**The Intellectual Property and Food Project** Charles Lawson, Jay Sanderson, 2016-03-03 The relationship between intellectual property and food affects the production and availability of food by regulating dealings in products, processes, innovations, information and data. With increasingly intricate relations between international and domestic law, as well as practices and conventions, intellectual property and food interact in many different ways. This volume is a timely consideration and assessment of some of the more contentious and complex issues found in this relationship, such as genetic technology, public research and food security, socio-economic factors and the root cause of poverty and patent-busting. The contributions are from leading scholars in this emerging field and each chapter foregrounds some of the key developments in the area, exploring historical, doctrinal and theoretical issues in the field while at the same time developing new ideas and perspectives around intellectual property and food. The collection will be a useful resource in leading further discussion and debate about intellectual property law and food.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
