**Handbook of Research on Promoting Logistics and Supply Chain Resilience Through Digital Transformation** Masudin, Ilyas, Almunawar, Mohammad Nabil, Restuputri, Dian Palupi, Sud-On, Ploy, 2022-11-25 Adoption of new technologies in logistics and supply chain processes is crucial for the continued effectiveness of supply chains. Technology has the potential to address the issue of logistics and supply chain visibility throughout the supply chain, from raw materials through manufacturers and end users. When properly implemented, improved forecasting of inventory levels, employee productivity, adequate accountability, and higher warehouse savings are all possible. Additionally, businesses must upskill their supply chain workers and recruit and manage digital talent in cross-functional teams. The Handbook of Research on Promoting Logistics and Supply Chain Resilience Through Digital Transformation discusses the ways in which global logistics and supply chains have been severely disrupted by digital technology transformation. The book helps policymakers in designing a resilient framework that can absorb external shocks like the COVID-19 pandemic and also enhances the performance and operational capability of the logistics and supply chain network. Covering topics such as oil and gas maintenance support, stakeholder management, and business optimization strategy, this major reference work is essential for logistics professionals, business leaders and executives, IT managers, government officials, manufacturers, students and faculty of higher education, librarians, researchers, and academicians.

**America in the Round** Donatella Galella, 2019-03-15 Washington D.C.'s Arena Stage was the first professional regional theatre in the nation's capital to welcome a racially integrated audience; the first to perform behind the Iron Curtain; and the first to win the Tony Award for best regional theatre. This behind-the-scenes look at one of the leading theatres in the United States shows how key financial and artistic decisions were made, using a range of archival materials such as letters and photographs as well as interviews with artists and administrators. Close-ups of major productions from *The Great White Hope* to *Oklahoma!* illustrate how Arena Stage navigated cultural trends. More than a chronicle, *America in the Round* is a critical history that reveals how far the theatre could go with its budget and racially liberal politics, and how Arena both disputed and duplicated systems of power. With an innovative "in the round" approach, the narrative simulates sitting in different parts of the arena space to see the theatre through different lenses—economics, racial dynamics, and American identity.

*Inappropriate Bodies Art, Design and Maternity* Buller Rachel Epp, 2019-09-01 This edited collection examines conflicting assumptions, expectations, and perceptions of maternity in artistic, cultural, and institutional contexts. Over the past two decades, the maternal body has gained currency in popular culture and the contemporary art world, with many books and exhibitions foregrounding artists' experiences and art historical explorations of maternity that previously were marginalized or dismissed. In too many instances, however, the maternal potential of female bodies—whether realized or not—still causes them to be stigmatized, censored, or otherwise treated as inappropriate: cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations, and another set of prejudices against those whose do not. Support for mothers in the paid workforce remains woefully inadequate, yet in many cultural contexts, social norms continue to ask what is "wrong" with women who do not have children. In these essays and conversations, artists and writers discuss how maternal expectations shape both creative work and designed environments, and highlight alternative ways of existing in relation to those expectations.

**Psychology and Philosophy of Abstract Art** Paul M.W. Hackett, 2016-05-25 This book examines how we perceive and understand abstract art in contrast to artworks that represent reality. Philosophical, psychological and neuroscience research, including the work of philosopher Paul Crowther, are considered and out of these approaches a complex model is developed to account for this experience. The understanding embodied in this model is rooted in facet theory, mapping sentences and partially ordered analyses, which together provide a comprehensive understanding of the perceptual experience of abstract art.

*Belief, Agency, and Knowledge* Matthew Chrisman, 2022-06-16 Epistemology is not just about the nature of knowledge or the analysis of concepts such as 'knows' and 'justified'. It is also about what we ought to believe and how we ought to investigate and reason about what is the case. This is a study focused on these normative aspects of epistemology. More specifically, it is concerned with the nature of epistemic norms and their relation both to the value of knowledge and to the structure of cognitive agency. The first part develops a theory of doxastic agency according to which believers exercise agency in the ongoing activity of maintaining systems

of belief. The second part defends an account of the grip epistemic norms have on us and the nature of our epistemic values. These are explained in terms of the way that a state, such as a person's belief, can be subject to robust social norms and be valued for its stability not only individually, but, crucially, within epistemic communities. The third part proposes some foundations for a meta-epistemological theory of epistemic discourse that takes seriously the idea that knowledge attributions are partly normative, and hence should be partly classified on the 'ought' side of the division between claims about what reality is like, and claims about what people ought to do, think, and feel.

Michel Foucault's Understandings of Power and the Political Crises in Egypt in the Yacoubian Building and Cairo My City, Our Revolution Ali B. Mohammed, 2020-02-29 What happens when the largest majority of the population blindly follow the interests of the tiny minority and lead a so called revolution against their current regime? What happens to a country, where all its sanctity and sacredness are destroyed by the hands of its own children? If Orwell's Mr. Jones is removed from the authority, the emerge of the pigs is an inevitable likelihood. This book compares the pre and after revolution state, of countries where uprisings emerged and reaches the vehement conclusion about the pros and cons of these rebellions in the shadow of Michel Foucault's understandings of power and his ideas of governmentality.

