**Environmental Life Cycle Assessment (Open Access)** Olivier Jolliet, Myriam Saade-Sbeih, Shanna Shaked, Alexandre Jolliet, Pierre Crettaz, 2015-11-18 Environmental Life Cycle Assessment is a pivotal guide to identifying environmental problems and reducing related impacts for companies and organizations in need of life cycle assessment (LCA). LCA, a unique sustainability tool, provides a framework that addresses a growing demand for practical technological solutions. Detailing each phase of the LCA methodology, this textbook covers the historical development of LCA, presents the general principles and characteristics of LCA, and outlines the corresponding standards for good practice determined by the International Organization for Standardization. It also explains how to identify the critical aspects of an LCA, provides detailed examples of LCA analysis and applications, and includes illustrated problems and solutions with concrete examples from water management, electronics, packaging, automotive, and other industries. In addition, readers will learn how to: Use consistent criteria to realize and evaluate an LCA independently of individual interests Understand the LCA methodology and become familiar with existing databases and methods based on the latest results of international research Analyze and critique a completed LCA Apply LCA methodology to simple case studies Geared toward graduate and undergraduate students studying environmental science and industrial ecology, as well as practicing environmental engineers, and sustainability professionals who want to teach themselves LCA good practices, Environmental Life Cycle Assessment demonstrates how to conduct environmental assessments for products throughout their life cycles. It presents existing methods and recent developments in the growing field of LCA and systematically covers goal and system definition, life cycle inventory, life cycle impact assessment, and interpretation.

*Yearbook of International Environmental Law* Ole Kristian Fauchald, David Hunter, 2008 This yearbook contains articles from an international team of contributors. Each section of essays covers a topical subject, focusing mainly on environmental law, and the year-in-review section offers a round-up of world-wide legal developments.

**The Conflict of the Faculties** Henk Borgdorff, 2012 Artistic research is an endeavour in which the artistic and the academic are connected. In this emerging field of research artistic practices contribute as research to what we know and understand, and academia opens its mind to forms of knowledge and understanding that are entwined with artistic practices. Henk Borgdorff also addresses how we comment on such issues, and how the things we say cause the practices involved to manifest themselves in specific ways, while also setting them into motion. In this sense, this work not only explores the phenomenon of artistic research in relation to academia, but it also engages with that relationship.

**Life Cycle Impact Assessment** Michael Z. Hauschild, Mark A.J. Huijbregts, 2015-03-24 This book offers a detailed presentation of the principles and practice of life cycle impact assessment. As a volume of the LCA compendium, the book is structured according to the LCIA framework developed by the International Organisation for Standardisation (ISO) passing through the phases of definition or selection of impact categories, category indicators and characterisation models (Classification): calculation of category indicator results (Characterisation); calculating the magnitude of category indicator results relative to reference information (Normalisation); and converting indicator results of different impact categories by using numerical factors based on value-choices (Weighting). Chapter one offers a historical overview of the development of life cycle impact assessment and presents the boundary conditions and the general principles and constraints of characterisation modelling in LCA. The second chapter outlines the considerations underlying the selection of impact categories and the classification or assignment of inventory flows into these categories. Chapters three through thirteen explore all the impact categories that are commonly included in LCIA, discussing the characteristics of each followed by a review of midpoint and endpoint characterisation methods, metrics, uncertainties and new developments, and a discussion of research needs. Chapter-length treatment is accorded to Climate Change; Stratospheric Ozone Depletion; Human Toxicity; Particulate Matter Formation; Photochemical Ozone Formation; Ecotoxicity; Acidification; Eutrophication; Land Use; Water Use; and Abiotic Resource Use. The final two chapters map out the optional LCIA steps of Normalisation and Weighting.

Land Use and Soil Resources Ademola K. Braimoh, Paul L.G. Vlek, 2008-02-02 Poor land management has degraded vast amounts of land, reduced our ability to produce enough food, and is a major threat to rural livelihoods in many developing countries. This book provides a thorough analysis of the multifaceted impacts of land use on soils. Abundantly illustrated with full-color images, it brings together renowned academics and policy experts to analyze the patterns, driving factors and proximate causes, and the socioeconomic impacts of soil degradation.

