American Shooter Gerry Souter, 2012-02-01 Gun ownership has long been a hot-button topic in the United States, and the National Rifle Association has the reputation of being an organization of primarily politically conservative members. American Shooter provides a unique look at gun ownership, handgun bans, shooting sports, and the controversy over how to interpret the Second Amendment from the point of view of a liberal gun owner and enthusiast. Gerry Souter examines the history of firearms in the United States, from the settlers who carried matchlock muskets ashore at Jamestown to the citizens who purchase guns in record numbers today. Recent Supreme Court decisions that uphold the right to bear arms have galvanized citizens on both sides of the debate, making the gun issue hotter than ever. To provide a personal view, Souter weaves in tales of his own experiences with guns, including sport shooting as a young man, hunting and bonding with his father, and facing the smoking end of a muzzle as an international photojournalist. American Shooter is both a history and a personal journey that traces the path of American gun ownership culture from the Revolution to today. It recounts how the country has lived with guns from the flintlock hung over the fireplace to the concealed-carry, laser-sighted Glock semiautomatic pistol tucked away in the hidden pocket of a mom's purse.

Crooked Deals and Broken Treaties John Tully, 2016 Draws on contemporary accounts and a wealth of studies to produce this history of the Cuyahoga Valley. Tully pays special attention to how settlers' notions of private property--and the impulse to own and develop the land--clashed with more collective social organizations of American Indians. He also documents the ecological cost of settlement, long before heavy industry laid waste to the region. --From publisher description.

**Scapegoat of Shiloh** Kevin Getchell, 2013-07-18 A great controversy surrounds General Lew Wallace at the Battle of Shiloh. General U.S. Grant blamed Wallace for the huge number of casualties the Union suffered, citing a dilatory march and poor choice of route to the battlefield. Wallace was obsessed with these accusations his entire life and wrote Ben-Hur as much to work through the injustice of being labeled a scapegoat as for literary aspirations. This book asserts that something entirely different may be at fault for the astonishing number of men lost. Overlooked in the history of the battle is Grant's own choice of a specific man to carry battle orders to Wallace, a mistake that might have made all the difference. This assertion is supported by newly discovered documents written by an obscure Wisconsin quartermaster as well as evidence in official records. The implications of this choice of messenger virtually vindicate Wallace. By also juxtaposing certain Confederate actions, this book explores the behind-the-scenes struggle during the Battle of Shiloh and its aftermath for the participants.

**Bioenergy** R. Navanietha Krishnaraj, Jong-Sung Yu, 2015-07-28 Energy is one of the prime needs of the modern world, and energy demands have been rapidly increasing in the recent years owing to rapid advancements in industrialization and population explosion. Conventional fossil fuels are being depleted at rapid rates, and the use of conventional sources such as coal or nuclear sources cause several hazards to the environment. New sources of fuel, such as bioenergy, are an ideal option for fulfilling ever-increasing energy demands. This important book offers an exploration of these alternate fuel sources, including biohydrogen, microbial fuel cells, bioethanol, and biodiesel production, focusing on the challenges and factors hindering the real-time application of these bioenergy sources. Researchers all over the world are working in this energy sector, and this has led to drastic improvements in bioenergy research. However, the technology gap between research and industrial application still exists. This important book offers engineers and technologists from different disciplines valuable information on this multifaceted field. The field of bioenergy is interdisciplinary, requiring the knowledge of biologists,

chemists, physicists, and engineers. Exploring the current trends and future prospects for biofuels, the information presented in this book will be valuable to the international industrial community for identifying new options to circumvent problems that exist in bioenergy applications. Topics include: • Thermophilic biohydrogen production • Bio-hydrogen production • Microbial fuel cells as a promising alternative energy source • Microbial fuel cell applications • Potential of *Pseudomonas putida* in producing bioethanol • Potential of lignocellulosic biofuels • Biodiesel production • Reactor designs for biodiesel production • Long-term storage stability of *Pongamia pinnata* and *Jatropha curcas* biodiesel

William E. Logan's 1845 survey of the Upper Ottawa Valley Charles H. Smith, Ian Dyck, 2007-01-01 This volume presents the 1845 field journal of pioneering geologist Sir William Edmond Logan, written on an expedition up the Ottawa River. The journal is sprinkled with fascinating stories of daily life during the expedition, supplemented with Logan's sketches. An introductory essay provides added insight into the work.

The Work and Family Handbook Marcie Pitt-Catsoupes, Ellen Ernst Kossek, Stephen Sweet, 2015-11-30 The Work and Family Handbook is a comprehensive edited volume, which reviews a wide range of disciplinary perspectives across the social sciences on the study of work-family relationships, theory, and methods. The changing demographics of the labor force has resulted in an expanded awareness and understanding of the intricate relations between work and family dimensions in people's lives. For the first time, the efforts of scholars working in multiple disciplines are organized together to provide a comprehensive overview of the perspectives and methods that have been applied to the study of work and family. In this book, the leading work-family scholars in the fields of social work, psychology, sociology, organizational behavior, human resource management, business, and other disciplines provide chapters that are both accessible and compelling. This book demonstrates how cross-disciplinary comparisons of perspective and method reveal new insights on the needs of working families, the challenges faced by those who study them, and how to formulate policy on their behalf.

