A Muslim Archipelago Max L. Gross, 2007 This book is with a contemporary focus. Author, Dr. Max Gross's purpose is to use history to explain today's Islamic insurgencies in Indonesia, Malaysia, Thailand, and the Philippines and to offer perspectives for the future. Muslim Archipelago's unique contribution is that it brings together in one reference a mass of information on the insurgencies in Southeast Asia. The country accounts are detailed and thorough as to events, organizations, dates, and participants. The chronological context provides Dr. Gross the opportunity to give insights about historical casualty. His accounting highlights the interaction of the insurgencies within Southeast Asia and their international connection outside the region. The detailed presentations in the chapters on Indonesia and Philippines are especially fruitful. Included in this nearly 280 page book are detailed four-color regional maps, charts, and historical photos spread throughout the text. An extensive bibliography and index are included.

Big Lies Joe Conason, 2003-05-25 The nationally renowned political observer--the bestselling author of *The Hunting of the President*--now mounts an unerring attack on the lies and distortions of the right wing.

A Muslim Archipelago Max L. Gross, 2007 Southeast Asia continues to beckon policymakers and scholars alike to revisit its history in spite of the tomes of appraisals already written, deconstructive or otherwise. Because of a significant presence of Muslims in the region, and particularly in the wake of 9/11, it invariably attracts the attention of foreign powers drawn by the specter of terrorism and focused on rooting out radical Islamist groups said to be working with al-Qaeda. Dr. Max Gross has written an impressive account of the role of Islam in the politics of Southeast Asia, anchored by a strong historical perspective and a comprehensive treatment of current affairs. The result is very much a post-9/11 book. The origins of Jemaah Islamiyah and its connections with al-Qaeda are carefully detailed. Yet, unlike much of the post-9/11 analysis of the Muslim world, Dr. Gross's research has been successful in placing the phenomenon of terrorism within a larger perspective. While recognizing that al-Qaeda's influence on regional terror networks remains unclear, it behooves us to be reminded that, regardless of the nature and extent of the linkages, to dismiss terrorism as a serious threat to security would be na ve to the point of recklessness. The Muslim Archipelago is a profoundly Islamic region, and Jemaah Islamiyah is only a small portion of this reality. The attention Dr. Gross pays to ABIM in Malaysia, of which I was a part, and the civil Islam movement in Indonesia, of which the late Nurcholish Madjid was a principal spokesman, is greatly appreciated. Those unfamiliar with the background and role of the traditional Islamic PAS party in Malaysia, as well as the Darul Islam movement in Indonesia, will find the author's account highly beneficial. The MNLF, the MILF, and Abu Sayyaf in the Philippines, as well as the various Islamic movements in southern Thailand, are also carefully explained.

How to Survive a Pandemic Michael Greger MD, 2020-05-26 A vital, timely text on the viruses

that cause pandemics and how to face them, by the New York Times bestselling author of *How Not to Die*. As the world grapples with the devastating impact of COVID-19, Dr Michael Greger reveals not only what we can do to protect ourselves and our loved ones during a pandemic, but also what human society must rectify to reduce the likelihood of even worse catastrophes in the future. From tuberculosis to bird flu and HIV to coronavirus, these infectious diseases share a common origin story: human interaction with animals. Otherwise known as zoonotic diseases for their passage from animals to humans, these pathogens – both pre-existing ones and those newly identified – emerge and re-emerge throughout history, sparking epidemics and pandemics that have resulted in millions of deaths around the world. How did these diseases come about? And what – if anything – can we do to stop them and their fatal march into our countries, our homes, and our bodies? In *How to Survive a Pandemic*, Dr Michael Greger, physician and internationally-recognized expert on public health issues, delves into the origins of some of the deadliest pathogens the world has ever seen. Tracing their evolution from the past until today, Dr Greger spotlights emerging flu and coronaviruses as he examines where these pathogens originated, as well as the underlying conditions and significant human role that have exacerbated their lethal influence to large, and even global, levels.

Governance and Public Sector Reform in Asia Anthony Cheung, Ian Scott, 2003-08-29 Based on new field research, this book assesses the current state of governance and public sector reforms in eleven Asian countries and jurisdictions, especially in the wake of the recent regional financial crisis that seriously affected some of them. It analyses reform efforts comparatively against a backdrop of governance problems, and seeks to establish whether these efforts represent a substantive shift in attitudes towards reform or whether they serve simply to reinforce existing practices. The authors explore a number of important themes that are central to governance and public sector reform issues. These include the role of the state, the success or failure of organizational reforms, corruption, the applicability of the new public management model in the Asian context, and the governance values and reform models promoted by regional and international agencies.

Motorized Obsessions Paul R. Josephson, 2007-09-02 2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
