Taking Stock of Nature Anna Lawrence, 2010-02-18 In a world of increasing demands for biodiversity information, participatory biodiversity assessment and monitoring is becoming more significant. Whilst other books have focused on methods, or links to conservation or development, this book is written particularly for policy makers and planners. Introductory chapters analyze the challenges of the approach, the global legislation context, and the significance of the Millennium Ecosystem Assessment. Specially commissioned case studies provide evidence from 17 countries, by 50 authors with expertise in both biological and social sciences. Ranging from community conservation projects in developing countries to amateur birdwatching in the UK, they describe the context, objectives, stakeholders and processes, and reflect on the success of outcomes. Rather than advocating any particular approach, the book takes a constructively critical look at the motives, experiences and outcomes of such approaches, with cross-cutting lessons to inform planning and interpretation of future participatory projects and their contribution to policy objectives.

Zeitschrift der Deutschen Gesellschaft für Geowissenschaften ,2009

Analysing Networked Learning Practices in Higher Education and Continuing Professional Development ,2009-01-01 This book provides an essential resource for researchers and practitioners in the area of networked learning. Networked learning is learning in which information and communication

technology is used to promote connections: between one learner and other learners; between learners and tutors and between a learning community and its learning resources.

Norway Outside the European Union Clive Archer, 2004-06 In November 1994 the Norwegian electorate rejected membership of the European Union. Professor Archer examines the background to this decision both in terms of an expression of interests within Norway and in terms of national feeling. He then investigates the subsequent interaction between Norway and the EU through the European Economic Area (EEA) - which allowed Norway access to the EU's markets; the Schengen agreement - dealing with justice and border matters and the Common Foreign and Security Policy. It includes discussion of policies that have had a particular effect on Norway, such as those of the gas directive, fisheries and the sale of alcohol and looks at how Norway has adapted itself to EU policy, noting the cases where the country has dug in its heels and when it has been acquiescent. This book will appeal to students and researchers with an interest in European integration and Nordic studies in general.

WHO Guidelines for Indoor Air Quality ,2010 This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon,

trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

The Oxford Handbook of Sound and Imagination Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkegaard, 2019 Whether social, cultural, or individual, the act of imagination always derives from a pre-existing context. For example, we can conjure an alien's scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train. This process is no less true for the role of imagination in sonic events and artifacts. Many existing works on sonic imagination tend to discuss musical imagination through terms like compositional creativity or performance technique. In this two-volume Handbook, contributors address this tendency head-on, correcting the current bias towards visual imagination to instead highlight the many forms of sonic and musical imagination. Topics covered include auditory imagery and the neurology of sonic imagination; aural hallucination and illusion; use of metaphor in the recording studio; the projection of acoustic imagination in architectural design; and the design of sound artifacts for cinema and computer games.

Transgenic Crops of the World Ian S. Curtis, 2012-08-10 Since the first transgenic plants were produced back in the early 1980s, there have been substantial developments towards the genetic engineering of most crops of our world. Initial studies using isolated plant cells and removing their cell walls to form protoplasts, offered the possibility of transferring genetic material by Agrobacterium-mediated gene transfer, chemical agents or electrical charges. However, in those cases where isolated protoplasts could be transformed, often, a shoot regeneration system was not available to induce the production of transgenic plants and any such regenerated plants were subject to mutation or chromosomal of cultured plant organs, such as leaf abnormalities. By the mid-1980s, the use of disks, offered the convenience of combining gene transfer, plant regeneration and selection of transformants in a single system. This approach, enabled the production of stable, phenotypically-normal, transgenic potato and tomato plants in culture. By the late 1980s, the use of biolistics offered a means of inserting foreign genes into plant cells which were inaccessible to Agrobacterium infection. Even today, this technology is now standard practice for the production of some transgenic plants.

