Phantom Billing, Fake Prescriptions, and the High Cost of Medicine Terry L. Leap,2011-04-15 U.S. health care is a \$2.5 trillion system that accounts for more than 17 percent of the nation's GDP. It is also highly susceptible to fraud. Estimates vary, but some observers believe that as much as 10 percent of all medical billing involves some type of fraud. In 2009, New York's Medicaid fraud office recovered \$283 million and obtained 148 criminal convictions. In July 2010, the U.S. Justice Department charged nearly 100 patients, doctors, and health care executives in five states of bilking the Medicare system out of more than \$251 million through false claims for services that were medically unnecessary or never provided. These cases only hint at the scope of the problem. In *Phantom Billing, Fake Prescriptions, and the High Cost of Medicine*, Terry L. Leap takes on medical fraud and its economic, psychological, and social costs. Illustrated throughout with dozens of specific and often fascinating cases, this book covers a wide variety of crimes: kickbacks, illicit referrals, overcharging and double billing, upcoding, unbundling, rent-a-patient and pill-mill schemes, insurance scams, short-pilling, off-label marketing of pharmaceuticals, and rebate fraud, as well as criminal acts that enable this fraud (mail and wire fraud, conspiracy, and money laundering). After assessing the effectiveness of the federal laws designed to fight health care fraud and abuse—the antikickback statute, the Stark Law, the False Claims Act, HIPAA, and the food and drug laws—Leap suggests a number of ways that health care providers, consumers, insurers, and federal and state officials can bring health care fraud and abuse under control, thereby reducing the overall cost of medical care in America.

The Oxford Handbook of Shakespeare Arthur F. Kinney,2012 Contains forty original essays.

Earl Scruggs and Foggy Mountain Breakdown Thomas Goldsmith,2019-09-30 Recorded in 1949, Foggy Mountain Breakdown changed the face of American music. Earl Scruggs's instrumental essentially transformed the folk culture that came before it while helping to energize bluegrass's entry into the mainstream in the 1960s. The song has become a gateway to bluegrass for musicians and fans alike as well as a happily inescapable track in film and television. Thomas Goldsmith explores the origins and influence of Foggy Mountain Breakdown against the backdrop of Scruggs's legendary career. Interviews with Scruggs, his wife Louise, disciple Bela Fleck, and sidemen like Curly Seckler, Mac Wiseman, and Jerry Douglas shed light on topics like Scruggs's musical evolution and his working relationship with Bill Monroe. As Goldsmith shows, the captivating sound of Foggy Mountain Breakdown helped bring back the banjo from obscurity and distinguished the low-key Scruggs as a principal figure in American acoustic music. Passionate and long overdue, *Earl Scruggs and Foggy Mountain Breakdown* takes readers on an ear-opening journey into two minutes and forty-three seconds of heaven.

The First Black United States Marines Ronald Culp,2007 On June 1, 1942, the United States Marine Corps broke a 144-year tradition and enlisted the first black Marines. Three months later, more than 400 black volunteers began their training as members of the 51st Composite Defense Battalion at Montford Point, a Marine camp of over five square miles located within Camp Lejeune in North Carolina. Compiled from personal interviews, this volume takes an in-depth look at the men who braved the color barrier and became the first black Marines. Beginning with a look at the pre-World War II Marine Corps, it examines the creed and contemporary image of the USMC. The main focus is the Marine Corps and the fighting experiences of their newest members. Additional topics include internal Marine perspectives on the admittance of blacks, initially enforced quotas, and the difficulties of segregation. Appendices provide information regarding monthly inductions into the Marine Corps from 1941 to 1945; rank and pay structure; depot and ammunition companies from 1943 to 1946; and Pacific Ocean area units of fire for ground weapons.

North Carolina String Music Masters Elizabeth A. Carlson,2016-02-08 North Carolina musicians pioneered and mastered the genres of old-time and bluegrass music. The roots of American music are deeply grounded in North Carolina's music history. Doc Watson played mountain fiddle tunes on guitar. He emerged as the father of flatpicking and forever changed the role of the guitar in American music. Charlie Poole created techniques that eventually defined bluegrass, and folks around the state heard his banjo on some of the most important old-time recordings. Rising star Rhiannon Giddens keeps the music alive today through new interpretations of classic old-time and bluegrass songs. Elizabeth Carlson profiles these and other masters of string music in this fascinating record of North Carolina's musical past, present and future.

