is argued here, highly effective and affective museum spaces. Contributions by an internationally diverse group of museum and heritage professionals, exhibition designers, architects and artists with academics from a range of disciplines including museum studies, theatre studies, architecture, design and history cut across traditional boundaries including the historical and the contemporary and together explore the various roles and functions of narrative as a mechanism for the creation of engaging and meaningful interpretive environments.

**Fight Like a Girl** Laura Barcella, 2019-08-01 Nearly every day there's another news story or pop cultural anecdote related to feminism and women's rights. #YesAllWomen, conversations around consent, equal pay, access to contraception, and a host of other issues are foremost topics of conversation in American (and worldwide) media right now. Today's teens are encountering these issues from a different perspective than any generation has had before, but what's often missing from the current discussion is an understanding of how we've gotten to this place. *Fight Like a Girl* will familiarize readers with the history of feminist activism, in an effort to celebrate those who paved the way and draw attention to those who are working hard to further the cause of women's rights. Profiles of both famous and lesser-known feminists will be featured alongside descriptions of how their actions affected the overall feminist cause, and unique portraits (artist's renderings) of the feminists themselves. This artistic addition will take the book beyond simply an informational text, and make it a treasure of a book.

**Murray River Country** Jessica K. Weir, 2009 Place, country, and care are at the heart of this wise book, which is so astutely responsive to the diverse, active Aboriginal individuals and nations of the Murray-Darling Basin Like the Central Valley of California near where I live, where vast rivers and wetlands have been engineered to produce a precarious and poisoned breadbasket for settler empires, the Murray-Darling Basin cries out for new practices of care from all of its people. Weir's book gives me hope that these blasted places and the lives of so many species, human and not, might again be whole, in new ways and old. Donna Haraway, History of Consciousness Department, University of California at Santa Cruz *Murray River Country* brings a fresh narrative to Australia's water crisis - the intimate stories of love and loss of the Aboriginal people who know the inland rivers as their traditional country. The Murray River's devastation demands that something fundamental changes in our water philosophies. Weir moves readers beyond questions of how much water will be 'returned' to the rivers, to understand that our economy, and our lives, are dependent on river health. She draws on western and Indigenous knowledge traditions to unsettle the boundaries of the current debates. In doing so she shows how powerfully influential yet unacknowledged assumptions continue to trap our thinking and disable us from taking effective action. By engaging with the Murray-Darling Basin, Australia's agricultural heartland, and the Murray River, Australia's greatest river, *Murray River Country* goes to the heart of our national understandings of how we are to live in this country.

**The P53 Protein** Guillermina Lozano, Arnold Jay Levine, 2016 Decades of research on the tumor suppressor p53 have revealed that it plays a significant role as a guardian of the genome, protecting cells against genotoxic stress. In recent years, p53 research has begun to move into the clinic in attempts to understand how p53 is frequently inactivated in-and sometimes even promotes-human cancer. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Medicine covers the rapid progress that has recently been made in basic and clinical research on p53. The contributors review new observations about its basic biology, providing updates on the functions of its isoforms and domains, the myriad stresses and signals that trigger its activation or repression, and its downstream effects on genome stability and the cell cycle that enforce tumor suppression in different cell and tissue types. They also discuss how p53 dysfunction contributes to cancer, exploring the various inherited and somatic mutations in the human TP53 gene, the impact of mutant p53 proteins on tumorigenesis, and the prognostic value and clinical outcomes of these mutations. Drugs that are being developed to respond to tumors harboring aberrant p53 are also described. This book is therefore essential reading for all cancer biologists, cell and molecular biologists, and pharmacologists concerned with the treatment of this disease.

**Blue Marble Health** Peter J. Hotez, 2016-09-01 Why do diseases of poverty afflict more people in wealthy countries than in the developing world? In 2011, Dr. Peter J. Hotez relocated to Houston to launch Baylor's National School of Tropical Medicine. He was shocked to discover that a number of neglected diseases often associated with developing countries were widespread in impoverished Texas communities. Despite the United States' economic prowess and first-world status, an estimated 12 million Americans living at the poverty level currently suffer from at least one neglected tropical disease, or NTD. Hotez concluded that the world's neglected diseases—which include tuberculosis, hookworm infection, lymphatic filariasis, Chagas disease, and leishmaniasis—are born first and foremost of extreme poverty. In this book, Hotez describes a new global paradigm known as “blue marble health,” through which he asserts that poor people living in wealthy countries account for most of the world's poverty-related illness. He explores the current state of neglected diseases in such disparate countries as Mexico, South Korea, Argentina, Australia, the United States, Japan, and Nigeria. By crafting public policy and relying on global partnerships to control or eliminate some of the world's worst poverty-related illnesses, Hotez believes, it is possible to eliminate life-threatening disease while at the same time creating unprecedented opportunities for science and diplomacy. Clear, compassionate, and timely, *Blue Marble Health* is a must-read for leaders in global health, tropical medicine, and international development, along with anyone committed to helping the millions of people who are caught in the desperate cycle of poverty and disease.