E-Commerce and Web Technologies Giuseppe Psaila, Roland Wagner, 2008-08-25 The International Conference on E-commerce and Web Technologies (EC-Web) is a mature and well-established forum for researchers working in the area of electronic commerce and web technologies. These are the proceedings of the

ninth conference in the series, which, like previous EC-Web conferences, was co-located with DEXA, the International Conference on Database and Expert Systems Applications, which, this year, took place in Turin, Italy. One key feature of EC-Web is its two-fold nature: it brings together both papers proposing technological solutions for e-commerce and the World Wide Web, and papers concerning the management of e-commerce, such as web marketing, the impact of e-commerce on business processes and organizations, the analysis of case studies, as well as social aspects of e-commerce (to understand the impact of e-commerce solutions on day-to-day life and the new opportunities that these behaviors open). The technical program included 12 reviewed papers and two invited papers. Each paper was reviewed by five reviewers, in order to select only the best quality papers. The program included five sessions: "Security in E-Commerce" (with two papers), "Social Aspects of E-Commerce" (with two papers), "Business Process and EC Inf- structures" (with three papers), "Recommender Systems and E-Negotiations" (with four papers) and "Web Marketing and User Profiling" (with three papers). We found the program interesting and we hope participants and readers feel the same. Furthermore, we hope the attendees enjoyed the conference and Turin. June 2008 Giuseppe Psaila Roland R. Wagner

The Preceptor's Handbook for Supervising Physician Assistants Randy Danielsen, Ruth Ballweg, Linda Vorvick, Donald Sefcik, 2011-05-27 The Preceptor's Handbook for Supervising Physician Assistants is a helpful guide for clinical

This work encompasses the experience and passion of four dedicated PA educators with combined experience of over 100 years. This indispensable resource addresses current practice as well as future projections and provides guidance for new styles of supervision in evolving health care systems including distance supervision, supervision in teams, and patterns of supervision in home care and geriatrics. Covering a wide variety of topics including supervision in the team environment as well as in individual practice, this handbook will provide the physician and physician assistant with the information and skills needed to be an excellent preceptor for students and a supervising clinician for graduate PAs. Features • Case Studies • Job Descriptions • Performance Agreements • Evaluation Tools • Professional Improvement Plans “The uniqueness of the physician-PA team paves the way for effective physician assistant practice. The Preceptors Handbook: A Guide to Supervising Physician Assistants presents a comprehensive model to help physicians reap the benefits that PAs bring to their practice, their patients, and the health care team. This clear and accessible resource provides step-by-step guidelines for building relationships with PAs, including tips on how to hire and work effectively with a PA, how to give constructive feedback, and how to apply coaching strategies. The authors, all leaders in PA education and practice, provide the essential information for building and sustaining a

Music Radio Morten Michelsen, Mads Krogh, Steen Kaargaard Nielsen, Iben Have, 2018-12-27 Why is music so important to radio? This anthology explores the ways in which musical life and radio interact, overlap and have influenced each other for nearly a century. One of music radio's major functions is to help build smaller or larger communities by continuously offering broadcast music as a means to create identity and senses of belonging. Music radio also helps identify and develop musical genres in collaboration with listeners and the music industry by mediating and by gatekeeping. Focusing on music from around the world, Music Radio discusses what music radio is and why or for what purposes it is produced. Each essay illuminates the intricate cultural processes associated with music and radio and suggests ways of working with such complexities.

Norwegian Catch-Up Jonathon W. Moses, 2017-11-28 'Norwegian Catch-Up' looks at the early Norwegian economic trajectory in the light of its external commitments and opportunities. Detailing Norway's economic performance relative to other countries at a time characterized by globalization, it has a particular focus on the role of international trade, investment and migration. The book examines how a small open state adapted successfully to the demands of (and opportunities provided by) a global market place. Not only did Norway manage an impressive economic record, but it developed

concomitantly a strong and articulate labor movement and resilient democratic institutions. In short, the Norwegian example provides hope for development in a context of globalization. This text provides the student with a pioneering new vantage point for understanding the nature and scope of today's globalization and its effect on economic (and political) development. It also provides a historical reflection on the liberal antecedent of modern social democracy.

Increasing Student Engagement and Retention Using Mobile Applications Laura A. Wankel,Patrick Blessinger,2013-01-30 Mobile technologies are reshaping and reframing the practice of teaching and learning in higher education. Beyond Edutainment: Exploring the Educational Potential of Computer Games

Simon Egenfeldt-Nielsen, 2011-01-25 Computer games have attracted much attention over the years, mostly attention of the less flattering kind. This has been true for computer games focused on entertainment, but also for what for years seemed a sure winner, edutainment. These years the area has gained new momentum and labels - game-based learning, serious games and educational games are just some of them. This dissertation aims to be a contribution to understanding educational use of computer games by building a framework that goes beyond edutainment. The framework laid out extends from an experiential learning approach, where concrete experiences are the starting point that can be transformed through reflection, instruction and active experimentation. It is concluded that computer games provide rich concrete experience that can be manipulated in the game universe providing more handles for the student compared to other media formats.