Hollywood's Dirtiest Secret Hunter Vaughan,2019-03-12 In an era when many businesses have come under scrutiny for their environmental impact, the film industry has for the most part escaped criticism and regulation. Its practices are more diffuse; its final product, less tangible; and Hollywood has adopted public-relations strategies that portray it as environmentally conscious. In *Hollywood's Dirtiest Secret*, Hunter Vaughan offers a new history of the movies from an environmental perspective, arguing that how we make and consume films has serious ecological consequences. Bringing together environmental humanities, science communication, and social ethics, *Hollywood's Dirtiest Secret* is a pathbreaking consideration of the film industry's environmental impact that examines how our cultural prioritization of spectacle has distracted us from its material consequences and natural-resource use. Vaughan examines the environmental effects of filmmaking from Hollywood classics to the digital era, considering how popular screen media shapes and reflects our understanding of the natural world. He recounts the production histories of major blockbusters—*Gone with the Wind*, *Singin' in the Rain*, *Twister*, and *Avatar*—situating them in the contexts of the development of the film industry, popular environmentalism, and the proliferation of digital technologies. Emphasizing the materiality of media, Vaughan interweaves details of the hidden environmental consequences of specific filmmaking practices, from water use to server farms, within a larger critical portrait of social perceptions and valuations of the natural world.

Starring Red Wing! Linda M. Waggoner,2019 The epic biography *Starring Red Wing!* brings the exciting career, dedicated activism, and noteworthy legacy of Ho-Chunk actress Lilian Margaret St. Cyr vividly to life. Known to film audiences as Princess Red Wing, St. Cyr emerged as the most popular Native American actress in the pre-Hollywood and early studio-system era in the United States. Today St. Cyr is known for her portrayal of Naturich in Cecile B. DeMille's *The Squaw Man* (1914); although DeMille claimed to have discovered the little Indian girl, the viewing public had already long adored her as a petite, daredevil Indian heroine. She befriended and worked with icons such as Mary Pickford, Jewell Carmen, Tom Mix, Max Sennett, and William Selig. Born on the Winnebago Reservation in 1884 and orphaned in 1888, she spent ten years in Indian boarding schools before graduating from the Carlisle Indian Industrial School in 1902. She married James Young Johnson, and in 1907 the couple reinvented themselves as the stage personas Princess Red Wing and Young Deer, performing in Wild West shows around New York and beginning their film careers. As their popularity grew, St. Cyr and Johnson decamped from the East Coast and helped establish the second motion picture company in Southern California, where Red Wing became a Native American leading lady in westerns until her career waned in 1917. After returning to the reservation to work as a housekeeper, she took her show on a two-year tour to educate the public about Native culture and lived out her life in New York, performing, educating, and crafting regalia. *Starring Red Wing!* is a sweeping narrative of St. Cyr's evolution as America's first Native American film star, from her childhood and performance career to her days as a respected elder of the multi-tribal New York City Indian Community.

The Airship ROMA Disaster in Hampton Roads Nancy E. Sheppard,2016-01-25 In March 1921, Major John G. Thornell and his crew were detailed to Italy to procure a new experimental airship for the United States Army Air Service. Stationed at Langley Field in Hampton, the ROMA never lived up to expectations despite being heralded as the future of military innovation. Tragically, it crashed and erupted in a ball of fire in 1922, claiming the lives of thirty-four of the brave men aboard. Author Nancy E. Sheppard reveals the forgotten, harrowing story of one of the last great airships and those who sacrificed for the promise of a new era in aviation.

In Search of The Thin Man Philip Zwerling,2024-02-29 The man who created the boldest hard boiled fiction, Dashiell Hammett, wrote *The Thin Man* in 1933 and launched the fun-loving, booze-swilling, mystery-solving

couple Nick and Nora Charles into American culture. MGM sold millions of movie tickets by casting William Powell and Myrna Loy as this classiest of romantic couples. Over 14 years and six films, these stars navigated grave periods of history: the Great Depression, World War II, and the Cold War. The novel and films live on as gems of a unique gritty sophistication. This complete history of The Thin Man series covers the brightest stars, tastiest scandals, headlines and conflicts behind these classic films. With a cast of hundreds, we see Hammett, his lover Lillian Hellman, and their friend Dorothy Parker fight alcoholism, sexual convention and Senator Joe McCarthy in culture wars of eerie contemporaneity.

