Death, Society and Human Experience (1-download) Robert Kastenbaum,2015-07-22 Providing an understanding of the relationship with death, both as an individual and as a member of society. This book is intended to contribute to your understanding of your relationship with death, both as an individual and as a member of society. Kastenbaum shows how individual and societal attitudes influence both how and when we die and how we live and deal with the knowledge of death and loss. Robert Kastenbaum is a renowned scholar who developed one of the world's first death education courses and introduced the first text for this market. This landmark text draws on contributions from the social and behavioral sciences as well as the humanities, such as history, religion, philosophy, literature, and the arts, to provide thorough coverage of understanding death and the dying process. Learning Goals Upon completing this book, readers should be able to: - Understand the relationship with death, both as an individual and as a member of society -See how social forces and events affect the length of our lives, how we grieve, and how we die -Learn how dying people are perceived and treated in our society and what can be done to provide the best possible care -Master an understanding of continuing developments and challenges to hospice (palliative care). -Understand what is becoming of faith and doubt about an afterlife

Climate Diplomacy from Rio to Paris William Sweet,2016-12-06 The essential primer for understanding climate diplomacy, describing both the major players and the path to progress, from the 1992 Rio Summit to the 2015 Paris Climate Conference Climate Diplomacy from Rio to Paris is the first accessible overview of climate diplomacy in its first quarter century. The author, who has reported on energy and climate for two decades, provides readers with a nuanced account of the major players and their interests—from the United States, the European Union, and China to environmental organizations, the United Nations, and the Vatican—and analyzes the outcomes of the major climate conferences at Rio, Kyoto, Copenhagen, and Paris.

Skybreaker Kenneth Oppel,2009-09-22 A legendary ghost ship. An incredible treasure. A death-defying adventure. Forty years ago, the airship Hyperion vanished with untold riches in its hold. Now, accompanied by heiress Kate de Vries and a mysterious gypsy, Matt Cruse is determined to recover the ship and its treasures. But 20,000 feet above the Earth's surface, pursued by those who have hunted the Hyperion since its disappearance, and surrounded by deadly high-altitude life forms, Matt and his companions soon find themselves fighting not only for the Hyperion—but for their very lives.

Animals and the Shaping of Modern Medicine Abigail Woods, Michael Bresalier, Angela Cassidy, Rachel Mason Dentinger, 2017-12-29 This book is open access under a CC BY 4.0 license. This book breaks new ground by situating animals and their diseases at the very heart of modern medicine. In demonstrating their historical significance as subjects and shapers of medicine, it offers important insights into past animal lives, and reveals that what we think of as 'human' medicine was in fact deeply zoological. Each chapter analyses an important episode in which animals changed and were changed by medicine. Ranging across the animal inhabitants of Britain's zoos, sick sheep on Scottish farms, unproductive livestock in developing countries, and the tapeworms of California and Beirut, they illuminate the multi-species dimensions of modern medicine and its rich historical connections with biology, zoology, agriculture and veterinary medicine. The modern movement for One Health – whose history is also analyzed – is therefore revealed as just the latest attempt to improve health by working across species and disciplines. This book will appeal to historians of animals, science and medicine, to those involved in the promotion and practice of One Health today.

Handheld Usability Scott Weiss, 2003-01-10 Offering an overview of usability, testing, and information architecture for EPOC, WAP, PDAs, handhelds, and handsets, this how-to guide dives into the details about medium-specific issues and design strategies. * Discusses designing for the current wireless platforms: cellular phones and PDAs * Covers both stand alone as well as Web-based application design * Contains a case study of a usability test

