The Answer Key is intended to assist teachers and to augment students' understanding by suggesting a variety of possible answers. Perfect for teachers engaged in long-distance or web-based learning, and for those who are schooling children at home.

Grand Isle on the Gulf Sally Kittredge Evans Reeves, Frederick J. Stielow, Betsy Swanson, 1979

Command in War Martin Van Creveld, 1985 Many books have been written about strategy, tactics, and great commanders. This is the first book to deal exclusively with the nature of command itself, and to trace its development over two thousand years from ancient Greece to Vietnam. It treats historically the whole variety of problems involved in commanding armies, including staff organization and administration, communications methods and technologies, weaponry, and logistics. And it analyzes the relationship between these problems and military strategy. In vivid descriptions of key battles and campaigns—among others, Napoleon at Jena, Moltke's Königgrätz campaign, the Arab-Israeli war of 1973, and the Americans in Vietnam—Martin van Creveld focuses on the means of command and shows how those means worked in practice. He finds that technological advances such as the railroad, breech-loading rifles, the telegraph and later the radio, tanks, and helicopters all brought commanders not only new tactical possibilities but also new limitations. Although vast changes have occurred in military thinking and technology, the one constant has been an endless search for certainty—certainty about the state and intentions of the enemy's forces; certainty about the manifold factors that together constitute the environment in which war is fought, from the weather and terrain to radioactivity and the presence of chemical warfare agents; and certainty about the state, intentions, and activities of one's own forces. The book concludes that progress in command has usually been achieved less by employing more advanced technologies than by finding ways to transcend the limitations of existing ones.

Online Collaborative Learning Tim S. Roberts, 2004-01-01 Online Collaborative Learning: Theory and Practice provides a resource for researchers and practitioners in the area of online collaborative learning (also known as CSCL, computer-supported collaborative learning), particularly those working within a tertiary education environment. It includes articles of relevance to those interested in both theory and practice in this area. It attempts to answer such important current questions as: how can groups with shared goals work collaboratively using the new technologies? What problems can be expected, and what are the benefits? In what ways does online group work differ from face-to-face group work? And what implications are there for both educators and students seeking to work in this area?

Alienation or Integration of Arab Youth Roel Meijer, 2014-06-03 An anthology of contributions from eleven renowned specialists in the field who deal with topics that effect Arab youth in the Middle East the most, such as demographic growth, rising unemployment, and the difficult prospects of their future. Apart from studies on violence and youth in the Algerian civil war, the book offers new insights into generational conflicts and attempts by contemporary youth to overcome their alienation by creating their own eclectic cultural solutions to the problems of tradition and modernity. The book is based on the latest research and opinion surveys held in different Arab countries.

Ethnoburb Wei Li, 2008-12-09 Winner of the 2009 Book Award in Social Sciences, Association for Asian American Studies This innovative work provides a new model for the analysis of ethnic and racial settlement patterns in the United States and Canada. Ethnoburbs—suburban ethnic clusters of residential areas and business districts in large metropolitan areas—are multiracial, multiethnic, multicultural, multilingual, and often multinational communities in which one ethnic minority group has a significant concentration but does not necessarily constitute a majority. Wei Li documents the processes that have evolved with the spatial transformation of the Chinese American community of Los Angeles and that have converted the San Gabriel Valley into ethnoburbs in the latter half of the twentieth century, and she examines the opportunities and challenges that occurred as a result of these changes. Traditional ethnic and immigrant settlements customarily take the form of either ghettos or enclaves. Thus the majority of scholarly publications and mass media covering the San Gabriel Valley has described it as a Chinatown located in Los Angeles' suburbs. Li offers a completely different approach to understanding and analyzing this fascinating place. By conducting interviews with residents, a comparative spatial examination of census data and other statistical sources, and fieldwork—coupled with her own holistic view of the area—Li gives readers an effective and fine-tuned socio-spatial analysis of the evolution of a new type of racially defined place. The San Gabriel Valley tells a unique story, but its evolution also speaks to those experiencing a similar type of ethnic and racial conurbation. In sum, Li sheds light on processes that are shaping other present (and future) ethnically and racially diverse communities. The concept of the ethnoburb has redefined the way geographers and other scholars think about ethnic space, place, and process. This book will contribute significantly to both theoretical and empirical studies of immigration by presenting a more intensive and thorough take on arguments about spatial and social processes in urban and suburban America.

A History of the University of Alberta, 1908-1969 Walter H. Johns, 1981

Youth and Youth Culture in the Contemporary Middle East Jorgen Baek Simonsen, 2005-03-01 As the analytical concept of youth gained importance, and was generally accepted as a period with its own cultural values and norms, social scientists began to analyze how social change was linked to youth. In the Middle East, a new concept of youth already began to find its way into the region in the late 19th century, and played a role in the anti-colonialist struggle. The same concept still plays a leading role today in the way young people act in relation to traditional values, political systems, and the West. In the Arab world in general, some 50% of the total population is 18 years of age or below, which means that youth as a social group is of growing importance in the area. This also means that for decades to come Middle Eastern governments will be challenged as their young citizens demand work, a place to live, and access to enjoyable and challenging activities for the ever-expanding leisure time embedded in a modern way of life. Drawing on extensive research, which covers a wide geographical area, this volume includes, among others, articles on: Youth, History and Change in the Modern Arab World; The Discovery of Adolescence in the Middle East; Discovering the Other: Arab/Jewish Youth Encounters in Arab Films; Youth, Moral and Islamism: Spending Leisure Time with Hamas in Palestine; The Construction of Youth in Public Discourse in Turkey: A Generational Approach;

and, Youth Culture and Official State Discourse in Iran. Youth and Youth Cultures in the Contemporary Middle East is a comprehensive work which describes and analyzes the forms of youth culture presently being exposed throughout the contemporary Middle East. It will appeal not only to scholars, but also to those with a general interest in Middle Eastern culture.