Shakespeare on Salvation David Anonby, 2024-03-13 This cutting-edge book explores Shakespeare's negotiation of Reformation controversy about theories of salvation. While twentieth century literary criticism tended to regard Shakespeare as a harbinger of secularism, the so-called "turn to religion" in early modern studies has given renewed attention to the religious elements in Shakespeare and his contemporaries. Nevertheless, there remains an aura of uncertainty regarding some of the doctrinal and liturgical specificities of the period. This historical gap is especially felt with respect to theories of salvation, or soteriology. Such ambiguity, however, calls for further inquiry into historical theology. The author explores how the language and concepts of faith, grace, charity, the sacraments, election, free will, justification, sanctification, and atonement find expression in Shakespeare's plays. In doing so, this book contributes to the recovery of a greater understanding of the relationship between early modern religion and Shakespearean drama. While the author shares David Scott Kastan's reluctance to attribute particular religious convictions to Shakespeare, in some cases such critical guardedness has diverted attention from the religious topography of Shakespeare's plays. Throughout this study, the author's hermeneutic is to read Shakespeare through the lens of early modern theological controversy and to read early modern theology through the lens of Shakespeare.

Interdisciplinary Foundations for the Science of Emotion Cecilea Mun, 2021-06-22 In this book, Cecilea Mun introduces an innovative meta-framework for conducting interdisciplinary research in the science of emotion, broadly construed, as well as a framework for a particular kind of theory of emotion. She provides new solutions and arguments in support of an embodied cognitive approach to resolving a wide range of problems, including those concerning skepticism, the place of ordinary intuitions for the science of emotion, intentionality, the rationality of emotions, naturalizing knowledge, and the debate between philosophical cognitive and noncognitive theories of emotion. Her solutions include a revolutionary, unifying, interdisciplinary taxonomy of theories of emotion, which allows one to understand the discourse in the science of emotion as a debate between four fundamental types of theories: realism, instrumentalism, eliminativism, and eliminative-realism. Her original proposal for a conception of intentionality that makes sense of our ordinary intuitions is also combined with her comprehensive account of rationality to articulate a groundbreaking understanding of the structure of human rationality. All of the contributions made herein, together, provide the foundations for a profound understanding of emotions, including as a kind of embodied language.

**Government Responsiveness in Race-Related Crisis Events** Vickie T Carnegie, 2023-01-15 Government Responsiveness in Race-Related Crisis Events explores the distinctive nature of public official decision-making in racially sensitive crisis events using grounded theory and applying a critical race lens to decisions made in the aftermath of the 2015 Charleston Church Shooting.

Perspectives on Taste Jeremy Wyatt, Julia Zakkou, Dan Zeman, 2022-04-27 This book offers a sustained, interdisciplinary examination of taste. It addresses a range of topics that have been at the heart of lively debates in philosophy of language, linguistics, metaphysics, aesthetics, and experimental philosophy. Our everyday lives are suffused with discussions about taste. We are quick to offer familiar platitudes about taste, but we struggle when facing the questions that matter—what taste is, how it is related to subjectivity, what distinguishes good from bad taste, why it is valuable to make and evaluate judgments about matters of taste, and what, exactly, we mean in speaking about these matters. The essays in this volume open up new, intersecting lines of research about these questions that cross traditional disciplinary boundaries. They address the notion of aesthetic taste; connections between taste and the natures of truth, disagreement, assertion, belief, retraction, linguistic context-sensitivity, and the semantics/pragmatics interface; experimental inquiry about taste; and metaphysical questions underlying ongoing discussions about taste. Perspectives on Taste will be of interest to researchers and advanced students working in aesthetics, philosophy of language, linguistics, metaphysics, and experimental philosophy.

**Curating and Re-Curating the American Wars in Vietnam and Iraq** Christine Sylvester,2019-03-04 We have long saved--and curated--objects from wars to commemorate the war experience. These objects appear at national museums and memorials and are often mentioned in war novels and memoirs. Through them we institutionalize narratives and memories of national identity, as well as international power and purpose. While people interpret war in different ways, and there is no ultimate authority on the experiences of any war, curators of war objects make different choices about what to display or write about, none of which are entirely problematic, good, or accurate. This book asks whose vantage points on war are made available, and where, for public consumption; it also questions whose war experiences are not represented, are minimized, or ignored in ways that advantage contemporary militarism. Christine Sylvester looks at four sites of war memory--the National Museum of American History, the Vietnam Veterans Memorial, Arlington National Cemetery, and selected novels and memoirs of the American wars in Vietnam and Iraq--to consider the way war knowledge is embedded in differing sites of memory and display. While the museum shows war aircraft and a laptop computer used by a journalist covering the American war in Iraq, visitors to the Vietnam Memorial or Arlington Cemetery find more prosaic and civilian items on view, such as baby pictures, slices of birthday cake, or even car keys. In addition, memoirs and novels of these wars tend to curate ghastly horrors of wars as experienced by soldiers or civilians. For Sylvester, these sites of war memory and curation provide ways to understand dispersed war authority and interpretation and to consider which sites invite viewers to revere a war and which reflect personal experiences that show the undersides of these wars. Sylvester shows that scholars, policymakers, and other citizens need to consider different types of situated memory and knowledge in order to fully grasp war, rather than idealize it.