**The One Year Yellow Ribbon Devotional** Brenda Pace, Carol McGlothlin, 2016-01-15 The One Year Yellow Ribbon Devotional will encourage those of us staying behind to pray for those who are taking a stand for our freedoms. During a time of war and election of a new president, The One Year Yellow Ribbon Devotional meets a large need in our society. So many people are affected by the absence of those who leave home and serve in distant lands. Those who are left behind often struggle to find contentment and hope. This devotional will not only meet the needs of those individuals but will also encourage all Americans to take a stand by praying for our country and the men and women serving overseas.

*Handbook for Achieving Gender Equity Through Education* Susan S. Klein, Barbara Richardson, Dolores A. Grayson, Lynn H. Fox, Cheris Kramarae, Diane S. Pollard, Carol Anne Dwyer, 2014-05-22 First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning

gender equity in education. This new, expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include: Expertise - Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus - The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering. Global/Diversity Focus - Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented - All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material - Expanded from 25 to 31 chapters, this new edition includes: \*more emphasis on male gender equity and on sexuality issues; \*special within population gender equity challenges (race, ability and disability, etc); \*coeducation and single sex education; \*increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; \*technology and gender equity is now treated in three chapters; \*women's and gender studies; \*communication skills relating to English, bilingual, and foreign language learning; and \*history and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents.

*Water and Energy* Gustaf Olsson, 2012-06-19 *Water and Energy - Threats and Opportunities* creates an awareness of the important couplings between water and energy. It shows how energy is used in all the various water cycle operations and demonstrates how water is used - and misused - in all kinds of energy production and generation. Population increase, climate change and an increasing competition between food and fuel production create enormous pressures on both water and energy availability. Since there is no replacement for water, water security looks more crucial than energy security. This is true not only in developing countries but also in the most advanced countries. The western parts of the USA suffer from water scarcity that provides a real security threat. The book does not aim to show "how to design" or to solve some of the very intricate conflicts between water and energy. Instead it systematically lists ideas, possibilities and a number of results. There are a few more technical chapters that act as entry points to more detailed technical literature. Part One of the book describes the water-energy nexus, the conflicts and competitions and the couplings between water security, energy security, and food security. Part Two captures how climate change, population increase and the growing food demand will have major impact on water availability in many countries in the world. Part Three describes water for energy and how energy production and conversion depend on water availability. As a consequence, all planning has to take both water and energy into consideration. The environmental (including water) consequences of oil and coal exploration and refining are huge, in North America as well as in the rest of the world. Furthermore, oil leak accidents have hit

America, Africa, Europe as well as Asia. The consequences of hydropower are discussed and the competition between hydropower generation, flood control and water storage is illustrated. The importance of water for cooling thermal power plants is described, as this was so tragically demonstrated at the Fukushima nuclear plants in 2011. Climate change will further emphasize the strong coupling between water availability and the operation of power plants. Part Four analyses energy for water – how water production and treatment depend on energy. The book shows that a lot can be done to improve equipment, develop processes and apply advanced monitoring and control to save energy for water operations. Significant amounts of energy can be saved by better pumping, the reduction of leakages, controlled aeration in biological wastewater treatment, more efficient biogas production, and by improved desalination processes. The water-energy issue is not only about technology. It is our attitudes and our lifestyle that can significantly influence the consumption of both water and energy. We all have to be reminded that water is energy and energy is water. The book is aimed at various kinds of readers: The politician and decision maker – providing a holistic view; The engineer who wishes to find out about the key issues and to understand the strong driving forces from the increasing population, climate change and the food supply in the world; The student who wishes to get an overview of future challenges and new possibilities; The planner – water and energy have to be planned together; The designer of a water and wastewater system – how does energy come in? The operator of a water or a wastewater treatment plant – what are the possibilities to make the system more efficient; The wastewater treatment manager – what are the possibilities to save and recover energy in a wastewater treatment plant; The researcher – looking for connections between different specialities. What kind of cross-disciplinary research would be needed; The power and energy professional – mostly the water issue is forgotten – until there is water scarcity; The water professional – it is not only a matter of operating water systems efficiently. Water professionals have to be much more engaged in the water quantity and water quality implications of energy generation. It is too late to attack the problems by developing methods for the treatment of contaminated water. The water consumption and the water pollution simply have to be closely watched already at the energy production phase. About the author: Gustaf Olsson, Professor Em. in Industrial Automation, Lund University, Sweden Since 2006 Gustaf is professor emeritus at Lund University, Sweden. Gustaf has devoted his research to control and automation in water systems, electrical power systems and process industries. From 2006 to 2008 he was part time professor in electrical power systems at Chalmers University of Technology, Sweden. Since 2006 he has been guest professor at the Technical University of Malaysia (UTM) and at the Tsinghua University in Beijing, China; about one month per year at each university. He is an honorary faculty member of the Exeter University in UK. Gustaf has served in various positions within IWA, the International Water Association. Between 2005 and 2010 he was the editor-in-chief of the journals Water Science and Technology and Water Science and Technology/Water Supply. From 2007 to 2010 he has been a member of the IWA Board of Directors. Gustaf has guided 23 PhDs and a few hundred MSc students to their exams. He has received the Lund University pedagogical award for distinguished achievements in the education. The Lund University engineering students have elected him as the teacher of the year. In 2010 he received the IWA Publication Award. Except in China and Malaysia he has spent extended periods as a guest professor and visiting researcher at universities and companies in the USA, Australia and Japan and has been invited as a guest lecturer in 19 countries outside Sweden. He has authored six books – some of them published in English, Russian, German and Chinese – and about 160 scientific publications. Three PowerPoint presentations are available for Water and Energy – threats and opportunities: Water and Energy: Modelling, Control and Automation Challenges – Part 1, Water and Energy: Modelling, Control and Automation Challenges – Part 2, and Water and

