Comics, Trauma, and the New Art of War Harriet E. H. Earle, 2017-06-19 Conflict and trauma remain among the most prevalent themes in film and literature. Comics has never avoided such narratives, and comics artists are writing them in ways that are both different from and complementary to literature and film. In *Comics, Trauma, and the New Art of War*, Harriet E. H. Earle brings together two distinct areas of research--trauma studies and comics studies--to provide a new interpretation of a long-standing theme. Focusing on representations of conflict in American comics after the Vietnam War, Earle claims that the comics form is uniquely able to show traumatic experience by representing events as viscerally as possible. Using texts from across the form and placing mainstream superhero comics alongside alternative and art comics, Earle suggests that comics are the ideal artistic representation of trauma. Because comics bridge the gap between the visual and the written, they represent such complicated narratives as loss and trauma in unique ways, particularly through the manipulation of time and experience. Comics can fold time and confront traumatic events, be they personal or shared, through a myriad of both literary and visual devices. As a result, comics can represent trauma in ways that are unavailable to other narrative and artistic forms. With themes such as dreams and mourning, Earle concentrates on trauma in American comics after the Vietnam War. Examples include Alissa Torres's *American Widow*,

Doug Murray's *The Nam*, and Art Spiegelman's much-lauded *Maus*. These works pair with ideas from a wide range of thinkers, including Sigmund Freud, Mikhail Bakhtin, and Fredric Jameson, as well as contemporary trauma theory and clinical psychology. Through these examples and others, *Comics, Trauma, and the New Art of War* proves that comics open up new avenues to explore personal and public trauma in extraordinary, necessary ways.

Big and Little Histories Marnie Hughes-Warrington, Anne Martin, 2021-08-19 This book introduces students to ethics in historiography through an exploration of how historians in different times and places have explained how history ought to be written and how those views relate to different understandings of ethics. No two histories are the same. The book argues that this is a good thing because the differences between histories are largely a matter of ethics. Looking to histories made across the world and from ancient times until today, readers are introduced to a wide variety of approaches to the ethics of history, including well-known ethical approaches, such as the virtue ethics of universal historians, and utilitarian approaches to collective biography writing while also discovering new and emerging ideas in the ethics of history. Through these approaches, readers are encouraged to challenge their ideas about whether humans are separate from other living and non-living things and whether machines and animals can write histories. The book looks to the fundamental questions posed about the nature of history making by Indigenous history makers and asks whether the

ethics at play in the global variety of histories might be better appreciated in professional codes of conduct and approaches to research ethics management. Opening up the topic of ethics to show how historians might have viewed ethics differently in the past, the book requires no background in ethics or history theory and is open to all of those with an interest in how we think about good histories.

Performing Memory in Art and Popular Culture

Liedeke Plate, Anneke Smelik, 2013-04-02 This volume pursues a new line of research in cultural memory studies by understanding memory as a performative act in art and popular culture. The authors take their cue from the observation that art and popular culture enact memory and generate processes of memory. They do memory, and in this doing of memory new questions about the cultural dimensions of memory arise: How do art objects and artistic practices perform the past in the present? What is their relationship to the archive? Does the past speak in the performed past (or do we speak to it)? To what purpose do objects recall? And for whom do they recollect? Here authors combine a methodological focus on memory as performance with a theoretical focus on art and popular culture as practices of remembrance. The essays in the book thus analyze what is at stake in the complex processes of remembering and forgetting, of recollecting and disremembering, of amnesia and anamnesis, that make up cultural memory.

Global Governance, Legitimacy and Legitimation

Magdalena Bexell, 2017-10-02 Rules set by global

governance organizations affect communities across the world. Such organizations increasingly seek to obtain legitimacy in the eyes of groups beyond their member state elites. This book advances scholarly debate on the politics of legitimacy and legitimation in global governance. It brings together researchers from different subfields of International Relations in order to highlight trends and contradictions in the contemporary politics of legitimacy across areas of sustainable development, humanitarian relief, responsible investment, sustainable fisheries and labour standards. The chapters explore legitimation efforts by various forms of global governance bodies, such as intergovernmental organizations, public-private partnerships and fully private bodies. The book demonstrates that different governance forms beyond the nation state share deep legitimacy challenges and engage in continuous legitimation attempts. Questions on the audiences of such legitimation attempts are particularly pivotal in understanding the politics of legitimacy. Audiences are not predetermined but constituted through interaction between legitimation efforts and the reactions to those of targeted and other groups, mirroring broader global power relations. This book was published as a special issue of Globalizations.

The Rhetoric of Sincerity Ernst van Alphen, Mieke Bal, Carel E. Smith, 2009 The essays in this volume demonstrate how the performance of sincerity is culturally specific and is enacted in different ways in different media and disciplines, including law and the arts.

Journalism Ethics Roger Patching, Martin

Hirst, 2013-11-20 *Journalism Ethics: Arguments and Cases for the 21st Century* explores the major ethical dilemmas facing journalists in the digital age. Engaging with both the theory and practice of journalism ethics, this text explains the key ethical concepts and dilemmas in journalism and provides an international range of examples and case studies, considering traditional and social media from a global perspective. *Journalism Ethics* offers an introductory philosophical underpinning to ethics that traces the history of the freedom of expression from the time of Greek philosophers like Aristotle, through the French and American revolutions, to modern day. Throughout the book Patching and Hirst examine ethically-challenging issues such as deception, trial by media, dealing with sources and privacy intrusion. They also explore continuing ethical fault lines around accuracy, bias, fairness and objectivity, chequebook journalism, the problems of the foreign correspondent, the conflicts between ethics and the law and between journalists and public relations consultants. Concluding with a step-by-step guide to ethical thinking on the job, this textbook is an invaluable resource for students of journalism, media and communication.

The Scene of Violence Alison Young, 2009-12-04 In the contemporary fascination with images of crime, violence gets under our skin and keeps us enthralled. The Scene of Violence explores the spectator's encounter with the cinematic scene of violence – rape and revenge, homicide and serial killing, torture and terrorism. Providing a detailed reading of both classical and contemporary films – for example, Kill Bill, Blue Velvet, Reservoir Dogs, The Matrix, Psycho, The Accused, Elephant, Seven, Thelma & Louise, United 93, Zodiac, and No Country for Old Men – Alison

Young returns the affective processes of the cinematic image to the study of law, crime and violence. Engaging with legal theory, cultural criminology and film studies, the book unfolds both our attachment to the authority of law and our identification with the illicit. Its original contribution is to bring together the cultural fascination of crime with a nuanced account of what it means to watch cinema. The Scene of Violence shows how the spectator is bound by the laws of film to the judgment of the crime-image.