Dieting, Overweight and Obesity Wolfgang Stroebe, 2022-07-26 Why do so many people become overweight and obese and why do they find it so difficult to lose weight? In this second edition of his influential book on Dieting, Overweight and Obesity, Wolfgang Stroebe – who developed the goal conflict model of eating – explores the physiological, environmental and psychological influence on weight gain and examines how these processes are affected by genetic factors. Like the first edition, the book takes a social-cognitive approach to weight regulation and discusses how exposure to environmental cues can set-off overeating in chronic dieters. In addition to extensively

revising and updating the chapters of the first edition, this second edition features three new chapters. The chapter on successful restrained eating reviews personality factors as well as recent experimental research on impulse control. The chapters on psychological treatment of obesity and on primary prevention describe and evaluate the various treatment and prevention approaches and the research conducted to assess their efficacy. This book is essential reading for students, researchers and clinicians interested in an up-to-date review of the field of eating research and a new theoretical approach to the study of overweight and obesity.

Fridtjof Nansen: A Book for the Young Jacob B. Bull, 2021-04-26 This is a biography of Fridtjof Nansen, intended to be read by children. Nansen was a Norwegian polymath and Nobel Peace Prize laureate. He gained prominence at various points in his life as an explorer, scientist, diplomat, and humanitarian. He led the team that made the first crossing of the Greenland interior in 1888, traversing the island on cross-country skis. He won international fame after reaching a record northern latitude of 86°14' during his Fram expedition of 1893–1896. Although he retired from exploration after his return to Norway, his techniques of polar travel and his innovations in

equipment and clothing influenced a generation of subsequent Arctic and Antarctic expeditions.

Nordic Contributions in IS Research Hannu Salmela, Anna Sell, 2011-08-03 This book contains the refereed proceedings of the Second Scandinavian Conference on Information Systems (SCIS), held in Turku, Finland, in August 2011. Inspired by the fact that Turku is the cultural capital of Europe in 2011, SCIS invited contributions that address the cultural impact of the latest technologies, e.g., social software, or that target cross-cultural issues of the IT profession itself. The resulting selection of papers in this volume reflects these topics. The 10 papers accepted were presented in one single track and cover topics such as the usage of social media platforms, the socio-economic consequences of novel technologies in application areas like healthcare or energy industries, and cultural differences in software development and maintenance.

Collaborative Case Conceptualization Willem Kuyken, Christine A. Padesky, Robert Dudley, 2011-10-20 Presenting an innovative framework for tailoring cognitive-behavioral interventions to each client's needs, this accessible book is packed with practical pointers and sample dialogues. Step by step, the authors show how to collaborate with clients to develop and test conceptualizations that illuminate personal strengths as well as problems, and that deepen in explanatory power as treatment progresses. An extended case illustration demonstrates the three-stage conceptualization process over

the entire course of therapy with a multiproblem client. The approach emphasizes building resilience and coping while decreasing psychological distress. Special features include self-assessment checklists and learning exercises to help therapists build their conceptualization skills.

Musical Rhythm in the Age of Digital Reproduction Ms Anne

Danielsen, 2013-01-28 Musical Rhythm in the Age of Digital Reproduction presents new insights into the study of musical rhythm through investigations of the micro-rhythmic design of groove-based music. The main purpose of the book is to investigate how technological mediation - in the age of digital music production tools - has influenced the design of rhythm at the micro level. Through close readings of technology-driven popular music genres, such as contemporary R&B, hip-hop, trip-hop, electro-pop, electronica, house and techno, as well as played folk music styles, the book sheds light on how investigations of the musical-temporal relationships of groove-based musics might be fruitfully pursued, in particular with regard to their micro-rhythmic features. This book is based on contributions to the project Rhythm in the Age of Digital Reproduction (RADR), a five-year research project running from 2004 to 2009 that was funded by the Norwegian Research Council.
