The Smith Tapes Ezra Bookstein, 2015-11-03 The 1960s were a period of radical cultural, social, and political upheaval in the United States and around the globe; yet in just three years, between 1969 and 1972, Village Voice Scenes columnist, WPLJ FM radio host, and cult figure Howard Smith got to the heart of it all by talking it out—both on and off the record. As famous as those who passed through the airwaves, Smith encapsulated the end of an era through personal conversations and hard-hitting interviews with Mick Jagger, Frank Zappa, Andy Warhol, Buckminster Fuller, leaders of the feminist movement and the Gay Liberation Front, a NARC agent, John Lennon and Yoko Ono, and scores of other iconic and influential personalities, including musicians, artists, filmmakers, actors, writers, politicians, and social activists, from countercultural luminaries to everyday revolutionaries and everyone in between. The Smith Tapes transcribes, for the first time ever, sixty-one of those recorded sessions, from an archive of more than one hundred fifty reels unearthed after more than forty years. Edited by documentary film writer and director/producer Ezra Bookstein, this book reveals the time capsule that Smith ingeniously captured, and contains raw and unscripted talks that take you right into the midst of a transformative cultural and musical explosion.

The Crisis of Authority – Workforce Tensions Myrah K. Mashigo – Tshabalala, 2013-12-30 The public service in South Africa faces an enormous challenge in improving service delivery not only to meet the citizens' expectations but to ensure quality life for the nation. The urgent need exists to establish what went wrong and how can the situation be turned around. The book established the root causes and the link between two key challenges identified by the government; management weaknesses and the absence of a strong performance culture. It offers critical approaches to cleanse and humanise the workplace, restore sanity, level-headedness. Reflection, Introspection, Self-Interrogation and Self - therapy are key in this whole equation.

How to Be a Better Birder Derek Lovitch, 2021-08-10 The essential tools you need to become a better birder This unique illustrated handbook provides all the essential tools you need to become a better birder. Here Derek Lovitch offers a more effective way to go about identification—he calls it the Whole Bird and More approach—that will enable you to identify more birds, more quickly, more of the time. He demonstrates how to use geography and an understanding of habitats, ecology, and even the weather to enrich your birding experience and help you find something out of the ordinary. Lovitch shows how to track nocturnal migrants using radar, collect data for bird conservation, discover exciting rarities, develop patch lists—and much more. This is the ideal resource for intermediate and advanced birders. Whether you want to build a bigger list or simply learn more about birds, *How to Be a Better Birder* will take your birding skills to the next level. Explains the Whole Bird and More approach to bird identification Demonstrates how to use geography, habitats, ecology, and the weather to be a better birder Shows how to bird at night using radar, collect conservation data, develop patch lists—and more Offers essential tools for intermediate and advanced birders

Derek Jeter Keith Elliot Greenberg,2011-01-01 Earning five World Series rings and a slew of other awards, New York Yankees shortstop Derek Jeter is on top of the world. Few Major League Baseball players ever come close to this level of success or name recognition. As USA TODAY, the Nation's No. 1 Newspaper, puts it, Derek Jeter, best player on the best team, brightest light in the biggest city. Jeter had always wanted to play for the Yankees. When he was a senior in high school, the Yankees drafted him and his dream came true. In the next few years, he went from a homesick minor leaguer, to the American League Rookie of the Year, to the World Series Most Valuable Player. Jeter has also been team captain since 2003 and is the Yankees all-time leader in hits. Find out how a kid from Kalamazoo, Michigan, became a baseball sensation!

Advances in Computational Toxicology Huixiao Hong,2019-05-21 This book provides a comprehensive review of both traditional and cutting-edge methodologies that are currently used in computational toxicology and specifically features its application in regulatory decision making. The authors from various government agencies such as FDA, NCATS and NIEHS industry, and academic institutes share their real-world experience and discuss most current practices in computational toxicology and potential applications in regulatory science. Among the topics covered are molecular modeling and molecular dynamics simulations, machine learning methods for toxicity analysis, network-based approaches for the assessment of drug toxicity and toxicogenomic analyses. Offering a valuable reference guide to computational toxicology and potential applications in regulatory science, this book will appeal to chemists, toxicologists, drug discovery and development researchers as well as to regulatory scientists, government reviewers and graduate students interested in this field.

