*Media and Urban Space* Frank Eckardt, 2008-01-01 Content:

New information and communication techniques have significant influences on urban life. In this book, international and interdisciplinary research, projects and considerations about the emerging 'Mediacity' are presented. Contributions from scientists, artists, and architects from 14 different countries are analyzing, researching and creatively approaching the cultural, social, political, and economical phenomena of the encounter between media and urban space. The Editor: Frank Eckardt is professor for 'Sociology of Globalization' at the Bauhaus University in Weimar, Germany. He holds a PhD in Political Science. His main field of research is urban studies. Since 2004, he is the coordinator of the research project 'Mediacity'.

*Ukraine's Search for Justice in the Shadow of the Donbas*

*Conflict* Igor Lyubashenko, 2020 The book presents the case study of evolution of transitional justice policies designed by Ukraine in the context of the Donbas conflict. It offers a theoretical introduction, discusses the specific context of relevant decisions, and analyses the policies aimed at achieving three normative goals: truth-seeking, retribution, and restoration.

## Post-Communist Nostalgia Maria Todorova, Zsuzsa Gille, 2012

Although the end of the Cold War was greeted with great enthusiasm by people in the East and the West, the ensuing social and especially economic changes did not always result in the hoped-for improvements in people's lives. This led to widespread disillusionment that can be observed today all across Eastern Europe. Not simply a longing for security, stability, and prosperity, this nostalgia is also a sense of loss regarding a specific form of sociability. Even some of those who opposed communism express a desire to invest their new lives with renewed meaning and dignity. Among the younger generation, it surfaces as a tentative yet growing curiosity about the recent past. In this volume scholars from multiple disciplines explore the various fascinating aspects of this nostalgic turn by analyzing the impact of generational clusters, the rural-urban divide, gender differences, and political orientation. They argue persuasively that this nostalgia should not be seen as a wish to restore the past, as it has otherwise been understood, but instead it should be recognized as part of a more complex healing process and an attempt to come to terms both with the communist era as well as the new inequalities of the post-communist era.

## **Post-Socialist Urban Infrastructures (OPEN ACCESS) Tauri**

Tuvikene,Wladimir Sgibnev,Carola S. Neugebauer,2023-01-09

Post-Socialist Urban Infrastructures critically elaborates on often forgotten, but some of the most essential, aspects of contemporary urban life, namely infrastructures, and links them to a discussion of post-socialist transformation. As the skeletons of cities, infrastructures capture the ways in which urban environments are assembled and urban lives unfold. Focusing on post-socialist cities, marked by neoliberalisation, polarisation and hybridity, this book offers new and enriching perspectives on urban infrastructures by centering on the often marginalised aspects of urban research--transport, green spaces, and water and heating provision. Featuring cases from West and East alike, the book covers examples from Azerbaijan, Bulgaria, Serbia, Croatia, Germany, Russia, Georgia, Lithuania, Poland, the Czech Republic, Tajikistan, and India. It provides original insights into the infrastructural back end of post-socialist cities for scholars, planners and activists interested in urban geography, cultural and social anthropology, and urban studies.

**Labour After Communism** David Mandel, 2004 The collapse of the Soviet Union led to a period of steep economic decline, followed by economic reform, soaring inflation, corruption and crime. Despite the fact that unions were part of the State and that membership was obligatory, incorporating 98 percent of the labor force, millions of workers were not paid their wages. Based upon an abundance of first-hand material, *Labour After Soviet Socialism* examines the complex interplay of history, ideology, leadership, state policy and economics, to explain the difficulty workers have encountered in defending their interests. David Mandel, labor scholar and activist, teaches political science at the University of Quebec, Montreal. He is co-founder of the School for Worker Democracy, which conducts rank-and-file labor education in Russia, Ukraine and Belarus.

*The U.S.S.R.* Sergeĭ Petrovich Tiĭuĭrin, 1948

**Cultural Heritage and Natural Disasters** Ionut Cristi Nicu, Alin Miĥu-Pintilie, Erich Nau, 2021-09-01 This book brings together a total of six papers in an interdisciplinary way at the border of natural disasters and cultural heritage. There is a need for studying and documenting cultural heritage in Arctic landscapes, as these

are the most affected by climate change. Remote sensing represents a powerful tool in the monitoring, management and safeguarding of cultural heritage. Sites included in the UNESCO World Heritage List should receive more attention from both geoscientists and social scientists. Urbanization has a short- and long-lasting effect on the conservation of cultural heritage.

**Consuming Russia** Adele Marie Barker, 1999 A timely study of the new Russia at the end of the twentieth century.

**Theory from the South** Jean Comaroff, John L.

Comaroff, 2015-11-17 As nation-states in the Northern Hemisphere experience economic crisis, political corruption and racial tension, it seems as though they might be 'evolving' into the kind of societies normally associated with the 'Global South'. Anthropologists Jean and John Comaroff draw on their long experience of living in Africa to address a range of familiar themes - democracy, national borders, labour and capital and multiculturalism. They consider how we might understand these issues by using theory developed in the Global South. Challenging our ideas about 'developed' and 'developing' nations, Theory from the South provides new insights into key problems of our time.

