Global Status Report on Road Safety 2015 World Health Organization,2015-12-17 The Global status report on road safety 2015, reflecting information from 180 countries, indicates that worldwide the total number of road traffic deaths has plateaued at 1.25 million per year, with the highest road traffic fatality rates in low-income countries. In the last three years, 17 countries have aligned at least one of their laws with best practice on seat-belts, drink-driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development: halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this report is the third in the series, and provides a snapshot of the road safety situation globally, highlighting the gaps and the measures needed to best drive progress.--Publisher's description.

Women in the Fine Arts, from the Seventh Century B.C. to the Twentieth Century A.D. Clara Erskine Clement Waters,1984

Particulate Products Henk G. Merkus,Gabriel M.H. Meesters,2013-11-19 Particulate products make up around 80% of chemical products, from all industry sectors. Examples given in this book include the construction materials, fine ceramics and concrete; the delicacies, chocolate and ice cream; pharmaceutical, powders, medical inhalers and sun screen; liquid and powder paints. Size distribution and the shape of the particles provide for different functionalities in these products. Some functions are general, others specific. General functions are powder flow and require – at the typical particulate concentrations of these products – that the particles cause adequate rheological behavior during processing and/or for product performance. Therefore, this book addresses particle packing as well as its relation to powder flow and rheological behavior. Moreover, general relationships to particle size are discussed for e.g. color and sensorial aspects of particulate products. Product-specific functionalities are often relevant for comparable product groups. Particle size distribution and shape provide, for example, the following functionalities: - dense particle packing in relation to sufficient strength is required in concrete construction, ceramic objects and pharmaceutical tablets - good sensorial properties (mouthfeel) to chocolate and ice cream - effective dissolution, flow and compression properties for pharmaceutical powders - adequate hiding power and effective coloring of paints for protection and the desired esthetical appeal of the objects - adequate protection of our body

against sun light by sunscreen - effective particle transport and deposition to desired locations for medical inhalers and powder paints. Adequate particle size distribution, shape and porosity of particulate products have to be achieved in order to reach optimum product performance. This requires adequate management of design and development as well as sufficient knowledge of the underlying principles of physics and chemistry. Moreover, flammability, explosivity and other health hazards from powders, during handling, are taken into account. This is necessary, since great risks may be involved. In all aspects, the most relevant parameters of the size distribution (and particle shape) have to be selected. In this book, experts in the different product fields have contributed to the product chapters. This provides optimum information on what particulate aspects are most relevant for behavior and performance within specified industrial products and how optimum results can be obtained. It differs from other books in the way that the critical aspects of different products are reported, so that similarities and differences can be identified. We trust that this approach will lead to improved optimization in design, development and quality of many particulate products.

The Truth about Crime Jean Comaroff, John L. Comaroff, 2016-12-05 This new book by the well-known anthropologists Jean and John L. Comaroff explores the global preoccupation with criminality in the early twenty-first century, a preoccupation strikingly disproportionate, in most places and for most people, to the risks posed by lawlessness to the conduct of everyday life. Ours in an epoch in which law-making, law-breaking, and law-enforcement are ever more critical registers in which societies construct, contest, and confront truths about themselves, an epoch in which criminology, broadly defined, has displaced sociology as the privileged means by which the social world knows itself. They also argue that as the result of a tectonic shift in the triangulation of capital, the state, and governance, the meanings attached to crime and, with it, the nature of policing, have undergone significant change; also, that there has been a palpable muddying of the lines between legality and illegality, between corruption and conventional business; even between crime-and-policing, which exist, nowadays, in ever greater, hyphenated complicity. Thinking through Crime and Policing is, therefore, an excursion into the contemporary Order of Things; or, rather, into the metaphysic of disorder that saturates the late modern world, indeed, has become its leitmotif. It is also a meditation on sovereignty and citizenship, on civility, class, and race, on the law and its transgression, on the political economy of representation.

Kaleidoscope Eyes Jen Bryant, 2009-05-12 Will Lyza's 1968 summer mystery lead to . . . pirate treasure? When Lyza helps her dad clean out her late grandfather's house, a mysterious surprise

brightens the sad task. In Gramps's dusty attic, Lyza discovers three maps, carefully folded and stacked, bound by a single rubber band. On top, an envelope says "For Lyza ONLY." What could this possibly be? It takes the help of her two best friends, Malcolm and Carolann, to figure out that the maps reveal three possible spots in their own New Jersey town where Captain Kidd (the Captain Kidd, seventeenth-century pirate) may have buried a treasure. Can three thirteen-year-olds actually conduct a secret treasure hunt? And what will they find? In a tale inspired by a true story of buried treasure, Jen Bryant weaves an emotional and suspenseful novel in poems, all set against the backdrop of the Vietnam War during a pivotal year in U.S. history.