Beasts at Bedtime Liam Heneghan, 2018-05-15 “[A] fresh new look at animal tales, often classic, and how they pertain to the present-day and our often fraught relationship to our environment.” –Jeff VanderMeer, author of the Southern Reach Trilogy Talking lions, philosophical bears, very hungry caterpillars, wise spiders, altruistic trees, companionable moles, urbane elephants: this is the magnificent menagerie that delights our children at bedtime. Within the entertaining pages of many children's books, however, also lie profound teachings about the natural world that can help children develop an educated and engaged appreciation of the dynamic environment they inhabit. In *Beasts at Bedtime*, scientist (and father) Liam Heneghan examines the environmental underpinnings of children's stories. From Beatrix Potter to Harry Potter, Heneghan unearths the universal insights into our inextricable relationship with nature that underlie so many classic children's stories. Some of the largest environmental challenges in coming years—from climate instability, the extinction crisis, freshwater depletion, and deforestation—are likely to become even more severe as this generation of children grows up. Though today's young readers will bear the brunt of these environmental calamities, they will also be able to contribute to environmental solutions if prepared properly. And all it takes is an attentive eye: Heneghan shows how the nature curriculum is already embedded in bedtime stories, from the earliest board books like *The Rainbow Fish* to contemporary young adult classics like *The Hunger Games*. This book enthralls as it engages. *Beasts at Bedtime* will help parents, teachers, and guardians extend those cozy times curled up together with a good book into a lifetime of caring for our planet. “*Beasts at Bedtime* is proof that most kidlit has

teachable moments embedded in it.” –Toronto Star

The Death of the Irish Language Reg Hindley, 2012-10-12 Using a blend of statistical analysis with field survey among native Irish speakers, Reg Hindley explores the reasons for the decline of the Irish language and investigates the relationships between geographical environment and language retention. He puts Irish into a broader European context as a European minority language, and assesses its present position and prospects.

Frontiers in Colorado Paleoindian Archaeology Robert H. Brunswig, Bonnie L. Pitblado, 2007-11-30 As the Ice Age waned, Clovis hunter-gatherers began to explore and colonize the area now known as Colorado. Their descendents and later Paleoindian migrants spread throughout Colorado's plains and mountains, adapting to diverse landforms and the changing climate. In this new volume, Robert H. Brunswig and Bonnie L. Pitblado assemble experts in archaeology, paleoecology-climatology, and paleofaunal analysis to share new discoveries about these ancient people of Colorado. The editors introduce the research with scientific context. A review of seventy-five years of Paleoindian archaeology in Colorado highlights the foundation on which new work builds, and a survey of Colorado's ancient climates and ecologies helps readers understand Paleoindian settlement patterns. Eight essays discuss archaeological evidence from Plains to high Rocky Mountain sites. The book offers the most thorough analysis to date of Dent--the first Clovis site discovered. Essays on mountain sites show how advances in methodology and technology have allowed scholars to reconstruct settlement patterns and changing lifeways in this challenging environment. Colorado has been home to key moments in human settlement and in the scientific study of our ancient past. Readers interested in the peopling of the New World as well as those passionate about the methods and history of archaeology will find new material and satisfying overviews in this book. Contributors include Rosa Maria Albert, Robert H. Brunswig, Reid A. Bryson, Linda Scott Cummings, James Doerner, Daniel C. Fisher, David L. Fox, Bonnie L. Pitblado, Jeffrey L. Saunders, Todd A. Surovell, R. A. Varney, and Nicole M. Waguespack.

Ecotheology and Nonhuman Ethics in Society Melissa Brotton, 2016-11-30 This book promotes Christian ecology and animal ethics from the perspectives of the Bible, science, and the Judeo-Christian tradition. It covers diverse topics such as developing Christian virtue ethics, assisting species threatened by climate change, liturgical and hymnal ecologies, past and present Catholic ecological thinking, and Jesus and the animals in the Gospel of Mark.

Tornadoes and Waterspouts in Ireland John Tyrrell, 2021-10 People living in Ireland do not expect to encounter a tornado. But, why not? They have been part of the Irish climate and have tracked across the land for hundreds of years. Indeed, during the last three decades they have visited every county in Ireland. This book traces how for centuries there was not the vocabulary to record them in a way we would recognise them today. In retrieving these records new insights emerge into both the written historical record and phrases used in our contemporary accounts. It introduces those conditions in Ireland favourable for tornadoes and waterspouts. Being localised phenomena they are ill suited for capture by the meteorological network, which was

designed for quite different purposes. Instead, building a database for recent years has been achieved from reports by numerous weather enthusiasts, followed by site investigations to confirm and characterise them. Many such case studies are presented from all over Ireland. Today, increasing attention is being placed upon severe weather events and their impacts. A chronology for recent decades shows that tornadoes in Ireland occur every year and may occur in any season, but no one year is typical. In addition, the vulnerability of people, built structures and aspects of the environment are explored. Potentially, they are vulnerable at any time of year and anywhere in Ireland. Finally, international comparisons show that the experience in Ireland is not so dissimilar to elsewhere. In particular, comparisons are made with data for the USA and the rest of Europe.