American Military History Volume 1 Army Center of Military History, 2016-06-05 American Military History provides the United States Army—in particular, its young officers, NCOs, and cadets—with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war—global war—was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

Talking Conflict Anna M. Wittmann, 2016-12-05 In today's information era, the use of specific words and language can serve as powerful tools that incite violence—or sanitize and conceal the ugliness of war. This book examines the complex, twisted language of conflict. Why is the term collateral damage used when military strikes kill civilians? What is a catastrophic success? What is the difference between a privileged and unprivileged enemy belligerent? How does deterrence differ from detente? What does hybrid warfare mean, and how is it different from asymmetric warfare? How is shell shock different from battle fatigue and PTSD? These are only a few of the questions that Talking Conflict: The Loaded Language of Genocide, Political Violence, Terrorism, and Warfare answers in its exploration of euphemisms, warspeak, doublespeak, and propagandistic terms. This handbook of alphabetically listed entries is prefaced by an introductory overview that provides background information about how language is used to obfuscate or minimize descriptions of armed conflict or genocide and presents examples of the major rhetorical devices used in this subject matter. The book focuses on the loaded language of conflict, with many of the entries demonstrating the function of given terms as euphemisms, propaganda, or circumlocutions. Each entry is accompanied by a list of cross references and Further Reading suggestions that point readers to pertinent sources for further research. This book is ideal for students—especially those studying political science, international relations, and genocide—as well as general readers.

Gumption Nick Offerman, 2016-04-05 First paperback printing includes Bonus chapter.

Planting Seeds of Knowledge Heinrich Hartmann, Julia Tischler, 2023-06-09 In the late nineteenth and early twentieth centuries, agricultural practices and rural livelihoods were challenged by changes such as commercialization, intensified global trade, and rapid urbanization. Planting Seeds of Knowledge studies the relationship between these agricultural changes and knowledge-making through a transnational lens. Spanning exchanges between different parts of Europe, North and South America, the Indian subcontinent, and Africa, the wide-reaching contributions to this volume reform current historiography to show how local experiences redefined global practice.

Healthcare Valuation, The Financial Appraisal of Enterprises, Assets, and Services Robert James Cimas, 2014-03-24 A timely look at the healthcare valuation process in an era of dynamic healthcare reform, including theory, methodology, and professional standards In light of the dynamic nature of the healthcare industry sector, the analysis supporting business valuation engagements for healthcare enterprises, assets, and services must address the expected economic conditions and events resulting from the four pillars of the healthcare industry: Reimbursement, Regulation, Competition, and Technology. Healthcare Valuation presents specific attributes of each of these enterprises, assets, and services and how research needs and valuation processes differentiate depending on the subject of the appraisal, the environment the property interest exists, and the nature of the practices. Includes theory, methodology, and professional standards as well as requisite research, analytical, and reporting functions in delivering healthcare valuation services Provides useful process tools such as worksheets and checklists, relevant case studies, plus a website that will include comprehensive glossaries and topical bibliographies Read Healthcare Valuation for a comprehensive treatise of valuation issues in the healthcare field including trends of compensation and reimbursement, technology and intellectual property, and newly emerging healthcare entities.

Tropic of Football Rob Ruck, 2018-07-31 Longlisted for the PEN/ESPN Award “Everything that’s rousing and distressing about block-and-tackle football is encompassed in Tropic of Football. . . illuminating.” —Newsday How a tiny Pacific archipelago is producing more players—from Troy Polamalu to Marcus Mariota—for the NFL than anywhere else in the world, by an award-winning sports historian Football is at a crossroads, its future imperiled by the very physicality that drives its popularity. Its grass roots—high school and youth travel program—are withering. But players from the small South Pacific American territory of Samoa are bucking that trend, quietly becoming the most disproportionately overrepresented culture in the sport. Jesse Sapolu, Junior Seau, Troy Polamalu, and Marcus Mariota are among the star players to emerge from the Samoan islands, and more of their brethren suit up every season. The very thing that makes them so good at football—their extraordinary internalization of discipline and warrior self-image—makes them especially vulnerable to its pitfalls, including concussions and brain injuries. Award-winning sports historian Rob Ruck travels to the South Seas to unravel American Samoa's complex ties with the United States. He finds an island blighted by obesity, where boys train on fields blistered with volcanic pebbles wearing helmets that should have been discarded long ago, incurring far more neurological damage than their stateside counterparts and haunted by Junior Seau, who committed suicide after a vaunted twenty-year NFL career, unable to live with the demons that resulted from chronic traumatic encephalopathy. Tropic of Football is a gripping, bittersweet history of what may be football's last frontier.

