 Advanced Environments, Tools, and Applications for Cluster Computing Dan
Grigoras,Alex Nicolau,Bernard Toursel,Bertil Folliot,2003-08-01 Started by
small group of well known scientists with the aim of sharing knowledge,
experiences, and results on all aspects of cluster computing, the initiative
of a workshop on cluster computing received more attention after IFIP WG 10.3
and IEEE Romania Section accepted our request for sponsorship. Moreover, the
application for a NATO ARW grant was successful, leading to a greater
interest in the workshop. In this respect, we have to say that we chose
Romania in order to attract scientists from Central and Eastern European
countries and improve the cooperation in the region, in the field of cluster
computing. We had an extremely short time to organize the event, but many
people joined us and enthusiastically contributed to the process. The success
of the workshop is wholly due to the hard work of the organizing committee,
members of the program committee, key speakers, speakers from industry, and
authors of accepted papers. The workshop consisted of invited and regular

5

paper presentations, followed by discussions, on many important current and emerging topics ranging from sheduling and load balancing to grids. The key speakers devoted their time and efforts to presenting the most interesting results of their research groups, and we all thank them for this . All papers were peer reviewed by two or three reviewers.
