Adventures in Paranormal Investigation Joe Nickell, 2014-04-23 Tales of alien abductions, miraculous relics, and haunted castles have attracted believers and skeptics across the globe for centuries. Paranormal investigator Joe Nickell tackles the world's most seemingly inexplicable myths in *Adventures in Paranormal Investigation*. With four decades of experience in the field, Nickell employs skepticism and scientific analysis to pull truth from the mires of false evidence and trickery that surround both old and new legends and mysteries. Unlike authors who engage in hype and sensationalism in order to foster or debunk myths, Nickell approaches each case with a rational and scientific approach intended to find the truth. Occam's Razor—all things being equal, the simplest solution is the best one—is a principal instrument in his investigative toolbox, as well as the belief that it is the claimant's responsibility to provide the extraordinary proof required in such extraordinary cases. *Adventures in Paranormal Investigation* features Nickell's on-site explorations in unusual phenomena. Among the forty unique cases, Nickell examines mysteries ranging from snake charmers

who purport to hold influence over the reptiles, to the Holocaust victims who reportedly haunt a gas chamber in Dachau, to Lake Simcoe's resident lake monster Igopogo in Canada. In addition to the case studies, Nickell analyzes how the propensity to fantasize can affect human perceptions of and belief in paranormal activity and how his personal experience with the paranormal was altered when intuition led to the discovery of a daughter he didn't know existed. More than just another myth-busting text, *Adventures in Paranormal Investigation* brings together reason and scientific analyses to explain both the phenomena and the role of human perception therein, establishing Nickell as the foremost paranormal investigator of our time.

Perspectives on the Mistreatment of American Educators Norman Dale Norris, 2002
Pressured by a society searching for a simple solution to a complex problem, educators are constantly subjected to a double standard and their work and role marginalized as insignificant despite compelling evidence to the contrary. This enlightening discussion of the misperceptions about the profession offers a thoughtful perspective on the real work done by educators and examines some of the harm done by efforts to fix what is wrong. There is not a group of professionals in the work world who must bear as many demands, yet who are so often undervalued as educators. Norris calls attention to the sociological and physical factors that often influence the work of educators, discussing the general perception of the teaching profession, as well as more specific issues such as reform, research, and political agendas. In a scholarly format, he reports on the double standards, demands, and high expectations that teachers are forced to overcome in order to be successful. This is must reading for anyone concerned about the status of teachers and teaching today.

Captive Fathers, Captive Children Terry Smyth, 2022-10-06 Why are the daughters and sons of Far East prisoners of war still captivated by the stories of their fathers? What is it that compels so

many of the children, after so many years, to search for the details of their fathers' captivity? And how, over the decades, have they come to terms with their childhood memories? In his book Terry Smyth treads new ground by examining the processes through which the children's memory practices came to be rooted in the POW experiences of their fathers. By following a life course approach, and a psychosocial methodology, the book demonstrates how memory and trauma were 'worked into' the social and cultural lives of individual children, and explores how the relationship between their inner psychic worlds and subsequent memory practices unfolded against a challenging and morally ambivalent geopolitical background. The book invites readers to engage with the author in a journey of exploration and self-reflection, with elements of auto-ethnography adding richness to the text. Enlivened by interview extracts, case study material and ethnographic observations, this work opens up fresh and ambitious perspectives on the personal legacies of war.

Breaking Their Will Janet Heimlich, 2011-06-14 This revealing, disturbing, and thoroughly researched book exposes a dark side of faith that most Americans do not know exists or have ignored for a long time—religious child maltreatment. After speaking with dozens of victims, perpetrators, and experts, and reviewing a myriad of court cases and studies, the author explains how religious child maltreatment happens. She then takes an in-depth look at the many forms of child maltreatment found in religious contexts, including biblically-prescribed corporal punishment and beliefs about the necessity of breaking the wills of children; scaring kids into faith and other types of emotional maltreatment such as spurning, isolating, and withholding love; pedophilic abuse by religious authorities and the failure of religious organizations to support the victims and punish the perpetrators; and religiously-motivated medical neglect in cases of serious health problems. In a concluding chapter, Heimlich raises questions about children's rights and proposes changes in

societal attitudes and improved legislation to protect children from harm. While fully acknowledging that religion can be a source of great comfort, strength, and inspiration to many young people, Heimlich makes a compelling case that, regardless of one's religious or secular orientation, maltreatment of children under the cloak of religion can never be justified and should not be tolerated.

Racism and Sexual Oppression in Anglo-America Ladelle McWhorter, 2009-03-26 Does the black struggle for civil rights make common cause with the movement to foster queer community, protest anti-queer violence or discrimination, and demand respect for the rights and sensibilities of queer people? Confronting this emotionally charged question, Ladelle McWhorter reveals how a carefully structured campaign against abnormality in the late 19th and early 20th centuries encouraged white Americans to purge society of so-called biological contaminants, people who were poor, disabled, black, or queer. Building on a legacy of savage hate crimes—such as the killings of Matthew Shepard and James Byrd—McWhorter shows that racism, sexual oppression, and discrimination against the disabled, the feeble, and the poor are all aspects of the same societal distemper, and that when the civil rights of one group are challenged, so are the rights of all.

