Security in the information age United States. Congress. Joint Economic Committee,2002

The Nature of War in the Information Age David J. Lonsdale,2004 There has been a great deal of speculation recently concerning the likely impact of the 'Information Age' on warfare. In this vein, much of the Revolution in Military Affairs (RMA) literature subscribes to the idea that the Information Age will witness a transformation in the very nature of war. In this book, David Lonsdale puts that notion to the test. Using a range of contexts, the book sets out to look at whether the classical Clausewitzian theory of the nature of war will retain its validity in this new age. The analysis covers the character of the future battlespace, the function of command, and the much-hyped concept of Strategic Information Warfare. Finally, the book broadens its perspective to examine the nature of 'Information Power' and its implications for geopolitics. Through an assessment of both historical and contemporary case studies (including the events following September 11 and the recent war in Iraq), the author concludes that although the future will see many changes to the conduct of warfare, the nature of war, as given theoretical form by Clausewitz, will remain essentially unchanged.

Security and Software for Cybercafes Adomi, Esharenana E.,2008-04-30 Cybercafes, which are places where Internet access is provided for free, provide the opportunity for people without access to the Internet, or who are traveling, to access Web mail and instant messages, read newspapers, and explore other resources of the Internet. Due to the important role Internet cafes play in facilitating access to information, there is a need for their systems to have well-installed software in order to ensure smooth service delivery. Security and Software for Cybercafes provides relevant theoretical frameworks and current empirical research findings on the security measures and software necessary for cybercafes, offering information technology professionals, scholars, researchers, and educators detailed knowledge and understanding of this innovative and leading-edge issue, both in industrialized and developing countries.

Handbook of Neuroemergency Clinical Trials Wayne M. Alves, Brett E. Skolnick, 2006-01-18 During the 1990's, scientific advances in understanding the mechanisms and pathophysiology of acute central nervous system injury were offset by a history of disappointing results from Phase III clinical trials of novel neuroprotective drugs. Numerous novel compounds were "tested, and seemingly fell by the wayside. This book is intended to focus on novel therapies and the unique challenges their intended targets pose for the design and analysis of clinical trials. The authors explore the issues facing research in this area and the strategies that might lead to future success in this critical area of unmet medical need. It represents a compendium of information gained from over 20 years of clinical trial experience in areas of acute neurology and neurosurgery. From the knowledge of clinical assessment using standardized tools, to the intricate design of difficult hyper-acute neuroemergencies trials, the reader will benefit from the authors' perspectives. * Presents new perspectives on acute neuroemergency clinical trials * Includes insights from clinical pharmacology and industry perspectives * Discusses historical lessons learned from early and recent trials in acute neuroscience populations

Religion, Education and Governance in the Middle East Sai Felicia Krishna-Hensel, 2016-04-08 The Middle East is a key geopolitical strategic region in the international system but its distinctive cultural and political divisions present a mosaic of states that do not lend themselves to simplistic interpretations. A thoughtful analysis of the Middle East requires an understanding of the synergism between tradition and modernity in the region as it adapts to a globalizing world. Religious education and activism continue to remain a significant factor in the modernization process and the development of modern governance in the states of the Middle East. This interdisciplinary book explores the historical and contemporary role of religious tradition and education on political elites and governing agencies in several major states as well as generally in the region. The relationship between democracy and authority is examined to provide a better understanding of the complexity underlying the emergence of new power configurations. As the region continues to respond to the forces of change in the international system it remains an important and intriguing area for analysts.

Turning the Tide Great Britain. Royal Commission on Environmental Pollution, Sir Tom Blundell, 2004 This Royal Commission report on protection of the marine environment focuses on the impact of marine fishing in the seas around the UK, both on fish populations and the wider ecosystem. It considers a range of issues including the role of the fishing industry and its growth over the last 50 years; the legal framework for the marine environment and fisheries, at the national, European and international levels; the impact of fishing and the legacy of overfishing; aquaculture fisheries; marine protected areas; improved fisheries management; and a system of marine spatial planning. The report concludes that, as a society, we give much lower priority to protecting our seas compared with the land, and over-fishing is a global problem which has led to the collapse of fisheries in many areas. This situation requires significant urgent change which recognises the need for sustainable fisheries management and avoids the degradation of our seas, placing it within the context of wider management of human activities in the marine environment. Recommendations made include: the introduction of a Marine Act to establish a statutory framework with strategic objectives for marine environmental protection; a move away from a presumption in favour of fishing rights to a precautionary approach which requires demonstration that fishing activity is environmentally sustainable; establishing a network of marine protected areas within the UK over the next five years, which would lead to 30 per cent of the UK's exclusive economic zone being closed to commercial fishing; and a change in the emphasis of research away from management of fish populations towards a wider focus on the marine environment.

Maintaining Peace and Security? Trudy Fraser, 2014-11-20 The security concerns of the United Nations today extend far beyond what the writers of the 1945 Charter could have imagined. As a result, the UN has been compelled to reconsider the parameters of what constitutes a threat to international peace and security, and what it means to be safe and secure in the twenty-first century. This text critically assesses the capacity of the UN to evolve in response to changing notions of security, and examines the complex history of people, places and politics that have helped shape this important global actor.