Naughty No More Marilyn Krieger, 2011-06-21 Thought you couldn't train your cat and resolve troublesome cat behavior challenges? Yes, you can! Clicker training, combined with other friendly, positive behavior modification techniques can effectively solve cat behavior problems and train your cat in a way that will be quick and easy for you; and fun for your cat. Clicker training can also improve your cat's activity rate, attitude and, more importantly, strengthen the bonds between you and your cat. In this easy-to-read beginner's guide, Marilyn Krieger, a leading clicker-training expert, tells you how to teach your cat to: sit and stay and not dart out of doors; not scratch the furniture; have stress-free introductions to new cats; stay off the table and counters; get along better with you, your guests and other cats; have a stress free association with both the cat carrier and the trip to the veterinarian; do tricks and much more!

The Earth's Biosphere Vaclav Smil, 2003-08-11 A comprehensive overview of Earth's biosphere, written with scientific rigor and essay-like flair. In his latest book, Vaclav Smil tells the story of the Earth's biosphere from its origins to its near and long-term future. He explains the workings of its parts and what is known about their interactions. With essay-like flair, he examines the biosphere's physics, chemistry, biology, geology, oceanography, energy, climatology, and ecology, as well as the changes caused by human activity. He provides both the basics of the story and surprising asides illustrating critical but often neglected aspects of biospheric complexity. Smil begins with a history of the modern idea of the biosphere, focusing on the development of the concept by Russian scientist Vladimir Vernadsky. He explores the probability of life elsewhere in the universe, life's evolution and metabolism, and the biosphere's extent, mass, productivity, and grand-scale organization. Smil offers fresh approaches to such well-known phenomena as solar radiation and plate tectonics and introduces lesser-known topics such as the quarter-power scaling of animal and plant metabolism across body sizes and metabolic pathways. He also examines two sets of fundamental relationships that have profoundly influenced the evolution of life and the persistence of the biosphere: symbiosis and the role of life's complexity as a determinant of biomass productivity and resilience. And he voices concern about the future course of human-caused global environmental change, which could compromise the biosphere's integrity and threaten the survival of modern civilization.

Curriculum Jennie Guy, 2020-09-17 Explores the intersection of contemporary art and school education in Art School; the independent curatorial framework throughout Ireland focused on establishing new interfaces between art and

education, questioning pedagogical shifts through artistic practice, bringing contemporary artists into education to inspire and to challenge. 80 b/w illus. This publication was funded by the Arts Council of Ireland and the Arts Office of Wicklow County Council.

Worlds Before Adam Martin J. S. Rudwick, 2010-04-05 In the late eighteenth and early nineteenth centuries, scientists reconstructed the immensely long history of the earth—and the relatively recent arrival of human life. The geologists of the period, many of whom were devout believers, agreed about this vast timescale. But despite this apparent harmony between geology and Genesis, these scientists still debated a great many questions: Had the earth cooled from its origin as a fiery ball in space, or had it always been the same kind of place as it is now? Was prehuman life marked by mass extinctions, or had fauna and flora changed slowly over time? The first detailed account of the reconstruction of prehuman geohistory, Martin J. S. Rudwick's *Worlds Before Adam* picks up where his celebrated *Bursting the Limits of Time* leaves off. Here, Rudwick takes readers from the post-Napoleonic Restoration in Europe to the early years of Britain's Victorian age, chronicling the staggering discoveries geologists made during the period: the unearthing of the first dinosaur fossils, the glacial theory of the last ice age, and the meaning of igneous rocks, among others. Ultimately, Rudwick reveals geology to be the first of the sciences to investigate the historical dimension of nature, a model that Charles Darwin used in developing his evolutionary theory. Featuring an international cast of colorful characters, with Georges Cuvier and Charles Lyell playing major roles and Darwin appearing as a young geologist, *Worlds Before Adam* is a worthy successor to Rudwick's magisterial first volume. Completing the highly readable narrative of one of the most momentous changes in human understanding of our place in the natural world, *Worlds Before Adam* is a capstone to the career of one of the world's leading historians of science.
