*The Animal Lover's Guide to the Internet* Bonnie Marlewski-Probert, 1997

Predisposed John R. Hibbing, Kevin B. Smith, John R. Alford, 2013-09-23 Buried in many people and operating largely outside the realm of conscious thought are forces inclining us toward liberal or conservative political convictions. Our biology predisposes us to see and understand the world in different ways, not always reason and the careful consideration of facts. These predispositions are in turn responsible for a significant portion of the political and ideological conflict that marks human history. With verve and wit, renowned social scientists John Hibbing, Kevin Smith, and John Alford—pioneers in the field of biopolitics—present overwhelming evidence that people differ politically not just because they grew up in different cultures or were presented with different information. Despite the oft-heard longing for consensus, unity, and peace, the universal rift between conservatives and liberals endures because people have diverse psychological,

physiological, and genetic traits. These biological differences influence much of what makes people who they are, including their orientations to politics. Political disputes typically spring from the assumption that those who do not agree with us are shallow, misguided, uninformed, and ignorant. *Predisposed* suggests instead that political opponents simply experience, process, and respond to the world differently. It follows, then, that the key to getting along politically is not the ability of one side to persuade the other side to see the error of its ways but rather the ability of each side to see that the other is different, not just politically, but physically. *Predisposed* will change the way you think about politics and partisan conflict. As a bonus, the book includes a Left/Right 20 Questions game to test whether your predispositions lean liberal or conservative.

Rabbit Behaviour, Health and Care Marit Emilie Buset, Richard Saunders, 2014-12-30 Developed from the successful Norwegian book *Den Store Kaninboka* (The Big Book of Rabbits) this book covers all aspects of rabbit behaviour, welfare, health and husbandry, with updated and expanded content now also made relevant to veterinarians. The focus is on explaining normal behaviour as a basis for describing optimal welfare, with an emphasis on rabbits in the domestic setting. Information regarding wild and laboratory rabbits is also included to show how behaviours such as socialisation, learning and communication can differ depending on environment. Health

matters relating to welfare such as nutrition and oral health are also covered in detail, and case studies from around the world give this valuable resource an international perspective.

**Tiger Country** Nina Raine, 2014 A brilliantly entertaining and exhilarating riff on the structure and format of a TV hospital drama.

**Caring Hands** Viktor Reinhardt, 2010 This book is a collection of electronic discussions that took place on the Animal Welfare Institute's Laboratory Animal Refinement & Enrichment Forum between June 2007 and March 2010. Comments are based upon first-hand experiences about ways to improve the conditions under which animals are housed and handled in research facilities. Animals discussed include mice and other rodents, rabbits, rhesus macaques and other nonhuman primates, dogs, cats, pigs, goats, and poultry. Topics include housing, refinement and enrichment specifically for primates and for other animals, animal training, and the role of animal care personnel.

*Sea Creatures* Susanna Daniel, 2014 Starting over in Miami along with her toddler son and husband, Georgia is forced to choose between her son, her marriage, and the possibility of new love when she takes a job as an errand runner for a reclusive artist.

**Animal Capital** Nicole Shukin, 2009 The juxtaposition of biopolitical critique and animal studies--two subjects seldom theorized together--signals the double-edged intervention of Animal Capital. Nicole Shukin pursues a resolutely materialist engagement with the question of the animal,

challenging the philosophical idealism that has dogged the question by tracing how the politics of capital and of animal life impinge on one another in market cultures of the twentieth and early twenty-first centuries.

**Unnatural Death** Dorothy L. Sayers, 2023-08-31 Unnatural Death by Dorothy L. Sayers - Unnatural Death is a 1927 mystery novel by Dorothy L. Sayers, her third featuring Lord Peter Wimsey. It was published under the title The Dawson Pedigree in the United States in 1928. Plot: Lord Peter Wimsey and his friend Chief Inspector Parker are told about the death, in late 1925, of an elderly woman named Agatha Dawson who had been suffering from terminal cancer. She was being cared for by Mary Whittaker, her great-niece and a trained nurse. Miss Dawson had an extreme aversion to making a will, believing that Miss Whittaker, her only known relative, would naturally inherit everything. Wimsey is intrigued in spite of the fact that there is no evidence of any crime (a post-mortem found no sign of foul play), nor any apparent motive (on Miss Dawson's death her estate did indeed pass, as she had expected and wished, to her great-niece). Wimsey sends his private investigator, Miss Katharine Climpson, to the village of Leahampton to investigate. She discovers that shortly before her death Miss Dawson had dismissed her maids, the sisters Bertha and Evelyn Gotobed. Wimsey places advertisements in the press asking them to get in touch. A few days later, Bertha is found dead in Epping Forest. On the body is a £5 banknote, originally issued to a Mrs Muriel Forrest who lives in an elegant flat in

South Audley Street, Mayfair. Wimsey and Parker visit her. She claims not to remember the banknote, but thinks she may have put it on a horse. Wimsey tricks her into providing her fingerprints on a wineglass. In a drawer he finds a hypodermic syringe with a doctor's prescription to be injected when the pain is very severe. Evelyn Gotobed tells Wimsey of an episode shortly before the sisters were dismissed in which Miss Whittaker had tried to get them to witness Miss Dawson's will, without the latter's knowledge. A mysterious West Indian clergyman named Hallelujah Dawson had also turned up, claiming to be an impecunious distant relative.

Right-Wing Authoritarianism Bob Altemeyer, 1981-01-01 Altemeyer begins by closely examining the scientific literature on right-wing authoritarianism. This timely volume surveys the history of social psychological research on right-wing authoritarianism and describes a more fruitful direction for future work. It concludes with a disturbing comment on the pervasiveness of authoritarian behaviour in our society.