Going Green: Implementing Sustainable Strategies in Libraries Around the World Petra

Hauke, Madeleine Charney, Harri Sahavirta, 2018-10-08 This publication examines aspects of reducing the ecological footprint in libraries' workaday operations as well as the social role and responsibility of libraries as leaders in environmental sustainability. The theoretical background and practical applications of contributions made by worldwide libraries to the United Nations 2030 Sustainable Development Goals (SDGs) are discussed. General articles and research studies from Finland, Germany, Portugal, and Brazil illuminate libraries' contributions to the SDGs. Case studies from Sweden, Kenya, Germany, Ukraine, China, and Serbia highlight challenges and opportunities in implementing sustainable approaches in public libraries. Examples of best practice from academic libraries in Hong Kong, Cameroon, Germany, Uganda, USA and Kenya, are presented. All papers published in this book are selected from the best papers of the ENSULIB Satellite Meeting 2017 in Berlin, the ENSULIB/Public Libraries Section's Open Session at the IFLA Conference 2017 in Poland, and from the IFLA Green Library Award 2017. All articles are written in English.

Pieces of Georgia Jen Bryant, 2007-11-13 Like her mother, Georgia McCoy is an artist, but her dad looks away whenever he sees her with a sketchbook. Sometimes it's hard to remember what it was like when her mother was still alive . . . when they were a family . . . when they were happy. But then a few days after her 13th birthday, Georgia receives an unexpected gift—a strange, formal letter, all typed up and signed anonymous—granting her free admission to the Brandywine River Museum for a whole year. And things begin to change. An accessible novel in poems, *Pieces of Georgia* offers an endearing protagonist—an aspiring artist, a grieving daughter, a struggling student, a genuine friend—and the poignant story of a broken family coming together.

Energy Effectiveness Sandra McCardell, 2018-06-19 This book describes practical ways to understand energy and water use in organizations and then manage or control that use, thereby

reducing risk and cost. The author presents a strategic framework to focus on the types of questions that should be addressed internally, including evaluation of potential projects, planning and implementing energy projects, and evaluating results. The premise is that no modern organization can exist without energy, despite the fact that energy is also one of the mandatory inputs that receives little to no attention in most organizations. This work highlights methodologies and projects that illuminate ways in which energy management is central to an organization's success, considering in each case the four main determinants of energy use: People, Buildings, Equipment /Processes, and the Environment. The book constitutes a complete energy savings resource for business owners, middle managers, and building and energy managers, providing options, free tools, and flexible project templates.

A River of Words Jen Bryant, 2008-07-09 2009 Caldecott Honor Book An ALA Notable Book A New York Times Best Illustrated Children's Book A Charlotte Zolotow Honor Book NCTE Notable Children's Book When he wrote poems, he felt as free as the Passaic River as it rushed to the falls. Willie's notebooks filled up, one after another. Willie's words gave him freedom and peace, but he also knew he needed to earn a living. So he went off to medical school and became a doctor -- one of the busiest men in town! Yet he never stopped writing poetry. In this picture book biography of William Carlos Williams, Jen Bryant's engaging prose and Melissa Sweet's stunning mixed-media illustrations celebrate the amazing man who found a way to earn a living and to honor his calling to be a poet.

Guns in the Hands of Artists Jonathan Ferrara, 2016-11-01 In the 1990s, the New Orleans murder rate exploded. In 1996, 350 people were killed—the highest number in the city's history, and the highest rate in the nation. In response to this crisis, gallery owner and artist Jonathan Ferrara and artist Brian Borrello, launched a powerful project: Guns in the Hands of Artists. Over sixty artists, including painters, glass artists, sculptors, photographers, and poets, used decommissioned guns taken off the city streets via a gun buyback program to express a thought, make a statement, open a discussion, and to stimulate thinking about guns and gun violence in America. As gun violence continues to devastate the nation on a daily basis, Guns in the Hands of Artists reemerged in 2012 as a community-based social activist art project that has since traveled to six cities across the US. Using art as a mirror for life and interweaving the works of thirty diverse artists with the voices of seventeen national thought leaders, this book is an important outgrowth of the exhibition and an extension of its efforts to employ art as a vehicle for dialogue, as a call to action, and—ultimately—as an agent of change. Essays by: Walter Isaacson, Senator Tim Kaine, Lupe Fiasco, Richard Ford, Joe Nocera,

Trymaine Lee, Lolis Eric Elie, John M. Barry, Dan Cameron, Lucia McBath, Harry Shearer, Jonathan Ferrara, Brian Borrello, Maria Cuomo Cole, Michael Waldman, E. Ethelbert Miller, Mayor Mitchell J. Landrieu, Congresswoman Gabrielle Giffords and Captain Mark Kelly.

