Eco-Nihilism Wendy Lynne Lee,2017-02-22 Eco-Nihilism: The Philosophical Geopolitics of the Climate Change Apocalypse argues that there are no versions of conquest capital compatible with the fact of a finite planet, and that the pursuit of growth is destined to not only exhaust our planetary resources, but generate profound social injustice and geopolitical violence in its pursuit.

Handbook of Web Based Energy Information and Control Systems Barney L. Capehart,Timothy Middelkoop,2020-12-22 This book promotes the benefits of the development and application of energy information and control systems. This wave of information technology (IT) and web-based energy information and control systems (web based EIS/ECS) continues to roll on with increasing speed and intensity. This handbook presents recent technological advancements in the field, as well as a compilation of the best information from three previous books in this area. The combined thrust of this information is that the highest level functions of the building and facility automation system are delivered by a web based EIS/ECS system that provides energy management, facility management, overall facility operational management and ties in with the enterprise resource management system for the entire facility or the group of facilities being managed.

The Engineer's Clean Air Handbook P. D. Osborn,2016-01-26 The Engineer's Clean Air Handbook is written for engineers but in a language which should be understandable to anyone who may be directly involved in or concerned about atmospheric contamination. It concentrates on achieving clean air and on the more general aspects of pollution. The book begins with the description and make-up of the atmosphere, the size and nature of the atmospheric content, sources of contamination, and risk assessment from atmospheric contamination. Subsequent sections focus on air filters and filtration systems, instrumentation for monitoring and control of atmospheric contamination, ventilation and the quality of breathing air, and the relationship of atmospheric contamination and health. Environmentalists, engineers, and ecologists will find the book useful.

Investment Grade Energy Audit Shirley J. Hansen,James W. Brown,2020-11-26 This book was written to give energy-involved professionals the tools they need to take their energy audits to the next level, and use them to accurately predict a building's future energy use and true savings potential. Going beyond the conventional energy audit, which can lead to projections which are frequently off by as much as 20%, this book provides detailed guidelines on how to use the new tool, the investment grade audit (IGA), which enables prediction of savings with much greater accuracy. Building on the traditional audit, the IGA requires the addition of a risk assessment component which evaluates conditions in a specific building and/or process and reduces the level of uncertainty as to how proposed energy efficiency measures will really behave over time. The authors have covered every aspect of the IGA, including risk management, the people factor, measurement and verification, financing issues, report presentation guidelines, and master planning strategies.