Unconventional Wisdom June Boyce-Tillman, 2016-04-08 Early Christianity saw women in positions of authority and a fluid theology that included feminine figures in the notion of the Divine. However, for centuries a male trinity has dominated theology with the characteristics of triumphalism, clarity, order, eternity and unity. Unconventional Wisdom examines the attempt within the last half of the twentieth century to unearth the hidden theological tradition of feminine Wisdom. The book presents the work of influential theorists, notably Foucault, Belenky and Dorothy Smith. The recovery of the feminine in the divine is linked with the rediscovery of subjugated value systems and what this might

mean for ecclesiology.

Henri de Rothschild, 1872-1947 Harry W. Paul, 2016-12-05 Dr Henri de Rothschild was a fifth generation Rothschild and perhaps the most famous of the Paris Rothschilds of the fin-de-siècle period. A 'sleeping partner' of the bank and the non-drinking owner of Mouton-Rothschild, Henri spent much of his life building medical institutions and promoting scientific medicine, including the promotion of Ehrlich's Salvarsan to cure syphilis and the use of radium to cure cancer. His hospital in a working class area of northern Paris boasted the latest in medical advances. Henri was particularly influential in developing the new science of infant feeding, while his broader concerns with infant health led to his playing a prominent role in the development of the specialty of pediatrics. This biography of Henri de Rothschild focuses on his medical achievements and that of his close family in France. Henri, his wife Mathilde and his mother Thérèse all had busy medical careers during World War I. The book also gives an account of both women's experiences of the war. Along with his explicitly scientific medical concerns, Henri was also a prolific playwright and, under the pseudonym André Pascal, wrote several plays about doctors. This book situates the plays, and particularly the themes of charlatanism, women doctors and medical ethics, in their contemporary context of the social and medical life of Paris. A fascinating and vividly written study of a somewhat neglected figure in the history of the illustrious Rothschild family, this book will make a valuable addition to the libraries of scholars in the history of medicine and those studying child health and welfare, the portrayal of doctors in literature, and more broadly the social and cultural life of early-twentieth century Paris.

The Tomb of the Unknown Soldier, Modern Mourning, and the Reinvention of the Mystical Body
Laura Wittman, 2011-01-01 I slutningen af 1. Verdenskrig indførte flere krigsførende lande et nyt hidtil

ukendt ritual. Kroppen af en anonym soldat, død på slagmarken, blev begravet i den ukendte soldats grav for at symbolisere den fælles sorg over slagmarkens voldsomme traumer. Ved at undersøge hvordan forskellige lande ofte med vidt forskellig politisk og kulturel baggrund har anvendt Den ukendte Soldat symbolsk, hævder forfatteren, at der er skabt en ny måde at udtrykke fælles national sorg på.

School District Leadership Matters Bruce Sheppard, Jean Brown, David Dibbon, 2009-03-08
School District Leadership Matters challenges policy makers, administrators, and academics in the field of educational leadership to reassess their traditional approaches to learning, working, and planning. The authors believe that government restructuring, standards-based reforms, and centrally imposed strategic planning have been painfully ineffective. As a consequence, student learning has become increasingly superficial and inauthentic. This book bridges the traditional divide between the generalizations of social science theory on the one hand and the world of educational practice on the other. It argues that a more promising approach to education reform is through effective school district leadership. Sheppard, Brown and Dibbon draw on their collective experience both as educational leaders and researchers of leadership, having spent five years researching and working in one school district. Here, they show how a district superintendent can successfully navigate the paradoxes and challenges of facilitating collaborative leadership in a school district with a traditionally hierarchical organizational structure. As a conclusion to their work, the authors highlight what they call five 'recognitions' that deepen readers' understanding of school district leadership. They illuminate, too, ways that senior level practitioners can apply theory to practice in order to break down the traditional hierarchical bureaucracies that inhibit learning, and create professional learning communities. School District Leadership Matters urges researchers, graduate students, practitioners,

and policymakers to focus on improving authentic learning for all students and argues that the best hope rests with effective school district leadership. This empirically-based yet practical book provides new insights and questions for academic researchers and will inspire policy makers and practitioners to imagine what could be and to work towards it.

Eradicating Female Genital Mutilation Hilary Burrage, 2015-11-28 This ground-breaking handbook details the present situation with regard to female genital mutilation (FGM) in Britain, referring also to other western nations where FGM occurs. It scrutinizes current pathways to eradicating this often dangerous, sometimes lethal, form of child abuse and gender-related violence. This book makes the case urgently for developing a shared, coherent model - a multi-disciplinary paradigm - as the basis to achieve the eradication of FGM. The text will be required reading for health, legal, educational and social services professionals, as well as researchers, policy makers, school governors, journalists and other concerned citizens.

