**Valery Garrett**

**Hooked** Lonny Shavelson, 2002 Shavelson is a physician and journalist who followed five addicts through various drug rehabilitation programs in California. Their stories, often told in their own words and punctuated by black and white photos Shavelson took as the five traversed the system and the streets, highlight the links between drug addiction, mental illness, and trauma, including child abuse. Shavelson argues for an integrated approach to drug treatment that addresses the fundamental causes of drug abuse, not just its outward symptoms and behaviors. c. Book News Inc.

**Hope in Hell** Valery Garrett, 2014-09-04 Hope in Hell is the gripping, true story of lives lost in the depths of drug addiction and their uncertain paths to recovery. A war veteran, a born-again mother, a street punk, and a prostitute strive to complete a challenging 90-day rehab program. Acton Rehabilitation Center, where summers are scorching and tumbleweeds outnumber buildings, is a desert community approximately fifty miles and a world away from both downtown L.A. and Malibu's fancy rehab centers. Yet it is a haven for those who have been living in hell. The raw feelings and changing attitudes of those at Acton are revealed as they navigate their way through the Twelve Step-based program. Out of their experiences comes an unflinching, sometimes humorous, but ultimately uplifting story of hope for all and redemption for those who choose it.

Drug Dependence to Treatment Lorrie Klosterman, 2008 Many people who use a drug regularly don't think of themselves as being dependent on it. I can quit anytime I want to is the classic phrase to downplay the notion. But the follow-up phrase I just don't want to quit right now may be precisely the evidence that there is a

problem. It can be hard to admit drug dependence. People don't like feeling out of control. Yet recognizing a substance abuse problem and getting help to overcome it are steps toward regaining freedom to make choices and to live life without being in the control of a substance. - p. 9.

### **Helping a Friend with an Alcohol Problem**

Jennifer Landau, 2016-12-15 A 2014 survey by the Substance Abuse and Mental Health Services Administration showed that 8.7 million youths ages twelve to twenty reported drinking alcohol beyond "just a few sips" in the previous month. Those who start drinking before age fifteen are five times more likely to become dependent on alcohol than those who begin at twenty-one. This resource shows young people how to help a friend who is abusing alcohol. It arms them with facts about alcohol, how it affects the teen mind and body, how to look for signs of a problem, and how to bring others on board to help.

The strategies and discussions contained in this book will be of special interest to educators,

students, and therapists as well as people struggling with substance abuse. --Book Jacket.

Facing Addiction in America Office of the Surgeon General, U.S. Department of Health and Human Services, 2017-08-15 All across the United States, individuals, families, communities, and health care systems are struggling to cope with substance use, misuse, and substance use disorders. Substance misuse and substance use disorders have devastating effects, disrupt the future plans of too many young people, and all too often, end lives prematurely and tragically. Substance misuse is a major public health challenge and a priority for our nation to address. The effects of substance use are cumulative and costly for our society, placing burdens on workplaces, the health care system, families, states, and communities. The Report discusses opportunities to bring substance use disorder treatment and mainstream health care systems into alignment so that they can address a person's overall health, rather than a substance misuse or a physical health condition alone or in isolation. It also provides suggestions and recommendations for action that everyone—individuals, families, community leaders, law enforcement, health care professionals, policymakers, and researchers—can take to prevent substance misuse and reduce its consequences.

**Clean Start** William E. McAuliffe, Jeffrey Albert, 1992 Based on the structured outpatient group program pioneered at the Harvard Cocaine Recovery Project, this volume is a guide to helping chemically dependent outpatient clients

take the critical first steps toward recovery. The book describes the initial month-long cessation and early recovery group - the Clean Start group - which was designed to help clients achieve stable abstinence and prepare them for long-term treatment. Delineating an affordable outpatient alternative to existing drug treatment modalities, the book offers group leaders a cookbook of step-by-step instructions, complete with scripts, for leading sessions. Part I, Program Theory and Design, establishes the rationale of the program and offers a coherent account of how to help groups of addicts separate themselves from drug use and lay the foundation for further recovery. It discusses the design of the program and the needs of clients in terms of a social conditioning model of addiction. Illuminated by a sample session, the format and topics for the group sessions are described, as are ways to deal with specific problems such as relapse. Part II, The Individual Clean Start Sessions, reviews the format and content of each of the program's ten sessions. Providing carefully developed scripts for leading structured drug-free group sessions, chapters also offer practical pointers on technique and copies of handout sheets. Some of the scripts address crucial topics that have not been fully covered in other programs, such as how to overcome resistance to change, and how to increase motivation for recovery. Thoroughly tested by Harvard Medical School researchers, the sessions are clear and easy to follow for leaders and group members. They engage clients and are designed to fit in a logical progression. Of

special note: These scripts can be readily adapted for use in individual sessions or inpatient programs. Representing a timely new direction in affordable outpatient treatment, CLEAN START will be of enormous value and interest to addiction specialists and counselors, as well as psychiatrists, clinical psychologists and sociologists, and social workers. Written in a clear, accessible style, it also serves as a text for graduate-level courses in drug abuse treatment and group therapy.
