*Shared Decision Making in Mental Health: International Perspectives on Implementation* Shulamit Ramon, Yaara Zisman-Ilani, Alan David Quirk, 2022-01-28

**The Sexual Liberals and the Attack on Feminism** Dorchon Leidholdt, Janice G. Raymond, 1990 In deze bundel wordt weerwerk geleverd tegen het Amerikaanse seksuele liberalisme, dat door een vrijwel ongelimiteerde seksuele vrijheid te propageren, direct en indirect afbreuk probeert te doen aan de verworvenheden van de feministische beweging. De aloude discussie over pro en contra pornografie wordt heropend, en ook over voortplantingstechnologie, seksueel geweld en incest nemen diverse auteurs verrassende en vernieuwende standpunten in.

**Vibration Problems in Machines** Arthur W. Lees, 2020-07-02 *Vibration Problems in Machines* explains how to infer information about the internal operations of rotating machines from external measurements through methods used to resolve practical plant problems. Second edition includes summary of instrumentation, methods for establishing machine rundown data, relationship between the rundown curves and the ideal frequency response function. The section on balancing has been expanded and examples are given on the strategies for balancing a rotor with a bend, with new section on instabilities. It includes case studies with real plant data, MATLAB® scripts and functions for the modelling and analysis of rotating machines.

*Shared Decision Making in Health Care* Glyn Elwyn, Adrian Edwards, Rachel Thompson, 2016-07-22 Over the past decade health care systems around the world have placed increasing importance on the relationship between patient choice and clinical decision-making. In the years since the publication of the second edition of *Shared Decision Making in Health Care*, there have been significant new developments in the field, most notably in the US where 'Obamacare' puts shared decision making (SDM) at the centre of the 2009 Affordable Care Act. This new edition explores shared decision making by examining, from practical and theoretical perspectives, what should comprise an effective decision-making process. It also looks at the benefits and potential difficulties that arise when patients and clinicians share health care decisions. Written by leading experts from around the world and utilizing high quality evidence, the book provides an up-to-date reference with real-world context to the topics discussed, and in-depth coverage of the practicalities of implementing and teaching SDM. The breadth of information in *Shared Decision Making in Health Care* makes it an essential resource for policy-makers and health care workers. As health care systems adapt to increasingly collaborative patient-clinician care frameworks, this will also prove a useful guide to SDM for clinicians of all disciplines.

The Myth Of The Blitz Angus Calder, 2012-06-30 The Myth of the Blitz was

nurtured at every level of society. It rested upon the assumed invincibility of an island race distinguished by good humour, understatement and the ability to pluck victory from the jaws of defeat by team work, improvisation and muddling through. In fact, in many ways, the Blitz was not like that. Sixty-thousand people were conscientious objectors; a quarter of London's population fled to the country; Churchill and the royal family were booed while touring the aftermath of air-raids; Britain was not bombed into classless democracy. Angus Calder provides a compelling examination of the events of 1940 and 1941 - when Britain 'stood alone' against the Luftwaffe - and of the Myth which sustained her 'finest hour'.

**Joint Decision Making in Mental Health** Camilla Lindholm, Melisa Stevanovic, Elina Weiste, 2020-06-21 This volume studies joint decision making in mental health care contexts through an in-depth examination of the negotiations of power and authority at the level of turn-by-turn sequential unfolding of interaction. Bringing together research at the intersection of mental health, discourse and conversation analysis it examines a wide range of settings including chronic psychiatric visits, rehabilitation meetings, occupational therapy encounters and cognitive behavioral therapy appointments. It presents a series of studies which reveal in close detail the joint decision-making processes in these critical encounters by using naturally occurring video-recorded interactions from a range of health service settings as data. In so doing, it sheds light on the interactional

practices of health care workers that may facilitate or discourage client participation in joint decision-making processes. The book will provide important insights for academics and practitioners working in the fields of psychology, psychotherapy, applied linguistics, nursing, social work and rehabilitation; and in particular for those specializing in psychiatry and mental health.