Killing King Stuart Wexler, Larry Hancock, 2015-04-01 At approximately 6 pm Eastern Standard Time on April 4, 1968, Martin Luther King Jr., one of America's great moral leaders was assassinated in Memphis, Tennessee. The largest manhunt in FBI history eventually resulted in the capture of James Earl Ray, a career criminal who had escaped from prison in April 1967. Ray entered a guilty plea and confessed his guilt before a judge, but immediately following his conviction, he recanted his confession and insisted on his innocence until his death in 1998. For decades, Americans debated issues of the crime, with a new congressional investigation in the 1970s concluding that Ray was guilty but part of a larger conspiracy. Using new data, interviews, and data-mining techniques, we are closer than ever to an accurate accounting of how Dr. King died and, most importantly, why he was killed.

Isolationist States in an Interdependent World Helga Turku, 2016-05-06 States that withdraw from the international system provide insight into an unexplored area of international relations in terms of rationality, self-interest, power politics, cooperation and alliances. Indeed, isolationism in an interdependent state system goes against the logic of modern society and state systems. Using historical, comparative and inductive analysis, Helga Turku explains why states may choose to isolate themselves both domestically and internationally, using comparative historical analysis to flesh out isolationism as a concept and in practice. The book examines extreme forms of self-imposed domestic and international isolation in an interdependent international system, noting the effects on both the immediate interests of a ruling regime and the long-term national interests of

the state and the populace.

Rights of the Elderly Fred C. Pampel,2008 Rights of the Elderly provides an overview of the history of this timely topic and the opinions surrounding it--from the Social Security Act of 1935 to the current activism of groups such as AARP and the Gray Panthers. Examining recent court cases such as Kathi Cooper et al. v. IBM Personal Pension Plan and IBM Corporation and documents such as The Age Discrimination in Employment Act of 1967, this new volume provides multiple perspectives and decisions surrounding this issue while also plotting a course for the future of legislative action. A comprehensive and up-to-date overview essay, capsule biographies, a large annotated bibliography, a chronology of significant events, organization and agency listings, and a glossary provide useful information for students, teachers, librarians, older persons, activists, policy makers, and the general reader interested in this controversial issue.

Robert Nixon and Police Torture in Chicago, 1871-1971 Elizabeth Dale,2016-05-25 In 2015, Chicago became the first city in the United States to create a reparations fund for victims of police torture, after investigations revealed that former Chicago police commander Jon Burge tortured numerous suspects in the 1970s, '80s, and '90s. But claims of police torture have even deeper roots in Chicago. In the late 19th century, suspects maintained that Chicago police officers put them in sweatboxes or held them incommunicado until they confessed to crimes they had not committed. In the first decades of the 20th century, suspects and witnesses stated that they admitted guilt only because Chicago officers beat them, threatened them, and subjected them to sweatbox methods. Those claims continued into the 1960s. In *Robert Nixon and Police Torture in Chicago, 1871-1971*, Elizabeth Dale uncovers the lost history of police torture in Chicago between the Chicago Fire and 1971, tracing the types of torture claims made in cases across that period. To show why the criminal justice system failed to adequately deal with many of those allegations of police torture, Dale examines one case in particular, the 1938 trial of Robert Nixon for murder. Nixon's case is famous for being the basis for the novel *Native Son*, by Richard Wright. Dale considers the part of Nixon's account that Wright left out of his story: Nixon's claims that he confessed after being strung up by his wrists and beaten and the legal system's treatment of those claims. This original study will appeal to scholars and students interested in the history of criminal justice, and general readers interested in Midwest history, criminal cases, and the topic of police torture.