**Water for the Environment** Avril Horne, Angus Webb, Michael Stewardson, Brian Richter, Mike Acreman, 2017-08-16 *Water for the Environment: From Policy and Science to Implementation and Management* provides a holistic view of environmental water management, offering clear links across disciplines that allow water managers to face mounting challenges. The book highlights current challenges and potential solutions, helping define the future direction for environmental water management. In addition, it includes a significant review of current literature and state of knowledge, providing a one-stop resource for environmental water managers. Presents a multidisciplinary approach that allows water managers to make connections across related disciplines, such as hydrology, ecology, law, and economics Links science to practice for environmental flow researchers and those that implement and manage environmental water on a daily basis Includes case studies to demonstrate key points and address implementation issues

**Law Enforcement and the INS** George Weissinger, 2017-03-29 This book updates prior research that utilized the perceptions of criminal investigators of the Immigration & Naturalization Service (INS), and compares these perceptions with immigration enforcement priorities that were implemented post 911, through the Obama Administration up to the Trump presidency. The legacy INS attempted to provide both a service and control function, which made it difficult for INS investigators to fulfill their mission of interior enforcement of the immigration laws. Other problems that surfaced included organizational relations, as well as notions about professionalism, which affected recruitment, retention, training, and worker expectations. The creation of the Department of

Homeland Security (DHS) should have addressed these issues relating to immigration enforcement with the intent of solving some of the underlying problems. However, policies and ideological issues exacerbated efforts to enforce the immigration laws. The updated material in this third edition discusses how the interaction between an organization and the environment in which it operates, contributes to effectiveness with specific reference to the organization's stated mission, A review of immigration laws and agency policies, including executive orders, priorities, the impact of sanctuary cities, and consideration of the wider variables impacting illegal migration among other issues, were also analyzed.

Facing Reality Charles Murray,2021-06-15 The charges of white privilege and systemic racism that are tearing the country apart float free of reality. Two known facts, long since documented beyond reasonable doubt, need to be brought into the open and incorporated into the way we think about public policy: American whites, blacks, Hispanics, and Asians have different violent crime rates and different means and distributions of cognitive ability. The allegations of racism in policing, college admissions, segregation in housing, and hiring and promotions in the workplace ignore the ways in which the problems that prompt the allegations of systemic racism are driven by these two realities. What good can come of bringing them into the open? America's most precious ideal is what used to be known as the American Creed: People are not to be judged by where they came from, what social class they come from, or by race, color, or creed. They must be judged as individuals. The prevailing Progressive ideology repudiates that ideal, demanding instead that the state should judge people by their race, social origins, religion, sex, and sexual orientation. We on the center left and center right who are the American Creed's natural defenders have painted ourselves into a corner. We have been unwilling to say openly that different groups have significant group differences. Since we have not been willing to say that, we have been left defenseless against the claims that racism is to blame. What else could it be? We have been afraid to answer. We must. Facing Reality is a step in that direction.

Manitou and God R. Murray Thomas,2007-10-30 Manitou and God describes American Indian religions as they compare with principal features of Christian doctrine and practice. Thomas traces the development of sociopolitical and religious relations between American Indians and the European immigrants who, over the centuries, spread across the continent, captured Indian lands, and decimated Indian culture in general and religion in particular. He identifies the modern-day status of American Indians and their religions, including the progress Indians have made toward improving their political power, socioeconomic condition, and cultural/religious recovery and the difficulties they continue to face in their attempts to better their lot. Readers will gain a better sense of the give and take between these two cultures and the influence each has had on the other. In Algonquin Indian lore, Manitou is a supernatural power that permeates the world, a power that can assume the form of a deity referred to as The Great Manitou or The Great Spirit, creator of all things and giver of life. In that sense, Manitou can be considered the counterpart of the Christian God. From early times, the belief in Manitou extended from the Algonquins in Eastern Canada to other tribal nations—the Odawa, Ojibwa, Oglala, and even the Cheyenne in the Western plains. As European settlers made their way across the land, the confrontation between Christianity and Native American religions revealed itself in various ways. That confrontation continues to this day.

**The State of Black Michigan, 1967-2007** Joe T. Darden,Curtis Stokes,Richard Walter Thomas,2007 In the wake of the 1967 Detroit riots, in which 43 people were killed, President Lyndon Johnson established the National Advisory Commission on Civil Disorders and posed these questions: What happened? Why did it happen? What can be done to prevent it from happening again? The commission concluded that white racism spurred the violence and that our society is moving toward two societies, one black, and one white-separate and unequal.The State of Black Michigan takes Johnson's questions further and applies them to Michigan's black citizens today: Are the ingredients of the explosive mixture that erupted in 1967 still present? What differences are there forty years later? Is Michigan in fact a state with two separate and unequal societies? The twenty essays in this volume pursue the answers to these questions by studying a broad range of topics, including socioeconomic inequality, black self-help, black business development, residential segregation, crime, health,