A Corrupt Tree: An Encyclopaedia of Crimes committed by the Church of Rome against Humanity and the Human Spirit A.S., 2014-01-13 'A Corrupt Tree' is a unique, extensively researched, four volume exposé of the dark side of the Church of Rome. It reveals that for nearly two thousand years the Church's fundamental characteristic has been its self-serving abuse of religio-corporate power. A large proportion of this first volume provides a detailed catalogue of the multitude of unholy popes. Included, are those who were immature, capricious, corrupt, lascivious, fanatical, senile, truly mad, megalomaniac, tyrannical, murderous, and wholesale killers. It confirms that for many, many centuries the popes were corrupt, cruel, inhumane, and despotic. In an age of savagery they were the leaders in barbarity; in the subsequent age of enlightenment they have persistently resisted the march of progress. Additionally, the popes were wholesale killers who 'made the principle of assassination a

law of the Christian Church.' Accordingly, the Church 'has shed more innocent blood than any other institution that has ever existed among mankind.' Here also are presented the cupidity, corruption, and sexual misconducts of lesser ecclesiastics, including cardinals, bishops, priests, monks and nuns. Pope Honorius III, for example, described his priests as 'worse than beasts wallowing in their dung.' The Church's ruthless stranglehold on knowledge and learning is catalogued in detail. Mathematics, philosophy and science were repressed. Selected, applied theology ruled the world. 'Everything was explained, but nothing was understood.' The chapters on censorship reveal that even works of considerable literary or philosophical merit did not escape. A large number of writings which eventually became classics of European culture were condemned and prohibited. The Church also exhibited a vitriolic hatred of those who translated the Bible into the vernacular. Many of these men were annihilated. Holy books were burned in large numbers – particularly the Jewish Talmud. It is clearly demonstrated that the Church held back civilisation for over fifteen hundred years. 'Century after century passed away, and left the peasantry but little better than the cattle in the fields.' Finally, the unholy behaviours of the numerous popes, cardinals, and lesser ecclesiastics are shown to establish, unequivocally, that the Church of Rome is neither holy nor apostolic. The ultimate message of these volumes is that to become an exemplary institution, and to play a truly humane role in the world's future, the Catholic Church must change.

Tracing Your Police Ancestors Stephen Wade, 2009-04-21 Tracing Your Police Ancestors will help you locate and research officers who served in any of the police forces of England and Wales from the creation of the Metropolitan Police by Sir Robert Peel in 1829. Assuming that the reader has no prior knowledge of how or where to look for such information, Stephen Wade explains and describes the various archives and records and provides a discussion of other sources. Case studies

are used to show how an individual officers career may be traced and understood from this research. He also explains the range of secondary sources open to the family or local historian, many of which offer a broader account of the social and cultural history of the British police forces.

Community Music Today Kari K. Veblen, David J. Elliott, Stephen J. Messenger, Marissa Silverman, 2013 *Community Music Today* highlights community music workers who constantly improvise and reinvent to lead through music and other expressive media. It answers the perennial question What is community music? through a broad, international palette of contextual shades, hues, tones, and colors. With over fifty musician/educators participating, the book explores community music in global contexts, interconnections, and marginalized communities, as well as artistry and social justice in performing ensembles. This book is both a response to and a testimony of what music is and can do, music's place in people's lives, and the many ways it unites and marks communities. As documented in case studies, community music workers may be musicians, teachers, researchers, and activists, responding to the particular situations in which they find themselves. Their voices are the threads of the multifaceted tapestry of musical practices at play in formal, informal, nonformal, incidental, and accidental happenings of community music.

The Future of Schools Merrelyn Emery, 2006 The Future of Schools will help changemakers move toward better functioning school systems using reliable, participative, and practical methods. The author describes an orderly sequence of activities that are intertwined with simple explanations. The principles and methods on which the book is based, follow from over fifty years of research ensuring that the processes yield reliable results. Each chapter discusses a range of variations and examples with both successful applications and potential pitfalls with simple ways of avoiding them. These variations and examples help the school district and its community to choose the best path through the planning and design processes for their unique people and circumstances. All of the methods and processes described are totally participative so that the schools and communities who use them can develop ownership of the processes and their outcomes. Not only does the school district change for the better, the community itself becomes more socially cohesive through working together for a common purpose.

Massacre at Duffy's Cut: Tragedy & Conspiracy on the Pennsylvania Railroad William E. Watson and J. Francis Watson, 2018 Fifty-seven Irish immigrant laborers arrived in the port of Philadelphia in June 1832 to work on Pennsylvania's Philadelphia and Columbia Railroad. They all perished within six weeks. Contractor Philip Duffy hired them to work a stretch of track in rural Chester County known as Duffy's Cut. For more than 180 years, the railroad maintained that cholera was to blame and kept the historical record under lock and key. In a harrowing modern-day excavation of their mass grave, a

group of academics and volunteers found evidence some of the laborers were murdered. Authors and research leaders Dr. William E. Watson and Dr. J. Francis Watson reveal the tragedy, mystery and discovery of what really happened at Duffy's Cut.