**Information Governance** Robert F. Smallwood, 2014-03-28 Proven and emerging strategies for addressing document and records management risk within the framework of information governance principles and best practices Information Governance (IG) is a rapidly emerging super discipline and is now being applied to electronic document and records management, email, social media, cloud computing, mobile computing, and, in fact, the management and output of information organization-wide. IG leverages information technologies to enforce policies, procedures and controls to manage information risk in compliance with legal and litigation demands, external regulatory requirements, and internal governance objectives. Information Governance: Concepts, Strategies, and Best Practices reveals how, and why, to utilize IG and leverage information technologies to control, monitor, and enforce information access and security policies. Written by one of the most recognized and published experts on information governance, including specialization in e-document security and electronic records management Provides big picture guidance on the imperative for information governance and best practice guidance on electronic document and records management Crucial advice and insights for compliance and risk managers, operations managers, corporate counsel, corporate records managers, legal administrators, information technology managers, archivists, knowledge managers, and information governance professionals IG sets the policies that control and manage the use of organizational information, including social media, mobile computing, cloud computing, email, instant messaging, and the use of e-documents and records. This extends to e-discovery planning and preparation. Information Governance: Concepts, Strategies, and Best Practices provides step-by-step guidance for developing information governance strategies and practices to manage risk in the use of electronic business documents and records.

The Routledge Companion to Research in the Arts Michael Biggs, Henrik Karlsson, 2010-10-04 The Routledge Companion to Research in the Arts is a major collection of new writings on research in the creative and performing arts by leading authorities from around the world. It provides theoretical and practical approaches to identifying, structuring and resolving some of the key issues in the debate about the nature of research in the arts which have surfaced during the establishment of this subject over the last decade. Contributions are located in the contemporary intellectual environment of research in the arts, and more widely in the universities, in the

strategic and political environment of national research funding, and in the international environment of trans-national cooperation and communication. The book is divided into three principal sections – Foundations, Voices and Contexts – each with an introduction from the editors highlighting the main issues, agreements and debates in each section. The Routledge Companion to Research in the Arts addresses a wide variety of concepts and issues, including: the diversity of views on what constitutes arts-based research and scholarship, what it should be, and its potential contribution the trans-national communication difficulties arising from terminological and ontological differences in arts-based research traditional and non-traditional concepts of knowledge, their relationship to professional practice, and their outcomes and audiences a consideration of the role of written, spoken and artefact-based languages in the formation and communication of understandings. This comprehensive collection makes an original and significant contribution to the field of arts-based research by setting down a framework for addressing these, and other, topical issues. It will be essential reading for research managers and policy-makers in research councils and universities, as well as individual researchers, research supervisors and doctoral candidates.

**Core Qualities** Daniel Ofman,2004-09 The unique core quadrant methodology illustrated in this guide presents a framework for improving any manager's workplace performance. The core quadrant system is built on the principles of the enneagram and further refines the core qualities that define the enneagram's nine personality types. By recognizing qualities such as determination, precision, flexibility, orderliness, and empathy in oneself and one's employees, managers can create environments that allow individuals to flourish within organizations. This system provides managers with insight into the motivations of their employees and is particularly valuable in dealing with difficult or incompatible personality types.

*Weeds – Guardians of the Soil* Joseph A. Coannouer,2015-02-22 This is perhaps the first book to be written in praise of weeds. According to Joseph Cocannouer, weeds perform the following valuable services among others: 1. They bring minerals and make them available to crops. 2. When used in crop rotation they crop roots to feed deeply. 3. They fiberize and condition the soil make any soil productive. 4. They are good indicators of soil condition. 5. Weeds are deep divers and feeders they enable crops to withstand drought better. 6. As companion crops they enable our domesticated plants to get unavailable food. 7. Weeds store up minerals and nutrients and keep them readily available. 8. Weeds make good eating. No, Professor Cocannouer does not believe that weeds should be allowed to go rampant and take over our farms and gardens. The function of this book is to demonstrate how the controlled use of weeds can be sound ecology, good conservation and a boon to the average farmer or gardener.