**Dialectics in World Politics** Shannon Brincat,2017-10-02 This volume explores the conceptual, methodological and praxeological aspects of dialectical analysis in world politics. As dialectics has remained an under-theorised analytical tool in international relations, this volume provides a critical resource for those seeking to deploy dialectics in their own research by showcasing its effectiveness for understanding and transforming world politics. Contributions demonstrate a number of innovative ways in which dialectical thinking can be of benefit to the study of world politics by covering three thematic concerns: (i) conceptual or meta-theoretical dimensions of dialectics; (ii) methodological features and general principles of dialectical approaches; and (iii) applications and/or case studies that deploy a dialectical approach to world politics. Canvassing a diverse range of dialectical approaches on key issues in world politics – from global security to postcolonial resistances, from the theoretical problems of reification and complexity, to the study of the global futures and the intercultural historical expressions of dialectics – Dialectics and World Politics offers key insights into the social forces and contradictions that are generative of transformation in world politics and yet routinely downplayed in orthodox approaches to international relations. Each chapter demonstrates how dialectics can be utilized more broadly in the discipline and deployed in a critical fashion as part of an emancipatory project. This book was originally published as a special issue of Globalizations.

**Coming Apart** Charles Murray,2013-01-29 NEW YORK TIMES BESTSELLER • A fascinating explanation for why white America has become fractured and divided in education and class, from the acclaimed author of Human Diversity. “I’ll be shocked if there’s another book that so compellingly describes the most important trends in American society.”—David Brooks, New York Times In Coming Apart, Charles Murray explores the formation of American classes that are different in kind from anything we have ever known, focusing on whites as a way of driving home the fact that the trends he describes do not break along lines of race or ethnicity. Drawing on five decades of statistics and research, Coming Apart demonstrates that a new upper class and a new lower class have

diverged so far in core behaviors and values that they barely recognize their underlying American kinship—divergence that has nothing to do with income inequality and that has grown during good economic times and bad. The top and bottom of white America increasingly live in different cultures, Murray argues, with the powerful upper class living in enclaves surrounded by their own kind, ignorant about life in mainstream America, and the lower class suffering from erosions of family and community life that strike at the heart of the pursuit of happiness. That divergence puts the success of the American project at risk. The evidence in *Coming Apart* is about white America. Its message is about all of America.

**Paper Talk** Brendan Frederick R. Edwards,2005 The pre-1960 history of print culture and libraries, as they relate to the First Peoples of Canada, has gone largely untold. Paper Talk explores the relationship between the introduction of western print culture to Aboriginal peoples by missionaries, the development of libraries in the Indian schools in the nineteenth century, and the establishment of community-accessible collections in the twentieth century. While missionaries and the Department of Indian Affairs envisioned books and libraries as assimilative and civilizing tools, Edwards shows that some Aboriginal peoples articulated western ideas of print culture, literacy, books, and libraries as tools to assist their own cultural, social, and political aspirations. This text also serves to illustrate that the contemporary struggle of Aboriginal peoples in Canada to establish libraries in communities has a historical basis and that many of the obstacles faced today are remarkably similar to those encountered by earlier generations.

Transitional Justice and Legacies of State Violence Lisa White,2015-03-05 As politicians, public bodies and non-Governmental organisations continue to profess an interest in making peace with the past, this highly original study explores the motivation, significance and legacy of ‘making public’ experiences of state violence in Northern Ireland. Based on a synthesis of documentary material with the findings from a series of contemporary interviews, this timely book uncovers the reasoning behind many Republican former detainees’ accounts of state violence and torture. It examines the aims of those who ‘went public’ during the conflict and discusses the meaning they attached to their stories and the various responses to them. It also identifies some of the risks involved in criticising the violence of the British State and illuminates the ways in which ‘truths’ are often contested in Northern Ireland - both during the conflict and in the years which have followed. A unique piece of interdisciplinary work, the study disentangles and evaluates the discourses presented by former detainees and makes an innovative and interesting contribution to knowledge about transitional justice and legacies of state violence. The book is suitable for social science scholars interested in human rights, state violence, criminology and transitional justice, as well as those seeking to understand more about experiences of imprisonment and the legacy of the Northern Ireland conflict.

**Island Historical Ecology** Peter E. Siegel,2018-01-29 In the first book-length treatise on historical ecology of the West Indies, Island Historical Ecology addresses Caribbean island ecologies from the perspective of social and cultural interventions over approximately eight millennia of human occupations. Environmental coring carried out in carefully selected wetlands allowed for the reconstruction of pre-colonial and colonial landscapes on islands between Venezuela and Puerto Rico. Comparisons with well-documented patterns in the Mediterranean and Pacific islands place this case study into a larger context of island historical ecology.

How To Become A Good Dancer Arthur Murray,2013-04-16 This early work by Arthur Murray is both expensive and hard to find in its first edition. Its 250 pages contain a wealth of information on how to learn the art of dancing and include chapters on the Fox Trot, the Rumba the Mambo, all accompanied by instructional diagrams. This fascinating work is thoroughly recommended for anyone with an interest in ballroom dancing and a willingness to learn. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Autonomous Horizons Greg Zacharias,2019-04-05 Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.
