World Language Teacher Education Jacqueline F. Davis, 2010-07-01 The significant change in public schools over the last two decades warrants a response in how we prepare teachers. This volume is an effort to share the contributors' knowledge, experience and ideas with colleagues, particularly with novice language teacher educators. The suggestions in the chapters are primarily provided for the teaching methods course, but many can be adapted to other education courses or for professional development programs. The first section of the introduction provides a review of issues identified in teacher education including debates, accountability, and government influence over education. The second section explores teacher educators in the literature such as issues in their practice, and a focus on foreign language teacher educator practice. The third section provides a brief overview of the chapters in the book.

Living in a Nuclear World Bernadette Bensaude-Vincent,Soraya Boudia,Kyoko Sato,2022-03-10 The Fukushima disaster invites us to look back and probe how nuclear technology has shaped the world we live in, and how we have come to live with it. Since the

first nuclear detonation (Trinity test) and the bombings of Hiroshima and Nagasaki, all in 1945, nuclear technology has profoundly affected world history and geopolitics, as well as our daily life and natural world. It has always been an instrument for national security, a marker of national sovereignty, a site of technological innovation and a promise of energy abundance. It has also introduced permanent pollution and the age of the Anthropocene. This volume presents a new perspective on nuclear history and politics by focusing on four interconnected themes—violence and survival; control and containment; normalizing through denial and presumptions; memories and futures—and exploring their relationships and consequences. It proposes an original reflection on nuclear technology from a long-term, comparative and transnational perspective. It brings together contributions from researchers from different disciplines (anthropology, history, STS) and countries (US, France, Japan) on a variety of local, national and transnational subjects. Finally, this book offers an important and valuable insight into other global and Anthropocene challenges such as climate change.

Supplying a timely overview of renewable and non-renewable electric power sources, it provides in-depth analysis of the key factors that affect success. It also identifies practices that have been precursors to failure so you can avoid making the same mistakes in your quest to contribute to the long-overdue advancement of green energy.

Research Opportunities for Deactivating and Decommissioning Department of Energy Facilities National Research Council, Division on Earth and Life Studies, Board on Radioactive Waste Management, Committee on Long-Term Research Needs for Deactivation and Decommissioning at Department of Energy Sites, 2001-08-31 When the Cold War abruptly ended, DOE halted most nuclear materials production. In 1995, Congress chartered DOE's Environmental Management Science Program (EMSP) to bring the nation's scientific infrastructure to bear on EM's most difficult, long-term cleanup challenges. The EMSP provides grants to investigators in industry, national laboratories, and universities to undertake research that may help address these cleanup challenges. On several occasions the EMSP has asked the National Academies for advice on developing its research agenda. This report resulted from a 15-month study by an Academies committee on long-term research needs for deactivation and decommissioning (D&D) at DOE sites.

Space Law Francis Lyall, Paul B. Larsen, 2016-04-01 The opening of space to exploration and use has had profound effects on society. Remote sensing by satellite has improved meteorology, land use and the monitoring of the environment. Satellite television

immediately informs us visually of events in formerly remote locations, as well as providing many entertainment channels. World telecommunication facilities have been revolutionised. Global positioning has improved transport. This book examines the varied elements of public law that lie behind and regulate the use of space. It also makes suggestions for the development and improvement of the law, particularly as private enterprise plays an increasing role in space.

The Upper Room and Tomb of David David Christian Clausen,2016-04-25 It has been a church, a mosque and a synagogue. Jesus is said to have dined there. James, his brother, is believed to have been interred there. King David may be buried beneath its floor. The subject of intense speculation by both scholars and the faithful, the Cenacle on Mount Zion—also known as the Upper Room of the New Testament gospels and as the Tomb of David—has remained a mystery for centuries. Claimed by Jews, Christians and Muslims, the sacred structure continues to evoke passionate controversy. Does it date back to the time of Christ? Was the Last Supper celebrated there? Is this the place where the Holy Spirit descended on the apostles on the first Pentecost following Easter Sunday? Did King David's remains ever lie there? These and many other questions are explored in this first-ever study, offering a readable, fully researched narrative account of the Cenacle's history, archaeology and imagery. Artistic, architectural and photographic illustrations document the Cenacle and its surroundings over the past 1,500 years.
