Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New

Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Urban Transport in the Developing World Harry T.

Dimitriou,Ralph Gakenheimer,2011-01-01 Policy-making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation, alongside growing commitments to sustainability. These challenges include: coping with financial deficits, providing for the poor, dealing meaningfully with global warming and energy shortages, addressing traffic congestion and related land use issues, adopting green technologies and adjusting equitably to the impacts of globalisation. This book presents a

contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most
significant military books of the twentieth century. By an
outstanding soldier of independent mind, it pushed forward the
evolution of land warfare and was directly responsible for German
armoured supremacy in the early years of the Second World War.
Published in 1937, the result of 15 years of careful study since his
days on the German General Staff in the First World War,
Guderian's book argued, quite clearly, how vital the proper use of
tanks and supporting armoured vehicles would be in the conduct of
a future war. When that war came, just two years later, he proved
it, leading his Panzers with distinction in the Polish, French and
Russian campaigns. Panzer warfare had come of age, exactly as
he had forecast. This first English translation of Heinz Guderian's
classic book - used as a textbook by Panzer officers in the war -
has an introduction and extensive background notes by the modern
English historian Paul Harris.

Made in the Twentieth Century Larry R. Paul, 2005 Areas including the US mail, production and packaging, brand names and characters, radio and television, and expositions and the Olympics. A final chapter covers how collectors can develop their own dating system. Paul is a longtime collector and display designer based in Baltimore. Extremely Entertaining Short Stories Stacy

AUMONIER, 2012-09-30 Short Stories of World War 1 and the 1920s, some funny, some poignant, by the author whom John Galsworthy rated "one of the best short-story writers of all time";.

Technological Revolutions and Financial Capital C.

Greater Fool Garth Turner, 2008 A young couple in Toronto starts house-hunting with a \$450,000 budget and ends up with a \$700,000 home, after losing fifteen bidding wars. In Vancouver the

average bungalow soars past \$900,000. In Saskatoon, house values rock higher 56 per cent in one year. At the same time, real estate values in the US plunge for the first time since the Great Depression. Millions of families are forced out of their homes. Canadians are told it can't happen here, while first-time buyers outside Toronto sign up for monster houses with virtually no down payment and 40-year mortgages for 98 per cent of the cost. When the average family can no longer afford the average home, how can so many people be deluded into believing a boom will last forever when none has before? How could we have put so much money into something we might never be able to sell, except to a greater fool? Truth is, homeowners and homebuyers have been seduced by a cabal made up of real estate marketers, builders, lenders and bankers, along with a pliant media, to buy, buy, buy. Canada has its own, hidden debt crisis just as dire as the subprime mortgage fiasco, and the same self-dealing industry tactics have led us to put more than 80 per cent of our net worth into a single asset, ignoring the obvious threats and repeating the disastrous mistakes of others. Are we next? Yes.

Filipinos in Canada Roland Sintos Coloma, Bonnie McElhinny, Ethel Tungohan, John Paul Catungal, Lisa M.

Davidson,2012-09-11 The Philippines became Canada's largest source of short- and long-term migrants in 2010, surpassing China and India, both of which are more than ten times larger. The fourth-largest racialized minority group in the country, the Filipino community is frequently understood by such figures as the victimized nanny, the selfless nurse, and the gangster youth. On one hand, these narratives concentrate attention, in narrow and stereotypical ways, on critical issues. On the other, they render other problems facing Filipino communities invisible. This landmark book, the first wide-ranging edited collection on Filipinos in Canada, explores gender, migration and labour, youth spaces and subjectivities, representation and community resistance to certain representations. Looking at these from the vantage points of anthropology, cultural studies, education, geography, history, information science, literature, political science, sociology, and women and gender studies, *Filipinos in Canada* provides a strong foundation for future work in this area.

Teaching of Intellectual Property Yo Takagi,Larry Allman,Mpazi

A. Sinjela,2008-04-17 Intellectual property (IP) comprises not only the valuable economic assets of private firms, but also the social and cultural assets of society. The potential impact of intellectual

property assets is so great that it is likely to have a considerable effect on national and international economic development in the future. Despite this, the area of IP education is relatively new to many academic institutions, and principles and methods in teaching IP are still evolving. Against this backdrop, in this book a number of internationally renowned professors and practitioners share their teaching techniques in their particular fields of expertise, including what they consider should be taught in terms of coursework. The result is a valuable handbook for teachers and those wishing to get up to speed on international IP issues.
