Low Energy Particle Accelerator-Based Technologies and Their Applications Vlado

Valković,2022-06-22 Low Energy Particle Accelerator-Based Technologies and Their Applications describes types of low energy accelerators, presents some of the main manufacturers, illustrates some of the accelerator laboratories around the globe and shows examples of successful transfers of accelerators to needed laboratories. Key Features: Presents new trends and the state of the art in a field that's growing Provides an overview of numerous applications of such accelerators in medicine, industry, earth sciences, nuclear non-proliferation and oil Fills a gap, with the author drawing on his own experiences with transporting such relatively large machines from one lab to the other that require a tremendous amount of planning, technical and engineering efforts This is an essential reference for advanced students as well as for physicists, engineers and practitioners in accelerator science. About the Author Dr. Vladivoj (Vlado) Valković, a retired professor of physics, is a fellow of the American Physical

Society and Institute of Physics (London). He has authored 22 books (from Trace Elements, Taylor & Francis, 1975, to Radioactivity in the Environment, Elsevier, 1st Edition 2001, 2nd Edition 2019), and more than 400 scientific and technical papers in the research areas of nuclear physics, applications of nuclear techniques to trace element analysis in biology, medicine and environmental research. He has lifelong experience in the study of nuclear reactions induced by 14 MeV neutrons. This research has been done through coordination and works on many national and international projects, including US-Croatia bilateral, NATO, IAEA, EU-FP5, FP6 and FP7 projects. In the Bubble John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're

unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of *In the Bubble* is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

Minor Histories Mike Kelley, 2004-02-06 The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the blazing network of focused confluences from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection

concentrates on Kelley's own work, ranging from texts in voices that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. *Statements* consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including *Ajax*, which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; *Some Aesthetic High Points*, an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of creative writings that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. *Video Statements and Proposals* are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. *Image-Texts* offers writings that accompany or are part of artworks and installations. This section includes *A Stopgap Measure*, Kelley's zestful millennial essay in social satire, and *Meet John Doe*, a collage of appropriated texts. *Architecture* features an discussion of Kelley's *Educational Complex* (1995) and an interview in which he reflects on the role of architecture in his work. Finally, *Ufology* considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

Myths & Legends of Japan Frederick Hadland

Davis, 2020-09-28 Pierre Loti in *Madame Chrysanthème*, Gilbert and Sullivan in *The Mikado*, and Sir Edwin Arnold in *Seas and Lands*, gave us the impression that Japan was a real fairyland in the Far East. We were delighted with the prettiness and quaintness of that country, and still more with the prettiness and quaintness of the Japanese people. We laughed at their topsy-turvy ways, regarded the Japanese woman, in her rich-coloured kimono, as altogether charming and fascinating, and had a vague notion that the principal features of Nippon were the tea-houses, cherry-blossom, and geisha. Twenty years ago we did not take Japan very seriously. We still listen to the melodious music of *The Mikado*, but now we no longer regard Japan as a sort of glorified willow-pattern plate. The Land of the Rising Sun has become the Land of the Risen Sun, for we have learnt that her quaintness and prettiness, her fairy-like manners and customs, were but the outer signs of a great and progressive nation. To-day we recognise Japan as a power in the East, and her victory over the Russian has made her army and navy famous throughout the world. The Japanese have always been an imitative nation, quick to absorb and utilise the religion, art, and social life of China, and, having set their own national seal upon what they have borrowed from the Celestial Kingdom, to look elsewhere for material that should strengthen and advance their position. This imitative quality is one of Japan's most marked characteristics. She has ever been loath to impart information to others, but ready at all times to gain access to any form of knowledge likely to make for her advancement. In the fourteenth century Kenkō wrote in his *Tsurezuregusa*: Nothing opens one's eyes so much as travel, no matter where, and the twentieth-century Japanese has put this excellent advice into practice. He has

travelled far and wide, and has made good use of his varied observations. Japan's power of imitation amounts to genius. East and West have contributed to her greatness, and it is a matter of surprise to many of us that a country so long isolated and for so many years bound by feudalism should, within a comparatively short space of time, master our Western system of warfare, as well as many of our ethical and social ideas, and become a great world-power. But Japan's success has not been due entirely to clever imitation, neither has her place among the foremost nations been accomplished with such meteor-like rapidity as some would have us suppose.

The Politics of Decentralization Carol J. Pierce Colfer, Doris Capistrano, 2012 Decentralization is sweeping the world and having dramatic and far-reaching impacts on resource management and livelihoods, particularly in forestry. This book is the most up-to-date examination of the themes, experiences and lessons learned from decentralization worldwide. Drawing on research and support from all of the major international forestry and conservation organizations, the book provides a balanced account that covers the impact of decentralization on resource management worldwide, and provides comparative global insights with wide implications for policy, management, conservation and resource use and planning. Topics covered include forest governance in federal systems, democratic decentralization of forests and natural resources, paths and pitfalls in decentralization and biodiversity conservation in decentralized forests. The book provides in-depth case studies of decentralization from Bolivia, Ghana, Indonesia, Russia, Scotland, Switzerland, Uganda and the US, as well as highlights from federal countries including Australia, Brazil, Canada, India and Malaysia. It also addresses the critical links between

the state, forests, communities and power relations in a range of regions and circumstances, and provides case examples of how decentralization has been viewed and experienced by communities in Guatemala, Philippines and Zimbabwe. The Politics of Decentralization is state-of-the-art coverage of decentralization and is essential for practitioners, academics and policy-makers across forestry and the full spectrum of natural resource management.