Radio Life Derek B. Miller,2021-01-21 Radio Life: a gripping adventure and a riveting political thriller: The Commonwealth, a post-apocalyptic civilisation on the rise, is locked in a clash of ideas with the Keepers . . . a fight which threatens to destroy the world . . . again. When Lilly was first Chief Engineer at The Commonwealth, nearly fifty years ago, the Central Archive wasn't yet the greatest repository of knowledge in the known world, protected by scribes copying every piece of found material - books, maps, even scraps of paper - and disseminating them by Archive Runners to hidden off-site locations for safe keeping. Back then, there was no Order of Silence to create and maintain secret routes deep into the sand-covered towers of the Old World or into the northern forests

beyond Sea Glass Lake. Back then, the world was still quiet, because Lilly hadn't yet found the Harrington Box. But times change. Recently, the Keepers have started gathering to the east of Yellow Ridge - thousands upon thousands of them - and every one of them determined to burn the Central Archives to the ground, no matter the cost, possessed by an irrational fear that bringing back the ancient knowledge will destroy the world all over again. To prevent that, they will do anything. Fourteen days ago the Keepers chased sixteen-year-old Archive Runner Elimisha into a forbidden Old World Tower and brought the entire thing down on her. Instead of being killed, though, she slipped into an ancient unmapped bomb shelter where she has discovered a cache of food and fresh water, a two-way radio like the one Lilly's been working on for years . . . and something else. Something that calls itself 'the internet' . . .

A Primer on QSAR/QSPR Modeling Kunal Roy, Supratik Kar, Rudra Narayan Das, 2015-04-11 This brief goes back to basics and describes the Quantitative structure-activity/property relationships (QSARs/QSPRs) that represent predictive models derived from the application of statistical tools correlating biological activity (including therapeutic and toxic) and properties of chemicals (drugs/toxicants/environmental pollutants) with descriptors representative of molecular structure and/or properties. It explains how the sub-discipline of Cheminformatics is used for many applications such as risk assessment, toxicity prediction, property prediction and regulatory decisions apart from drug discovery and lead optimization. The authors also present, in basic terms, how QSARs and related chemometric tools are extensively involved in medicinal chemistry, environmental chemistry and agricultural chemistry for ranking of potential compounds and prioritizing experiments. At present, there is no standard or introductory publication available that introduces this important topic to students of chemistry and

pharmacy. With this in mind, the authors have carefully compiled this brief in order to provide a thorough and painless introduction to the fundamental concepts of QSAR/QSPR modelling. The brief is aimed at novice readers.

Risk and Presidential Decision-making Trenta Luca, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision-making has changed after the Cold War as radically as a large body of literature seems to suggest, and develops a new framework to interpret presidential decision-making in foreign policy. It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography, international relations and Presidential studies. Based on developments in the health and environment literature, the book identifies the President as the ultimate risk-manager, demonstrating how a President is called to perform a delicate balancing act between risks on the domestic/political side and risks on the strategic/international side. Every decision represents a 'risk vs. risk trade-off,' in which the management of one 'target risk' leads to the development 'countervailing risks.' The book applies this framework to the study three major crises in US foreign policy: the Cuban Missile Crisis, the seizure of the US Embassy in Tehran in 1979, and the massacre at Srebrenica in 1995. Each case-study results from substantial archival research and over twenty interviews with policymakers and academics, including former President Jimmy Carter and former Senator Bob Dole. This book is ideal for postgraduate researchers and academics in US foreign policy, foreign policy decision-making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences. The case studies will also be of great use to undergraduate students.

Applied Chemoinformatics Thomas Engel, Johann Gasteiger, 2018-04-19 Edited by world-famous pioneers in chemoinformatics, this is a clearly structured and applications-oriented approach to the topic, providing up-to-date and focused information on the wide range of applications in this exciting field. The authors explain methods and software tools, such that the reader will not only learn the basics but also how to use the different software packages available. Experts describe applications in such different fields as structure-spectra correlations, virtual screening, prediction of active sites, library design, the prediction of the properties of chemicals, the development of new cosmetics products, quality control in food, the design of new materials with improved properties, toxicity modeling, assessment of the risk of chemicals, and the control of chemical processes. The book is aimed at advanced students as well as lectures but also at scientists that want to learn how chemoinformatics could assist them in solving their daily scientific tasks. Together with the corresponding textbook Chemoinformatics - Basic Concepts and Methods (ISBN 9783527331093) on the fundamentals of chemoinformatics readers will have a comprehensive overview of the field.
