Power & Purity Carol Lansing,1998-02-12 Catharism was a popular medieval heresy based on the belief that the creation of humankind was a disaster in which angelic spirits were trapped in matter by the devil. Their only goal was to escape the body through purification. Cathars denied any value to material life, including the human body, baptism, and the Eucharist, even marriage and childbirth. What could explain the long popularity of such a bleak faith in the towns of southern France and Italy? Power and Purity explores the place of cathar heresy in the life of the medieval Italian town of Orvieto. Based on extensive archival research, it details the social makeup of the Cathar community and argues that the heresy was central to the social and political changes of the 13th century. The late 13th-century repression of Catharism by a local inquisition was part of a larger redefinition of civic and ecclesiastical authority. Author Carol Lansing shows that the faith attracted not an alienated older nobility but artisans, merchants, popular political leaders, and indeed circles of women in Orvieto as well as Florence and Bologna. Cathar beliefs were not so much a pessimistic anomaly as a part of a larger climate of religious doubt. The teachings on the body and the practice of Cathar holy persons addressed questions of sexual difference and the structure of authority that were key elements of medieval Italian life. The pure lives of the Cathar holy people, both male and female, demonstrated a human capacity for self-restraint that served as a powerful social model in towns torn by violent conflict. This study addresses current debates about the rise of persecution, and argues for a climate of popular toleration. Power and Purity will appeal to historians of society and politics as well as religion and gender studies.

Evaporites Through Space and Time B. Charlotte Schreiber,S. Lugli,M. Bağ el,2007 This book is an exploration of varying approaches to the study of the deposition, diagenesis and stratigraphy of evaporites. The volume includes papers from chemical modellers, who work on the basis of geochemical representations of the formative water bodies, and from basin-wide depositional-stratigraphical modellers, who propose depositional scenarios that are fitted to individual basinal pictures.Until now there have been only a few studies of evaporite formation that explain the characteristic features we observe in the real rock record. This volume is a collection of relevant papers in which these features are integrated in a realistic manner, based on our new understanding of saline water bodies, to the diverse tectonic, chemical and depositional constraints of their individual basins. In addition there are several review articles that offer oversight and extensive referencing of basins worthy of further study.This book is a valuable resource for sedimentologists and stratigraphers looking for an up-to-date reference on evaporite deposits.

Tribal Housing Issues Robin D. Tribhuvan,2005 Every human society has developed certain cultural norms, customs, traditions and rituals in planning and constructing a house. It is a tendency of the owner of the house to complete these cultural formalities so as to find peace (shanti) in the new vastu or home. The Hindu society has made a provision of the science of building a house called vastu shastra . Tribals too have cultural norms, taboos, meaningful customs, traditions and rituals associated with house construction. Every social action in the context of house building ritual is symbolic and meaningful to the tribals. Their housing designs and settlement patterns may have been evolved to suit their ecological and environment needs. There could be some scientific base behind the creation of house architecture, designs and settlement patterns.

Puro Arte Lucy Mae San Pablo Burns,2012-12-03 Winner of the 2012 Outstanding Book Award in Cultural Studies, Association for Asian American Studies Puro Arte explores the emergence of Filipino American theater and performance from the early 20th century to the present. It stresses the Filipino performing body's location as it conjoins colonial histories of the Philippines with U.S. race relations and discourses of globalization. Puro arte, translated from Spanish into English, simply means “pure art.” In Filipino, puro arte however performs a much more ironic function, gesturing rather to the labor of over-acting, histrionics, playfulness, and purely over-the-top dramatics. In this book, puro arte functions as an episteme, a way of approaching the Filipino/a performing body at key moments in U.S.-Philippine imperial relations, from the 1904 St. Louis World’s Fair, early American plays about the Philippines, Filipino patrons in U.S. taxi dance halls to the phenomenon of Filipino/a actors in Miss Saigon. Using this varied archive, Puro Arte turns to performance as an object of study and as a way of understanding complex historical processes of racialization in relation to empire and colonialism.

It is widely recognized that the degree of development of a science is given by the transition from a mainly descriptive stage to a more quantitative stage. In this transition, qualitative interpretations (conceptual models) are complemented with quantification (numerical models, both, deterministic and stochastic). This has been the main task of mathematical geoscientists during the last forty years - to establish new frontiers and new challenges in the study and understanding of the natural world. Mathematics of Planet Earth comprises the proceedings of the International Association for Mathematical Geosciences Conference (IAMG2013), held in Madrid from September 2-6, 2013. The Conference addresses researchers, professionals and students. The proceedings contain more than 150 original contributions and give a multidisciplinary vision of mathematical geosciences.