**The Fight for the Yazoo, August 1862\_ÑJuly 1864** Myron J. Smith, Jr., 2012-10-10 Following the loss of the CSS Arkansas in early August 1862, Union and Confederate eyes turned to the Yazoo River, which formed the developing northern flank for the South's fortress at Vicksburg, Mississippi. For much of the next year, Federal efforts to capture the citadel focused on possession of that stream. Huge battles and mighty expeditions were launched (Chickasaw Bayou, Yazoo Pass, Steele's Bayou) from that direction, but the city, guarded by stout defenses, swamps, and motivated defenders, could not be turned. Finally, Union troops ran down the Mississippi and came up from the south and the river defenses and the bastion itself were taken from the east. From July 1863 to August 1864, sporadic Confederate resistance necessitated continued Federal attention. This book recounts the whole story.

*A Dictionary of Iowa Place-Names* Tom Savage, 2007-08 Lourdes and Churchtown, Woden and Clio, Emerson and Sigourney, Tripoli and Waterloo, Prairie City and Prairieburg, Tama and Swedesburg, What Cheer and Coin. Iowa's place-names reflect the religions, myths, cultures, families, heroes, whimsies, and misspellings of the Hawkeye State's inhabitants. Tom Savage spent four years corresponding with librarians, city and county officials, and local historians, reading newspaper archives, and exploring local websites in an effort to find out why these communities received their particular names, when they were established, and when they were incorporated. Savage includes information on the place-names of all 1,188 incorporated and unincorporated communities in Iowa that meet at least two of the following qualifications: twenty-five or more residents; a retail business; an annual celebration or festival; a school; church, or cemetery; a building on the National Register of Historic Places; a zip-coded post office; or an association with a public recreation site. If a town's name has changed over the years, he provides information about each name; if a name's provenance is unclear, he provides possible explanations. He also includes information about the state's name and about each of its ninety-nine counties as well as a list of ghost towns. The entries range from the counties of Adair to Wright and from the towns of Abingdon to Zwingle; from Iowa's oldest town, Dubuque, starting as a mining camp in the 1780s and incorporated in 1841, to its newest, Maharishi Vedic City, incorporated in 2001. The imaginations and experiences of its citizens played a role in the naming of Iowa's communities, as did the hopes of the huge influx of immigrants who settled the state in the 1800s. Tom Savage's dictionary of place-names provides an appealing genealogical and historical background to today's map of Iowa. "It is one of the beauties of Iowa that travel across the state brings a person into contact with so many wonderful names, some of which a traveler may understand immediately, but others may require a bit of investigation. Like the poet Stephen Vincent Benét, we have fallen in love with American names. They are part of our soul, be they family names, town names, or artifact names. We identify with them and are identified with them, and we cannot live without them. This book will help us learn more about them and integrate them into our beings."—from the foreword by Loren N. Horton "Primghar, O'Brien County. Primghar was established by W. C. Green and James Roberts on November 8, 1872. The name of the town comes from the initials of the eight men who were instrumental in developing it. A short poem memorializes the men and their names: Pumphrey, the treasurer, drives the first nail; Roberts, the donor, is quick on his trail; Inman dips slyly his first letter in; McCormack adds M, which makes the full Prim; Green, thinking of groceries, gives them the G; Hayes drops them an

H, without asking a fee; Albright, the joker, with his jokes all at par; Rerick brings up the rear and crowns all 'Primghar.' Primghar was incorporated on February 15, 1888."