Beilegung individualarbeitsrechtlicher Streitigkeiten in Japan Heike Alps, 2015-10-12 English summary: For a long period of time, conflicts in individual labor law have not been perceived as a meaningful type of conflict in Japan. For the first time, at the beginning of the new millennium, two systems were introduced, which provided for all of Japan, nationally unified regulations particularly for the settlement of conflicts within individual labor law. A joint-committee procedure through district labor bureaus was created in 2001, following the Act on Promotion of the Resolution of Individual Labor-related Disputes, and the procedures for labor tribunal committees at the district court level was instituted in 2006. Japan is considered to be a country, in which conflicts are predominantly resolved with the help of proceedings, whose goal is the amicable settlement of disputes. The plea procedures display several similarities in both alternative conflict-resolution procedures. The analysis and legal classification of the two newly established procedures is the goal of this work. German description: Individualarbeitsrechtliche Streitigkeiten sind in Japan über einen langen Zeitraum hinweg nicht als bedeutsamer Konflikttypus wahrgenommen worden. Erst zu Beginn des neuen Jahrtausends wurden zwei Systeme eingeführt, die landesweit für ganz Japan einheitliche Regelungen speziell nur für die Beilegung individualarbeitsrechtlicher Konflikte

vorsehen. Im Jahr 2001 ist ein Vermittlungsverfahren auf Verwaltungsebene und im Jahr 2006 das Verfahren über die Verstandigung in Arbeitssachen vor den japanischen Distriktgerichten eingeführt worden. Japan gilt als Land, in dem Konflikte überwiegend mit Hilfe von Verfahren gelöst werden, deren Ziel die einvernehmliche Beilegung eines Streites ist. Das Verstandigungsverfahren weist viele Gemeinsamkeiten mit solch alternativen Streitbeilegungsverfahren auf. Die Analyse und rechtliche Einordnung der beiden neu etablierten Verfahren ist das Ziel dieses Beitrags.

Hukum Internasional Malcolm N. Shaw

QC, 2019-06-01 Dalam perjalanan panjang umat manusia dari era gua menuju era komputer, ada satu peran sentral yang selalu dimainkan oleh ide hukum-ide bahwa ketertiban atau tatanan adalah hal yang penting sementara kekacauan (chaos) bertentangan dengan eksistensi

keadilan dan kestabilan. Setiap masyarakat, baik besar maupun kecil, kuat maupun lemah, telah menciptakan sendiri kerangka sejumlah prinsip yang mengatur perkembangannya. Apa yang boleh dilakukan, apa yang tidak boleh dilakukan, tindakan yang diterima, yang terlarang, semuanya terangkum dalam kesadaran masyarakat tersebut.

Law and the Long War Benjamin Wittes,2008-06-19
An authoritative assessment of the new laws of war and a sensible and sophisticated roadmap for the future of liberty in the Age of Terror America is losing a crucial front in the ongoing war on terror. It is losing not to Al Qaeda, but to its own failure to construct a set of laws that will protect the American people during this global conflict. As debate continues to rage over the legality and ethics of war, Benjamin Wittes enters the fray with a sober-minded exploration of law in wartime that is definitive, accessible, and nonpartisan. Outlining how this country came to its current impasse over human rights and counterterrorism, Law and the Long War paves the way toward fairer, more accountable rules for a conflict without end.

One-to-many-relations in morphology, syntax, and semantics Berthold Cysmann,Manfred Sailer,2021 The standard view of the form-meaning interfaces, as embraced by the great majority of contemporary grammatical frameworks, consists in the assumption that meaning can be associated with grammatical form in a one-to-one

correspondence. Under this view, composition is quite straightforward, involving concatenation of form, paired with functional application in meaning. In this book, we discuss linguistic phenomena across several grammatical sub-modules (morphology, syntax, semantics) that apparently pose a problem to the standard view, mapping out the potential for deviation from the ideal of one-to-one correspondences, and develop formal accounts of the range of phenomena. We argue that a constraint-based perspective is particularly apt to accommodate deviations from one-to-many correspondences, as it allows us to impose constraints on full structures (such as a complete word or the interpretation of a full sentence) instead of deriving such structures step by step. Most of the papers in this volume are formulated in a particular constraint-based grammar framework, Head-driven Phrase Structure Grammar. The contributions investigate how the lexical and constructional aspects of this theory can be combined to provide an answer to this question across different linguistic sub-theories.