What We Talk About When We Talk About Books Leah Price, 2019-08-20 Reports of the death of reading are greatly exaggerated Do you worry that you've lost patience for anything longer than a tweet? If so, you're not alone. Digital-age pundits warn that as our appetite for books dwindles, so too do the virtues in which printed, bound objects once trained us: the willpower to focus on a sustained argument, the curiosity to look beyond the day's news, the willingness to be alone. The shelves of the world's great libraries, though, tell a more complicated story. Examining the wear and tear on the books that they contain, English professor Leah Price finds scant evidence that a golden age of reading ever existed. From the dawn of mass literacy to the invention of the paperback, most readers already skimmed and multitasked. Print-era doctors even forbade the very same silent absorption now recommended as a cure for electronic addictions. The evidence that books are dying proves even scarcer. In encounters with librarians, booksellers and activists who are reinventing old ways of reading, Price offers fresh hope to bibliophiles and literature lovers alike.

Industrial Archaeology Marilyn Palmer, Peter Neaverson, 1998 Industrial Archaeology sets out a coherent methodology for the discipline which expands on and extends beyond the purely functional analysis of industrial landscapes, structures and artefacts to their cultural meaning.

The Global Burden of Disease Colin Mathers, World Health Organization, 2008 The global burden of disease: 2004 update is a comprehensive assessment of the health of the world's population. It provides detailed global and regional estimates of premature mortality, disability and loss of health for 135 causes by age and sex, drawing on extensive WHO databases and on information provided by Member States.--Publisher description.

Ringside, 1925 Jen Bryant, 2009-07-14 Take a ringside seat at one of the most controversial trials in American history. The year is 1925, and the students of Dayton, Tennessee, are ready for a summer of fishing, swimming, and drinking root beer floats at Robinson's Drugstore. But when their science teacher, J. T. Scopes, is arrested for having taught Darwin's theory of evolution, it seems it won't be an ordinary summer in Dayton. As Scopes's trial proceeds, the small town pulses with energy and is faced with astonishing nationwide publicity. Suddenly surrounded by fascinating people and new ideas, Jimmy Lee, Pete, Marybeth, and Willy are thrilled. But amidst the excitement and circus-like atmosphere is a threatening sense of tension—not only in the courtroom, but among even the strongest

of friends. □ “The colorful facts [Bryant] retrieves, the personal story lines, and the deft rhythm of the narrative are more than enough invitation to readers to ponder the issues she raises.”—Publishers Weekly, Starred

Second Language Acquisition Doris Luft Baker, Deni Lee Basaraba, Cara Richards-Tutor, Catherine Richards-Tutor, 2018 Although learning English as a second language is ubiquitous across schools worldwide, it can be particularly challenging in classrooms with a linguistically diverse population of students. For example, although 76% of English learners in the United States speak Spanish as their native language, ELs in the United States actually speak more than 450 languages (Baker, Richards-Tutor, Gersten, Baker, & Smith, 2017). Moreover, all ELs, even Spanish-speaking ELs, are a remarkably heterogeneous group in terms of their: (a) English language proficiency, (b) native language proficiency, (c) socioeconomic status, (d) parental level of education, (e) country of origin, and (f) individual and family experiences (Dürğunoglu & Goldenberg, 2011). Thus, understanding more nuanced ways to support this growing population of students should be a priority. Collectively, this book provides the most up-to-date review of our current knowledge about how the complexities of each of the linguistic registers across mathematics, science and social studies extends far beyond content-area vocabulary and warranting an intentional, purposeful focus on language, particularly academic English during content-area instruction. Moreover, the current disciplinary content standards demand the integration of discipline-specific language instruction within content-area instruction. To address these demands, the topics of the chapters in this book span content areas (ELA, mathematics, science, and social studies), topical areas (assessment, language growth, instruction, and professional development), and grade levels (preschool, elementary, and secondary). Each chapter provides a synthesis of the research on one of the specific topics, and it concludes with implications for practice and research. References to the most relevant research are provided. We hope that this book can guide future research and professional development initiatives in school districts on what needs to be taken into account when training teachers to be effective instructors of content and academic language. English learners constitute a large percentage of the student population outside and inside the United States. Thus, learning more about language growth patterns in English and the native language, assessment considerations, effective interventions, and curricular analyses can provide a road map to direct the research that can support this increasingly large number of students worldwide.

High-resolution Autoradiography George C. Towe, Henry J. Gomberg, J. W. Freeman, 1954

Autoradiography has been used only to a rather limited extent in metallurgical studies. Probably the major deterring factor has been that the autoradiographic systems have not provided the high resolution required in many investigations. A general discussion of the requirements for high-resolution autoradiography is presented in this report including detecting layer as well as radioactive-sample specifications. The need for a thin photographic emulsion in close contact with the metal surface is emphasized. The desirability of using favorable radiation (e.g., low-energy beta radioactivity) is also discussed.