The Urban Mosaic of Post-Socialist Europe Sasha

Tsenkova, Zorica Nedovic-Budic, 2006-12-02 This book explores urban dynamics in Europe fifteen years after the fall of communism. The 'urban mosaic' of the title expresses the complexity and diversity of the processes and spatial outcomes in post-socialist cities. Emerging urban phenomena are illustrated with

case studies, focusing on historical themes, cultural issues and the socialist legacy. Among the cities analyzed are Kazan, St. Petersburg, Moscow, Warsaw, Prague, Komarno, Budapest, Belgrade, Bucharest, Sofia and Tirana.

**Iron Curtains** Sonia A. Hirt, 2012-04-23 *Iron Curtains* has been awarded Honorable Mention for the 2013 ASEEES Harvard Davis Center Book Prize! The prize is sponsored by Harvard University's Davis Center for Russian and Eurasian Studies and is awarded annually by the Association for Slavic, East European, and Eurasian Studies, for an outstanding monograph published on Russia, Eurasia, or Eastern Europe in anthropology, political science, sociology, or geography. Utilizing research conducted primarily with residents of Sofia, Bulgaria, *Iron Curtains: Gates, Suburbs, and Privatization of Space in the Post-socialist City* explores the human dimension of new city-building that has emerged in East Europe. Features original data, illustrations, and theory on the process of privatization of resources in societies undergoing fundamental socio-economic transformations, such as those in Eastern Europe Represents the sole in-depth monograph on contemporary urbanism in Southeast Europe Makes a broader statement on issues of urbanism in Europe and other parts of the

world while highlighting the complex connections between cultures and cities

The Death and Life of American Journalism Robert W.

McChesney, John Nichols, 2011-07-12 Daily newspapers are closing across America. Washington bureaus are shuttering; whole areas of the federal government are now operating with no press coverage. International bureaus are going, going, gone. Journalism, the counterbalance to corporate and political power, the lifeblood of American democracy, is not just threatened. It is in meltdown. In *The Death and Life of American Journalism*, Robert W.

McChesney, an academic, and John Nichols, a journalist, who together founded the nation's leading media reform network, Free Press, investigate the crisis. They propose a bold strategy for saving journalism and saving democracy, one that looks back to how the Founding Fathers ensured free press protection with the First Amendment and provided subsidies to the burgeoning print press of the young nation.

**Necessary Evils** Mark Freeman, 2009-11-30 Captain America, the famous Marvel comic hero, is thawed out of the ice during WWII in order to combat Hitler's super agent, Red Skull.

**Ruling Russia** William Zimmerman, 2016-03-22 The first book to

trace the evolution of Russian politics from the Bolsheviks to Putin. When the Soviet Union collapsed, many hoped that Russia's centuries-long history of autocratic rule might finally end. Yet today's Russia appears to be retreating from democracy, not progressing toward it. *Ruling Russia* is the only book of its kind to trace the history of modern Russian politics from the Bolshevik Revolution to the presidency of Vladimir Putin. It examines the complex evolution of communist and post-Soviet leadership in light of the latest research in political science, explaining why the democratization of Russia has all but failed. William Zimmerman argues that in the 1930s the USSR was totalitarian but gradually evolved into a normal authoritarian system, while the post-Soviet Russian Federation evolved from a competitive authoritarian to a normal authoritarian system in the first decade of the twenty-first century. He traces how the selectorate—those empowered to choose the decision makers—has changed across different regimes since the end of tsarist rule. The selectorate was limited in the period after the revolution, and contracted still further during Joseph Stalin's dictatorship, only to expand somewhat after his death. Zimmerman also assesses Russia's political prospects in future elections. He predicts that while a return to totalitarianism in

the coming decade is unlikely, so too is democracy. Rich in historical detail, *Ruling Russia* is the first book to cover the entire period of the regime changes from the Bolsheviks to Putin, and is essential reading for anyone seeking to understand why Russia still struggles to implement lasting democratic reforms.

The Story So Far Bill Grueskin, Ava Seave, Lucas Graves, 2011-06-01 Bill Grueskin, Ava Seave, and Lucas Graves spent close to a year tracking the reporting of on-site news organizations some of which were founded over a century ago and others established only in the past year or two and found in their traffic and audience engagement patterns, allocation of resources, and revenue streams ways to increase the profits of digital journalism. In chapters covering a range of concerns, from advertising models and alternative platforms to the success of paywalls, the benefits and drawbacks to aggregation, and the character of emerging news platforms, this volume identifies which digital media strategies make money, which do not, and which new approaches look promising. The most comprehensive analysis to date of digital journalism's financial outlook, this text confronts business challenges both old and new, large and small, suggesting news organizations embrace the unique opportunities of the

internet rather than adapt web offerings to legacy business models. The authors ultimately argue that news organizations and their audiences must learn to accept digital platforms and their constant transformation, which demand faster and more consistent innovation and investment.
