I Know What I Saw Linda S Godfrey,2019-07-16 Which came first--the monster or the myth? Journalist Linda Godfrey investigates present-day encounters with mysterious creatures of old. The monsters of ancient mythology, folklore, and more contemporary urban legend have long captured the popular imagination. While most people in America today relegate monsters to just that--our imaginations--we continue to be fascinated by the unknown. Linda Godfrey is one of the country's leading authorities on modern-day monsters and has interviewed countless eyewitnesses to strange phenomena. Monsters evolve, taking on both new and familiar forms over time and across cultures. In this well-researched book, Godfrey explores uncanny encounters with werewolves, goatmen, Bigfoot, and more. In more than twenty-five years spent chasing monsters, Godfrey has found that it often remains unclear whether the sightings are simply mistaken animals, hoaxes, or coincidence. When all the speculation is said and done, one question remains for fans and researchers: Are the creatures real, or are they entirely other-world? Godfrey suspects that it isn't an either/or question--our reality operates on a scale from dense matter to realms the human eye cannot see. As Godfrey investigates unexplained phenomena, her search for answers will fascinate casual observers and enthusiasts alike.

Und was wäre der sicherste Weg, einem Riesen die Mandeln herauszunehmen? McNeill, Elizabeth Tucker, and William Westerman showcase ways the Internet both shapes and is shaped by folklore

Garden Revolution Larry Weaner,Thomas Christopher,2016-05-18 AHS Book Award winner This lushly-photographed reference is an important moment in horticulture that will be embraced by anyone looking for a better, smarter way to garden. Larry Weaner is an icon in the world of ecological landscape design, and now his revolutionary approach is available to all gardeners. *Garden Revolution* shows how an ecological approach to planting can lead to beautiful gardens that buck much of conventional gardening’s counter-productive, time-consuming practices. Instead of picking the wrong plant and then constantly tilling, weeding, irrigating, and fertilizing, Weaner advocates for choosing plants that are adapted to the soil and climate of a specific site and letting them naturally evolve over time. Allowing the plants to find their own niches, to spread their seed around until they find the microclimate and spot that suits them best, creates a landscape that is vibrant, dynamic, and gorgeous year after year.

Herbaceous Perennial Plants Allan M. Armitage,2008-05-01 The third edition of the comprehensive—and entertaining—gardening reference by the master horticulturalist. This is the long-awaited third edition of Allan Armitage’s masterpiece on garden perennials. Armitage’s extensive traveling, teaching, and trialing experiences provide a depth of understanding of the best ornamental perennials for North American gardens unparalleled by any other garden writer. One of the most definitive and conclusive books written about perennials, the first edition was designated as one of the best seventy-five books written in the last seventy-five years by the American Horticulture Society. Now the third edition of “*The Big Perennial Book*” (as it is fondly referred to by many practitioners) describes 3,600 species in 1224 pages. More than three hundred color photos complement detailed text filled with the author’s pointed observations of plant performance, cultivar selection, and current taxonomy. In addition, his trademark wit and passion are both in abundance, making reading as pleasurable as it is informative.

The Bulb Hunter Chris Wiesinger,William C. Welch,2013-09-27 Dubbed the Bulb Hunter in a 2006 New York Times feature story, Chris Wiesinger took his passion for bulbs to vacant lots, abandoned houses, cemeteries, and construction sites throughout the South in search of botanical survivors whose descendants had never seen the inside of a big-box chain store. The vintage specimens Wiesinger sought came from hardy, historic stock, adapted to human neglect and hot climates, reappearing faithfully over decades

without care or cultivation. Traveling back roads, speaking to strangers, looking for the telltale color of a remnant iris or lily, Wiesinger started digging, then began trying to grow and share the bulbs he collected. From its humble beginnings on an East Texas sweet potato farm, his Southern Bulb Company has now grown into a full-fledged business known throughout the world, propagating and selling the rare, tough, heritage plants Wiesinger still seeks out and champions. Nicknamed “Flower” by his fellow cadets at Texas A&M University, Wiesinger relates his adventures in bulb hunting, telling stories of the bulbs he has discovered and weaving in his own life story as a student, plantsman, and small business owner. He then teams with veteran horticulturist William C. Welch to provide advice on how to grow and appreciate the bulbs that have been rescued and reintroduced. This “primer” gives gardeners information on what bulbs to grow where, when to plant them and when they bloom, and how to incorporate them with other plants in the landscape. Finally, Welch describes how bulbs have enhanced his personal gardens and brought him and Wiesinger together in the common cause of heirloom gardening. Entertaining, informative, and loaded with beautiful photographs, The Bulb Hunter is sure to be a favorite of gardeners and plant lovers everywhere.

Daffodils for North American Gardens Brent Heath,Becky Heath,2001 Here in this new, revised, and updated edition, the authors share their vast knowledge and experience in the world of daffodils in a crisp, clear prose, supported by hundreds of full-color illustrations as well as instructive drawings.

High and Dry Robert Nold,2008-01-01 Leavened with humor and rueful wisdom, Nold's pithy descriptions zero in on each plant's outstanding ornamental characteristics while giving the reader an accurate idea of what to expect from the plant's performance in the garden. Although Nold addresses himself primarily to western gardeners, anyone with an interest in hardy, drought-tolerant plants will find in these pages an abundance of tempting possibilities with which to experiment.--BOOK JACKET.

Stel,2002-06-05 The Global Ocean Observing System (GOOS) is an international programme for a permanent global framework of observations, modelling and analysis of ocean variables that are needed to support operational services around the world. The EuroGOOS strategy has two streams: the first is to improve the quality of marine information in European home waters, and the second is to collaborate with similar organisations in other continents to create a new global ocean observing and modelling system that will provide the open ocean forecasts needed to achieve the best possible performance by local marine information services everywhere. EuroGOOS held its second international conference in The Hague in 1999. Here, the operational services already in place in the EuroGOOS regions were presented and evaluated. In addition, a Forward Look was presented, with targets for the next 5-10 years. The proceedings of the first EuroGOOS conference were published by Elsevier in the /locate/inca/600827EOS Series No. 62 Editors: Stel et al, ISBN 0-444-82892-3.

After a brief review of the research background and of the project itself, successive chapters describe the specific practices which teachers found fruitful and the underlying ideas about learning that these developments illustrate. Later chapters discuss the problems that teachers encountered when implementing the new practices in their classroom and give guidance for school management and LEAs about promoting and supporting the changes. --from publisher description
